Report of Independent Accountants

To the Participants and Administrator
of the TGL Pension Plan

We were engaged to audit the financial statements of the TGL Pension Plan as of December 31, 2011 and 2010, and for the years then ended, as listed in the accompanying table of contents. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by The Northern Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of and for the years ended December 31, 2011 and 2010, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Mortality sponsor elections	Section 430(h)(3) prescribed separate static annuitant and nonannuitant mortality tables. These tables are based on the RP-2000 mortality tables projected with mortality improvement to the valuation year plus 7 and 15 years based on Scale AA.
417(e) lump sums	Liabilities are determined based on the underlying annuity used by the plan to determine the lump sum amount, rather than valuing the lump sum payment. This annuity is valued based on funding interest rates rather than 417(e) rates and current year 417(e) unisex mortality.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**Asset methods**

The asset valuation method is an average of the adjusted market value for each month during the last 24 months preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be not greater than 110 percent and no less than 90 percent of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.
- **Transferred participants:** The liabilities for employees who have transferred into another plan of the plan sponsor have been included with the liabilities for terminated vested participants.

Minimum funding method

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Maximum deductible contribution method

The cushion amount is based on the funding target for minimum funding calculations.

Schedule SB, Part V — Summary of Plan Provisions

Benefits included or excluded:

Unless noted below, all benefits provided by the plan, are included in this valuation.

- **Plan amendments excluded:** Amendments adopted after the valuation date or effective after the current plan year are excluded from the valuation.
- **IRC Section 436 benefit restrictions:** Not applicable for this valuation.
- **Late retirement increases:** Participants over normal retirement age are valued including the late retirement actuarial increase.
- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.
- **IRC Section 415(b) benefit limitations:** The limitations of Internal Revenue Code Section 415(b) have been incorporated into our calculations.

• Benefit	Accrued benefit, reduced by 6.67% per year for first 5 years that commencement precedes normal retirement date and by 3.33% per year for next five years.														

Schedule SB, Part V — Summary of Plan Provisions

Late retirement	
• Eligibility	Working beyond normal retirement age.
• Benefit	Better of: <ul style="list-style-type: none"> Continued accruals, or Actuarially increased normal retirement benefit (annual recomputation).
Deferred vested	
• Eligibility	5 years of continuous service.
• Benefit	Accrued benefit at termination, payable at normal retirement date. Benefits can commence first day of month following normal retirement date or a reduced benefit at 55 with 5 years of continuous service.
Disability	
• Eligibility	10 years of continuous service and total and permanent disability.
• Benefit	Accrued benefit payable immediately.
Death benefit	
• Eligibility	Married (or Domestic Partner) and eligible for a pension benefit
▪ Regular benefit	Annuity based on accrued benefit at death. Payable at normal retirement date in the normal form for married participants as if participant died on that date. Reduced benefit is available, subject to the same factors as early retirement.
▪ Special pre-retirement death benefit for participants with 10 years of continuous service	Present value of accrued benefit minus present value of regular death benefit, assuming commencement at normal retirement date.
Form of benefits	
• Automatic form for unmarried participants	Life Annuity
• Automatic form for married participants	Joint & Survivor

▪ Optional form conversion factors	Amount of an alternative form of benefit (other than a lump sum) which has a value equivalent to the benefit or benefits otherwise payable under the plan, computed on the basis of a 7.00% compound annual interest rate and UP-1984 Mortality Table.
▪ Conversion factors for Lump Sum	The equivalent value when calculated under the mortality table and segment rates mandated by IRS under PPA and 417(e)(3).
Funding medium	Master trust administered by Northern Trust
Miscellaneous	
▪ Maximum benefits	Annual benefits may not exceed the limits in IRC Section 415. This limit is indexed annually. For 2011, limit is \$195,000.
▪ Changes since prior valuation	None

Significant events

On September 19, 2011, Tyco International announced that its Board of Directors approved a plan to separate the company into three separate, publicly traded companies. The separation is expected to be completed in 2012. This event is not expected to have any material effect on the plan's assets or liabilities.

