Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Report of Independent Auditors

To the Participants and Benefit Plans Committee of the
Robert Bosch Fuel Systems LLC Hourly-Rated Employees' Pension Plan

We were engaged to audit the financial statements of the Robert Bosch Fuel Systems LLC Hourly-Rated Employees' Pension Plan (the "Plan") at December 31, 2011 and 2010 and for the years then ended, as listed in the accompanying index. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by The Northern Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of and for the years ended December 31, 2011 and 2010, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

1. Description of the Plan

The following brief description of the Robert Bosch Fuel Systems LLC Hourly-Rated Employees' Pension Plan (the "Plan") is provided for general information purposes only. Participants should refer to the Plan document for a more complete description.

The assets of the Plan are invested in the Robert Bosch LLC Master Retirement Trust ("Master Trust").

General

The Plan is a noncontributory, defined-benefit pension plan that is administered by a pension committee composed of representatives of Robert Bosch Fuel Systems LLC (the "Company" or "Plan Sponsor"). The Plan was created to provide pension benefits for permanent full-time hourly employees of the Company, who are represented by the DTC/UAW DDC/EMD Labor Agreement, for past credited service accrued through October 31, 1988, as certain former General Motors Corporation ("GM") hourly employees, and for credited service accrued since November 1, 1988, as employees of the Company. Under the terms of the DTC/GM Sales Agreement, the Company must assume the specific pension benefit levels and conditions as prescribed in the General Motors Supplemental Agreement of Hourly-Rated Pension through September 14, 1990. For those participants who subsequently transfer back to GM, amounts representing the present value of their accumulated benefits earned during their period of service with the Company, and associated net assets, will be transferred to GM (see Note 10). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

An employee of the Company is a participant in the Plan if they have attained age 21 and have completed one year of service, as defined in the Plan document, or were in the bargaining unit defined in the collective bargaining agreement between GM and the UAW, effective October 8, 1987, which became applicable to the Company as a successor employer on November 1, 1988. Effective August 9, 2011, participation in the Plan was frozen to newly hired employees. Current plan participants will continue to receive vesting service and credit service under the terms of the Plan document after August 9, 2011.

During 2003, the Company approved a Closure Agreement for its Kentwood, Michigan plant. The plant closure, originally effective December 31, 2003, has been subsequently extended to no later than July 31, 2013, with the company having an option to further extend the closure agreement by two additional years to July 31, 2015.

Contributions

The Company has agreed to voluntarily contribute such amounts as are necessary to provide assets sufficient to meet the benefits to be paid to Plan participants. The Plan has met the ERISA minimum funding requirements for 2011 and 2010.

Benefit Payments

A participant is eligible for normal retirement benefits on or after the attainment of age 65. For normal retirement, a pension is payable monthly for the life of the participant based on the number of years of credited service at the time of retirement and the applicable monthly benefit factor, which is determined by the position held by the employee at the time of retirement.

A participant is eligible for early retirement benefits, subject to certain restrictions as defined in the Plan document. Pension benefits will be reduced by a set percentage per year based upon age, as defined in the Plan document, for each year a participant receives benefits before their 62nd year.

An employee who is totally and permanently disabled prior to attaining age 65 and has at least 10 years of credited service shall be eligible for disability pension as provided for in the Plan.

Participants may be entitled to receive certain supplemental early retirement benefits as defined in the Plan document. Certain participants affected by the Closure Agreement may elect to receive a "mutually satisfactory" (as defined by the Plan document) supplemental early retirement benefit if they have attained age 50 and have at least 10 years of credited service.

A participant with five years of credited service, as defined in the Plan document, is fully vested.

Pensions and supplements are paid monthly. The Plan provides surviving spouse and joint and survivor coverage benefits, as defined in the Plan document.

Plan Termination
Although it has not expressed any intent to do so, the Company has the right to terminate the Plan subject to the provisions of ERISA and as described in the Plan document. Should the Plan terminate at some future time, its net assets will generally not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on the priority of those benefits, the financial condition of the Company, and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation ("PBGC") at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Administrative Expenses
All administrative expenses are paid by the Plan to the extent they are not paid by the Company.

