To the Plan Administrative Committee of
Flint Hills Resources Chemicals Cash Balance Pension Plan:

We were engaged to audit the financial statements of **Flint Hills Resources Chemicals Cash Balance Pension Plan** (the Plan) as of December 31, 2011 and 2010, and for the years then ended, as listed in the accompanying table of contents. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 3, which was certified by Bank of New York Mellon/BNY Mellon, N.A., the trustee of the Plan, except for comparing the information with the related information included in the financial statements. We have been informed by the Plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The Plan administrator has obtained certifications from the trustee as of and for the years ended December 31, 2011 and 2010, that the information provided to the Plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America as established by the American Institute of Certified Public Accountants and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Notes to financial statements

1 Description of the Plan

The following description of the Flint Hills Resources Chemicals Cash Balance Pension Plan (the Plan) provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

General

The Plan is a noncontributory cash balance defined benefit pension plan sponsored by Flint Hills Resources, LP (the Company) covering eligible employees who have attained age 21, have completed one year of service and are members of the United Steelworkers of America International Union, Local No. 2-004, the International Brotherhood of Electrical Workers (AFL-CIO), Local 390, or the United Steelworkers of America International Union Local No. 4-23. The trustee of the Plan, Bank of New York Mellon/BNY Mellon Bank, N.A. (the trustee), together with the Koch Industries, Inc. Investment Committee, manages the Plan's investment assets. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA).

Pension Benefits

Under the provisions of the Plan a hypothetical cash balance is calculated for each participant representing the individual's accrued retirement benefit. Each participant's hypothetical account is increased each year by a percentage multiplied by the participant's compensation, as defined in the Plan document. The percentage is based upon the sum of the participant's age and years of service at the beginning of the Plan year, as follows:

Age plus years of service	Percentage of Compensation
Under 30	4.00%
30 but less than 40	5.50%
40 but less than 50	7.00%
50 but less than 60	8.00%
60 but less than 70	9.00%
70 but less than 80	10.50%
Over 80	12.00%

Each participant's years of service at previous employer Huntsman Chemical Corporation (Huntsman) are counted toward years of service in the Plan. The participant's hypothetical account is also increased by interest at a rate of not less than 5%.

Vesting

Participants are 100% vested upon completion of three years of credited service.

Retirement Benefit Options

In general, the Plan provides for normal retirement benefits upon reaching age 65 and has provisions for early retirement, late retirement, disability, or death benefits.

A participant's benefit upon retirement, disability or death is equal to or based on the participant's hypothetical cash balance account. Retirement benefits may be paid as a single cash payment or an annuity.

Funding Policy

The Company makes contributions to the Plan based on the funding recommendations of the Plan's independent consulting actuary to meet the minimum requirements under ERISA. The Plan was in compliance with applicable ERISA funding requirements for 2011 and 2010.

2 Summary of Significant Accounting Policies**Basis of Accounting**

The accompanying financial statements are prepared under the accrual method of accounting.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts of assets and liabilities and changes therein, disclosures of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements. Accordingly, actual results may differ from those estimates.

Investment Valuation and Income Recognition

The Plan's investment in the Koch Industries, Inc. Defined Benefit Master Trust (Koch Industries Master Trust) is stated at fair value (Note 3). Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (Note 4).

Investments held by the master trust that are traded on a national securities exchange are valued at the last reported sales price on the last business day of the Plan year. Investments in preferred stocks, government bonds, corporate bonds, and cash equivalents are valued based on yields available on comparable securities. Investments in common trust funds are based on quoted redemption values on the last business day of the Plan year, as determined by the trustee of the Plan. Investments in limited partnerships are valued at appraised values at the end of the Plan year as reported by the partnerships' respective general partners and the trustee of the Plan. Appraised values are developed using various modeling techniques, including, but not limited to, the strong correlation of the underlying security to one or more broad-based securities market indices and/or other financial instruments. Other investments consist primarily of synthetic equity options that are indexed to specific equity market benchmarks and are valued based upon observable market data. Investments in derivative instruments are marked to market daily based on quoted prices or widely accepted models that use readily observable market parameters as their basis. Amounts owed or due on open derivative contracts are recorded as receivables or payables to the master trust. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Investment related expenses of the master trust, such as trustee and investment manager fees, are paid by the master trust and are netted against (added to) net investment gain (loss) from the master trust.

