We were engaged to audit the accompanying statements of net assets available for benefits of **Micro-Poise Measurement Systems 401(k) Plan** (the "Plan") as of December 31, 2011 and 2010, the related statement of changes in net assets available for benefits for the year ended December 31, 2011 and the supplemental schedule of assets (held at end of year) as of December 31, 2011. These financial statements and supplemental schedule are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the United States Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan Administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 3, which was certified by ING Institutional Plan Services, LLC, as an agent for Reliance Trust Company, except for comparing this information with the related information included in the financial statements and supplemental schedule. We have been informed by the Plan Administrator that the trustee holds the Plan's assets and executes the transactions. The Plan Administrator has obtained a certification from the agent on behalf of the trustee regarding the completeness and accuracy of the information summarized in Note 3 that was provided to the Plan Administrator by the agent of the trustee as of and for the year ended December 31, 2011 and as of December 31, 2010.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedule taken as a whole. The supplemental schedule is presented for the purpose of additional analysis and is not a required part of the financial statements but is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The form and content of the information included in the financial statements and supplemental schedule, other than that derived from the information certified by the custodian, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the United States Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Micro-Poise Measurement Systems 401(k) Plan

Notes To Financial Statements

Note 1. Plan Description

The following description of the Micro-Poise Measurement Systems 401(k) Plan (the "Plan") provides only general information. Participants should refer to the Plan Agreement for a more complete description of the Plan's provisions.

General:

The Plan was established effective April 1, 2007 by Micro-Poise Measurement Systems, LLC (the "Company") and is a defined contribution plan covering substantially all employees of the Company, who are not leased, temporary or casual employees, consultants or independent contractors, or employees participating in another defined contribution plan maintained by the employer. Employees are eligible for the plan upon hire and as soon as administratively practicable to enable their entrance into the plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Reclassification:

Certain amounts in the prior year financial statements have been reclassified to agree to current year presentation.

Contributions:

Each year, the participants may elect to contribute a percentage of their wages, as defined in the Plan agreement, limited to the maximum amount allowed by the Internal Revenue Service. Participants may also contribute amounts representing distributions from other qualified defined benefit or contribution plans. Participants direct their contributions into various investment options offered by the Plan.

The Company's matching contribution is equal to 100% of employee contributions up to 5% of eligible wages. Company contributions are invested in a manner consistent with the participants' contributions. Contributions are subject to certain limitations.

Participant accounts:

Each participant's account is credited with the participant's contributions, the matching percentage of the Company contribution (if applicable), and an allocation of Plan earnings and charged with an allocation of administrative expenses. Allocations are based on participant earnings or account balances, as defined by the Plan. The benefit to which a participant is entitled is the benefit that can be provided from the participant's account.

Vesting:

Participants are immediately vested in their voluntary contributions and employer matching contributions plus actual earnings thereon.

Notes receivable from participants:

The Plan provides that participants may borrow from their fund accounts a minimum of \$1,000 up to a maximum of 50% of their vested account balance or \$50,000. Three outstanding notes are permitted per participant. The maximum term allowed is five years, unless the note is for the purchase of a principal residence. The notes are collateralized by the balance in the participant's account and bear interest at rates commensurate with prevailing rates. Payments are due each pay period, primarily through payroll deduction.

Micro-Poise Measurement Systems 401(k) Plan

Notes To Financial Statements

Notes receivable from participants are measured at their unpaid principal balance plus any accrued but unpaid interest. Delinquent participant notes are reclassified as distributions based upon the terms of the plan document.

Payment of benefits:

Upon termination of service, a participant may elect to receive either a lump-sum or direct rollover amount equal to the vested value of his or her account, or upon death, disability or retirement, receive periodic installments over a period not to exceed the life expectancy of the participant or joint lives of the participant and spouse. A terminated participant with an account balance of \$5,000 or less will automatically receive a lump-sum distribution. Participants may withdraw portions of their vested account at any time after reaching 59½. A participant may make only two such withdrawals in any twelve-month period. Benefits are recorded when paid.

Administration of Plan assets:

Certain administrative functions are performed by officers or employees of the Company. No such officer or employee receives compensation from the Plan. Certain administrative expenses for the trustee's fees for the Plan year ended December 31, 2011 were paid directly by the Plan Sponsor.

Note 2. Significant Accounting Policies

Basis of accounting:

The financial statements of the Plan are prepared under the accrual method of accounting.

Use of estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Investment contracts:

Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan. The Plan invests in contracts through a common collective investment trust. As required by the codification, the Statement of Net Assets Available for Benefits presents the fair value of the investment in the common collective fund as well as the adjustment of the investment in the common collective fund from fair value to contract value related to the investment contracts. The Statement of Changes in Net Assets Available for Benefits is prepared on a contract value basis. The difference between fair value and contract value was not material as of December 31, 2011.

Investment valuation and income recognition:

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See below for discussion of fair value measurements.

Notes To Financial Statements

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date.

Investment securities, in general are exposed to various risks, such as interest rate, credit, and overall market volatility. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the value of investment securities will occur in the near-term and those such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Fair value measurements:

Accounting standards establish a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 Measurements) and the lowest priority to unobservable inputs (Level 3 Measurements). The three levels of the fair value hierarchy under are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2011 and 2010.

