Report of Independent Auditors

To the Benefit Plans Committee and Participants of the
Robert Bosch LLC New Richmond Production Hourly Retirement Plan

We were engaged to audit the financial statements of the Robert Bosch LLC New Richmond Production Hourly Retirement Plan (the "Plan") at December 31, 2011 and 2010 and for the years then ended, as listed in the accompanying index. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by The Northern Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of and for the years ended December 31, 2011 and 2010, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

New Richmond Production Hourly Retirement Plan

Notes to Financial Statements

December 31, 2011 and 2010

1. Description of the Plan

The following brief description of the Robert Bosch LLC New Richmond Production Hourly Retirement Plan (the "Plan") is provided for general information purposes only. Participants should refer to the Plan document for a more complete description.

The assets of the Plan are invested in the Robert Bosch LLC Master Retirement Trust ("Master Trust").

General

Effective July 1, 2004, all the stock of Doboy Inc. (the "Employer") was acquired from SIG Holdings USA Inc. ("SIG") by an affiliate of Robert Bosch LLC (the "Company" or "Bosch"), and the Employer thereby became a member of the Bosch controlled group in the United States. As a result of this transaction, certain employees of the Employer who are represented by Local 1217 of the International Association of Machinists (IAM) (the "Union") became employees of Bosch. Prior to the purchase of the Employer by Bosch, these employees were participants in the Doboy – New Richmond Production Retirement Plan (the "SIG Plan") sponsored by SIG.

The Plan, established July 1, 2004, is a noncontributory, defined-benefit pension plan that is administered by a pension committee composed of representatives of the Company and participating subsidiaries and affiliates. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

The Plan covers all Union employees of Bosch Packaging Technology, Inc. facilities of the Company. All Union employees who were participants in the SIG Plan on June 30, 2004, became participants in the Plan on July 1, 2004. All other Union employees are eligible to participate in the Plan on May 1 or November 1 following completion of one year of eligibility service.

Contributions

The Company has agreed to voluntarily contribute such amounts as are necessary to provide assets sufficient to meet the benefits to be paid to Plan participants. The Plan has met the ERISA minimum funding requirements for 2011 and 2010.

Benefit Payments

A participant is eligible for normal retirement benefits on or after the attainment of age 65. The monthly benefit is based upon a participant's credited service and the pension benefit level in effect at termination of employment as follows:

Date of Termination of Employment	Pension Benefit Level
July 1, 2004 to October 31, 2004	\$ 20.00
On or after November 1, 2004	\$ 20.50

Participants terminating employment on or after November 1, 2004 receive an additional \$0.50 (in addition to the \$20.50) for each year of credited service worked at SIG.

Robert Bosch LLC
New Richmond Production Hourly Retirement Plan
Notes to Financial Statements
December 31, 2011 and 2010

A participant is eligible for early retirement benefits on or after the attainment of age 55 and before his normal retirement date and the completion of 5 years of vesting service, as defined in the Plan document. Pension benefits will be reduced by a set percentage per year based upon age, as defined in the Plan document, for each year a participant receives benefits before his or her 65th year.

At age 65, a participant is automatically vested. If terminated prior to age 65, a participant with 5 years of service, each of at least 1,000 hours of service, will be vested and therefore entitled to begin receiving retirement benefits as early as attaining the age of 55.

Optional forms of payment are available if elected by the participant as described in the Plan document. A participant that is married at the date of retirement would receive a joint and 50% survivor benefit unless spousal consent is obtained for an alternate benefit payment. Participants' surviving spouses are entitled to death benefits, as defined in the Plan document.

Plan Termination

Although it has not expressed any intent to do so, the Company has the right to terminate the Plan subject to the provisions of ERISA and as described in the Plan document. Should the Plan terminate at some future time, its net assets will generally not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on the priority of those benefits, the financial condition of the Company, and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation ("PBGC") at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Administrative Expenses

All administrative expenses are paid by the Plan to the extent they are not paid by the Company.

2. Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan have been prepared on the accrual basis of accounting and in conformity with accounting principles generally accepted in the United States of America ("GAAP").

Benefit Payments

Benefits are recorded when paid.

