INDEPENDENT AUDITORS' REPORT

To the Trustees of and Participants in
ITT Pension Plan for Hourly Employees at
Vertical Pump Division, City of Industry, California:

We have audited the accompanying statements of net assets available for benefits of the ITT Pension Plan for Hourly Employees at Vertical Pump Division, City of Industry, California (the "Plan") as of December 31, 2011 and 2010, and for the years then ended, listed in the table of contents. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2011, and the changes therein for the year then ended and its financial status as of December 31, 2010, and the changes therein for the year then ended in conformity with accounting principles generally accepted in the United States of America.

1. DESCRIPTION OF THE PLAN

The following description of the ITT Pension Plan for Hourly Employees at Vertical Pump Division, City of Industry, California (the "Plan") is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

General — The Plan is a defined benefit pension plan covering employees employed in the Vertical Pump Division, City of Industry, California Plant, sponsored by Goulds Pumps, Inc. (the "Company" or "Plan Sponsor"), a subsidiary of ITT Corporation ("ITT"). The Benefits Administration Committee, as appointed by the board of directors of ITT, controls and manages the operation and administration of the Plan. Northern Trust (the "Trustee") serves as the trustee of the Plan, and together with several investment managers, manages the Plan's investments. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

On October 31, 2011 (the "spin-off date"), ITT Corporation completed a tax-free pro rata distribution of Exelis Inc. and Xylem Inc. In connection with the spin-off, the companies executed a Benefits and Compensation Matters Agreement pursuant to which:

- The Company will continue to sponsor the Plan.
- The Investment Master Trust of ITT Corporation (the "Former Master Trust") was renamed and transferred to Exelis Inc. on the spin-off date and Exelis Inc. assumed all liabilities associated with the Former Master Trust.
- Effective October 31, 2011, ITT Corporation created the Investment Master Trust of ITT Corporation (the "ITT Master Trust"), a new master trust.
- Shortly after the spin-off date, the Plan's interest in the Former Master Trust was liquidated and cash was transferred from the Former Master Trust to the ITT Master Trust.
- At December 31, 2011, there was a receivable due from the Former Master Trust to pay any outstanding bills for the period prior to the spin-off date.

The Plan's assets include an undivided interest in an investment account of the ITT Master Trust, EIN 38-7003271, at December 31, 2011 and for the period from October 31, 2011 through December 31, 2011, and the Former Master Trust as of and for the year ended December 31, 2010, and for the period from January 1, 2011 through October 31, 2011 (collectively the "Master Trusts"). The Master Trusts include the combined assets of the Plan as well as several other employee benefit plans sponsored by ITT and its subsidiaries (collectively, the "Participating Plans"). Use of a master trust permits the commingling of Plan assets with the assets of other Participating Plans for investment and administrative purposes. Although Plan assets are commingled in the Master Trusts, the Trustee maintains supporting records for the purpose of allocating the net income (loss) of the Master Trusts to

the Participating Plans. The net investment (loss) income of the investment account is allocated by the Trustee to each Participating Plan based on the relationship of the interest of each Participating Plan to the total of the interests of the Participating Plans.

Eligibility — All hourly employees represented by the union are eligible to participate upon the completion of one hour of service. Since September 1, 2003, no employee has become eligible to participate.

Pension Benefits — Participants are eligible for monthly benefit payments upon reaching age 62 and having 5 years of service. The normal monthly benefit payments are determined by multiplying the benefit rate, which depends upon the period of credited service, by the total number of years of credited service, not to exceed 35 years. A participant is 100% vested after five years of service. Prior to that time, the participant is not vested.

Participants are eligible to receive early retirement benefits between the ages of 55 and 62 upon the completion of 5 years of continuous service. Early retirement benefits are computed in a manner similar to normal retirement at age 62, except that they are reduced by certain factors, as outlined in the Plan document, for each month that the early retirement date precedes the normal retirement date.

Death and Disability Benefits — A married employee who is a vested participant is automatically covered by the preretirement death benefit option, which will provide a benefit for the surviving spouse upon death prior to retirement, unless coverage is waived. The benefit would be equal to the benefit the spouse would have received had the employee retired on the date of death, computed under the normal form of payment and subject to certain limitations.

