Independent Auditors' Report

To the Participants and Plan Administrator of the
Schlumberger Pension Plan for U.S. Taxpayers Employed Abroad
Houston, Texas

We have audited the accompanying statement of net assets available for benefits of the Schlumberger Pension Plan for U.S. Taxpayers Employed Abroad (the "Plan") as of December 31, 2011 and the related statement of changes in net assets available for benefits for the year then ended and the statement of accumulated plan benefits as of December 31, 2010 and the related statement of changes in accumulated plan benefits for the year then ended. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements of the Plan as of and for the year ended December 31, 2010 were reported on by Salibello & Broder LLP, whose practice was combined with our firm and whose report dated October 12, 2011 expressed an unqualified opinion on those financial statements.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2011, and changes therein for the year then ended and its accumulated plan benefits as of December 31, 2010, and changes in accumulated plan benefits for the year then ended in conformity with accounting principles generally accepted in the United States of America.

1. Description of the Plan

The following brief description of the Schlumberger Pension Plan for U.S. Taxpayers Employed Abroad (the "Plan") is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

General

The Plan is a defined benefit pension plan established on January 1, 2009 covering employees (U.S. citizens and/or U.S. taxpayers employed abroad) of Schlumberger Limited (the "Company") who have met certain requirements, including length of service. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). The Plan has an allocable interest in the net assets of the Schlumberger Master Pension Trust (the "Pension Trust"), which serves as the investing medium for the Plan and certain other plans of Schlumberger Limited and its affiliates.

The Plan is administered by an Administrative Committee, which is appointed by the Board of Directors of the Company in accordance with certain provisions of the plan document and is a named fiduciary under the provisions of Section (3)(21) of ERISA. The Administrative Committee, which normally consists of at least three persons, is responsible for general administration of the Plan.

The Finance Committee is appointed by the Board of Directors of the Company in accordance with certain provisions of the Pension Trust agreement and is a named fiduciary under the provisions of Section (3)(21) of ERISA. The Finance Committee communicates to The Northern Trust Company (the "Trustee") the funding policies and methods which have been established to carry out the objectives of the Plan.

Eligibility

Each employee who (a) is designated as an International Mobile employee, an International Commuter employee, a Europe Mobile employee or a GeoMobile employee who was a participant in the International Staff Pension Plan immediately prior to January 1, 2009, (b) is a U.S. taxpayer working outside of the U.S., and (c) has completed one year of continuous active employment shall be eligible to commence participation in the Plan on the first day of the next following month. An employee who was a participant in the Schlumberger International Staff Pension Plan prior to January 1, 2009, and who completes one hour of service on or after such date, shall be eligible to participate in the Plan as of January 1, 2009. Employees hired after January 1, 2009 are eligible to participate in the Plan as of the date the employee completes one year of active service, as defined in the Plan document. Notwithstanding the foregoing, in order to be eligible to become a participant, each employee must agree to make participant contributions in accordance with the written procedures of the Plan.

Vesting

A participant is 100% vested after five years of active service or attainment of age 50, whichever occurs first. A participant is 100% vested in his accrued benefits attributable to his contribution.

1. Description of the Plan (cont'd)

Retirement age

Normal retirement age is 65. Early retirement is permitted at age 55 for benefits accrued in 2010 and age 60 for benefits accrued after 2010. Special early retirement is permitted at age 55 for benefits accrued after 2010, and age 50 for benefits accrued in 2010, provided the participant has completed at least 20 years of active service.

Funding policy

Employer contributions are determined by an independent actuary, Sibson Consulting, and represent the annual amount required by ERISA to meet the minimum funding standards. These contributions are funded on or before required dates as set forth by ERISA. The Plan met the ERISA minimum funding requirement for 2011 and 2010. The Company at its option can contribute more than the minimum required. Active participants are required to contribute 4% of their admissible compensation, as defined in the Plan document, for each calendar year or portion thereof by automatic payroll deduction. Effective January 1, 2010, the required active participant contribution is 6% of their admissible compensation.

Benefits

Participants who are vested and whose benefits commence at or after normal, early or special early retirement age are entitled to receive pension benefits for their lifetime in annual amounts equal to the sum of their annual retirement credits as of their retirement date reduced for early commencement, as defined in the Plan document.

Participants accrue an annual retirement credit for each year (or portion thereof) of participation in the Plan equal to 3.2% of their admissible compensation for the plan year 2010. For each year of service after December 31, 2010, a participant shall accrue an annual retirement credit equal to 3.5% of admissible compensation.

