Plan II (Alcoa Hourly Plan), Alcoa Subsidiaries Merged Inactive Pension Plan, Employees' Retirement Plan of Suriname Aluminum Company LLC – Plan I (Suriname Plan I), Employees' Retirement Plan of Suriname Aluminum Company LLC – Plan II (Suriname Plan II), Huck International Inc., Retirement Plan (Huck Plan), Howmet Corporation Muskegon County Operations Hourly Employees' Pension Plan (Muskegon Plan), and the Howmet Corporation Pension Plan (Howmet Plan) (collectively the "Plans"), which participate in the Alcoa Inc. These individual financial statements and supplemental schedules are the responsibility of the Plans' management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 9, which was certified by The Bank of New York Mellon, the trustee of the Plans, except for comparing such information with the related information included in the individual financial statements and supplemental schedules. We have been informed by the plan administrator that the trustee holds the Plans' investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of December 31, 2011 and 2010 and for the years then ended, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and schedules taken as a whole. The supplemental schedules are presented for the purpose of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The form and content of the information included in the financial statements and schedules, other than that derived from the information certified by the trustee have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Employees' Retirement Plans of Alcoa Inc. and Subsidiary Companies

Notes to Financial Statements

December 31, 2011 and 2010

1. Description of Plans

The following description of each Plan's provisions provides only general information. Participants should refer to each Plan document for a more complete description of each Plan's provisions.

General

The Alcoa Inc. and Subsidiary Companies ("Alcoa" or the "Company") Employees' Retirement Plan of Alcoa Inc. Plan I (Alcoa Salary Plan), Employees' Retirement Plan of Alcoa Inc. Plan II (Alcoa Hourly Plan), Alcoa Subsidiaries Merged Inactive Pension Plan (Alcoa Subsidiaries Merged Inactive Plan), Employees' Retirement Plan of Suriname Aluminum Company LLC – Plan I (Suriname Plan I), Employees' Retirement Plan of Suriname Aluminum Company LLC – Plan II (Suriname Plan II), Huck International, Inc. Retirement Plan (Huck Plan), Howmet Corporation Muskegon County Operations Hourly Employees' Pension Plan (Muskegon Plan) and the Howmet Corporation Pension Plan (Howmet Plan) (collectively the "Plans") are noncontributory defined benefit plans that cover United States employees and certain employees in foreign countries and participate in the Alcoa Inc. Retirement Plans' Master Trust ("Alcoa Master Trust" or "Master Trust") at December 31, 2011 and 2010.

The investments of the Plans are maintained under one trust pursuant to a "Master Trust Agreement" with the trustee, The Bank of New York Mellon ("trustee").

All fiduciary responsibility for the Plans is maintained by the Alcoa Benefits Management Committee. The Plans are subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

The Plans provide, in general, for monthly pensions upon retirement at or after age 65, or earlier upon disability, incapacity, special circumstances or with certain minimum age and service requirements. Pension benefits generally depend upon length of service, job grade or remuneration, and certain social security and other benefits.

Eligibility and Vesting

Employees hired before March 1, 2006 are eligible to participate in the Alcoa Salary Plan and the Alcoa Hourly Plan after they have attained age 21 with one year of service. Effective March 1, 2006, certain new hires are not eligible to participate in the Alcoa Salary Plan and the Alcoa Hourly Plan.

Employees are eligible to participate in Suriname Plan I and Suriname Plan II after they have attained age 21 with one year of service.

There are no longer any active participants accruing benefits in the Alcoa Subsidiaries Merged Inactive Plan, or the Huck Plan. Benefits are being provided to retired participants and will be provided to deferred vested participants in accordance with Plan provisions applicable at the time of their termination.

Employees are eligible to participate immediately in the Muskegon Plan.

Employees hired before March 1, 2006 are eligible to participate immediately in the Howmet Plan. Effective March 1, 2006, certain new hires are not eligible to participate in the Howmet Plan.

Employees' Retirement Plans of Alcoa Inc. and Subsidiary Companies

Notes to Financial Statements

December 31, 2011 and 2010

All eligible participants in the Plans fully vest after a five-year period except the eligible participants in the Muskegon Plan which fully vest after five years of continuous service, the eligible salaried participants in the Howmet Plan which fully vest after three years of service, and the eligible hourly participants of certain locations in the Howmet Plan which fully vest after seven years.