An employee who has completed five years of continuous service and who becomes totally and permanently disabled is eligible to receive a disability retirement benefit. The amount of the benefit is computed, as it would be for normal retirement based on the employee's years of credited service as of the date of disability.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting — The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP).

Use of Estimates — The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits and changes therein at the date of the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties — Investment securities, in general, are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Due to the level of risk associated with certain investment securities held by the Plan, it is reasonably possible that values realized at the time of sale could materially differ from amounts reported in the financial statements.

Investment Valuation and Income Recognition — The Plan's interest in the Master Trusts is presented at fair value, which has been determined based on the fair value of the underlying investments of the Master Trusts. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 5 for description of valuation methods. Purchases and sales of securities are recorded on a trade-date basis.

Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Management fees and operating expenses charged to the Plan for the investments in the registered investment companies, common collective trust (CCT) funds, and commingled funds are deducted from income earned on a daily basis and are not separately reflected. Consequently, management fees and operating expenses are reflected as a reduction of investment return for such investments.

Payment of Benefits — Benefit payments to participants are recorded upon distribution.

Administrative Expenses — Administrative expenses of the Plan are paid by the Master Trusts on behalf of the Plan, as provided in the Plan document and the Master Trusts' agreements. The Plan Sponsor provides accounting and other administrative services to the Plan and Master Trusts at no charge.

Recent Accounting Pronouncement — In May 2011, the Financial Accounting Standards Board issued guidance intended to achieve common fair value measurements and related disclosures between U.S. GAAP and international accounting standards. The amendments primarily clarify existing fair value guidance and therefore the amendments are not intended to change the application of existing fair value measurement guidance. However, the amendments include certain instances where a particular principle or requirement for measuring fair value or disclosing information about fair value measurements has changed. This guidance is effective for the periods beginning after December 15, 2011, and early application is prohibited. The requirements are not expected to have a material effect on the Plan's fair value measurement.

3. FUNDING POLICY

Contributions to provide benefits under the Plan are made solely by the Company. Funding requirements under Internal Revenue Service (IRS) rules are a major consideration in making contributions to our postretirement plans. With respect to qualified pension plans, we intend to contribute annually not less than the minimum required by applicable law and regulations. While the Company has significant discretion in making voluntary contributions, the ERISA, as amended by the Pension Protection Act of 2006 and further amended by the Worker, Retiree, and Employer Recovery Act of 2008 and applicable Internal Revenue Code (IRC) regulations mandate minimum funding thresholds. Failure to satisfy the minimum funding thresholds could result in restrictions on our ability to amend the Plan or make benefit payments. Although mandatory contributions to our U.S. postretirement plans were not required during 2011, we will continue to monitor the funded status and minimum funding requirements.

4. ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to service rendered by employees as of the valuation date. Accumulated plan benefits include benefits expected to be paid to: (1) retired or terminated employees or their beneficiaries, (2) beneficiaries of employees who have died, and (3) present employees or their beneficiaries. The actuarial present value of accumulated plan benefits is determined by an independent actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements, such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The following amounts were calculated as of the latest actuarial valuation date, which was January 1, 2011. This represents a disclosure measure based solely on the funding valuation.

The actuarial present value of accumulated plan benefits as of January 1, 2011, is as follows:

Vested benefits:	
Participant and/or beneficiaries currently receiving benefits	$1,915,601
Other participants	1,676,326
Total vested benefits	3,591,927
Nonvested benefits	1,271
Total actuarial present value of accumulated plan benefits	$3,593,198

The changes in the actuarial present value of the Plan's accumulated plan benefits for the year ended January 1, 2011, are:

Actuarial present value of accumulated plan benefits — January 1, 2010	$3,502,107
Increase (decrease) during the year attributable to:	
Benefits accumulated	29,613
Benefits paid	(243,012)
Interest	304,490
Actuarial present value of accumulated plan benefits — January 1, 2011	$3,593,198

The actuarial cost method used to measure the present value of accumulated plan benefits is the Unit Cost Method. The significant actuarial assumptions used in the January 1, 2011, valuations were as follows:

- Mortality: UP-94 Table (scale AA projected 16 years) with special mortality table used for the period after disability in 2011 and in 2010.
- Retirement age: Age 62.
- Investment return: 9.0%
- Discount rate: 9.0%

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

5. FAIR VALUE MEASUREMENTS

In measuring Master Trusts' assets at fair value, a fair value hierarchy is applied which categorizes and prioritizes the inputs used to estimate fair value into three levels. The fair value hierarchy is based on maximizing the use of observable inputs and minimizing the use of unobservable inputs when measuring fair value. Classification within the fair value hierarchy is based on the lowest level input that is significant to the fair value measurement. The three levels of the fair value hierarchy are defined as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.