Schedule SB, Line 24 — Change in Actuarial Assumptions

Report of Independent Accountants

To the Participants and Administrator
of the TGL Pension Plan

We were engaged to audit the financial statements of the TGL Pension Plan as of December 31, 2011 and 2010, and for the years then ended, as listed in the accompanying table of contents. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by The Northern Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of and for the years ended December 31, 2011 and 2010, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

1. DESCRIPTION OF PLAN

The following brief description of the TGL Pension Plan (the "Plan"), formerly the Tyco/Grinnell/Ludlow Pension Plan for Certain Hourly Employees, is provided for general information purposes only. Selected Plan provisions are described below. Participants should refer to the Plan document and summary of Plan description for more complete information regarding the terms of the Plan.

General

The Plan is a trustee, noncontributory, defined benefit pension plan covering certain hourly employees of Grinnell Corporation, Gimpel Corporation, Ludlow Corporation, and certain employees of Batts, Inc. and Forever Hangers, Inc. (collectively, the "Company"). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA") and the Internal Revenue Code of 1986, as amended (the "Code").

Effective December 31, 2001, the benefit accruals and future participation under the Plan for the employees of GFPS (Lubbock) division were frozen.

On September 19, 2011, Tyco International Ltd. ("TIL") announced that its Board of Directors ("the Board") approved a plan to separate TIL into three separate, publicly traded companies consisting of TIL's North American residential security business, its flow control business, and its commercial fire and security business by spinning off the North American residential security business and flow control business in a tax-free pro rata distribution to shareholders. On March 28, 2012, TIL announced that it entered into a definitive agreement to combine its flow control business with Pentair, Inc. ("Pentair") in a tax-free, all-stock merger immediately following the spin-off of the flow control business. See note 8 Subsequent Events for additional information.

The Company is part of a controlled group of entities with Tyco International Management Company, LLC ("TIMCO LLC"), which is the Plan Sponsor.

Funding Policy

The Company's funding policy is to make all required contributions to the pension plan in accordance with applicable pension laws and regulations. Additional, voluntary contributions (in excess of required minimum amounts) are periodically considered based on their individual merits. The Company contributions for 2011 and 2010 met the minimum funding requirements under Internal Revenue Service Regulations.

Although it has not expressed any intention to do so, the Company has the right under the Plan to terminate the Plan subject to the provisions set forth in ERISA.

Pension Benefits

The pension benefit calculations vary due to the merger of a number of TIMCO LLC subsidiary pension plans into the Plan. The merging plans continue to calculate their pension benefit in accordance with each plan, as in effect immediately prior to the merger. Participants who have completed five or more years of continuous service are entitled to annual pension benefits. For a more complete schedule of pension benefits, participants should refer to the Plan document.

Disability and Death Benefits

Participants who terminate employment due to total and permanent disability or spouses of vested participants who die may be entitled to receive benefits under this Plan.

TGL Pension Plan
Notes to Financial Statements
December 31, 2011

Administrative Expenses

Insurance premiums, trustee service charges, audit fees, investment related fees and certain administrative and actuarial fees are paid by the Plan. All other expenses associated with the administration of the Plan are paid by the Company.

Plan Administration

The Plan has an Administrative Committee and an Investment Committee. The Administrative Committee acts in the capacities of Plan administrator and Plan fiduciary. The Investment Committee acts in the capacity of Plan fiduciary. Committee members are appointed by the Board of Directors of TIMCO LLC. The Investment Committee appoints the investment managers to manage the assets of the Tyco Master Trust (the "Master Trust").

Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable, or would have been payable, during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
2. Other vested benefits insured by the Pension Benefit Guaranty Corporation (the "PBGC"), a U.S. government agency, up to the applicable limitations.
3. All other vested benefits; that is, vested benefits not insured by the PBGC.
4. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan's sponsor and the level of benefits guaranteed by the PBGC.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Actuarial Valuation Method and Assumptions

Independent actuaries are employed by the Company to determine the Plan's required contributions, present value of accumulated benefits, and prior service costs using the traditional unit credit method. The significant actuarial assumptions including mortality, salary increases, and investment returns, used by the independent actuaries in the January 1, 2011 valuation are summarized as follows:

Investment Return Rate:	5.91% effective interest rate based on funding segment rates: 2.94% for the first 5 years, 5.82% for the next 15 years, and 6.46% for years after 20 years
Retirement:	Weighted average age 62
Mortality:	IRC Section 430(h)(3) separate static annuitant and non-annuitant mortality tables

Certain actuarial assumptions discussed above have changed since the January 1, 2010 valuation. The actuarial assumption used in the January 1, 2010 valuation was the effective investment return of 6.57% based on funding segment rates: 4.6% for the first 5 years, 6.65% for the next 15 years, and 6.76% for years after 20 years.