2. Significant Accounting Policies

Basis of Accounting
The financial statements of the Plan have been prepared on the accrual basis of accounting and in conformity with accounting principles generally accepted in the United States of America ("GAAP").

Benefit Payments
Benefits are recorded when paid.

Investment Valuation and Income Recognition
The Master Trust's investments are stated at fair value. The fair value of the participation units in the common collective trusts is based on the net asset value of units held on the last business day of the Plan year. Securities such as common stock, preferred stock, registered investment companies, and real estate investment trusts, traded on a national securities exchange are valued at the last reported sales price on the last business day of the Plan year; investments traded in the over-the-counter market and listed securities for which no sale was reported on that date are valued at the average of the last reported bid and ask prices. Fixed income securities such as corporate debt instruments and U.S. government securities are valued based on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available, the bond is valued using matrix pricing or models from reputable pricing vendors.

Investment transactions of the Master Trust are recorded on the trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Actuarial Present Value of Accumulated Plan Benefits
Accumulated plan benefits (see Note 3) are those estimated future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to: (a) retired or terminated employees or their beneficiaries; and (b) present employees or their beneficiaries. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included to the extent they are deemed attributable to employee service rendered to the valuation date.

Use of Estimates
The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan administrator to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

New Accounting Pronouncements
In January 2010, the Financial Accounting Standards Board ("FASB") issued authoritative guidance intended to improve disclosures about fair value measurements. The guidance requires entities to disclose significant transfers in and out of fair value hierarchy levels and reasons for the transfers and to present information about purchases, sales, issuances and settlements separately in the reconciliation of fair value measurements using significant unobservable inputs (Level 3). Additionally, the guidance clarifies that a reporting entity should provide fair value measurements for each class of assets and liabilities and disclose the inputs and valuation techniques used for fair value measurements using significant other observable inputs (Level 2) and significant unobservable inputs (Level 3). This guidance is effective for annual periods beginning after December 15, 2009 except for disclosures about purchases, sales, issuances and settlements in the Level 3 reconciliation, which is effective for annual periods beginning after December 15, 2010. The Plan has expanded disclosures in Notes 5 and 6 to comply with the aforementioned fair value guidance. As this guidance provides only disclosure requirements, the adoption of the standard did not impact the Plan's financial statements.

In May 2011, the FASB issued authoritative guidance to improve the comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with accounting principles generally accepted in the United States of America and International Financial Reporting Standards by changing the wording used to describe many of the requirements for measuring fair value and disclosing information about fair value measurements. The amendments include those that clarify the FASB's intent about the application of existing fair value measurement and disclosure requirements and those that change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements. This Accounting Standards Update, which is to be applied prospectively, is effective for annual periods beginning after December 15, 2011. The Plan will expand disclosures in Notes 5 and 6 as necessary to comply with the aforementioned fair value guidance. As this guidance provides only disclosure requirements, the adoption of the standard will not impact the Plan's financial statements.

3. Accumulated Plan Benefits

An independent actuary estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits as of January 1, 2011 was as follows:

Vested benefits	
Participants currently receiving benefits	$ 53,796,347
Other participants	19,518,870
Total vested benefits	73,315,217
Nonvested benefits	1,535,807
Total actuarial present value of accumulated plan benefits	$ 74,851,024

The following summarizes the significant components of the change in the present value of accumulated plan benefits from January 1, 2010 to 2011:

Actuarial present value of accumulated plan benefits as of January 1, 2010	$ 72,627,473
Increase (decrease) during the year attributable to	
Benefits accumulated and actuarial experience gain/loss	1,332,924
Interest due to change in discount period	5,454,980
Benefits paid	(4,564,353)
Actuarial present value of accumulated plan benefits as of January 1, 2011	$ 74,851,024

Significant assumptions underlying the actuarial computations are as follows:

Interest rate	7.75% as of January 1, 2011 and 2010
Retirement rate	Less than 30 years service - 10% by age 55; 10% by age 60; 25% by age 62; 50% by age 65; 100% by age 70 30 years service or more - 25% by age 55; 25% by age 60; 25% by age 62; 50% by age 65; 100% by age 70
Mortality	RP-2000 Combined Table, projected to 2015 with no collar adjustment

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Certification of Investment Information

All investment information disclosed in the accompanying financial statements, including plan interest in Robert Bosch LLC Master Retirement Trust at December 31, 2011 and 2010, plan interest in net investment income of Robert Bosch LLC Master Retirement Trust for the years then ended, and the investments and investment income information of the Master Trust presented in Note 5, was obtained or derived from information supplied to the Plan administrator and certified as complete and accurate by The Northern Trust Company, the trustee.