Investment Valuation and Income Recognition

The Master Trust's investments are stated at fair value. The fair value of the participation units in the common collective trusts is based on the net asset value of units held on the last business day of the Plan year. Securities such as common stock, preferred stock, registered investment companies, and real estate investment trusts, traded on a national securities exchange are valued at the last reported sales price on the last business day of the Plan year; investments traded in the over-the-counter market and listed securities for which no sale was reported on that date are valued at the average of the last reported bid and ask prices. Fixed income securities such as corporate debt instruments and U.S. government securities are valued based on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available, the bond is valued using matrix pricing or models from reputable pricing vendors.

December 31, 2011 and 2010

Investment transactions of the Master Trust are recorded on the trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits (see Note 3) are those estimated future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to: (a) retired or terminated employees or their beneficiaries; and (b) present employees or their beneficiaries. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included to the extent they are deemed attributable to employee service rendered to the valuation date.

Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan administrator to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

New Accounting Pronouncements

In January 2010, the Financial Accounting Standards Board ("FASB") issued authoritative guidance intended to improve disclosures about fair value measurements. The guidance requires entities to disclose significant transfers in and out of fair value hierarchy levels and reasons for the transfers and to present information about purchases, sales, issuances and settlements separately in the reconciliation of fair value measurements using significant unobservable inputs (Level 3). Additionally, the guidance clarifies that a reporting entity should provide fair value measurements for each class of assets and liabilities and disclose the inputs and valuation techniques used for fair value measurements using significant other observable inputs (Level 2) and significant unobservable inputs (Level 3). This guidance is effective for annual periods beginning after December 15, 2009 except for disclosures about purchases, sales, issuances and settlements in the Level 3 reconciliation, which is effective for annual periods beginning after December 15, 2010. The Plan has expanded disclosures in Notes 5 and 6 to comply with the aforementioned fair value guidance. As this guidance provides only disclosure requirements, the adoption of the standard did not impact the Plan's financial statements.

In May 2011, the FASB issued authoritative guidance to improve the comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with accounting principles generally accepted in the United States of America and International Financial Reporting Standards by changing the wording used to describe many of the requirements for measuring fair value and disclosing information about fair value measurements. The amendments include those that clarify the FASB's intent about the application of existing fair value measurement and disclosure requirements and those that change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements. This Accounting Standards Update, which is to be applied prospectively, is effective for annual periods beginning after December 15, 2011. The Plan will expand disclosures in Notes 5 and 6 as necessary to comply with the aforementioned fair value guidance. As this guidance provides only disclosure requirements, the adoption of the standard will not impact the Plan's financial statements.

3. Accumulated Plan Benefits

An independent actuary estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits at January 1, 2011 was as follows:

Vested benefits	
Participants currently receiving payments	\$ 182,132
Other participants	765,160
Total vested benefits	947,292
Nonvested benefits	27,789
Total actuarial present value of accumulated plan benefits	<u>\$ 975,081</u>

The following summarizes the significant components of the change in the present value of accumulated plan benefits from January 1, 2010 to 2011:

Actuarial present value of accumulated plan benefits as of January 1, 2010	<u>\$ 821,668</u>
Increase during the year attributable to	
Benefits accumulated and actuarial experience gain/loss	107,966
Interest due to change in discount period	63,011
Benefits paid	<u>(17,564)</u>
Actuarial present value of accumulated plan benefits as of January 1, 2011	<u>\$ 975,081</u>

Significant assumptions underlying the actuarial computations are as follows:

Interest rate	7.75% as of January 1, 2011 and 2010
Retirement rate	5% by age 55; 10% by age 60; 30% by age 62; 100% by age 65
Mortality	RP-2000 Combined Table, projected to 2015 with no collar adjustment

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Certification of Investment Information

All investment information disclosed in the accompanying financial statements, including plan interest in Robert Bosch LLC Master Retirement Trust at December 31, 2011 and 2010, plan interest in net investment income of Robert Bosch LLC Master Retirement Trust for the years then ended, and the investments and investment income information of the Master Trust presented in Note 5, was obtained or derived from information supplied to the Plan administrator and certified as complete and accurate by The Northern Trust Company, the trustee.

5. Investment in Master Trust

The Plan's investments are in the Master Trust, which was established for the investment of assets of the Plan, and several other Company-sponsored retirement plans. Each participating retirement plan has an undivided interest in the Master Trust. At December 31, 2011 and 2010, the Plan's interest in the net assets of the Master Trust was approximately .09% and .08%, respectively. Investment income and expenses are allocated monthly to the Plan based upon its pro rata share in the net assets of the Master Trust.