Benefit Provisions

The benefit provisions for the Alcoa Salary Plan, the Suriname Plan I, and the Howmet Plan determine the retirement benefit on a compensation-based formula.

The Alcoa Hourly Plan, the Suriname Plan II, and the Muskegon Plan determine the retirement benefits on a factor times years of service.

Benefit provisions for certain participants of the Alcoa Subsidiaries Merged Inactive Plan determine the retirement benefit on a compensation-based formula while the remaining are based on hypothetical account balances.

The benefit provisions for the Huck plan determine benefits for service through December 31, 2001 based on a percentage of monthly earnings. This percentage was based on age at month end.

Normal retirement for the Alcoa Salary Plan, the Alcoa Hourly Plan, the Alcoa Subsidiaries Merged Inactive Plan and the Huck Plan is age 65 with five years of service.

Normal retirement for the Suriname Plan I is age 60 with 18 months of service or age 55 with 30 years of service.

Normal retirement for the Suriname Plan II is the earlier of the date of (i) age 60, or (ii) the later of the date of age 65 or 18 months of service.

Normal retirement for the Muskegon Plan and the Howmet Plan is age 62 with five years of service.

Risks and Uncertainties

The Plans invest in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and such changes could materially affect the amounts reported in the statements of individual plan net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the individual Plans' financial statements.

Termination of Plans

Benefits under the Plans are insured by the Pension Benefit Guaranty Corporation ("PBGC"). Should the Plans' terminate at some future time, the net assets of the Plans generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty, while other benefits may not be provided for at all.

Employees' Retirement Plans of Alcoa Inc. and Subsidiary Companies

Notes to Financial Statements

December 31, 2011 and 2010

A full description of each Plan's termination priorities is available in each Plan document.

2. Summary of Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

Use of Estimates

The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Plans' interest in Alcoa Inc. Retirement Plans' Master Trust Investment income includes the Plans' unrealized and realized gains and losses on investments along with dividends, interest income and investment management/trustee fees.

The fair value of the Plans' interest in the Master Trust is based on the beginning-of-year value of the Plans' interest in the Master Trust plus actual contributions and allocated investment income less actual distributions, allocated investment loss and administrative expenses.

The individual Plans participate in the operations of the Master Trust through the purchase and sale of units. Cash inflows and outflows between the Plans and the Master Trust are accounted for at the beginning-of-the-month unit value. Units are revalued monthly to reflect changes in the investment values. Net investment income and losses are allocated to the Plans that participate in the Master Trust based on each Plan's units held.

Benefit Payments

Benefit payments to participants are recorded upon distribution.

Administrative Expenses

Trustee, audit, legal, actuarial, recordkeeping, and other administrative expenses are paid by the Plans.

Investment Management Fees

Investment management fees are paid by the Plans and are included in Plans' interest in Alcoa Inc. Retirement Plans' Master Trust Investment income.

Employer Contributions Receivable

Employer contributions receivable represent the remaining funding amounts Alcoa is required to contribute to meet the minimum contribution levels established by law or as a result of a formal commitment by Alcoa to make a contribution into the respective Plans.

Employees' Retirement Plans of Alcoa Inc. and Subsidiary Companies

Notes to Financial Statements

December 31, 2011 and 2010

Funding Policy

The Plans are defined benefit pension plans. No employee contributions to the Plans are required or permitted. Alcoa contributes such amounts as are necessary on an actuarial basis to provide the individual Plans with assets sufficient to meet the benefits to be paid to current and future retirees or their beneficiaries. The minimum contributions required, if any, for the Plans are designed to fund the Target Normal cost and an amortization installment towards any funding shortfalls. A funding shortfall occurs when there is an excess of Funding Target liability over the Actuarial Value of Plan Assets. The amortization installment is designed to fully fund the funding shortfall in a given year over a 7 year period. Alcoa may also voluntarily contribute amounts in excess of those minimum required amounts to meet certain funding thresholds or company objectives.