5. Investment in Master Trust

The Plan's investments are in the Master Trust, which was established for the investment of assets of the Plan, and several other Company-sponsored retirement plans. Each participating retirement plan has an undivided interest in the Master Trust. At December 31, 2011 and 2010, the Plan's interest in the net assets of the Master Trust was approximately 6.0%. Investment income and expenses are allocated monthly to the Plan based upon its pro rata share in the net assets of the Master Trust.

The following table presents the fair value of investments for the Master Trust at December 31:

	2011	2010
Investments, at fair value		
Common collective trusts	$ 867,803,179	$ 724,560,030

Net assets	$ 1,349,179,020	$ 1,247,486,952

Investment income for the Master Trust was as follows:

	2011	2010
Interest and dividend income	$ 10,961,059	$ 9,534,052
Net appreciation in fair value of investments	7,971,742	139,861,755
	$ 18,932,801	$ 149,395,807

During 2011 and 2010, the Master Trust's investments (including investments bought and sold, as well as held during the year) appreciated (depreciated) in fair value as follows:

	2011	2010
Investments, at fair value		
Common collective trusts	$ 50,868,023	$ 78,412,633
Common stock	(40,222,608)	60,872,619

Real estate investment trust	(1,100,258)	472,737
Other	114,025	(81,522)
	$ 7,971,742	$ 139,861,755

6. Fair Value Measurements

The FASB established a framework to increase consistency and comparability in fair value measurements. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Master Trust has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

For a description of the valuation methodologies used for assets measured at fair value see Investment Valuation and Income Recognition under Note 2. These methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level within the fair value hierarchy the Master Trust's investment assets at fair value as of December 31, 2011 and 2010:

Common collective trusts consist of pools of investments used by institutional investors to obtain equity and fixed income market exposures by investing in funds which are intended to mirror market indices. They are valued on the basis of the relative interest of each participating investor in the fair value of the underlying assets of each of the respective common collective trusts. The underlying assets are valued based on the NAV as provided by the investment account manager and are classified in Level 2 of the fair value hierarchy. These investments can be traded daily with a time delay for international trades. As of December 31, 2011 the Plan is not holding any unfunded commitments. Common collective trusts included in the Master Trust and their relative benchmarks include:

Common Collective Trust	Description	Benchmark	Redemption
Collective Short Term Investments Fund	Short term cash investments	90 day U.S. treasury bill	Daily with time delay for international
Lazard Emerging Markets Fund	Emerging markets investments	MSCI Emerging Markets Gross	Daily with time delay for international

7. Risks and Uncertainties

The Master Trust invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

8. Tax Status

The Internal Revenue Service has determined and informed the Company in a letter dated July 6, 2009, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (the Code). Although the Plan has been amended since receiving the determination letter, the plan administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code and therefore believe that the Plan is qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2011, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes the Plan is no longer subject to income tax examinations for years beginning prior to January 1, 2008.

9. Party-in-Interest Transactions

The Master Trust invests in common collective trusts managed by the Trustee or its affiliates. These transactions qualify as exempt party-in-interest transactions.

10. Subsequent Events

Effective as of January 1, 2012, the benefit formula, which was previously adjusted annually in accordance with the Consumer Price Index ("CPI"), will no longer be adjusted in accordance with the CPI, but will instead remain fixed at the respective rate applicable to each type of benefit that was in effect as of December 31, 2011.

In April 2012, the Company finalized a pension asset transfer in accordance with the terms and conditions of the asset transfer agreement between the Company and GM. Assets of the Plan that were transferred to GM for participants who subsequently transferred back to GM through March 2012 under this agreement totaled $14,625,006. Corresponding accumulated plan benefits, as measured under IRC section 414(l) were also transferred to GM. Under ASC 960, such accumulated plan benefits totaled $14,239,638.