The maximum annual benefit payable to a participant shall not exceed or shall be limited to the maximum permissible benefit, which is the lesser of:

a) $160,000, as adjusted for cost of living increases pursuant to Internal Revenue Code ("IRC") and Treasury Regulations; or

b) 100% of the participant's average compensation for the three consecutive years of service that produces the highest average.

The maximum admissible compensation shall not exceed $195,000, subject to IRC and Treasury Regulations. In addition, survivor benefits may be paid to a deceased participant's surviving spouse or to a designated beneficiary under certain retirement options.

Alternative benefit options are available, as outlined in the Plan document.

1. Description of the Plan (cont'd)

Plan expenses

Expenses required to maintain the Plan are absorbed by the Plan, unless otherwise paid by the Company.

2. Summary of significant accounting policies

Basis of accounting

The accompanying financial statements of the Plan are prepared under the accrual basis of accounting.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Accordingly, actual results could differ from those estimates.

Valuation of investments

The Plan's interest in the Pension Trust is stated at fair value, as determined by the Trustee, and consists of an allocation of the Pension Trust's net assets that is based upon cumulative employer and participant contributions, net of benefits paid to terminated and retired participants, and allocations of Pension Trust's investment income and administrative expenses. The guaranteed investment contract ("GIC") is stated at fair value, which approximates contract value (see Note 6).

The Plan follows the provisions of Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 820, "Fair Value Measurement." Under FASB ASC Topic 820, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the exit price) in an orderly transaction between market participants at the measurement date.

FASB ASC Topic 820 establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC Topic 820 are as described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

2. Summary of significant accounting policies (cont'd)

Level 2 Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of relevant observable inputs and minimize the use of unobservable inputs. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the Plan. Unobservable inputs are inputs that reflect the Plan's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. Changes in economic conditions or valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. Plan management evaluated the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. For the years ended December 31, 2011 and 2010, there were no significant transfers in or out of levels 1, 2 or 3. See Notes 6 and 7 for the disclosures required by FASB ASC Topic 820 with regard to Plan investments.

A fair value measurement is for a particular asset or liability. The unit of account determines what is being measured by reference to the level at which the asset or liability is aggregated (or disaggregated) for purposes of applying other accounting pronouncements. Accordingly, because the Plan does not hold shares of the Pension Trust, the disclosures required by FASB ASC Topic 820 are required for the individual assets and liabilities under the Pension Trust and are not required for the Plan's total interest in the Pension Trust. Similarly, since the Pension Trust does not hold shares of the Schlumberger Group Trust (the "Group Trust"), the disclosures required by FASB ASC Topic 820 are required for the individual assets and liabilities under the Group Trust and are not required for the Pension Trust's total interest in the Group Trust. Likewise, since the Group Trust does not own shares of the different investment pools which are disclosed in Note 7, the disclosures required by FASB ASC Topic 820 are required for the individual assets and liabilities under each investment pool and are not required for the Group Trust's total interest in each of the investment pools.

2. Summary of significant accounting policies (cont'd)

Valuation of investments (cont'd)

In determining the fair value of assets and liabilities underlying the Pension Trust, Group Trust and the investment pools owned by the Group Trust, the Pension Trust and Group Trust use various inputs and valuation methodologies which are described in Notes 6 and 7. There have been no significant changes in the inputs or valuation methodologies used at December 31, 2011 and 2010.

Relevant accounting developments

In January 2010, the FASB issued Accounting Standards Update ("ASU") No. 2010-06, "Improving Disclosures About Fair Value Measurements." ASU No. 2010-06 requires a reporting entity to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and the reasons for the transfers. ASU No. 2010-06 also requires a reporting entity to disclose separately, in the reconciliation for Level 3 fair value measurements, information about purchases, sales, issuances, and settlements. In addition, it clarifies existing disclosures about fair value measurements by requiring that such disclosures be made for each class of assets and liabilities. Finally, this accounting standard update clarifies that the disclosures about the valuation techniques and inputs used to measure fair value are required for fair value measurements that fall in either Level 2 or 3. The new disclosures and clarifications of existing disclosures are effective for the Plan annual periods beginning January 1, 2010, except for the disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements, which are effective for the Plan annual periods beginning January 1, 2011. The adoption of ASU No. 2010-06, as incorporated into FASB ASC Topic 820, did not have an impact on the Plan's financial statements other than the additional detailed disclosures in the reconciliation for Level 3 fair value measurements.

In May 2011, the FASB issued ASU No. 2011-04, "Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs." ASU No. 2011-04 was issued to provide a consistent definition of fair value between accounting principles generally accepted in the United States of America ("U.S. GAAP") and International Financial Reporting Standards ("IFRSs"). This pronouncement is effective for reporting periods beginning on or after December 15, 2011, with early adoption prohibited. Plan management currently is evaluating the impact of the adoption of ASU No. 2011-04 on the Plan's financial statements.