The actuarial determined pension contribution is calculated using the Unit Credit Cost Method. The Funding Target liability is the present value of accrued benefits and based on compensation and service to date. The Target Normal Cost is the present value of benefits expected to be accrued during the current plan year, reflecting the effect of expected compensation increases during the year and including expected expenses to be paid from plan assets during the year.

The Plans have met the minimum funding requirements under the provisions of ERISA in 2011 and 2010.

Investment Policy and Strategy

The Alcoa Master Trust's investment policy and weighted average asset allocations at December 31, 2011 and 2010, by asset category, are as follows:

Asset Category	Policy Range
Equity securities	20-55%
Debt securities	30-65%
Other	5-25%

The principal objectives underlying the investments of the Alcoa Master Trust's assets are to ensure that Alcoa can properly fund benefit obligations as they become due under a broad range of potential economic and financial scenarios, maximize the long-term investment return with an acceptable level of risk based on such obligations, and to broadly diversify investments across and within the capital markets to protect asset value against adverse market movements in any one market. Specific objectives for long-term investment strategy include reducing the volatility of pension assets relative to pension liabilities and achieving risk factor diversification across the balance of the asset portfolio. Investments are diversified by strategy, asset class, geography, and sector to enhance returns and mitigate downside risk. A large number of external investment managers are used to gain broad exposure to the financial markets and to mitigate manager concentration risk.

Investment practices must comply with the requirements of ERISA and any other applicable laws and regulations. The use of derivative instruments is permitted where appropriate and necessary for achieving overall investment policy objectives. Derivatives are used primarily to manage interest rate risk with the portfolio. Currently, the use of derivative instruments is not significant when compared to the overall investment portfolio.

Recently Issued Accounting Guidance

In May 2011, the FASB issued ASU 2011-04 *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS*. ASU 2011-4 is intended to improve the comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with U.S. GAAP and IFRS. The amendments are of two types: (i) those that clarify the Board's intent about the application of existing fair value measurement and disclosure requirements and (ii) those that change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements. The update is effective for annual periods beginning after December 15, 2011. Plan management does not believe the adoption of this update will have a material impact on the Plans' financial statements.

Reclassifications

Certain reclassifications have been made to prior period financial statements to conform to the current year presentation. This includes revisions to the fair value disclosures as further described in Note 5. These items had no impact on previously reported net assets available for benefits or to the statement of changes in net assets available for benefits.

Employees' Retirement Plans of Alcoa Inc. and Subsidiary Companies

Notes to Financial Statements

December 31, 2011 and 2010

In the normal course of managing the Alcoa Master Trust investments, the trustee loans securities owned by the Alcoa Master Trust to brokers/dealers in exchange for a fee. The securities are then returned to the Alcoa Master Trust in accordance with the Broker Agreement. The loaned securities are included in the investment information disclosed above. At December 31, the amount of securities loaned to brokers/dealers was as follows:

	2011	2010
Investments		
U.S. government or government agency obligations	\$ 798,839,169	\$ 195,060,196
Corporate debt instruments	<u>11,269,548</u>	<u>112,062,751</u>
	<u>\$ 810,108,717</u>	<u>\$ 307,122,947</u>

Of the total securities loaned to brokers/dealers, approximately \$717,000,000 and \$176,000,000 is concentrated with five brokers/dealers at December 31, 2011 and 2010, respectively.

In support of these transactions, the brokers/dealers provide collateral of cash, treasury obligations or letters of credit which exceed the value of the securities loaned. The brokers/dealers provide collateral to secure each loan in an amount equal to 102% and 105% of the market value of securities loaned of United States issuers and of non-United States issuers, respectively. The Master Trust bears the risk of loss with respect to the unfavorable change in fair value of the invested cash collateral. However, the brokers/dealers bear the risk of loss related to the decrease in fair value of the noncash collateral. At December 31, the amount of collateral provided by the brokers/dealers was as follows:

	2011	2010

4. Fair Value Measurements

FASB ASC No. 820, Fair Value Measurements and Disclosures, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in methodologies used at December 31, 2011 and 2010:

Cash and Cash Equivalents

Includes investments in U.S. government securities with maturities less than one year and commingled funds. The commingled funds are valued at cost which approximates fair value. Investments in U.S. government securities are valued at fair value, as determined by the trustee through independent sources, which approximates the last reported closing price on the last business day of the year.