The effect of these changes is included in note 3 under the caption change in actuarial assumptions.

Basis of Accounting

The financial statements of the Plan are presented on the accrual basis of accounting.

Investment Valuation and Income Recognition

The investment in the Master Trust is shown at estimated fair value based on the fair values of the underlying investments held in the Master Trust. The Plan's interest in the Master Trust is based on the beginning of the year value of the Plan's interest in the Master Trust plus actual contributions and allocated net investment income or loss (including interest, dividends, net unrealized and realized gains and losses) less actual distributions and allocated administrative expenses. Net investment income or loss and certain administrative expenses are allocated to the individual plans based upon the ratio of the plans holdings in the Master Trust of the prior month end.

Other significant accounting policies include: investment transactions are recorded on the trade date, gains or losses on sales of investments are recorded as the difference between proceeds and cost, cost is determined on a specific identification basis. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date.

Fair value is the price that would be received by the Plan to sell an asset or paid by the Plan to transfer a liability (an exit price) in an orderly transaction between market participants on the measurement date in the Plan's principal or most advantageous market for the asset or liability. Fair value measurements require the Plan to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The hierarchy places the highest priority on unadjusted quoted market prices in active markets for identical assets or liabilities (level 1 measurements) and gives the lowest priority to unobservable inputs (level 3 measurements). The three levels of inputs within the fair value hierarchy are defined as follows:

TGL Pension Plan
Notes to Financial Statements
December 31, 2011

Investment Valuation and Income Recognition, continued

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the plan has the ability to access.

Level 2: Inputs to the valuation methodology include: quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability; inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs for the valuation methodology are unobservable and significant to the fair value measurement.

The assets or liabilities fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of the observable inputs and minimize the use of unobservable inputs.

The fair values of the underlying investments of the Master Trust are determined as follows:

Cash and cash equivalents are primarily invested in a money market mutual fund. The fair value is determined by obtaining quoted prices on nationally recognized securities exchanges (level 1 inputs).

Common stocks are valued by obtaining prices on recognized and highly liquid exchanges (level 1 inputs).

Common collective trusts are valued based on their net asset values, as reported by custodians of the common collective trusts and as supported by actual redemption prices (level 2 inputs). Included in the common collective trusts are money market funds which are valued at the net asset value per share as quoted by such companies or funds as of the valuation date. The money market funds are institutional commingled funds. Although not traded on active markets the net asset value per share is observable. Cash is valued at the amounts deposited in the fund, plus accrued interest (level 1 inputs).

Corporate bonds primarily consist of more than 200 corporate investment grade and high yield credit bonds ("Corporate credits"), as well as Asset Backed Securities ("ABS"). The Corporate credits are generally priced using the most recent bid prices or potentially the mean of the latest bid and ask prices. ABS are generally valued using matrix pricing through recognized financial models utilized by the investment manager and the custodian that incorporate other observable inputs such as cash flow, security structure, or market information, when there is no broker/dealer quote available (level 2 inputs).

TGL Pension Plan
Notes to Financial Statements
December 31, 2011

Investment Valuation and Income Recognition, continued

Partnership/joint venture interests are valued by the custodian based on the underlying assets which includes publicly traded common stock, commercial paper, futures, foreign exchange forwards and money market funds. Redemption value is based on current ownership percentage at the end of the calendar month. Redemption frequency is on a monthly basis, upon 15 days advance notice (level 2 inputs).

U.S. government securities are direct obligations of the U.S. government or its agencies. These securities are generally priced using the most recent bid prices or potentially the mean of the latest bid and ask prices. This category also includes mortgage backed securities ("MBS") issued by U.S. government agencies that may utilize models, such as a single cash flow model, that incorporate data on interest rate movements, pass-thru securities markets, bid evaluations, and other pertinent data (level 2 inputs).