- Level 2 inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices (in nonactive markets or in active markets for similar assets or liabilities), inputs other than quoted prices that are observable, and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

- Level 3 inputs are unobservable inputs for the assets or liabilities.

In certain instances, fair value is estimated using quoted market prices obtained from an external pricing service. In obtaining such data from the pricing service, the Plan has evaluated the methodologies used to develop the estimate of fair value in order to assess whether such valuations are representative of fair value, including net asset value (NAV). Additionally, in certain circumstances, the Plan may adjust NAV reported by an asset manager when sufficient evidence indicates NAV is not representative of fair value.

The following is a description of the valuation methodologies used to measure the Master Trusts' assets at fair value.

- Equity Securities — Equities (including common and preferred shares, domestic listed and foreign listed, closed end mutual funds, and exchange traded funds) are generally valued at the closing price reported on the major market on which the individual securities are traded at the measurement date. These funds are generally classified within Level 1 and 2 of the fair value hierarchy.

- CCT and Commingled Funds — Open-ended mutual funds, collective trusts, and commingled funds are arrangements in which the funds of individual trusts are pooled to avail themselves of professional investment management and achieve greater diversification of investment, stability of income, or other investment objectives. CCT funds invest in debt and equity securities, the mix of which varies by fund, and report NAV as of the measurement date. These funds are generally classified within Level 2 of the fair value hierarchy.

- Private Equity — The valuation of limited partnership interests in private equity funds may require significant management judgment. The NAV reported by the asset manager is adjusted when management determines that NAV is not representative of fair value. In making such an assessment, a variety of factors are reviewed by management, including, but not limited to, the timeliness of NAV as reported by the asset manager and changes in general economic and market conditions subsequent to the last NAV reported by the asset manager. These funds are generally classified within Level 3 of the fair value hierarchy.

- Absolute Return (Hedge Funds) — The valuation of limited partnership interests in hedge funds may require significant management judgment. The NAV reported by the asset manager is adjusted when management determines that NAV is not representative of fair value. In making such an assessment, a variety of factors are reviewed by management, including, but not limited to, the timeliness of NAV as reported by the asset manager and changes in general economic and market conditions subsequent to the last NAV reported by the asset manager. Depending on how quickly the Master Trusts can redeem these investments and the extent of any adjustments to NAV, hedge funds are classified within either Level 2 (redeemable within 90 days) or Level 3 (redeemable beyond 90 days) of the fair value hierarchy.

- Fixed Income — U.S. government securities are generally valued using quoted prices of securities with similar characteristics. Corporate bonds and notes are generally valued by using pricing models (e.g., discounted cash flows), quoted prices of securities with similar characteristics, or broker quotes. Fixed income securities are generally classified in Level 2 of the fair value hierarchy.

- Commodities, Cash, and Other — Commodities are valued based on the closing price in the market. When held in a private equity or hedge fund, depending on how quickly the Master Trusts can redeem these investments and the extent of any adjustments to NAV, commodities are classified within either Level 2 (redeemable within 90 days) or Level 3 (redeemable beyond 90 days) of the fair value hierarchy. Cash investments are money market commingled trust vehicles which are valued by quoted market price or NAV, and are classified as Level 1 or Level 2 accordingly.

(a) As of December 31, 2010, it was probable that certain funds would be redeemed at a value other than NAV due to pending sales in the secondary market. As a result, the funds were measured based on evidence of the price a market participant would pay in an orderly transaction. As there were no significant unobservable inputs in determining fair values, these funds were reclassified from Level 3 to Level 2.

The Plan reports transfers within the fair value hierarchy at the beginning of the reporting period.

(a) Private equity buyout funds are partnership investment vehicles that take a controlling interest primarily in private companies with the intent of developing them for future sale at a higher price to a strategic or financial buyer or through an initial public offering. These investments include $498,543 where ownership of the partnership interest is directly held and $416,573 invested through funds of private equity funds. The nature of the investments in this category is that distributions are received through the liquidation of the underlying assets of the fund. These partnership vehicles are expected to be liquidated over the next three to 12 years.