The Plan has evaluated the events and transactions that have occurred through October 10, 2012, the date the financial statements were available to be issued, and noted no other items requiring adjustment to the financial statements or additional disclosures.

Schedule SB, line 22 – Description of Weighted Average Retirement Age

For each active participant, an expected retirement age was calculated weighted in proportion to the probability (as shown in the retirement rates table in the attachment to Schedule SB, Part V – Statement of Actuarial Assumptions/Methods) that the individual would remain an active participant to each age and then retire at that age. The plan's weighted average retirement age of 59 is the arithmetic average of the expected retirement ages of all participants on January 1, 2011.

Changes in Methods and Assumptions Since Last Year

For contribution purposes:
The interest crediting rate for the Bosch Pension Plan and the Discontinued Operations Plan changed from 6.00% in 2010 to 5.00% in 2011.
The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.
The mortality table used for the lump sum conversion was updated to use a 2011 mortality table.

Data Sources

Towers Watson used asset data supplied by the trustee. The Company furnished participant data, the dates and amounts of the prior year contributions as well as the accrued pension cost at year-end.
Data was reviewed for reasonableness and consistency, but no audit was performed. Towers Watson is not aware of any errors or omissions in the data that would significantly affect the valuation results.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Plan Provisions — Fuel Systems Hourly

Effective Date	November 1, 1988. The most recent amendment, December 16, 2010. The plan was amended and restated effective as of January 1, 2008.
Eligibility	Any employee is a participant in the plan if he is in the bargaining unit defined in the collective bargaining agreement between Robert Bosch Fuel Systems and the UAW.
Definitions	
Credited Service	0.1 of a year for each 170 hours of credit during a calendar year up to a maximum of 1 full year for 1,700 or more hours of credit.
Eligibility Service	Employee becomes a participant in plan upon completion of 750 hours in any 12 month period starting with date of hire. A participant must be age 21.
Vesting Service	Years and completed months rounded to nearest tenth.

Note: Service and benefits are adjusted to reflect benefits payable by GM but for which assets have not been transferred as of the valuation date including adjustments for past payments made by GM for which the DTC trust held the assets.

Eligibility for Benefits	
Normal retirement	Age 65 and one year of credited service.
Early retirement	An employee with at least 10 years of credited service may retire at any time after age 60; or age 55-60, if his years of service and age total 85 or more; or at any time after 30 years of service.
Mutual consent early retirement	An employee with at least 10 years of credited service may be retired by the company under mutually satisfactory conditions at any time after age 55 and qualify for a special early retirement pension.
Disability retirement	An employee with at least 10 years of credited service who becomes totally and permanently disabled before age 65 may qualify for a disability pension.
Vested pension	An employee who has 5 or more years of credited or vesting service at the date of his termination of employment is eligible to receive a deferred vested benefit.

Amounts of Benefits

Normal retirement

The amount of monthly normal retirement benefit is equal to the life income benefit rate determined from the following table (based on the benefit class code applicable at retirement), multiplied by the number of years of credited service at retirement.

Retirement Date After 3/01	Benefit Class Code	Benefit Rate: Payments from 4/1/07 through 3/08	Payments from 4/1/08 through 3/09	Payments from 4/1/09 through 3/10	Payments from 4/1/10 through 3/11	Payments from 4/1/11 and after
	A	$46.39	$48.41	$48.18	$49.81	$50.64
	B	46.64	48.66	48.43	50.06	50.89
	C	46.89	48.91	48.68	50.31	51.14
	D	47.14	49.16	48.93	50.56	51.39

Effective in April, 2000 and each year thereafter during the life of this agreement, the Benefit Class A rate will be adjusted by the percent change in the official Consumer Price Index for Urban Wage Earners and Clerical Workers published by the Bureau of Labor Statistics (1967=100) during the previous calendar year. The Benefit Class B, C and D rates will be set based on the Benefit Class A rate by adding twenty-five cents ($.25), fifty cents ($.50) and seventy-five cents ($.75) respectively. Employees who retire during the succeeding year will have their pension based on these amounts.

