GEORGIA UNION PENSION PLAN**EIN: 35-1814673 PN: 021****SCHEDULE SB, PART V—STATEMENT OF ACTUARIAL ASSUMPTIONS/METHODS**DESCRIPTION OF ACTUARIAL COST METHOD:

This valuation was performed using the unit credit actuarial cost method. This method divides the cost of funding benefits into two parts: normal cost and actuarial accrued liability. The normal cost is the estimated cost of the benefits accrued in the current plan year. The normal cost for a participant will increase each year unless the benefit accrual for the year decreases significantly. The normal cost for the plan will tend to increase if the number of participants increases, if the average age of the participants increases, or if the benefit accrual for the majority of the participants increases. The actuarial accrued liability is the estimated cost of all benefits accrued to the valuation date. The unfunded actuarial accrued liability is the actuarial accrued liability minus plan assets. An actuarial gain or loss is calculated each year based on the change in the unfunded actuarial accrued liability. The total contribution is the normal cost plus/ (minus) payments to amortize actuarial losses/(gains) that occur and plus/(minus) payments to amortize any other events that affect the accrued liability, such as amendments or changes in actuarial assumptions.