The following table presents the fair value of investments for the Master Trust at December 31:

	2011	2010
Investments, at fair value		
Common collective trusts	\$ 867,803,179	\$ 724,560,030

6. Fair Value Measurements

The FASB established a framework to increase consistency and comparability in fair value measurements. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Master Trust has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

For a description of the valuation methodologies used for assets measured at fair value, see Investment Valuation and Income Recognition under Note 2. These methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy the Master Trust's investment assets at fair value as of December 31, 2011 and 2010:

Common collective trusts consist of pools of investments used by institutional investors to obtain equity and fixed income market exposures by investing in funds which are intended to mirror market indices. They are valued on the basis of the relative interest of each participating investor in the fair value of the underlying assets of each of the respective common collective trusts. The underlying assets are valued based on the NAV as provided by the investment account manager and are classified in Level 2 of the fair value hierarchy. These investments can be traded daily with a time delay for international trades. As of December 31, 2011 the Plan is not holding any unfunded commitments. Common collective trusts included in the Master Trust and their relative benchmarks include:

7. Risks and Uncertainties

The Master Trust invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes would be material to the amounts reported in the Statement of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

8. Tax Status

The Internal Revenue Service has determined and informed the Company in a letter dated September 27, 2012, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (the "Code"). The plan administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code and therefore believe that the Plan is qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2011, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes the Plan is no longer subject to income tax examinations for years beginning prior to January 1, 2008.

9. Party-in-Interest Transactions

The Master Trust invests in common collective trusts managed by the Trustee or its affiliates. These transactions qualify as exempt party-in-interest transactions.

10. Subsequent Events

The Plan has evaluated events and transactions that have occurred through October 10, 2012, the date the financial statements were available to be issued, and noted no items requiring adjustment to the financial statements or additional disclosures.

Changes in Methods and Assumptions Since Last Year	For contribution purposes: The interest crediting rate for the Bosch Pension Plan and the Discontinued Operations Plan changed from 6.00% in 2010 to 5.00% in 2011. The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements. The mortality table used for the lump sum conversion was updated to use a 2011 mortality table.	
Data Sources	Towers Watson used asset data supplied by the trustee. The Company furnished participant data, the dates and amounts of the prior year contributions as well as the accrued pension cost at year-end. Data was reviewed for reasonableness and consistency, but no audit was performed. Towers Watson is not aware of any errors or omissions in the data that would significantly affect the valuation results.

Schedule SB, Part V – Summary of Plan Provisions

Benefits are generally converted from the normal form of payment to the optional form of payment on an actuarially equivalent basis, which varies depending on the plan formula. Benefits accrued under multiple prior plan formulas may be converted using multiple bases.

The following actuarial equivalence bases apply to the New Richmond Production Hourly Pension Plan:

<u>Mortality</u>	<u>Interest</u>
417(e)(3) Applicable Mortality Table	6.0%

Note that this summary is intended to be a reasonably representative sample of the optional form conversion factors for the plan. It is not intended to be an exhaustive list of all the factors used in the conversion of benefits from the normal form of payment to any optional form of payment offered by the plan.

Schedule SB, line 25 – Change in Method

Below is a summary of significant changes that were made.

The valuation software used to produce the actuarial information submitted on this schedule has been refined to reflect evolving understanding of PPA requirements, and such modifications may be considered to be a method change. The percentage changes in funding target, target normal cost and plan assets due to the refinements in the software are each less than 2% (disregarding the effects of any changes that are automatically approved under final IRC 430 regulations), and the modifications to the software were designed to produce results no less accurate than the results produced by the software prior to the change. Therefore the change in funding method due to a change in valuation software receives automatic approval under IRS Announcement 2010-3.