Employees' Retirement Plans of Alcoa Inc. and Subsidiary Companies

Notes to Financial Statements

Fixed income Securities

These securities consist of U.S. government debt which are included as Level 1, and publicly traded U.S. and non-U.S. fixed interest obligations (principally corporate bonds and debentures) which are valued through consultation and evaluation with brokers in the institutional market using quoted prices and other observable market data and are included as Level 2. Additionally these securities consist of commercial and residential mortgage-backed securities which are valued by investment managers based on the most recent financial information available, which typically represents significant unobservable data. As such, these investments are generally classified as Level 3.

Equity Securities – Common Stocks and Futures Contracts

Valued at the closing price reported on the active market on which the individual securities are traded.

Equity Securities – Commingled Trust Funds and Gold Trust-Exchange Traded Fund

Valued at the net asset value ("NAV") of shares held by the Plans at year end.

Alternative Investments

Estimated at fair market value which considers, but is not limited to fair values reported by the investment advisor, audited financial statements, and independently appraised values. In the event that audited financial statements for these investments are not available in time to prepare the financial statements or management believes the value reported by the investment advisor does not accurately reflect fair value due to an event in the market place, management will adjust the reported value to fair value based upon information provided by the investment manager and independent valuation experts.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

5. Derivatives

Derivatives Policy

The Master Trust enters into contractual arrangements classified as derivatives in carrying out its investment strategy, principally to (1) manage interest rate risk within the portfolio, (2) manage exposure to a market more efficiently than could be accomplished through the use of cash markets, and (3) increase investment returns by reducing the cost of structuring the portfolio or by capturing value disparities between financial instruments. The Master Trust utilizes exchange traded instruments such as interest rate futures, options on futures, interest rate swaps and foreign currency forward contracts.

The following is a summary of the Master Trust's usage of derivatives:

Futures Contracts

A futures contract is a contractual agreement to make or take delivery of a standardized quantity of a specified grade or type of commodity or financial instrument at a specified future date in accordance with terms specified by a regulated future exchange.

The Master Trust may use treasury, eurodollar, and other fixed income futures contracts to manage exposure to interest rate risk and exposure in the market. Buying futures tends to increase the Master Trust's exposure to the underlying instrument held, while selling futures tends to reduce the exposure. The balance of futures at year-end is indicative of the average balance during the year.

A summary of the open futures contracts as of December 31, 2011 and 2010 is presented below:

Options on Futures Contracts

The Master Trust may buy or sell options on futures contracts to capture value disparities between financial instruments. Options strategies may be used to improve yields and enhance performance of the fixed income portfolio. Options on futures contracts are purchased or sold on regulated futures exchanges.

Interest Rate Swaps

The Master Trust may use interest rate swaps to manage exposure to interest rates within the portfolio or to capture value disparities between financial instruments. An interest rate swap typically involves the agreement with a counterparty to exchange variable rate and fixed rate payments with respect to a notional amount of principal on the value of an underlying instrument or index. Interest rate swaps are purchased or sold on regulated futures exchanges.

Foreign Currency Forwards

The Master Trust may use foreign currency forwards to capture value disparities between the fixed income and currency markets. Currency forwards may be purchased or sold to enhance returns in the fixed income portfolio. Foreign currency forwards are purchased or sold on regulated futures exchanges.

Activity and year end holdings of Options on Futures Contracts, Interest Rates Swaps and Foreign Currency Forwards were not significant to overall investment portfolio.

