INDEPENDENT AUDITOR'S REPORT

To the Investment Committee
Retirement Pension Plan for
Employees of JPS Industries, Inc.
Greenville, South Carolina

We were engaged to audit the accompanying statements of net assets available for benefits of the Retirement Pension Plan for Employees of JPS Industries, Inc. (the "Plan") as of December 31, 2011 and 2010, and the related statements of changes in net assets available for benefits for the years then ended and the supplemental schedule of Schedule H, Line 4i – Schedule of Assets (Held at End of Year) as of December 31, 2011. These financial statements and supplemental schedule are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the United States Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the investment information summarized in Note 7, which was certified by Bank of New York Mellon, the trustee of the Plan, except for comparing this information with the related information included in the financial statements and supplemental schedule. We have been informed by the Plan administrator that the trustee holds the Plan's assets and executes transactions. The plan administrator has obtained a certification from the custodian as of December 31, 2011 and 2010 and for the year ended December 31, 2011, that the information provided to the plan administrator by the custodian is complete and accurate.

As discussed in Note 2 to the financial statements, the financial statements include the Company's common stock valued at \$20,219,693 and \$23,108,220 at December 31, 2011 and 2010, respectively. The stock value has been estimated by an independent valuation specialist in the absence of a readily ascertainable market value. Because of the inherent subjectivity of any valuation the estimated value may differ significantly from the value that would have been used had a ready market for the stock existed and the difference could be material.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedule taken as a whole. The supplemental schedule is presented for the purposes of additional analysis and is not a required part of the financial statements but is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The form and content of the information included in the financial statements and supplemental schedule, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the United States Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

NOTES TO FINANCIAL STATEMENTS

1. Plan Description

The following description of the Retirement Pension Plan for Employees of JPS Industries, Inc. (the "Plan") provides only general information. Participants should refer to the Plan Document and Summary Plan Description (not included herein) for more complete information regarding the Plan's provisions.

General - The Plan is a non-contributory defined benefit plan for salaried and hourly employees of the Company ("Company" refers to JPS Industries, Inc. and electing subsidiaries) who have attained the age of 21 and completed one year of service. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). The Administrative Committee, as defined in the Plan document, serves as the administrator (the "Plan Administrator") of the Plan. As of March 1, 2005, the Plan was amended to discontinue the addition of new participants to the Plan and to provide that rehired employees cannot accrue additional benefits, even though they may otherwise be a Plan participant. Effective December 31, 2005, no participant accrued additional benefits under the Plan. During 2012, the Company decided to unfreeze the Plan (see note 12).

Pension Benefits - The Plan provides for a monthly normal retirement benefit at the later of the date on which a participant attains age 65 or 5 years of service. The Plan has special provisions for early retirement and death. The monthly retirement benefit formula for salaried employees participating in the Plan is 0.6% of final average pay less than covered compensation (as defined) times credited service divided by 12, plus 1.2% of final average pay greater than covered compensation (as defined) times credited service divided by 12. Also, participants' annual earnings used in calculating benefits are capped at the limits specified by federal law. For hourly employees, the monthly retirement benefit formula is .42% of final average compensation (defined as the highest 5 of the last 10 years worked) times credited service divided by 12. Except for vesting, service or compensation paid after December 31, 2005 is not considered in any benefit determination.

For participants who were participating in the Plan on June 30, 1989, the benefit will never be less than the accrued benefit at that date.

Funding - The Company makes contributions to the Plan, when necessary, to meet minimum funding requirements under applicable laws and regulations. Contributions of \$2,902,560 and \$2,207,176 were made by the required dates for the years ended December 31, 2011 and 2010, respectively. These amounts met or exceeded the minimum funding requirements of ERISA.

2. Summary of Significant Accounting Policies

Basis of Accounting - The accompanying financial statements of the Plan are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Use of Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of net assets available for benefits, the actuarial present value of accumulated plan benefits, disclosure of contingent assets and liabilities at the date of the financial statements, and the changes in net assets available for benefits and changes in the actuarial present value of accumulated plan benefits during the reporting period. Actual results could differ from those estimates.

The Plan relies significantly on the use of estimates in determining the valuation of the Company's common stock. The financial statements include the Company's common stock valued at \$20,219,693 and \$23,108,220 at December 31, 2011 and 2010, respectively. The stock's value has been estimated by an independent valuation specialist in the absence of a readily ascertainable market value. Because of the inherent subjectivity in any valuation, the estimated value may differ significantly from the value that would have been used had a ready market for the securities existed, and the difference could be material.