Early retirement

For those with 30 or more years of service at retirement: Pension benefits are determined as for normal retirement but based on service at early retirement. Regular benefits are reduced before age 62 as for those with less than 30 years of service at retirement. At age 62, the full regular benefit becomes payable.

In addition, the monthly benefit payable before age 62 is subject to the following minimums:

Retirement Dates	Minimum Benefit: Payments from 4/1/07 through 3/08	Payments from 4/1/08 through 3/09	Payments from 4/1/09 through 3/10	Payments from 4/1/10 through 3/11	Payments from 4/1/11 and after
	$2,699.67	$2,817.56	$2,804.36	$2,898.70	$2,947.43

Effective in April, 2000 and each year thereafter during the life of this agreement, the temporary benefit rate will be adjusted by the percent change in the official Consumer Price Index for Urban Wage Earners and Clerical Workers published by the Bureau of Labor Statistics (1967=100) during the previous calendar year.

For those with less than 30 years of service at retirement: Pension benefits are determined as for normal retirement reduced for retirement before age 62 by applying the applicable factor from the following table:

Age at Retirement	*Factor*
55	.579
56	.635
57	.694
58	.752
59	.808
60	.867
61	.933

If the employee's years of service and age at retirement total 85 or more, the reduction applicable before age 62 is restored at age 62.

In addition, for those retiring before age 62 an "interim supplement" equal to the amount determined from the following table multiplied by years of credited service is payable until age 62 or prior eligibility for unreduced Social Security benefits.

		Interim Supplement Benefit Rate				
If Retirement Date After 3/01	*Age at Retirement*	*Payments from 4/1/07 through 3/08*	*Payments from 4/1/08 through 3/09*	*Payments from 4/1/09 through 3/10*	*Payments from 4/1/10 through 3/11*	*Payments from 4/1/11 and after*
	55	$19.45	$20.30	$20.20	$20.88	$21.23
	56	22.95	23.95	53.84	24.64	25.05
	57	27.79	29.01	28.87	29.84	30.35
	58	32.52	33.94	33.78	34.92	35.50
	59	36.38	37.97	37.80	39.07	39.72
	60	42.03	43.86	43.66	45.13	45.89
	61	42.03	43.86	43.66	45.13	45.89

Effective in April, 2000 and each year thereafter during the life of this agreement, the interim supplemental rates will be adjusted by the percent change in the official Consumer Price Index for Urban Wage Earners and Clerical Workers published by the Bureau of Labor Statistics (1967=100) during the previous calendar year.

Mutual consent retirement	The monthly benefit is the same as for regular early retirement except in the case of an employee with less than 30 years of service at retirement. For such employee there is no reduction for commencement before age 62 and in lieu of the "interim supplement," a "temporary benefit" is payable until age 62 equal to the product of credited service (maximum 30 years) and the temporary benefit rate. Effective April 1, 2007 the rate of such temporary benefit shall be $43.13 per year of credited service, with a maximum of $1,293.90 per month. Effective April 1, 2008 the rate of such temporary benefit shall be $45.02 per year of credited service, with a maximum of $1,350.60 per month. Effective April 1, 2009 the rate of such temporary benefit shall be $44.81 per year of credited service, with a maximum of $1,344.30 per month. Effective April 1, 2010 the rate of such temporary benefit shall be $46.31 per year of credited service, with a maximum of $1,389.30 per month. Effective April 1, 2011 the rate of such temporary benefit shall be $47.09 per year of credited service, with a maximum of $1,412.70 per month. Effective in April, 2000 and each year thereafter during the life of this agreement, the temporary benefit rate will be adjusted by the percent change in the official Consumer Price Index for Urban Wage Earners and Clerical Workers published by the Bureau of Labor Statistics (1967=100) during the previous calendar year.
Disability retirement	The amount of disability retirement pension is determined as for special early retirement.
Vested pension	The amount of monthly deferred vested benefit is calculated as for normal retirement above based on Credited Service at time of termination. The deferred vested is payable beginning on the first day of the month after the employee's 65th birthday and monthly thereafter during his lifetime; however, an employee who terminates with at least 5 years of vesting service may elect, instead, a monthly benefit starting on the first day of any month after he becomes age 60, and before age 65, in which event his monthly benefit is reduced by .6% per month before age 65; on the first day of any month after he becomes age 55, or before age 60, in which event his monthly benefit is reduced per the table in Article VII, Section 7.2(c)(3).
Preretirement death benefits	Death after meeting the eligibility requirements for retirement: If an employee who is married dies before retirement but after becoming eligible to retire at his own option, his spouse will be entitled to the same survivor benefit as if the employee had retired and commenced receiving his pension under the normal form of payment applicable to married participants. Death while vested but not eligible for early retirement: If an employees dies after satisfying the vesting requirements but before becoming eligible for retirement, his spouse will be entitled to a survivor's benefit provided that the spouse and participant are married and that the participant had not waived coverage under this provision. The survivor's benefit

