We were engaged to audit the accompanying Statements of Net Assets Available for Benefits of Voith Industrial Services, Inc. 401(k) Plan as of December 31, 2011 and 2010, the related Statement of Changes in Net Assets Available for Benefits for the years ended December 31, 2011, and the Schedule H, Line 4(i) Schedule of Assets (Held at End of Year) at December 31, 2011. These financial statements and schedule are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 8, which was certified by State Street Bank and Trust Company and Reliance Trust Company, the trustees of the Plan, except for comparing the information with the related information included in the financial statements and supplemental schedule. We have been informed by the Plan administrator that State Street Bank and Trust Company held the Plan's investment assets and executed investment transactions from July 1, 2011 through December 31, 2011, and that Reliance Trust Company held the Plan's investment assets and executed investment transactions as December 31, 2010, and for the period January 1, 2011 through June 30, 2011. The Plan administrator has obtained a certification from the trustees as of and for the years ended December 31, 2011 and 2010, that the information provided to the Plan administrator by the trustee is complete and accurate.

Because of the significance of the information in that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and schedules taken as a whole. The supplemental schedules are presented for the purpose of additional analysis and are not a required part of the financial statements but are required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The form and content of the information included in the financial statements and schedules, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Notes to Financial Statements

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The accompanying financial statements of Voith Industrial Services, Inc. 401(k) Plan ("Plan") have been prepared on the accrual basis using accounting principles generally accepted in the United States of America.

Fully benefit-responsive investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan. The Statements of Net Assets Available for Benefits presents the fair value of the investment contracts as well as the adjustment of the fully benefit-responsive investment contracts from fair value to contract value. The Statement of Changes in Net Assets Available for Benefits is prepared on a contract value basis.

Receivables

Receivables represent contributions due the Plan as of December 31, 2011 and 2010 by the employer and employee.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 9 for discussion of fair value measurements.

Investment securities, in general, are exposed to various risks such as interest rate, credit, and overall market volatility risks. Due to the level of risk associated with certain investments, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Purchases and sales of securities are recorded on a trade date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Payment of Benefits

Benefits are recorded when paid.

Use of Estimates

The preparation of financial statements in conformity with principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Subsequent Events

In preparing the financial statements, the Company has evaluated events subsequent to the statements of net assets date through October 11, 2012, which is the date the financial statements were available to be issued.

Related Party Transactions

Certain plan investments are shares of mutual funds managed by ADP Retirement Services. ADP Retirement Services is the asset custodian, as defined by the Plan, and therefore, these transactions qualify as party-in-interest transactions.

Certain employees of the Plan sponsor provide administrative and executive oversight services to the Plan. The Plan is not charged by the Plan sponsor for the services.

NOTE 2 DESCRIPTION OF THE PLAN

The following description of the Plan provides only general information. Participants should refer to the Plan Agreement for a more complete description of the Plan's provisions.

General

Effective September 2, 2003, Voith Industrial Services, Inc. (the Company) adopted the Plan for the benefit of eligible employees of the Company. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). It has been amended for compliance with the applicable provisions of the Economic Growth and Tax Relief Reconciliation Act (EGTRRA), effective January 1, 2002. The Plan is also subject to the Collective Bargaining Agreement effective October 15, 2005 with the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (UAW) and its affiliated Local No. 1853; the Collective Bargaining Agreement effective November 1, 2003 with the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (UAW) and its affiliated Local No. 2488; the Collective Bargaining Agreement effective May 1, 2006 with the Paper, Allied-Industrial, Chemical & Energy Workers International Union (PACE) and its affiliated Local No. 760, Unit 2; the Collective Bargaining Agreement effective December 5, 2004 with the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (UAW) and its affiliated Local No. 737; the Collective Bargaining Agreement effective June 29, 2005 with the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (UAW) and its affiliated Local No. 76; and the Collective Bargaining Agreement effective December 7, 2005 with the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (UAW) and its affiliated Local No. 723. Union employees must have attained the age of 18 and completed one year of service in order to enter the Plan. Non-union employees of the Company must have attained the age of 19 and completed three months of service in order to enter the Plan. Eligible employees can enter the Plan on the first day of each quarter.

Effective January 1, 2010, Voith Industrial Services, Inc. (formerly known as Premier Manufacturing Support Services, Inc.) changed the name of the Plan to Voith Industrial Services, Inc. 401(k) Plan (formerly known as the Premier Manufacturing Support Services, Inc. 401(k) Plan).