Recently Issued Accounting Standards – Financial Accounting Standards Board ("FASB") Accounting Standards Update ("ASU") 2010-06, *Improving Disclosures about Fair Value Measurements*, amended Accounting Standards Codification ("ASC") 820, *Fair Value Measurements and Disclosures*, to clarify certain existing fair value disclosures and require a number of additional disclosures. The guidance in ASU 2010-06 clarified that disclosures should be presented separately for each "class" of assets and liabilities measured at fair value and provided guidance on how to determine the appropriate classes of assets and liabilities to be presented. ASU 2010-06 also clarified the requirement for entities to disclose information about both the valuation techniques and inputs used in estimating Level 2 and Level 3 fair value measurements. In addition, ASU 2010-06 introduced new requirements to disclose the amounts (on a gross basis) and reasons for any significant transfers between Levels 1, 2 and 3 of the fair value hierarchy and present information regarding the purchases, sales, issuances and settlements of Level 3 assets and liabilities on a gross basis. With the exception of the requirement to present changes in Level 3 measurements on a gross basis, which is delayed until 2011, the guidance in ASU 2010-06 was effective for reporting periods beginning after December 15, 2009. Since ASU 2010-06 only affects fair value measurement disclosures, adoption of ASU 2010-06 did not have a significant effect on the Plan's net assets available for benefits or its changes in net assets available for benefits.

In May 2011, the FASB issued ASU No. 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*, which amends ASC Section 820. ASU 2011-04 also requires the categorization by level for items that are only required to be disclosed at fair value and information about transfers between Level 1 and Level 2. In addition, the ASU provides guidance on measuring the fair value of financial instruments managed within a portfolio and the application of premiums and discounts on fair value measurements. The ASU requires additional disclosure for Level 3 measurements regarding the sensitivity of fair value to changes in unobservable inputs and any interrelationships between those inputs. The new guidance is effective for reporting periods beginning after December 15, 2011. The adoption is not expected to have a significant effect on the statement of net assets available for benefits and statement of changes in net assets available for benefits.

Investment valuation and income recognition - Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the plan's gains and losses on investments bought and sold as well as held during the year.

Payment of Benefits - Benefit payments to participants are recorded upon distribution.

Plan Expenses - All reasonable expenses incurred in administering the Plan (with the exception of indirect expenses borne by the Company) are paid by the Plan.

Subsequent Events - The Plan has evaluated subsequent events through September 21, 2012, the date the financial statements were available to be issued.

3. Actuarial Present Value of Accumulated Plan Benefits

The accumulated plan benefits are those future periodic payments that are attributable, under the Plan's provisions, to the service employees have rendered. The actuarial present value of accumulated plan benefits is determined by the Plan's actuary, and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment.

The effect of plan amendments on accumulated plan benefits is recognized during the year in which such amendments become effective. The actuarial present value of accumulated plan benefits as of December 31 is as follows:

	<u>12/31/2011</u>	<u>12/31/2010</u>
Vested benefits:		
Active participants	\$ 3,211,277	\$ 2,993,859
Participants currently receiving benefits	74,077,995	73,128,166
Other participants	<u>13,010,747</u>	<u>13,268,626</u>
Total vested benefits	90,300,019	89,420,651
Non-vested benefits	<u>25,072</u>	<u>63,604</u>
Total actuarial present value of accumulated plan benefits	<u>\$ 90,325,091</u>	<u>\$ 89,484,255</u>

Reconciliation of changes in the actuarial present value of accumulated plan benefits is as follows:

	<u>Year Ended 12/31/2011</u>	<u>Year Ended 12/31/2010</u>
Actuarial present value of accumulated plan benefits as of beginning of year	\$ 89,484,255	\$ 91,946,996
Increase due to interest rate	7,188,448	7,393,223
Additional benefits accrued and adjustment based on actual experience	357,240	286,677
Increase due to changes in assumptions	3,318,116	-
Benefit payments	<u>(10,022,968)</u>	<u>(10,142,641)</u>
Actuarial present value of accumulated plan benefits as of end of year	<u>\$ 90,325,091</u>	<u>\$ 89,484,255</u>

Significant actuarial assumptions used or significant changes in the valuation of the actuarial present value of accumulated plan benefits as of December 31, 2011 and 2010 were:

- The Projected Unit Credit actuarial method was used.
- The assumed discount rate in valuing the future liability for plan benefits was 8.50% for both years ended December 31, 2011 and 2010.
- Mortality tables used are in accordance with the RP-2000 Employee Mortality Table with Blue-Collar Adjustment projected to 2020 for active participants and the RP-2000 Health Annuitant Mortality Table with Blue-Collar Adjustment projected to 2020 for retirees, beneficiaries and terminated vested participants.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Fair Value Measurements

FASB ASC 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are described as follows:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access

Level 2: Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets.
- Quoted prices for identical or similar assets or liabilities in inactive markets.
- Inputs other than quoted prices that are observable for the asset or liability.
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used between December 31, 2011 and 2010.

Insurance separate account: Recorded at the fair value of the underlying assets which is equivalent to the contract value.

Common trust funds: Stated at estimated fair values, which have been determined based on the unit values of the funds. Unit values are determined by the bank sponsoring such common trust funds by dividing the fund's net assets at fair value by its units outstanding at each valuation date.

Employer common stock: Estimated by the Plan administrator based on a valuation by an independent valuation specialist. In estimating value, the specialists use inputs from the Company independent sources as well as multiple methodologies. Such inputs include historical and projected income and cash flow, interviews with Company management, independent market analysis and comparative Company analysis. A variety of valuation techniques are also used including public trading analysis, guideline transaction analysis and discounted cash flow analysis.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the plan's investments at fair value as of December 31, 2011 and 2010:

5. Plan Termination

Although it has no intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

In the event that the Plan is terminated, the net assets of the Plan will be allocated for payment of plan benefits to the participants in an order of priority determined in accordance with ERISA, applicable regulations there under, the group annuity contract and the Plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation ("PBGC") if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For plan terminations occurring during either 2011 or 2010, that ceiling was \$4,500. Subsequently, for plan terminations occurring during 2012, the ceiling has been increased to \$4,653 per month. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For older annuitants or for those who elect to receive their benefits in some form less valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted upward. Conversely, for younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all.

6. Income Tax Status

The Plan obtained its latest determination letter dated July 5, 2012, in which the Internal Revenue Service stated that the Plan, as amended effective January 1, 2012, and the related trusts were in compliance with the applicable requirements of the Internal Revenue Code (IRC). The restatement included prior amendments as well as additional required amendments. The required amendment had no impact on Plan operations or accrued benefits. The Company believes that the Plan is currently designed and is operating in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be substantiated upon examination by the applicable federal or state taxing authorities. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2011, there are no uncertain tax positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for the years prior to 2008.

7. Trustee Certifications

The Bank of New York Mellon ("BNYMellon") serves as trustee of the Plan's assets held in a trust account for the Plan (the "Trust") and thus has responsibility for maintaining plan assets and processing plan investment transactions. Except for the estimated fair value of the employer common stock as of December 31, 2011 and 2010 and its related appreciation (depreciation) for the years ended December 31, 2011 and 2010, the investment information in the accompanying financial statements has been derived from information provided by the trustee. The trustee has provided certification that such investment information is complete and accurate, as required under the method of compliance with the Department of Labor Rules and Regulations for Reporting and Disclosure under ERISA elected by the Plan administrator. The investment information supplied by the trustee was not audited by an independent public accountant, as permitted by 29 CFR 2520.103-8 of the Department of Labor Rules and Regulations for Reporting and Disclosure under ERISA.

The following is a summary of the unaudited information regarding the Plan as of December 31, 2011 and 2010, and for the years then ended, included in the Plan's financial statements and supplemental schedule that was prepared by or derived from information prepared by BNYMellon and furnished to the Plan administrator. The Plan administrator has obtained certifications from the trustee that such information is complete and accurate.