In December 2011, the FASB issued ASU No. 2011-11, "Disclosures about Offsetting Assets and Liabilities." ASU No. 2011-11 contains guidance enhancing disclosure requirements about the nature of an entity's right to offset and related arrangements associated with its financial instruments and derivative instruments. The new guidance requires the disclosure of the gross amounts subject to rights of set-off, amounts offset in accordance with the accounting standards followed, and the related net exposure. The new guidance will be effective for reporting periods beginning January 1, 2013. Plan management currently is evaluating the impact of the adoption of ASU No. 2011-11 on the Plan's financial statements.

2. Summary of significant accounting policies (cont'd)

Risks and uncertainties

Due to various risks (i.e., interest rate, market and credit risk) associated with certain investments of the Pension Trust and Group Trust, and the level of uncertainty related to changes in the value of investments, it is at least reasonably possible that changes in the values of the investments of the Pension Trust and Group Trust will occur in the near term, and this could materially affect the value of the Plan interest in the Pension Trust and the corresponding investment income reported in the statements of net assets available for benefits and the statements of changes in net assets available for benefits, respectively.

The Pension Trust and Group Trust invest in securities with contractual cash flows, such as asset-backed securities, collateralized mortgage obligations and commercial mortgage-backed securities. The value, liquidity and related income of these securities are sensitive to changes in economic conditions, including real estate value, delinquencies or defaults, or both, and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported in the financial statements.

Benefit payments

Benefit payments are recorded when paid.

3. Tax status

On January 31, 2011, the Plan applied for, but has not received, a determination letter from the Internal Revenue Service stating that the Plan is qualified under IRC Section 401(a). However, the Plan management believes that the Plan is qualified in form and operation, and therefore, the related trust is exempt from taxation.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. Plan management has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2011 there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

4. Actuarial present value of accumulated plan benefits

Accumulated plan benefits are those future periodic benefit payments, including lump-sum distributions, which are attributable under the Plan's provisions to the service employees have rendered to the benefit information date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries.

The actuarial present value of accumulated plan benefits, which is determined by an independent actuary, is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as death, withdrawal or retirement) between the benefit information date and the expected date of payment.

The calculation of the actuarial present value of accumulated plan benefits as of December 31, 2010 has been based on the following significant actuarial assumptions:

a) Expected rate of return in investments (net of expenses): 7.5% (8.5% in 2009) (including a reduction of 0.5% to reflect anticipated plan administrative expenses associated with providing benefits)

b) Mortality rates: 2011 Pension Protection Act of 2006 Fund Mortality Table (2007 Current Liability Combined in 2009)

c) Retirement rates:

Age	Post-2010 Rates	Pre-2011 Rates
50-54	0%	10%
55-59	25%	25%
60-64	40%	40%
65	100%	100%

d) Retirement from terminated vested status: Age 60, with appropriate reduction

4. Actuarial present value of accumulated plan benefits (cont'd)

e) Turnover rates:

Age	Rates
25	12.60%
30	10.30%
35	8.80%
40	8.25%
45	8.40%
50	11.37%
54	13.20%
55 and older	0.00%

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial cost method used is the Unit Credit for both funding and the calculation of the actuarial present value of accumulated plan benefits.

The Plan is not considered an "at-risk-plan" for the 2011 Plan year.

5. Plan termination

The Board of Directors reserves the right to terminate the Plan entirely or partially at any time. In the event of the termination or partial termination of the Plan, the right of each affected participant to benefits accrued to the date of such total or partial termination, to the extent then funded, shall become fully vested and non-forfeitable, and upon a complete termination all previously unallocated net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide benefits in accordance with the following priorities:

a) Benefits to each participant representing that portion of each participant's accrued retirement benefit which is derived from the participant's contributions.

b) In the case of benefits payable as an annuity:

(i) In the case of the benefit of a participant or beneficiary which was in pay status as of the beginning of the three-year period ending on the termination date of the Plan, to each such benefit, based on the provisions of the Plan (as in effect during the five-year period ending on such date) under which such benefit would be the least; and

5. Plan termination (cont'd)

(ii) In the case of a participant's or beneficiary's benefit (other than a benefit described in subparagraph (b) (i) above) which would have been in pay status as of the beginning of such three-year period if the participant had returned prior to the beginning of the three-year period and if his benefits had commenced (in the normal form of annuity under the Plan) as of the beginning of such period, to each such benefit based on the provisions of the Plan (as in effect during the five-year period ending on such date) under which such benefit would be the least.

c) Benefits to each participant under the Plan guaranteed under Title IV of ERISA.

d) Benefits to each participant representing other non-forfeitable benefits.

e) All other benefits under the Plan.

f) Benefits to the Company.