VOITH INDUSTRIAL SERVICES, INC. 401(K) PLAN

Notes to Financial Statements (Continued)

NOTE 2 DESCRIPTION OF THE PLAN (CONTINUED)

Contributions

Each year, participants may contribute, before tax, contributions to the Plan up to 60% of their eligible annual compensation, as defined. However, contributions may not exceed limitations established under Section 402(g) of the Internal Revenue Code of 1986 as amended (\$16,500 at December 31, 2011). Section 414(v) of the Internal Revenue Code of 1986 as amended allows a maximum catch-up contribution of \$5,500. Participants may also contribute amounts representing distributions from other qualified plans.

Participants designate the percentage of their total contribution to be invested in any of the Plan's investment funds. A participant may change the amount of his elective deferred contributions at any time during the Plan year by issuing a change request form to the Plan administrator. Participants may change the percentage of contributions invested in each account and may make transfers between accounts anytime during the year.

The Company makes a matching contribution to the Plan on behalf of each participant who makes before-tax contributions. For the 2011 and 2010 plan years, eligible non-union employees received a Company match equal to 55% of the participant's contribution up to 5% of their total compensation. Eligible employees of UAW, Local No. 723, also received a Company match equal to 55% of their contribution up to 5% of their total compensation. Eligible employees of UAW, Local No. 1853, received a Company match equal to 55% of their contribution up to 4% of their total compensation. They also received a fixed profit sharing contribution in the amount of \$416. Eligible employees of UAW, Local No. 2488, received a Company match equal to 55% of their contribution up to 4% of their total compensation. They also received a fixed profit sharing contribution in the amount of \$150. Eligible employees of PACE, Local No. 760, Unit 2; UAW, Local No. 737; and UAW, Local No. 76 received a Company match equal to 55% of their contribution up to 4% of their total compensation.

The Company may also make additional discretionary contributions to the Plan to those participants employed on the last day of the contribution period. There were no additional discretionary contributions for 2011 and 2010.

Rollover Contributions

Participants may roll over their taxable portion of funds previously held for their account in another employee benefit plan to the Plan on a tax-free basis.

Participant Accounts

Each participant's account shall be credited with the applicable contributions, earnings, losses, expenses and distributions. As defined in the Plan, allocations of earnings and losses are based on the ratio that the participant account bears to the total of all participant accounts.

VOITH INDUSTRIAL SERVICES, INC. 401(K) PLAN

Notes to Financial Statements (Continued)

NOTE 2 DESCRIPTION OF THE PLAN (CONTINUED)

Vesting

Participants are immediately vested in their contributions plus actual earnings thereon. Non-union employees, employees of UAW, Local No. 1853, employees of UAW, Local No. 76, and employees of UAW, Local No. 723, are immediately 100% vested in the Company's matching contribution plus actual earnings thereon. For employees of UAW, Local No. 2488, UAW, Local No. 737, and PACE, Local No. 760, Unit 2, vesting in the Company's matching contribution plus actual earnings thereon is based on years of continuous service. A participant is 100% vested after six years of credited service.

Hardship Withdrawals

Participants qualify to take a hardship withdrawal if a participant has an immediate financial hardship resulting from certain events as identified in the Plan document. Once a hardship withdrawal is taken, the participant agrees not to make elective salary deferrals for a six month period after receipt of the hardship withdrawal.

Notes Receivable from Participants

Participants may borrow from their fund accounts a minimum of \$1,000 up to the lesser of \$50,000 (as defined in the Plan) or 50% of their vested account balance. (If a participant had a note receivable balance in the most recent prior period, the maximum note amount is \$50,000 or 50% of their vested balance less the highest note balance in the prior period.) Participants may have only one note outstanding at any given time. Note repayment terms are not to exceed 5 years unless utilized for the purchase of a primary residence. The notes are secured by the balance in the participant's account and bear interest at rates ranging from 4.25% to 10.5%. Principal and interest are paid ratably through bi-weekly payroll deductions; however, lump sum payoffs are permitted.

Payment of Benefits

On termination of service due to retirement, death, disability, other termination of employment with Premier, or termination of the Plan, a participant may elect to receive a lump-sum amount equal to the value of the participant's vested interest in his or her account. Participants with a vested account balance of \$1,000 or less will automatically be distributed as a lump-sum if a direct rollover is not requested in writing within 30 days.

Upon termination of the Plan, the assets will be distributed to participants in accordance with the Plan's provisions and existing laws and regulations.