Net gain (loss) from investment activity is comprised of the net realized and unrealized gain (loss) from investment activity. Net realized gain (loss) from investment activity is determined based upon the difference between the sales proceeds for investments sold and the fair market value of such investments at the beginning of the plan year, or historical cost if such investments were purchased during the current plan year. Unrealized gain (loss) from investment activity is determined based upon the difference between the fair market value of investments as of the beginning of the plan year, or historical cost for investments purchased during the current plan year and the fair market value of such investments at the end of the plan year. The net gain (loss) earned by each type of investment held by the Plan for the years ended December 31, 2011 and 2010 was as follows:

	Year Ended <u>12/31/2011</u>	Year Ended <u>12/31/2010</u>
Employer common stock, at estimated fair value	\$ (2,888,527)	\$ 1,347,980
Common trust funds	(515,589)	5,786,607
Insurance separate account	<u>2,777,276</u>	<u>1,905,319</u>
	<u>\$ (626,840)</u>	<u>\$ 9,039,906</u>

9. Insurance Separate Account

The Plan holds a deposit administration group annuity contract with an immediate participation guarantee from Transamerica Life Insurance Company ("TFLIC"). The contract covers all active salaried participants' accumulated plan benefits at June 30, 1984. The immediate participation guarantee from TFLIC covers most retired salaried employees as of June 30, 1984; these contracts will collectively be referred to as the "TFLIC Contracts". The TFLIC Contracts unconditionally guarantee benefits to salaried Plan participants earned through June 30, 1984 in the Plan of a predecessor employer. All benefits earned subsequent to June 30, 1984 are covered by the Plan's beneficial interest in the Trust. Accordingly, since the accumulated plan benefits relating to remaining benefits earned through June 30, 1984 are guaranteed by the TFLIC Contracts, the liabilities for such benefits have been effectively satisfied.

The assets deposited under the contracts, which are held by BNYMellon in a separate custodial account, are owned by TFLIC. However, under the contract arrangements with TFLIC and the trustee, investments which relate to the TFLIC Contracts and the related investment earnings (collectively, the "TFLIC Assets") remain in a non-pooled separate custodial account to fund the benefit payments for guaranteed benefits earned as of June 30, 1984. For pension accounting purposes, the assets underlying the TFLIC Contracts are included in the investments of the Trust as insurance company separate accounts.

At such time as the TFLIC Assets might decrease to the level of the trigger point (as defined in the contracts and as computed by TFLIC), which represents the Guaranteed Benefit Obligation ("GBO," which is an amount computed by TFLIC representing the accumulated plan benefits as of June 30, 1984 and is guaranteed by TFLIC plus an Immunization Corridor, as defined in the contracts), TFLIC has the right to transfer the TFLIC Assets from the separate account to TFLIC's general account and cause annuities to be purchased for the individuals covered by these contract arrangements and for whom

benefits have been unconditionally guaranteed by TFLIC. Should the TFLIC Assets be insufficient to purchase such annuities, TFLIC is obligated to fund the deficiency. At the discretion of the trustee, all or a portion of certain funds in excess of the trigger point may be transferred from the separate account to the general assets of the Trust and may be used to satisfy non-TFLIC Contract liabilities.

TFLIC determines on a quarterly basis the GBO and trigger point for the contract. Since the TFLIC Assets were in excess of the trigger point at the quarterly testing date ending on December 31, 2011, assets were not transferred from their separate account to TFLIC's general account and no annuities were purchased for the individuals covered by these contract arrangements.

10. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

The actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

The Company announced on March 16, 2012 that it was exploring strategic alternatives. Such alternatives could include changes in the Plan sponsor and would not impact accrued benefits.

11. Party-In-Interest Transactions

Certain plan investments are shares of the Plan sponsor's common stock. The Plan held 1,925,685 shares of the Plan sponsor's common stock at both December 31, 2011 and 2010, valued at \$20,219,693 and \$23,108,220, respectively. This investment and transactions in this investment qualify as party-in-interest transactions which are exempt from the prohibited transaction rules of ERISA.

Also, certain Plan investments are units or interests in common trust funds managed by BNYMellon, the Trustee of the Plan. In accordance with the provisions of ERISA, transactions involving such investments qualify as party-in-interest transactions. Amounts paid to BNYMellon for investment and administrative fees totaled \$229,374 and \$237,358 for the years ended December 31, 2011 and 2010, respectively.

12. Subsequent Event - Effective May 31, 2012 the Company made a decision to unfreeze the Plan and begin accruing benefits under a new formula for eligible employees on or after June 1, 2012.

Discount rates for funding

Current Year:	Segment Rates with four month lookback:	
	First Segment Rate	3.78%
	Second Segment Rate	6.31%
	Third Segment Rate	6.57%
	Effective Interest Rate	6.14%
 Prior Year:	 Segment Rates with four month lookback:	
	First Segment Rate	5.03%
	Second Segment Rate	6.73%
	Third Segment Rate	6.82%
	Effective Interest Rate	6.59%

Mortality

Mortality tables mandated by PPA as specified in IRS Regulation 1.430(h)(3)-1, applied on a static basis, projected 7 years from the valuation date for annuitants and 15 years for non-annuitants.