Registered investment companies are valued by obtaining quoted prices on nationally recognized securities exchanges (level 1 inputs). Some registered investment companies have private open-ended mutual funds which are valued based on their net asset values, as reported by custodians of the registered investment companies and as supported by actual redemption prices (level 2 inputs).

Other investments includes swap, municipal bond, non-U.S. government bonds, and sundry assets which are valued either by obtaining quoted prices on nationally recognized securities exchanges (level 1 inputs) or by third party pricing sources obtained by the custodian which may utilize models that incorporate pertinent data to determine pricing and non-U.S. sovereign debt securities, where the custodian will utilize available broker/dealer quotes (level 2 inputs).

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Payment of Benefits

Benefits are recorded when paid.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements. Accordingly, actual results may differ from those estimates.

Federal Income Tax Status

The Internal Revenue Service has determined and informed the Company by a letter dated December 12, 2002, that the Plan and related trust are designed in compliance with applicable sections of the Code. The Plan has been amended since receiving the determination letter. However, the Plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code. Therefore, no provision for income taxes is required.

The plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2008.

5. INVESTMENT IN THE MASTER TRUST

As of December 31, 2011 and 2010 the Plan's sole investment is in the Master Trust, which was established for the investment of assets of the Plan and several other TIMCO LLC and affiliated companies' sponsored retirement plans. The assets of the Master Trust are held by its trustee, The Northern Trust Company, for the years ended December 31, 2011 and 2010. Each participating retirement plan has an undivided interest in the assets of the Master Trust except for any other securities, which, if applicable, are identifiable with individual plans. The Plan's interest in the net assets of the Master Trust is approximately 2% at December 31, 2011 and 2010.

On November 9, 2010, TIL announced that it entered into an investment agreement (the "Agreement") to sell a majority interest in its Electrical and Metal Products business to an affiliate of the private equity firm Clayton, Dubilier & Rice, LLC (the "Investor"). TIL formed a newly incorporated holding company, Atkore International Group Inc. ("Atkore"), to hold TIL's Electrical and Metal Products business. On December 22, 2010, the transaction closed and the Investor acquired shares of a newly-created class of cumulative convertible preferred stock of Atkore (the "Preferred Stock"). The Preferred Stock initially represented 51% of the outstanding capital stock (on an as-converted basis) of Atkore. The assets and liabilities relating to the participants of the Allied Harvey Union Pension Plan, the Allied Philadelphia Union Pension Plan, the T.J. Cope Pension Plan and the Unistrut Pension Plan, which were sold in the transaction above, continued to be a part of the Master Trust as of December 31, 2010. During the month of April 2011, \$59,386,733 of assets relating to Atkore participants were transferred to a master trust established by Atkore.

The following financial information was obtained from data that has been prepared and certified to as complete and accurate by the trustee of the Master Trust. Such financial information has not been audited by the Plan's independent accountants.

The Master Trust did not have any investments measured at fair value on a recurring basis using significant unobservable inputs (level 3) for the years ended December 31, 2011 and 2010.

Changes in Fair Value Levels

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

Management or the Plan Sponsor evaluated the significance of transfers between levels based upon the nature of the financial instruments and size of the transfer relative to total net assets available for benefits. For the year ended December 31, 2011 and 2010, there were no significant transfers in or out of any levels.

7. RISKS & UNCERTAINTIES

The Master Trust invests in a highly diversified portfolio of investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such change could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated Plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the use of estimates and the assumption setting process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

8. SUBSEQUENT EVENTS

Effective as of January 1, 2012, the assets and liabilities of the Graphic Controls division of the ADT Security Services Pension Plan (“ADT Plan”) were spun off from the ADT Plan in accordance with Code Section 414(l) and ERISA Section 4044 to the Plan, which is a tax-qualified defined benefit retirement plan sponsored by the Plan Sponsor. In connection with the transfer of assets and liabilities, the Plan assumed the aggregate liability for the benefits accrued by participants in the Graphic Controls division of the ADT Plan as of December 31, 2011, and such persons cease to have a right to any benefit under the ADT Plan.

On September 28, 2012, TIL completed the previously announced separation of its North American residential security business and flow control business. Immediately following the spin-offs, the flow control business was successfully merged with Pentair.

The Plan Sponsor has evaluated subsequent events through October 9, 2012, which is the date the financial statements were available to be issued.