Payment of Benefits

Benefits are recorded when paid.

Administrative Expenses

Administrative expenses include PBGC premiums, record keeping, legal, and other administration fees directly incurred by the Plan.

Subsequent Events

The Plan administrator has evaluated subsequent events through September 21, 2012, the date the financial statements were available to be issued.

Recently Issued Accounting Pronouncements

In January 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2010-06 – *Improving Disclosures about Fair Value Measurements*. ASU 2010-06 requires disclosure of activities, on a gross basis, including purchases, sales, issuances, and settlements, in the reconciliation of level 3 fair value recurring measurements. The new disclosures are required for periods beginning after December 15, 2010. The Plan's adoption of the accounting standard had no material impact on the 2011 financial statements. See Note 4 for disclosure of Level 3 activities on a gross basis.

3 Financial Information of Master Trust

The Koch Industries Master Trust was established for the collective investment of the assets of participating employee benefit plans of Koch Industries, Inc. and certain of its subsidiaries. Fund assets are allocated among participating plans by assigning to each plan those transactions (primarily contributions, benefit payments, and specific administrative expenses) which can be specifically identified. Income and expenses resulting from the collective investment of the assets are allocated (on a monthly or daily basis) in proportion to the fair value of the assets assigned to each plan.

The assets of the Koch Industries Master Trust are accounted for on a units-of-participation basis. At December 31, 2011 and 2010, the Plan held 4,522,026 and 3,232,324 units of the Koch Industries Master Trust with an individual unit estimated fair value of \$1.000, respectively. The Plan's unit holdings at December 31, 2011 and 2010 had fair values of \$4,522,026 and \$3,232,324, respectively, which represented approximately .1% and .1% of the net assets of the Koch Industries Master Trust.

The trustee of the Plan has certified the completeness and accuracy of substantially all investments reflected in the accompanying statements of net assets available for benefits and substantially all of the related investment activity reflected in the statements of changes in net assets available for benefits of the Plan. The net assets of the Koch Industries Master Trust certified as complete and accurate by the trustee totaled \$4,742,503,716 and \$4,701,751,628 at December 31, 2011 and 2010, respectively. Net investment gain (loss) of the Koch Industries Master Trust certified as complete and accurate by the trustee totaled \$42,495,685 and \$497,846,748, and excluded \$6,969,528 and \$45,187,649 of net investment gain related to certain investments in limited partnerships and investment expenses for the years ended December 31, 2011 and 2010, respectively. The Plan's independent auditors have not audited investment information certified by the trustee of the Plan.

A summary of the net assets of the Koch Industries Master Trust is as follows:

Net appreciation in fair value of investments	\$ 39,429,938	\$540,367,478

The Koch Industries Master Trust's overall strategy is to provide investment diversification to minimize risk and maximize long-term investment returns while maintaining sufficient liquidity. As a part of this strategy, the master trust holds certain investments that have redemption restrictions, future funding commitments, and other requirements that vary by individual investment. Redemption restrictions are generally short term with the exception of certain limited partnership investments, of which funds frequently cannot be withdrawn for the life of the investment. At December 31, 2011 and 2010, the Koch Industries Master Trust had noncancelable commitments to make future investments in certain limited partnerships totaling \$505,867,066 and \$95,432,192, respectively. The commitments mature at various dates designated by the respective fund agreements.

At December 31, 2011 and 2010, the Koch Industries Master Trust held \$1,567,144,079 and \$432,193,973, respectively, of collective trust funds managed by Bank of New York Mellon/BNY Mellon, N.A. In addition, fees paid by the Koch Industries Master Trust to the trustee, or an affiliate thereof, for trustee and investment management services approximated \$627,334 and \$258,000 for the years ended December 31, 2011 and 2010, respectively. Transactions with Bank of New York Mellon/BNY Mellon, N.A., qualify as party-in-interest transactions.