(b) Private equity distressed funds are partnership investment vehicles that purchase debt or preferred equity instruments of companies that are distressed, near bankrupt, or bankrupt. The nature of the investments in this category is that distributions are received through the liquidation of the underlying assets of the fund. These partnership vehicles are expected to be liquidated over the next seven to nine years.

(c) Venture and growth private equity funds are partnership investment vehicles that provide seed or growth capital to start-ups and early stage companies, usually in high growth industries, such as information and clean technology, health care, and biotechnology. The nature of the investments in this category is that distributions are received through the liquidation of the underlying assets of the fund. These partnership vehicles are expected to be liquidated over the next seven to nine years.

(d) Mezzanine private equity funds provide mezzanine loans to companies that need capital but do not want to sell or dilute their equity interests. Mezzanine loans are subordinated debt or preferred equity securities that represent a claim on the borrower's assets which is senior to the common equity but subordinate to senior secured and unsecured debt. The nature of the investments in this category is that distributions are received through the liquidation of the underlying assets of the fund. These partnership vehicles are expected to be liquidated over the next 10 to 12 years.

(e) Absolute return fund of funds include partnership investment vehicles that invest in a diversified portfolio of other hedge funds that employ a range of investment strategies.

(f) Fixed income/multi-strategy absolute return funds are partnership investment vehicles that invest in multiple investment strategies, such as macro, equity long/short, convertible arbitrage, and event driven, often with the intent to diversify risk and reduce volatility.

(g) Equity long/short absolute return funds include partnership investment vehicles that can purchase both long and short positions of publicly traded equities. Management of the fund has the ability to shift investments from value to growth strategies, from small to large capitalization companies, and from a net long position to a net short position.

(h) Macro absolute return funds include partnership investment vehicles that make investments predicated on the managers views, either fundamentally or quantitatively derived, on different global factors, such as asset allocation (e.g., stocks versus bonds) interest rates, currency, sovereign risk, and commodities over a span of different time frames.

(i) Redemption restrictions vary by investment management agreement but are based on the initial investment date and take into account summary of liquidity terms, notice period, redemption schedule, withdrawal with or without penalties, and the firm's redemption schedule.

(j) Private equity assets are "redeemed" via a secondary sale market where a broker is contracted to bid out the assets in question.

6. INVESTMENTS

The ITT Master Trust's investments, which represented 5 percent or more of ITT Master Trust's net assets as of December 31, 2011, are shown below. There were no investments which represented 5 percent or more of the Former Master Trust's net assets as of December 31, 2010.

9. EXEMPT PARTY-IN-INTEREST TRANSACTIONS

Certain Master Trusts' investments are shares of registered investment companies managed by the Trustee. In addition, the Former Master Trust entered into a securities lending agreement with the Trustee as described in Note 7. These assets and related transactions qualify as exempt party-in-interest transactions.

In addition, the Former Master Trust invested in shares of ITT Corporation common stock. At December 31, 2010, the Former Master Trust held 1,038,000 shares of common stock of ITT Corporation, with a market value of $54,325,000. During the year ended December 31, 2010, the Former Master Trust recorded dividend income of $1,038,000 from the common stock of ITT Corporation. As Goulds Pumps, Inc., a subsidiary of ITT Corporation, is the Plan Sponsor, these transactions qualify as exempt party-in-interest transactions.

Certain administrative functions are performed by officers and employees of the Company (who may also be a participant in the Plan) at no cost to the Plan or Master Trusts. These transactions are not deemed prohibited party-in-interest transactions because they are covered by the statutory administrative exemptions from the IRC and ERISA's rules on prohibited transactions.

10. FEDERAL INCOME TAX STATUS

The IRS has determined and informed the Company by a letter dated August 29, 2002, that the Plan and related trust were designed in accordance with the applicable regulations of the IRC. The Plan has been amended since receiving the determination letter; however, the Company and Plan management believe that the Plan is currently designed and operated in compliance with the applicable requirements of the IRC, and the Plan and related trust continue to be tax-exempt. Therefore, no provision for income taxes has been included in the Plan's financial statements.

GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2011, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2008.