commences on the earliest date on which the participant could have commenced receiving a pension. The amount of survivor's benefit is 60% of the benefit payable to the participant at the earliest possible commencement date, based on the pension accrued by the participant at the date of his death.

Special age 65 benefit — Participants eligible for postretirement medical benefit also receive a Medicare Part B benefit. Medicare Part B reimbursement for 2006 – $88.50; 2007 – $93.50; 2008 – $96.40 (maximum amount).

Forms of Payment

Normal forms — Unmarried: Single life annuity.

Married: Employee's pension is reduced to 95% (and increased (to a maximum of 100%) or decreased .5% (no lower limit) for each year by which employee is more than 5 years younger but no more than 10 years or older, respectively, than his spouse); upon his death after retirement, 60% of such pension will be paid to his spouse for life. Reductions of a married participant's pension is restored if the spouse dies while the participant is still living or, in certain cases, if the participant and spouse are divorced. Effective January 1, 2008, the employee's pension will be actuarial reduced, however the reduction cannot be greater than the reduction prior to January 1, 2008.

Optional forms — Optional forms of payment may be taken on an actuarially reduced basis if the participant elects out of the Normal Form. This includes a single life annuity, a Joint and 60% Survivor Annuity, and a Joint and 75% Survivor Annuity.

Changes in Plan Provisions Since Prior Year

The current bargaining agreement was extended until July 31, 2011. Plan provisions reflect any current year changes in the Internal Revenue Code maximum on benefits and pay.

Schedule SB, Part V – Summary of Plan Provisions

Please apply to note under Plan Provision Definitions: …including adjustments for past payments made by GM for which the DTC trust held the assets.

Benefits are generally converted from the normal form of payment to the optional form of payment on a simplified actuarial equivalence basis, which varies depending on the plan formula. Benefits accrued under multiple prior plan formulas may be converted using multiple bases.

The following actuarial equivalence bases apply to the Robert Bosch Fuel Systems LLC Hourly Rated Employees' Pension Plan:

Mortality	Interest
417(e)(3) Applicable Mortality Table	6.0%

The 60% Joint-and-Survivor conversion factor is alternatively based upon the greater of the simplified actuarial equivalence basis and the actuarial equivalence using the above basis.

Form	Factor	Adjustment for each year survivor is more than five years older/younger than the participant, with a maximum factor of 1.0
60% Joint-and-Survivor	0.95	+/- 0.005

Note that this summary is intended to be a reasonably representative sample of the optional form conversion factors for the plan. It is not intended to be an exhaustive list of all the factors used in the conversion of benefits from the normal form of payment to any optional form of payment offered by the plan.

Schedule SB, line 25 – Change in Method

Below is a summary of significant changes that were made.

The valuation software used to produce the actuarial information submitted on this schedule has been refined to reflect evolving understanding of PPA requirements, and such modifications may be considered to be a method change. The percentage changes in funding target, target normal cost and plan assets due to the refinements in the software are each less than 2% (disregarding the effects of any changes that are automatically approved under final IRC 430 regulations), and the modifications to the software were designed to produce results no less accurate than the results produced by the software prior to the change. Therefore the change in funding method due to a change in valuation software receives automatic approval under IRS Announcement 2010-3.