Generally, the Pension Benefit Guaranty Corporation (the "PBGC") guarantees the payment of most vested normal retirement benefits, early retirement benefits, and certain disability and survivor benefits and survivor pensions, subject to certain limitations. Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all. Participants should consult the Plan document for more complete information related to guarantees of benefits.

The PBGC guarantees vested benefits at the level in effect on the date of Plan termination. However, if benefits have been increased within the 5 years before Plan termination, the whole amount of the Plan's vested benefits or the benefit increase may not be guaranteed. In addition, there is a ceiling on the amount of monthly benefits that PBGC guarantees, which is adjusted periodically.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations, and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

In the event of the Plan's withdrawal from the Pension Trust, the Trustee shall set apart that portion or equitable share of the Pension Trust allocated to the Plan pursuant to a valuation and allocation of the Pension Trust by the Trustee, subject to approval by the Finance Committee.

6. Interest in the Schlumberger Master Pension Trust

The Plan's investments are 100% in the Pension Trust. The Pension Trust was established for the investment of assets of the Plan and other qualified pension plans sponsored by Schlumberger Limited and its affiliates (collectively, the "Pension Plans"). Each participating plan has an allocable specific interest in the Pension Trust. The assets of the Pension Trust are held by the Trustee. At December 31, 2011 and 2010, the Plan's interest in the net assets of the Pension Trust was approximately 1.46% ($40.6 million) and 1.27% ($34.6 million), respectively. Investment income and certain administrative expenses relating to the Pension Trust are allocated to the individual plans based upon average monthly balances invested by each plan. Other administrative expenses are allocated to each plan based on the specific services provided to them. The plans' balances reflect transfers to and from the individual plans as well as the plans' share of investment income. In addition, any commitments of the Pension Trust are shared by the individual plans based on the participating plan's allocable interest.

The following table presents the investments of the Pension Trust:

(dollars in thousands)	December 31, 2011	2010
Investments, at fair value:		
Pension Trust interest in the Schlumberger Group Trust	$ 2,549,811	$ 2,540,659

For the years ended December 31, 2011 and 2010, realized gains (losses) and unrealized gains from Level 3 assets are reported in net appreciation (depreciation) in fair value of investments in the statement of changes in net assets of the Pension Trust.

6. Interest in the Schlumberger Master Pension Trust (cont'd)

Valuation of investments and financial liabilities

The Pension Trust interest in the Group Trust is stated at fair value, as determined by the Trustee, which consists of an allocation of the Group Trust's net assets that is based on amounts contributed by the Pension Trust and a certain other trust and plan of Schlumberger Limited and its affiliates, net of distributions, that are invested by the Group Trust, and a respective allocation of investment income and administrative expenses.

Short-term investment funds are stated using a constant price (or amortized cost) of $1 per unit of participation, which approximates fair value.

Investments in real estate are made principally through pooled separate accounts and real estate investment trusts ("REIT"), which are stated at fair value represented by the net asset value of the pooled separate account or REIT at year-end, as determined by the investment manager based on the fair value of the underlying real estate investments. The fair value of the underlying real estate investments are valued by independent appraisers on an annual basis. However, because of the inherent uncertainty of the valuation, the valuation presented does not necessarily represent the amount that might ultimately be realized from the investment held. The investments in real estate were purchased for the sole benefit of the Pension Plans.

Investments in limited partnerships are stated at fair value represented by the net asset value of the partnership interests owned by the Pension Trust at year-end, as determined by the respective general partners of the limited partnerships based on the fair value of the underlying investments of the limited partnerships. In establishing the fair value of partnership investments, general partners take into consideration information from the financial statements of the companies in which they invest, as well as the currency in which the investment is denominated. Because of the inherent uncertainty of the valuation, the valuation presented does not necessarily represent the amount that might ultimately be realized from the investment held. The investments in limited partnerships were purchased for the sole benefit of the Pension Plans.

The GIC is stated at fair value, which approximates contract value. Contract value as determined by the insurance company, represents contributions and investment income less distributions and administrative expenses. The GIC was purchased for the sole benefit of the Schlumberger Technology Corporation Pension Plan.