During 2011 and 2010 the Koch Industries Master Trust invested in a limited number of derivative financial instruments. Certain investment managers were allowed to use derivatives for such strategies as portfolio structuring, return enhancement, and hedging against deterioration of investment holdings from market and interest rate changes. Derivatives are also used as a hedge against foreign currency fluctuations. Derivative instruments included equity index, government and money market forwards and futures, credit default swaps, as well as interest rate swaps and options. The resulting fair value changes of derivative instruments were included in the net appreciation in fair value of investments. Derivative positions held at December 31, 2011 and 2010 were not material and the use of derivative instruments was not believed to materially increase the credit or market risk of the master trust's investments.

4 Fair Value Measurements

FASB ASC 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The valuation methods described in Note 2 may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date. There have been no changes in the methodologies used at December 31, 2011 and 2010.

The following table sets forth by level, within the fair value hierarchy, a summary of the Koch Industries Master Trust's investment assets at fair value as of December 31, 2011.

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

Plan management evaluates the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. For the year ended December 31, 2011, there were no significant transfers in or out of levels 1, 2 or 3.

5 Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the services rendered by the employees to the valuation date. The actuarial present value of accumulated plan benefits is determined by the Plan's actuary and is the amount that results from applying actuarial assumptions to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. The actuarial present value of accumulated plan benefits is presented based on a beginning-of-year benefit information date.

The significant actuarial assumptions used in the December 31, 2010 valuation are as follows:

Method of valuation	Unit credit actuarial cost method
Investment rate of return	8.50%
Mortality	RP-2000 projected with Scale AA to 2010, no collar
Average retirement age	62

A summary of accumulated plan benefits is as follows:

December 31	2010
Vested benefits:	
Participants currently receiving payments	\$ 29,561
Other participants	2,145,438
Nonvested benefits	325,731
Total	\$ 2,500,730

The changes in the actuarial present value of accumulated plan benefits consist of the following:

For the year ended December 31	2010
Actuarial present value of accumulated plan benefits, beginning of year	\$ 1,627,251
Increase for interest due to the decrease in the discount period	136,626
Benefits paid	(40,593)
Assumption changes	1,508
Benefits accumulated and other changes	775,938
Actuarial present value of accumulated plan benefits, end of year	\$ 2,500,730

Assumption changes include an update of the full corporate bond yield curve used to calculate the funding target and target normal cost from January 2010 to January 2011.

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

6 Related-Party Transactions

Certain Plan investments are managed by the trustee and therefore, these transactions qualify as party-in-interest transactions.

7 Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- Benefits attributable to employee contributions, taking into account those paid out before termination.
- Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan.
- Other vested benefits insured by the PBGC up to the application limitations discussed below.
- Vested benefits not insured by the PBGC.
- All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal retirement age benefits, early retirement benefits and certain disability and survivor benefits. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations, and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

8 Tax Status

The Internal Revenue Service has determined and informed the Company by a letter dated October 11, 2008, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code. The Plan has been amended since receiving the determination letter. However, the Plan administrative committee and the Plan's tax counsel believe that the Plan and related trust are currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code.

9 Risks and Uncertainties

The Plan through the Koch Industries Master Trust invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

The Plan through the Koch Industries Master Trust invests in securities with contractual cash flows, such as asset-backed securities, collateralized mortgage obligations and commercial mortgage backed securities, including securities backed by subprime mortgage loans. The value, liquidity and related income (loss) of these securities are sensitive to changes in economic conditions, including real estate value, delinquencies or defaults, or both, and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

At-risk assumptions For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the lump sum form of payment.

Methods

Valuation date	First day of plan year.
Funding target	Present value of accrued benefits.
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year.
Actuarial value of assets	The fair market value of assets.
Benefits not valued	All benefits described in the Plan Provisions section of this report were valued. Towers Watson has reviewed the plan provisions with FHR and, based on that review, is not aware of any significant benefits required to be valued that were not.
Change in assumptions and methods since prior valuation	<p>The full corporate bond yield curve used to calculate the funding target and target normal cost was updated from January 2010 to January 2011.</p> <p>The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.</p> <p>The assumed plan-related expenses added to the target normal cost were changed from \$60,000 for 2010 to \$40,000 for 2011.</p> <p>The salary increase rate was changed from 4.00% in 2010 to 3.00% in 2011 to reflect revised expected experience.</p>

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