11. PLAN TERMINATION

Although it has not expressed any intention to do so, the Company has the right under the Plan, in certain circumstances, to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event that the Plan is terminated, the net assets of the Plan will be allocated for payment of plan benefits to the participants in an order of priority determined in accordance with ERISA, applicable regulations there under and the Plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid, and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the existing assets and the PBGC guaranty while other benefits may not be provided for at all.

12. SUBSEQUENT EVENTS

For the year ended December 31, 2011, subsequent events were evaluated through August 21, 2012, the date the financial statements were available to be issued. On March 20, 2012, the Company chose to accelerate all remaining 2012 Plan contributions of $313,000 and make a $337,454 voluntary contribution to the Plan. All contributions were allocated to the 2011 plan year.

Schedule SB, line 22 – Description of Weighted Average Retirement Age

This age is derived by applying, for an employee with the characteristics of an average new entrant to the plan, the following formula, modified so that the "½" is not used for t = FRA-ERA.

$$\frac{\sum_{t=0}^{FRA-ERA} ({}_tp_{ERA}) * (q^r_{ERA+t}) * (ERA + t + ½)}{\sum_{t=0}^{FRA-ERA} ({}_tp_{ERA}) * (q^r_{ERA+t})}$$

where

FRA	=	age by which everyone is assumed to retire
ERA	=	age before which nobody is assumed to retire
${}_tp_{ERA}$	=	probability of surviving at work to age ERA + t
q^r_{ERA+t}	=	probability of retiring at age ERA + t

Asset valuation method

The Actuarial Value of Assets is Market Value as of the valuation date, including discounted receivable contributions, reduced by 2/3 and 1/3 of the of the gain/(loss) in the prior 2 years, respectively. The gain/(loss) for each period is determined as the actual return on Market Value during the period less the expected return on Market Value based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third segment rate. The resulting value is constrained to be within a corridor of 90% to 110% of Market Value, including discounted receivable contributions.

The expected return on plan assets is 9.00% per annum, limited by PPA to the applicable Third Segment Rate as follows:

2010 measurement period:	6.76%
2009 measurement period:	6.69%

Last amended

January 1, 2008.

Covered employees

Any employee of the Company who is on the hourly-rated payroll of the Company's Vertical Pump Division, City of Industry, California.

Eligibility for participation

A covered employee becomes a member of the Plan on his date of employment.

Vesting service

Vesting service is equal to the elapsed period of time in completed years since a covered employee's date of employment.

Benefit service

In general, a covered employee earns one month of Benefit Service for each calendar month during which he has one hour of service. Benefit Service is limited to a maximum of 35 years. Effective November 15, 1998, benefit accruals for all salaried employees were suspended.

Annual compensation

The member's total earnings for federal income tax purposes, including the member's elective deferrals under a Company sponsored Section 401(k) or 125 plan. A member's earnings are limited in accordance with IRS rules to $245,000 indexed for cost of living.

Average annual compensation

The average of annual compensation for the two years during the last ten years of employment that produces the greatest average.

Schedule SB, line 22 – Description of Weighted Average Retirement Age

This age is derived by applying, for an employee with the characteristics of an average new entrant to the plan, the following formula, modified so that the "½" is not used for t = FRA-ERA.

$$\frac{\sum_{t=0}^{FRA-ERA} ({}_tp_{ERA}) * (q^r_{ERA+t}) * (ERA + t + ½)}{\sum_{t=0}^{FRA-ERA} ({}_tp_{ERA}) * (q^r_{ERA+t})}$$

where

FRA	=	age by which everyone is assumed to retire
ERA	=	age before which nobody is assumed to retire
${}_tp_{ERA}$	=	probability of surviving at work to age ERA + t
q^r_{ERA+t}	=	probability of retiring at age ERA + t

Asset valuation method

The Actuarial Value of Assets is Market Value as of the valuation date, including discounted receivable contributions, reduced by 2/3 and 1/3 of the of the gain/(loss) in the prior 2 years, respectively. The gain/(loss) for each period is determined as the actual return on Market Value during the period less the expected return on Market Value based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third segment rate. The resulting value is constrained to be within a corridor of 90% to 110% of Market Value, including discounted receivable contributions.

The expected return on plan assets is 9.00% per annum, limited by PPA to the applicable Third Segment Rate as follows:

2010 measurement period:	6.76%
2009 measurement period:	6.69%