In-service distributions are permissible from the Plan for participants that have obtained the age of 59 1/2. Participants electing in-service distributions may elect to receive all or a portion of their vested benefits in a lump sum payment or annual installments.

Notes to Financial Statements (Continued)

NOTE 2 DESCRIPTION OF THE PLAN (CONTINUED)

Forfeitures

The non-vested portion of terminated participant account balances can be used by the Plan sponsor to pay administrative expenses under the Plan, and then to reduce future employer contributions. For the years ended December 31, 2011 and 2010, the balance of unallocated forfeitures was \$2,114 and \$709, respectively. For the year ended December 31, 2011, forfeitures in the amount of \$7,383 were used to reduce the amount of employer contributions.

NOTE 3 TAX STATUS

The Internal Revenue Service has determined, and informed the Company by letter dated March 3, 2012, that the Plan and related trust are designed in accordance with applicable section of the Internal Revenue Code (IRC). Therefore, no provision for income taxes has been included in the Plan's financial statements.

NOTE 4 PLAN TERMINATION

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event the Plan is terminated, participants will become fully vested in their account balances.

NOTE 5 ADMINISTRATIVE EXPENSES

Administrative expenses represent the cost of accounting and administrative services provided to the Plan by ADP Retirement Services. Certain other administrative expenses of the Plan are paid by the Company.

NOTE 8 INFORMATION CERTIFIED BY THE TRUSTEES

The following information provided by State Street Bank and Trust Company and Reliance Trust Company, for the years ended December 31, 2011 and 2010, respectively, was certified by them to be complete and accurate with respect to the following:

1. The assets held by State Street Bank and Trust Company and Reliance Trust Company at December 31, 2011 and 2010, respectively, as well as the transactions involving these assets for the years then ended.
2. The amount of investment income for the period January 1, 2011 through June 30, 2011 was certified by Reliance Trust Company and the investment income from July 1, 2011 through December 31, 2011 was certified by State Street Bank and Trust Company.
3. The Schedule H, Line 4(i) – Schedule of Assets (Held at End of Year) at December 31, 2011.

NOTE 9 FAIR VALUE MEASUREMENTS

Applicable generally accepted accounting principles, GAAP, accounting for Fair Value Measurement and Disclosures establishes a framework for measuring fair value. That framework provides a fair value hierarchy that priorities the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under the applicable GAAP accounting for Fair Value Measurement and Disclosures are described below:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access. (Mutual funds, common stocks, corporate bonds, US government securities, etc.)

VOITH INDUSTRIAL SERVICES, INC. 401(K) PLAN

Notes to Financial Statements (Continued)

NOTE 9 FAIR VALUE MEASUREMENTS (CONTINUED)

Level 2 – Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets
- Quoted prices for identical or similar assets or liabilities in inactive markets
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement. (Guaranteed investment contract, etc.)

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation approaches used for assets measured at fair value.

Common stocks, corporate bonds and U.S. government securities: Valued at the closing price reported on the active market on which the individual securities are traded.

Mutual funds: Value at the net asset value ("NAV") of shares held by the plan at year end.

Guaranteed investment contract: Valued at fair value by discounting the related cash flows based on current yields of similar instruments with comparable durations considering the credit-worthiness of the issuer (see Note 10).

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different approaches or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

NOTE 10 BENEFIT-RESPONSIVE INVESTMENT

The Plan has a benefit-responsive investment contract with Invesco National Trust Company. The Trust's primary investment objectives are to provide preservation of principal, maintain a stable interest rate, and provide daily liquidity at contract value for participant withdrawals and transfers.

The Trust enters into wrapper agreements with wrap providers. A wrapper agreement is a derivative instrument that is designed to minimize the risk of investment losses and under most circumstances maintain a constant net asset value per share. Under normal circumstances, the value of the wrapper agreements is expected to vary inversely with the market value of the Trust's assets covered ("covered assets") by the wrapper agreement.

If the market value of the covered assets is less than their book value, the wrapper agreements are assets of the Trust with a value equal to the difference which will generally result in the future interest crediting rates that are lower than the current market yields. Conversely, if the market value of the covered asset is more than their book value, this generally results in a deduction from market value to contract value and future crediting rates that are higher than the current market yields. The book value of the wrapper agreement is equal to the purchase price of covered assets less the sale price of covered assets sold to cover share redemptions plus interest accrued at the crediting rate.

