1. DESCRIPTION OF THE PLAN

The following description of the Brightstar Corp. 401(k) Plan (the "Plan") provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions. Brightstar Corporation (the "Plan Administrator" or the "Company") is the plan sponsor.

General

The Plan was adopted on October 1, 2003 and is a defined contribution plan covering all full-time employees of the Company who have six months of service and are age 18 or older. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Contributions

Each year, participants may contribute up to 100% of their pretax annual compensation, as defined in the Plan, subject to certain Internal Revenue Code limitations. Participants who have attained age 50 before the end of the plan year are eligible to make catch-up contributions. Participants may also contribute amounts representing distributions from other qualified defined benefit or defined contribution plans. Participants direct the investment of their contributions into various investment options offered by the Plan. Employer contribution amounts may be contributed at the option of the employers' board of directors and are invested in accordance with the respective employee's investment allocation elections.

Participant Accounts

Each participant's account is credited with the participant's contribution and allocations of (a) the employers' contribution and (b) plan earnings, and charged with an allocation of administrative expenses. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting

Participants are vested 100% immediately in their contributions plus actual earnings thereon, and the employers' contribution portion of their accounts.

Notes Receivable from Participants

Participants may borrow from their accounts a minimum of $1,000 up to a maximum equal to the lesser of $50,000 or 50% of their vested account balance. The $50,000 amount in the preceding sentence is reduced by the excess of the participant's highest outstanding loan balance during the 12-month period ending on the date of the loan over the participant's current outstanding loan balance on the date of the loan. The notes receivable are secured by the balance in the participant's account and bear an interest at rates that range from 4.25% to 9.25%, which are commensurate with local prevailing rates as determined quarterly by the plan administrator. Principal and interest is paid ratably through monthly payroll deductions.

1. DESCRIPTION OF THE PLAN (CONTINUED)

Payment of Benefits

On termination of service due to death, disability or retirement, a participant may elect to receive either a lump-sum amount equal to the value of the participant's vested interest in his or her account, or annual installments over a period of time not to exceed their (or their beneficiaries) assumed life expectancy. For termination of service due to other reasons, a participant may receive the value of the vested interest in his or her account as a lump-sum distribution.

Forfeited Accounts

At December 31, 2011 and 2010, forfeited nonvested accounts totaled $5,261 and $1,817, respectively. These accounts will be used to reduce future employer contributions. Also in 2011, employer contributions were reduced by $723 from forfeited nonvested accounts.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting.

Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan. The Statements of Net Assets Available for Benefits present the fair value of the investment contracts as well as the adjustment of the fully benefit-responsive investment contracts from fair value to contract value. The Statements of Changes in Net Assets Available for Benefits is prepared on a contract value basis.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts of assets and liabilities and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See NOTE 10 for discussion of fair value measurements.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Investment Valuation and Income Recognition (continued)

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Notes Receivable from Participants

Notes receivable from participants is measured at their unpaid principal balance plus any accrued and unpaid interest. Delinquent notes receivable from participants are recorded as a distribution based upon the terms of the plan document.

Payment of Benefits

Benefits are recorded when paid.

Fair Value Measurements

Fair values of financial instruments are estimated using relevant market information and other assumptions, as more fully disclosed in NOTE 10. Fair value estimates involve uncertainties and matters of significant judgment. Changes in assumptions or in market conditions could significantly affect the estimates.

Administrative Expenses

All administrative expenses of maintaining the Plan are paid by the Plan or by the employer.

Investment Management Fees and Operating Expenses

Investment management fees and operating expenses charged to the Plan for investments in the various funds are deducted from income earned on a daily basis and are reflected as a component of net appreciation (depreciation) in fair value of investments.

Plan Termination

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event that the Plan is terminated, participants would become 100% vested in their accounts.

Reclassification

Certain prior year amounts have been reclassified to conform to the current year presentation.

Subsequent Events

The Plan sponsor anticipates changing the Plan's trustee in January 2013.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Recent Accounting Pronouncements

Fair Value Measurements

In January 2010, the Financial Accounting Standards Board ("FASB") issued an accounting standard update on fair value measurements and disclosures. The update requires more robust disclosures about (1) the different classes of assets and liabilities measured at fair value, (2) the valuation techniques and inputs used, (3) the activity in Level 3 fair value measurements, and (4) the transfers between Levels 1, 2, and 3. The Plan's adoption of the new disclosures and clarifications of existing disclosures that were effective for interim and annual reporting periods beginning after December 15, 2009 did not have an effect on the Plan's financial statements. The disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements are effective for fiscal years beginning after December 15, 2010 and for interim periods within those fiscal years. The adoption of the Level 3 disclosures did not have a significant effect on the Plan's financial statements.