Plan Provisions — New Richmond Hourly

Effective Date	Effective July 1, 2004. The plan was restated effective January 1, 2007 and was last amended effective December 16, 2010.
Participant	Each Employee who was a participant in the SIG Plan on June 30, 2004 shall become a Participant in this Plan on the Effective Date. In addition, each Employee who was not a participant in the SIG Plan on June 30, 2004, but who completes one year of Eligibility Service on or before January 1, 2005 shall enter the Plan as a Participant on January 1, 2005, provided that he is an Employee on that date. New hires are eligible to participate on 1/1 or 7/1 next following completion of 1,000 hours in any anniversary year.
Definitions	
Credited service	Service after June 30, 2004 measured in whole and fractional years based on hours. A full year of credited service is granted if the employee works 2,000 or more hours in one Plan Year. Total credited service (including SIG service) cannot exceed 45 years.
SIG Credited service	Credited Service with SIG Dobby Inc. as of June 30, 2004 as defined in the SIG Plan for participants who were employees as of the Effective Date.
Vesting service	Plan Years in which an employee is credited with 1,000 or more Hours of Service including vesting service credited under the SIG Plan as outlined in the plan document.
Eligibility for Benefits	
Normal retirement	A participant is eligible for normal retirement on or after the attainment of age 65.
Early retirement	A participant is eligible for early retirement on or after the attainment of age 55 and after the completion of 5 years of Vesting Service and before his Normal Retirement Date.
Deferred vested pension	A participant is entitled to a vested pension benefit payable as early as age 55 if he terminates for any reason other than death on or after the completion of 5 years of Vesting Service.
Preretirement death	A participant's spouse is eligible for pension benefits if the participant had attained the right to a vested pension and died before any payments commenced if married at least one year prior to date of death.
Postretirement death	No benefits shall be paid from the Plan to any person after the death of a participant unless so specified by form of payment chosen.
Disability benefit	A participant is eligible for disability benefits on or after the completion of 5 years of Vesting Service and is determined by the Social Security Administrator to have become Totally and Permanently Disabled during the course of his employment.

Forms of Payment

Normal form	The normal form of payment for a single employee is a life annuity. The normal form of a payment for a married employee is a Joint plus 50% Survivor Annuity, actuarially reduced from a life annuity.
Optional form	Optional forms of payment may be taken on an actuarially reduced basis if the participant elects out of the Normal Form. This includes a single life annuity, a 10 year certain and life annuity, a Joint and 50% Survivor Annuity, a Joint and 66 2/3% Survivor Annuity, and a Joint and 75% Survivor Annuity.

Amounts of Benefits

Normal retirement	For participants separating on or after November 1, 2004, the Accrued Retirement Benefit is the sum of (a) and (b) as follows: (a) \$20.50 for each full and fractional year of Credited Service earned after July 1, 2004. (b) \$0.50 for each full and fractional year of SIG Credited Service as of June 30, 2004.
Early retirement	The benefit calculated as for normal retirement above based on Credited Service at termination. This amount shall be reduced by 1/2% for each complete calendar month prior to the participant's Normal Retirement Date.
Deferred vested pension	The benefit calculated as for normal retirement above based on Credited Service at termination. For benefits commencing prior to age 65, the benefit is reduced using same factors as early retirement.
Preretirement death	A monthly benefit payable to the spouse of a participant for the duration of the spouse's life commencing at the earliest age at which the participant could have commenced receiving benefits in the amount of 50% of the benefit as for normal retirement reduced for early commencement and for payment in the joint and 50% survivor form.
Disability	The benefit calculated as for normal retirement above based on Credited Service to date of disability.

Changes in Plan Provisions Since Prior Year

Plan provisions have not changed since the prior year, except to reflect current year changes in the Internal Revenue Code maximum on pay and benefits.

Schedule SB, Part V – Summary of Plan Provisions

Benefits are generally converted from the normal form of payment to the optional form of payment on an actuarially equivalent basis, which varies depending on the plan formula. Benefits accrued under multiple prior plan formulas may be converted using multiple bases.

The following actuarial equivalence bases apply to the New Richmond Production Hourly Pension Plan:

<u>Mortality</u>	<u>Interest</u>
417(e)(3) Applicable Mortality Table	6.0%

Note that this summary is intended to be a reasonably representative sample of the optional form conversion factors for the plan. It is not intended to be an exhaustive list of all the factors used in the conversion of benefits from the normal form of payment to any optional form of payment offered by the plan.

Schedule SB, line 25 – Change in Method

Below is a summary of significant changes that were made.

The valuation software used to produce the actuarial information submitted on this schedule has been refined to reflect evolving understanding of PPA requirements, and such modifications may be considered to be a method change. The percentage changes in funding target, target normal cost and plan assets due to the refinements in the software are each less than 2% (disregarding the effects of any changes that are automatically approved under final IRC 430 regulations), and the modifications to the software were designed to produce results no less accurate than the results produced by the software prior to the change. Therefore the change in funding method due to a change in valuation software receives automatic approval under IRS Announcement 2010-3.