6. 401(h) Account

The Alcoa Salary Plan includes a medical-benefit component in addition to the normal retirement benefits to fund a portion of the postretirement obligations for retirees and their beneficiaries in accordance with Section 401(h) of the Internal Revenue Code ("IRC"). A separate account has been established and maintained in the Alcoa Salary Plan for the net assets related to the medical-benefit component (401(h) account). In accordance with IRC Section 401(h), the Alcoa Salary Plan's investments in the 401(h) account may not be used for, or diverted to, any purpose other than providing health benefits for retirees and their beneficiaries. Any assets transferred to the 401(h) account from the defined benefit pension plan in a qualified transfer of excess pension plan assets (and any income allocable thereto) that are not used during the plan year must be transferred out of the account to the pension plan. The related obligations for health benefits are not included in the Alcoa Salary Plan's obligations in the accumulated plan benefits but are reflected as obligations in the financial statements of the plan sponsor. The Alcoa Salary Plan's participants do not contribute to the 401(h) account. Employer contributions or qualified transfers to the 401(h) account are determined annually and are at the discretion of Alcoa. There were no contributions made to the 401(h) account in 2011 and 2010. Certain of the Alcoa Salary Plan's interest in the Master Trust are restricted to fund a portion of postretirement health benefits for retirees and their beneficiaries in accordance with IRC Section 401(h). Alcoa pays medical benefits to retirees through the Alcoa Retiree Healthcare Plan, which is not included in the Alcoa Salary Plan. This plan represents a portion of Alcoa's other postretirement employee benefits. During 2011 and 2010, 401(h) assets were used to pay \$55,854,472 and \$62,177,251 of retiree health benefits.

7. Accumulated Plan Benefits

Accumulated plan benefits are those future benefit payments that are attributable, under each Plan's provisions, to employees' service rendered to the benefit information date. Accumulated plan benefits comprise benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of deceased employees, and (c) present employees or their beneficiaries.

The actuarial present value of accumulated plan benefits is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The Plans' actuary made this determination.

Employees' Retirement Plans of Alcoa Inc. and Subsidiary Companies **Notes to Financial Statements** **December 31, 2011 and 2010** ---

Based upon actuarial estimates at January 1, 2011, the present value of accumulated plan benefits for the Plans included in the Master Trust is as follows:

8. Tax Status

The Internal Revenue Service has determined and informed the Company that the Plans and related trust are designed in accordance with applicable sections of the IRC. The Plans have been amended since receiving the determination letters. However, the Plans' administrator and tax counsel believe that the Plans are designed and are currently being operated in compliance with the applicable requirements of the IRC.

Determination letters received were dated as follows:

Alcoa Salary Plan	January 9, 2003
Alcoa Hourly Plan	January 9, 2003
Alcoa Subsidiaries Merged Inactive Plan	August 6, 2002
Suriname Plan I	July 1, 2002

U.S. GAAP require plan management to evaluate tax positions taken by the plan and recognized a tax liability (or asset) if the organization has taken an uncertain position that would not be sustained upon examination by the IRS. The plan administrator and its tax counsel have analyzed the tax positions taken by the plan and has concluded that as of December 31, 2011, there are no uncertain tax positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure to the financial statements. As such, no reserve is required under U.S. GAAP. The plan is subject to audit by the IRS; however, there are no current IRS audits for any tax periods in progress. The plan administrator and its tax council believe the Plan is no longer subject to IRS audit outside the statutory audit period.

RETIREMENT FROM DEFERRED VESTED STATUS: Former employees are assumed to commence payment of benefits at the earlier of Normal Retirement Age or the earliest age eligible for unreduced benefits.

FUTURE EXPENSES: Expenses based on prior year experience have been included in the normal cost.

BENEFIT AND COMPENSATION LIMITS: Limits on benefits due to Section 415 of the Internal Revenue Code and limits on compensation due to Section 401(a)(17) are not assumed to increase.

SPOUSE ASSUMPTION: It was assumed that 85% of participants would be married upon commencement of coverage for death benefits. The husband was assumed to be three years older than his wife.

ASSET VALUATION METHOD: Two-year average of adjusted market values. This method spreads asset gains/(losses) over a two year period on an annual basis. The gain/(loss) for each period is determined as the actual return during the period less the expected return based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third segment rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value. The discounted value of accrued contributions, if any, is included in the valuation assets.

VALUATION METHOD: The Funding Target is the present value of accrued benefits and based on compensation and service to date. The Target Normal cost is the present value of benefits expected to be accrued during the current plan year, including the effect of expected compensation increases during the year.

MISCELLANEOUS: The valuation was prepared on a going-plan basis; therefore, no allowance has been made for certain additional liabilities which may arise if some or all of the units of the Company are closed down. The valuation was based on participants in the Plan as of the valuation date and did not take future participants into account. No provision has been made for contingent liabilities with respect to nonvested terminated participants who may be reemployed. The valuation assumptions anticipate a modest rate of future inflation.
