PENSION PLAN FOR HOURLY EMPLOYEES
NOTES TO FINANCIAL STATEMENTS
December 31, 2011 and 2010

NOTE A - DESCRIPTION OF PLAN

The following brief description of the Fulton Industries, Inc. - U.A.W. Local No. 2351 Pension Plan for Hourly Employees (Plan) is provided for general information purposes only. Participants should refer to the Plan agreement for more complete information.

General - The Plan is a defined benefit pension plan established for the principal purpose of providing a supplemental income upon retirement to all eligible employees of Fulton Industries, Inc. (Company), represented by Local No. 2351 of the United Auto Workers. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Pension Benefits - Participants are entitled to a monthly pension benefit beginning at normal retirement age (65) equal to the product of the participant's years of credited service times the established benefit multiplier at the retirement date. Maximum credited service on which monthly benefits are calculated is 35 years for retirements prior to June 30, 1993.

Effective July 1, 1999, the Plan was amended to increase future annual pension benefits. For those employees who retire on or after July 1, 1999, the Plan will pay a retirement benefit of \$14.50 per month for each year of credited service. In addition, employees who retire subsequent to July 1, 1996, will receive \$.25 for each year of service subsequent to July 1, 1996; employees who retire subsequent to July 1, 1997, will receive \$.25 for each year of service subsequent to July 1, 1997; employees who retire subsequent to July 1, 1998, will receive \$.25 for each year of service subsequent to July 1, 1998.

The Plan provides for a reduced benefit at early retirement (age 55 with at least 10 years of vesting service). Accrued benefits become vested upon completion of ten years of credited service and are payable beginning at normal retirement age or upon early retirement. Participants may elect to receive their pension benefits in the form of a monthly annuity payable for life or various forms of joint and survivor annuities.

Death Benefits - If a participant who has elected a survivor annuity dies prior to his normal retirement date, his spouse receives a monthly income equal to the survivor portion of the form of joint and survivor annuity elected. A participant who dies subsequent to his early retirement date while still in the service of the Company and who was not afforded the opportunity to elect a survivor annuity is deemed to have elected a survivor annuity.

Disability Benefits - A participant who has accumulated ten years of credited service and becomes disabled is entitled to a monthly pension benefit calculated as if the participant had retired at a normal retirement age as of the date of disability.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following are the significant accounting policies followed by the Plan:

Valuation of Investments - Debt securities traded on national securities exchanges are valued at the last reported sale price on the last business day of the year. Shares of registered investment companies are valued at quoted market prices which represent the net asset value of shares held by the Plan at year-end.

Investment Income - Income from investments is recorded as earned on the accrual basis. Realized gains and losses on sales of securities are based on the actual cost of the securities.

Actuarial Present Value of Accumulated Plan Benefits - Accumulated plan benefits are those future periodic payments which are attributable under the Plan's provisions to the services employees have rendered to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died and (c) present employees or their beneficiaries. Benefits payable under all circumstances, retirement, death, disability and termination of employment, are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the actuarial firm of Al Minor & Associates, Inc., and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations as of December 31, 2011 and 2010, were (a) life expectancy of participants (the 1971 Group Annuity Mortality Table set back 3 years was used), (b) retirement age assumption (the assumed retirement age was 65 for 2011 and 2010) and (c) investment return. The 2011 and 2010 valuations included an assumed average rate of return of 7.0% for both years. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Income Tax Status - The Internal Revenue Service made a determination on June 12, 1995, that the Plan, as amended, is qualified under Section 401(a) of the Internal Revenue Code and, therefore, the trust is exempt from federal income tax under Section 501(a) of the Code.

Estimates - The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Subsequent events - The plan performed subsequent events procedures through October 5, 2012, the date financial statements were available to be issued. The plan has not evaluated any subsequent events after this date related to these financial statements.

See independent auditor's report.

NOTE C - FUNDING POLICY

The Plan is funded through contributions by the Company. The contributions are generally designed to fund the Plan's current service costs on a current basis and to fund over approximately twenty-five years the unfunded actuarial liability arising from qualifying service prior to establishment of an amendment to the Plan. The Company's contributions for 2011 and 2010 equaled or exceeded the minimum funding requirements of ERISA.

NOTE D - PLAN TERMINATION

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to provisions set forth in ERISA.

In the event the Plan terminates, the net assets of the Plan will be allocated to benefits as described by ERISA and its related regulations, generally to provide benefits in the order

- A. Certain annuity payments that the former employees or their beneficiaries are receiving or that employees eligible for retirement would have been receiving had they retired.
- B. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) up to the applicable limitations as discussed below.
- C. All other vested benefits (vested benefits not insured by the PBGC).
- D. All nonvested benefits.

The PBGC guarantees most, but not all, vested retirement benefits and certain disability and survivors' pensions.

However, there is a statutory ceiling on the amount of an individual's monthly benefits that the PBGC guarantees. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination, whichever comes later. For younger annuitants or for those who elect to receive their benefits in some form other than a single-life annuity, the corresponding ceilings are actuarially

Whether all participants receive their benefits, should the Plan terminate at some future time, will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits and may also depend on the level of benefits guaranteed by the PBGC.

NOTE F - FAIR VALUE MEASUREMENTS

Financial Accounting Standards Board Statement (FASB) ASC 820, Fair Value Measurements and Disclosures, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of fair value hierarchy under FASB ASC 820 are described

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the plan has the ability to access.

Level 2 - Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets
- Quoted prices for identical or similar assets or liabilities in inactive markets
- Inputs other than Quoted prices that are observable for the asset or liability
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2011 and 2010.

Money market funds - Valued at the net asset value ("NAV") of shares held by the plan at year end.

Mutual funds and corporate bonds - valued at the closing price reported on the active market on which the individual securities are traded.

The method described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation method is appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.