To accomplish the primary objectives of the Trust, the Trust enters into wrapper contracts (also known as synthetic GIGs). In a synthetic GIC structure, the underlying investments are owned by the Trust for plan participants. The Trust enters into wrapper contracts from high-quality insurance companies or banks that serve to substantially offset the price fluctuations in the underlying investments caused by movements in interest rates. Each wrapper contract obligates the wrapper provider to maintain the "contract value" of the underlying investments. The contract value is generally equal to the principal amounts invested in the underlying investments, plus interest accrued at a crediting rate established under the contract, less any adjustments for withdrawals (as specified in the wrapper agreement). Under the terms of the wrapper contract, the realized and unrealized gains and losses on the underlying investments are, in effect, amortized over the duration of the underlying investments are, in effect, amortized over the duration of the underlying investments through adjustments to the future contract interest crediting rate (which is the rate earned by participants in the Trust for underlying investments). The wrapper contract provides that the adjustments to the interest crediting rate will not result in an interest crediting rate that is less than zero. This minimizes the risk of loss with respect to principal and interest.

In general, if the contract value of the wrapper agreement exceeds the market value of the underlying investments (including accrued interest), the wrapper provider becomes obligated to pay that difference to the Trust in the event the shareholder redemptions result in a total contract liquidation. In the event that there are partial shareholder redemptions that would otherwise cause the contract's crediting rate to fall below zero percent, the wrapper provider is obligated to contribute to the Trust an amount necessary to maintain the contract's crediting rate of at least zero percent. The circumstance under which payments are made and the timing of the payments between the Trust and the wrapper provider may vary based on the terms of the wrapper contract.

The key factors that influence future interest crediting rates for a wrapper contract include: 1) the level of market interest rates; 2) The amount and timing of participant contributions, transfers, and withdrawals into/out of the wrapper contract; 3) The investment returns generated by the fixed income investments that back the wrapper contract; 4) The duration of the underlying fixed income investments backing the wrapper contract.

Notes to Financial Statements (Continued)

NOTE 10 BENEFIT-RESPONSIVE INVESTMENT (CONTINUED)

Wrapper contracts' interest crediting rates are typically reset on a monthly or quarterly basis according to each contract. While there may be slight variations from one contract to another, most wrapper contracts use a formula that is based on the characteristics of the underlying fixed income portfolio.

Over time, the crediting formula amortizes the Trust's realized and unrealized market value gains and losses over the duration of the underlying investments.

Because changes in market interest rates effect the yield to maturity and the market value of the underlying investments, they can have a material impact on the wrapper contract's interest crediting rate. In addition, participant withdrawals and transfers from the trust are paid at contract value but funded through the market value liquidation of the underlying investments, which also impacts the interest crediting rate. The resulting difference between the market value of the underlying investments relative to the wrapper contract value is presented on the Trust's Schedule of Portfolio Investments and statement of Assets and Liabilities as the "Adjustment from Fair Value to Contract Value". If the Adjustment from Fair Value to Contract Value is positive for a given contract, this indicates that the wrapper contract value is greater than the market value of the underlying investments. The embedded market value losses will be amortized in the future through a lower interest crediting rate. If the Adjustment from Fair Value to Contract Value is negative, this indicates that the wrapper contract value is less than the market value of the underlying investments. The amortization of the embedded market value gains will cause the future interest crediting rate to be higher.

In certain circumstances, the amount withdrawn from the wrapper contract would be payable at fair value rather than contract value. These events include termination of the plan, a material adverse change to the provisions of the plan, the employer elects to withdraw from a wrapper contract in order to switch to a different investment provider, or if the terms of a successor plan (in the event of the spin-off or sale of a division) do not meet the wrapper contract issuer's underwriting criteria for issuance of a clone wrapper contract.

While it is possible that some of the plans participating in the Trust may experience plan terminations or other events that would trigger fair value payouts under the Trust's wrapper agreements, based on prior experience, the Trust's management believes it is not probable that such events would be of sufficient magnitude to limit the ability of the Trust to transact at contract value with the participants in the Trust. Given that such events are beyond the control of the Trust, however, there can be no guarantee that this will be the case.

Examples of events that would permit a wrapper contract issuer to terminate a wrapper contract upon short notice include the plan's loss of its qualified status, material breaches of responsibilities which are not cured, or material adverse changes to the provisions of the plan. If one of these events was to occur, the wrapper contract issuer could terminate the wrapper contract at the market value of the underlying investments (or in the case of a traditional GIC, at the hypothetical market value based upon a contractual formula).