Notes Receivable from Participants

In 2010, the Plan adopted an accounting standard update which clarifies how loans to participants should be classified and measured by defined contribution benefit plans. The standard requires that participant loans be segregated from plan investments and presented as notes receivables from participants and measured at their unpaid principal balance plus any accrued but unpaid interest. As a result, the Plan has reclassified participant loans for 2011 and 2010 from investments to notes receivable from participants.

Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs

In May 2011, the FASB issued an accounting standard update which works to achieve common fair value measurement and disclosure requirements in U.S. GAAP and International Financial Reporting Standards. The update both clarifies the FASB's intent about the application of existing fair value guidance, and also changes certain principles regarding measurement and disclosure. The update is effective prospectively and is effective for annual periods beginning after December 15, 2011. Early application is permitted for interim periods beginning after December 15, 2011. The Plan is currently evaluating the effect the update will have on its financial statements.

3. TAX STATUS

The Internal Revenue Service (IRS) has determined and informed the Plan by a letter dated March 31, 2008, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination letter, the Plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC and therefore believes that the Plan is qualified and the related trust is tax-exempt. As a result, the financial statements do not reflect a provision for income taxes.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2011 and 2010, there are no uncertain tax positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the accompanying financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2008.

4. INVESTMENT CONTRACTS

The Plan invests in benefit-responsive guaranteed investment contracts through a collective trust. The collective trust maintains the contributions in a general account. The account is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. The guaranteed investment contract issuer is contractually obligated to repay the principal and a specified interest rate that is guaranteed to the Plan.

Because the investment contract is fully benefit-responsive, contract value is the relevant measurement attribute for that portion of the net assets available for benefits attributable to the investment contract. The investment contract is presented on the face of the accompanying statements of net assets available for benefits at fair value with an adjustment to contract value in arriving at net assets available for benefits. Contract value, as reported to the Plan, represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value.

There are no reserves against contract value for credit risk of the contract issuer or otherwise. The fair value of the shares in the collective trust at December 31, 2011 and 2010 was $1,560,212 and $1,219,160, respectively. The crediting interest rates are based on formulas agreed upon with the issuers. Such interest rates are typically reset on a monthly or quarterly basis according to each contract.

Certain events limit the ability of the Plan to transact at contract value with the collective trust. Such events include the following: (1) termination of the Plan (2) a material adverse change to the provisions of the Plan (3) an employer elects to withdraw in order to switch to a different investment provider or (4) if the terms of a successor plan do not meet the contract issuer's underwriting criteria. The plan administrator does not believe that any events which would limit the Plan's ability to transact at contract value with participants are probable of occurring.

Examples of events that would permit a contract issuer to terminate a contract upon short notice includes the Plan's loss of its qualified status, material breaches of responsibilities which are not cured or material and adverse changes to the provisions of the Plan. If one of these events was to occur, the contract issuer could terminate the contract at the market value of the underlying investments.

The average yields were as follows at December 31:

	2011	2010
Based on actual earnings	1.23%	2.05%
Based on interest rate credited to participants	1.99%	3.26%

5. INVESTMENTS (CONTINUED)

During 2011 and 2010, the Plan's investments (including gains and losses on investments bought and sold, as well as held during the year) (depreciated) appreciated in value as follows:

	Year Ended December 31, 2011	Year Ended December 31, 2010
Registered investment companies	$ (738,362)	$ 853,191
Collective trust	(2,677)	55
	$ (741,039)	**$ 853,246**

The Plan uses the net asset value (NAV) to determine the fair value of all the underlying investments which (a) do not have a readily determinable fair value and (b) prepare their financial statements consistent with the measurement principles of an investment company or have the attributes of an investment company. The following table lists all investments with a reported estimated fair value using net asset value per share:

	Fair Value as of 12/31/11	Unfunded Commitments as of 12/31/11	Redemption Frequency	Redemption Notice Period
Collective trust:				
Invesco Stable Value Trust (a)	**$ 1,560,212**	**$ -**	N/A	N/A

Invesco Stable Value Trust (a)	**$ 1,219,160**	**$ -**	N/A	N/A

Investment strategies

(a) – The trust's primary investment objective is to provide the preservation of principal, maintain a stable interest rate and provide daily liquidity at contract value for participant withdrawals and transfers.

8. RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statements of net assets available for benefits.

9. RELATED PARTY TRANSACTIONS

Certain plan investments are administered by Reliance Trust Company. Reliance Trust Company is the trustee as defined in the Plan and, therefore, these transactions qualify as party-in-interest transactions.

10. FAIR VALUE MEASUREMENTS

The FASB Accounting Standards Codification ("ASC") Topic No. 820 provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include, quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2011 and 2010.

Registered Investment Companies (Mutual Funds): Valued at the closing price reported on the active market on which the individual funds are traded.

Collective Trust: Valued at the quoted net asset value of shares held by the Plan at year end.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.