Common collective investment trusts: Valued based on information reported by the trustee using audited financial statements of the common collective fund.

Shares of registered investment companies: Valued at the closing price reported on the active market on which the individual securities are traded.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Subsequent events:

The Plan has evaluated subsequent events for potential recognition and/or disclosure through October 11, 2012, the date the financial statements were available to be issued.

New accounting pronouncements:

In January 2010, the Financial Accounting Standards Board (FASB) issued an amendment "*Fair Value Measurements and Disclosures – Improving Disclosures about Fair Value Measurements*" which requires new disclosures and reasons for transfers of financial assets and liabilities between Levels 1 and 2. This amendment also clarifies that fair value measurements and disclosures are required for each class of financial assets and liabilities, and those disclosures should include a discussion of inputs and valuation techniques. It further clarifies that the reconciliation of Level 3 measurements should separately present purchases, sales, issuances, and settlements instead of netting these changes. With respect to matters other than Level 3 measurements, the amendment has been adopted in the current year. There were no transfers between Level 1 and 2 investments. See Note 4 for the disclosures for each class of assets. The guidance related to Level 3 measurements is effective for periods beginning on or after December 15, 2010 except for the Level 3 disclosure requirements, which were effective January 1, 2011. The Plan adopted this guidance as required with immaterial impacts to the financial statements.

In May 2011, the FASB issued Accounting Standards Update (ASU) 2011-04, "*Amendments to Achieve Common Fair Value Measurements and Disclosure Requirements in U.S. GAAP and IFRSs (ASU 2011-04)*". ASU 2011-04 amended ASC 820, "*Fair Value Measurements and Disclosures*", to converge the fair value measurement guidance in GAAP and International Financial Reporting Standards (IFRSs). Some of the amendments clarify the application of existing fair value measurement requirements, while other amendments change a particular principle in ASC 820. In addition, ASU 2011-04 requires additional fair value disclosures. The amendments are to be applied prospectively and are effective for annual periods beginning after December 15, 2011. The Plan's management is currently evaluating the effect that the provisions of ASU 2011-04 will have on the Plan's financial statements.

Note 3. Information Certified by ING Institutional Plan Services, LLC ("ING") an Agent for Reliance Trust Company ("Reliance")

The plan administrator has elected the method of compliance as permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the plan administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to the following information certified by ING, agent for Reliance, as of and for the year ended December 31, 2011 and as of December 31, 2010, except for comparing such certified information to information included in the Plan's financial statements and supplemental schedule.

⁽¹⁾ This asset class seeks an investment return that approximates as closely as practicable, before expenses, the performance of the S&P 500® (the "Index") over the long term. All investment options in this category have the potential to lose value.

⁽²⁾ This asset class seeks an investment return that approximates as closely as practicable, before expenses, the performance of the S&P MidCap 400® (the "Index") over the long term. All investment options in this category have the potential to lose value.

⁽³⁾ This asset class seeks to achieve its objective by investing in a set of underlying collective trust funds representing various asset classes. Each fund is managed to a specific retirement year. Over time the allocation to asset classes and funds change according to the retirement date. The stocks eventually transition to a fixed fund and income securities upon retirement. All investment options in this category have the potential to lose value.

⁽⁴⁾ This asset class seeks to provide safety of principal, adequate liquidity and competitive yield with low return volatility. The Fund intends to achieve this objective by investing in a variety of stable value investments such as Guaranteed Investment Contracts and security backed investment contracts issued by high quality financial institutions (AA rated or higher) as well as stable value collective funds and money market funds. Security backed contracts are backed by high quality, marketable fixed income securities which provide a credited rate of interest based on the yields of the underlying securities. The underlying fixed income security exposure is obtained by investing in collective funds managed by the sub-advisor for this purpose or may be purchased directly by the sub-advisor. Securities backing investment contracts are all investment grade at time of purchase with a minimum average quality rating of AA.

Note 5. Plan Termination

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of Plan termination, participants will continue to be 100% vested in their accounts and the Company will direct the distribution of participant accounts as soon as practicable.

Note 6. Related Party Transactions

Certain Plan investments are managed by Reliance. Reliance has served the Plan as trustee; therefore, these transactions qualify as party-in-interest. Fees paid by the Plan for the investment management services were \$2,000 for the period ended December 31, 2011.

Notes To Financial Statements

Note 7. Income Tax Status

Effective April 1, 2007, the Plan adopted a standardized form of a prototype plan. The prototype plan has received an opinion letter from the Internal Revenue Service as to the prototype plan's qualified status. The prototype plan opinion letter has been relied upon by the Plan. The Plan administrator believes the Plan is designed and is currently being operated in compliance with the applicable provisions of the Internal Revenue Code.

The Plan's administrator has evaluated the Plan's tax positions and concluded that the Plan has maintained its tax exempt status and had taken no uncertain tax positions that require adjustment to the financial statements. With few exceptions, the Plan is no longer subject to income tax examinations by the U.S. federal, state, or local tax authorities for years before 2008.