The crediting interest rate was 1.99% at December 31, 2011. The average yield for the year ended December 31, 2011 was 1.23%.

NOTE 10 BENEFIT-RESPONSIVE INVESTMENT (CONTINUED)

In 2010, the Plan's investment in the Bank of America N.A. Retirement Preservation Trust (Trust) is a benefit-responsive investment with Bank of America Corporation. Bank of America Corporation maintains the contributions in a general account, which is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. The investment is included in the financial statements at contract value as reported to the Plan by Bank of America N.A. Contract value represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value.

All investment contracts held in the portfolio are fully benefit-responsive. An investment contract is generally permitted to be valued at contract value, rather than fair value, to the extent it is fully benefit-responsive and held by a trust offered only to qualified employer-sponsored defined-contribution plans. An investment contract is considered fully benefit responsive if: 1) it is effected directly between the Trust and the issuer and may not be transferred without the consent of the issuer, 2) either the repayment of principal and interest is a financial obligation of the issuer (i.e., for traditional investment contracts) or the issuer of a wrap contract provides assurance that the contract crediting rate will not be adjusted to less than zero (i.e., for synthetic GICs), 3) the contract requires all permitted participant-initiated transaction with the Trust to occur at contract value without limitation, 4) it is improbable that an event will occur that would limit the ability of the Trust to transact at contract value with both the issuer and the Trust unit holders, and 5) the Trust allows unit holders reasonable access to their funds. Investment contracts that do not meet the criteria for valuation at contract value will be valued at fair value as determined by the Trustee, and such value may be more or less than contract value.

The crediting rate is primarily based on the current yield-to-maturity of the covered investments, plus or minus amortization of the difference between the market value and contract value of the covered investments over the duration of the covered investments at the time of the computation. The crediting rate is most impacted by the change in the annual effective yield to maturity of the underlying securities, but is also affected by the differential between the contract value and the market value of the covered investments. This difference is amortized over the duration of the covered investments. Depending on the change in duration from each reset period, the magnitude of the impact to the crediting rate of the contract to market difference is heightened or lessened. The crediting rate can be adjusted periodically and is usually adjusted either monthly or quarterly, but in no event is the crediting rate less than zero. The crediting rate may be impacted, among other things, by volatility and illiquidity in the fixed-income securities market. If the market value of the underlying investments is lower than their contract value, the crediting rate may be lower than the return on the underlying investments. Contributions from participants may increase market value attributed to the underlying investments and increase the crediting rate and the Trust's return. Redemptions may have an opposite effect, where if the Trust experiences significant redemptions when the market value is below the contract value, the crediting rate, and therefore the Trust's return may be reduced to zero.

NOTE 10 BENEFIT-RESPONSIVE INVESTMENT (CONTINUED)

The existence of certain conditions can limit the Trust's ability to transact at contract value with issuers of its investment contracts. Certain employer initiated events (e.g., layoff, bankruptcy, plant closings, plan termination, mergers, early retirement incentives, employer communications designed to induce participant to transfer from the fund, competing fund transfer or violation of equity wash or equivalent rules in place and changes of qualification status of employer or plan) are not eligible for book value disbursements even from fully benefit responsive contracts. These events may cause liquidation of all or a portion of a contract at a market value adjustment. If the likelihood of such a non-book value withdrawal incident is imminent, it may be necessary to consider a revaluation of those particular contract(s). As of December 31, 2009, the Trustee believes the occurrence of an event that would limit the ability of the Trust to transact at contract value with the participants in the Trust is not probable.

Effective with the Trustee's October 6, 2010 approval of a Resolution to terminate the trust and commence liquidation of its assets, the Trust changed from a stable value fund to a short-term bond fund. For the period from January 1, 2010 through October 6, 2010, investments held by the Trust were reported at contract value as described in Accounting Standards Codification 946-210-45 through 946-210-55. However, contract value is the relevant measurement attribute for that portion of the net assets of a collective investment fund attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the underlying defined-contribution plans. The most significant change was the elimination of the Trust's wrap contracts and the change from contract value to fair value accounting. The change in the accounting method required the Trust to recognize an unrealized loss of the difference between the contract value of the contracts and the fair value of the underlying securities on October 6, 2010. Concurrent with this change the liquidation of the long-term assets held by the Trust resulted in the realized losses. The realized losses incurred from the restructuring the Trust were funded by a Liquidity Commitment that was made available to the Trust by the Bank.