Actuarial cost method

The Funding Target is the present value of accrued benefits and based on compensation and service to date. The Target Normal Cost is the present value of benefits expected to be accrued during the current plan year, reflecting the effect of expected compensation increases during the year and including expected plan administrative and investment expenses to be paid from plan assets during the year.

Non-Prescribed Funding Assumptions and Methods

Expenses

Expected plan administrative and investment expenses of \$700,000 were added to the Target Normal Cost.

Frequency of optional payment forms

Benefits are paid assuming that 50% of future retirees will elect the single life annuity form of benefit, 40% will elect the 100% joint & survivor life annuity form of benefit, and 10% will elect the 50% joint & survivor life annuity form of benefit.

Marital percentage

80% of male employees and 50% of female employees are assumed to be married at death. Husbands are assumed to be 3 years older than their wives.

Shortfall Base Amortization Period

Shortfall Amortization Bases for 2008 and 2009 are amortized over 7 years, as required by PPA 2006. For the Shortfall Amortization Bases established in 2010 and 2011, the 2+7 amortization method of PRA 2010 has been elected.

45 – 49	10.0%
50 – 54	5.0%

Asset valuation method

The Actuarial Value of Assets is Market Value as of the valuation date, including discounted receivable contributions, reduced by 2/3 and 1/3 of the of the gain/(loss) in each of the prior 2 years, respectively. The gain/(loss) for each period is determined as the actual return on Market Value during the period less the expected return on Market Value based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third segment rate. The resulting value is constrained to be within a corridor of 90% to 110% of Market Value, including discounted receivable contributions.

The expected return on plan assets is 8.50% per annum, limited by PPA to the applicable Third Segment Rate as follows:

2010 measurement period:	6.82%
2009 measurement period:	6.69%

Normal Retirement

Eligibility

Termination of employment on or after attainment of age 65.

Benefit

Accrued Benefit determined as of the termination date. Payments commence on the first day of the month on or after date of termination.

Early Retirement

Eligibility

Termination of employment on or after attainment of age 55.

Benefit

Accrued benefit determined as of the termination date, payable commencing at the Participant's Normal Retirement Date.

At the option of the Participant, the benefit can become payable earlier on the first day of any month, but is reduced to reflect early commencement. The reduction is one-third of one percent for each of the first 60 months and one-half of one percent for each of the next 60 months that commencement of benefit payments commence precedes the Participant's Normal Retirement Date.

Deferred Vested Retirement

Eligibility

Termination of employment after the completion of five years of vesting service.

Benefit

Accrued benefit determined as of the termination date, commencing at the Participant's Normal Retirement Date.

At the option of the Participant, the benefit can become payable at the participant's Early Retirement Date or the first day of any month thereafter. The amount of the benefit payable before the participant's Normal Retirement Date is the actuarial equivalent of the participant's Normal Retirement Benefit.

Death Benefits

Eligibility

Death after the attainment of age 55 or the age plus service greater than or equal to 70.

Benefit

50% of the participant's accrued benefit, not reduced for early commencement.

SCHEDULE SB, LINE 32 – SCHEDULE OF AMORTIZATION BASES

Shortfall Amortization Summary

Date Established	Type of Base	Initial Amount	Remaining Installments	Shortfall Amortization Installment	Present Value of Remaining Installments as of January 1, 2011
January 1, 2008	Shortfall	\$ 5,596,603	4	\$ 936,073	\$ 3,544,645
January 1, 2009	Shortfall	\$(3,975,960)	5	(705,529)	(3,279,859)
January 1, 2010	Shortfall	\$16,889,436	8	1,113,014	17,273,392
January 1, 2011	Shortfall	\$11,444,383	9	<u>702,685</u>	<u>11,444,383</u>
Total charge				2,046,243	\$ 28,982,561

An election has been made under PRA 2010 to use the alternative 2 plus 7-year amortization period for the bases established in 2010 and 2011. Under 2 plus 7-year amortization, the required installments for the first 2 years of the amortization period equal interest on the base at the plan's effective interest rate for the plan year of the election. The balance is then amortized over the following 7 years in level installments determined using the discount rates for the plan year of the election. There are no installment acceleration amounts.