As of December 31, 2010, U.S. common and preferred stocks are stated at fair value as determined by closing quoted market prices in active markets in which the securities are sold.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Pension Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Valuation of investments and financial liabilities (cont'd)

The following table sets forth a summary of the Level 3 investments held by the Pension Trust reported at net asset value as of December 31, 2011 and 2010:

(dollars in thousands)	Fair Value Estimated Using Net Asset Value per Share				
	Fair Value		Unfunded Commitments at	Redemption Frequency (If Currently	Redemption Notice
	2011	2010	December 31, 2011	Eligible)	Period
Real estate funds (1)	$ 50,382	$ 40,149	$ -	quarterly	45-90 days
Limited partnerships (2)	164,221	127,839	152,585	N/A	N/A
Total	$ 214,603	$ 167,988	$ 152,585		

(1) Real estate funds primarily include investments in real estate limited partnerships, concentrated in U.S. commercial real estate. Redemptions are subject to management's and/or board of director's approval.

(2) Limited partnerships include investments in several fund of funds limited partnerships that invest primarily in U.S. and foreign companies. These investments can never be redeemed with the funds. Instead, the nature of the investments is that distributions are received through the liquidation of the underlying assets of the funds. If these investments were held, it is estimated that the underlying assets of the funds would be liquidated over 10-15 years.

Commitments

The Pension Trust invests in certain real estate and limited partnerships investments whereby the Pension Trust commits to providing certain funds primarily on an "as needed" basis. During the year ended December 31, 2011, the Pension Trust made additional commitments totaling approximately $60 million and contributed approximately $70 million. At December 31, 2011, the Pension Trust was committed to funding approximately $153 million for such investments over a period not exceeding six years.

Securities transactions and investment income

Net appreciation or depreciation in fair value of investments includes realized gains or losses on investments sold and unrealized gains or losses on investments held. Unrealized gains or losses on investments represent the change in the difference between the cost and fair value of investments at the end of the year and at the beginning of the year.

6. Interest in the Schlumberger Master Pension Trust (cont'd)

Securities transactions and investment income (cont'd)

Purchases and sales of securities are recorded on a trade-date basis. Gains and losses on securities transactions are recorded as the difference between proceeds received and cost, with cost determined on the moving average basis. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date.

7. Interest in the Schlumberger Group Trust

A portion of the Pension Trust's investments are in the Group Trust. The Group Trust serves as the investing medium for the Pension Trust and a certain other trust and plan of Schlumberger Limited and its affiliates. Each participating trust and plan has an allocable interest in the Group Trust. The assets of the Group Trust are held by the Trustee. At December 31, 2011 and 2010, the Pension Trust's interest in the net assets of the Group Trust was approximately 48.76% ($2.550 billion) and 49.22% ($2.541 billion), respectively. Investment income and certain administrative expenses relating to the Group Trust are allocated to the individual trusts and plan based upon average monthly balances invested by each trust and plan in the underlying pooled investments of the Group Trust. Other administrative expenses are allocated to each trust and plan based on the specific services provided to them. The trusts' and plan's balances reflect transfers to and from the individual trusts and plan as well as the trusts' and plan's share of investment income.

At December 31, 2011 and 2010, the Pension Trust's interest in the Group Trust investments was approximately as follows:

	2011	2010
U.S. Equities and Equity Index	45.90%	51.37%
Non-U.S. Equities	55.07%	56.35%

(1) The Portfolio seeks to achieve its investment objective by investing under normal circumstances at least 65% of its total assets in a diversified portfolio of fixed income instruments of varying maturities, which may be represented by forwards. Fixed income instruments include bonds, debt securities and other similar instruments issued by various U.S. and non-U.S. public or private sector entities.

(2) The Portfolio seeks to achieve its investment objective by investing under normal circumstances at least 80% of its assets in a portfolio of corporate fixed income instruments, which may be represented by forwards or derivatives such as options, futures contracts, or swap agreements. Fixed income instruments include bonds, debt securities and other similar instruments issued by various U.S. and non-U.S. public or private sector entities.

7. Interest in the Schlumberger Group Trust (cont'd)

(3) The Fund is an open-end interval management investment company that offers its shareholders the opportunity to purchase and redeem shares on a periodic basis. The Fund seeks long-term growth of capital and invests primarily in common stock and other equity securities of issuers in developing countries. The Fund redeems its shares at monthly interval and accepts redemption request at any time. The Fund has adopted, as a fundamental policy, liquidity procedures designed to more easily provide for redemptions, although there can be no guarantees of that result. The Fund's liquidity policy requires that the Fund maintain a portfolio of securities such that as of each day on which the Fund's assets are valued for purposes of calculating its net asset value, at least 85% of the Fund's net assets will either (i) mature by the next redemption payment date; or (ii) be capable of being sold between the redemption request deadline and the redemption payment date at approximately the price used in computing the Fund's net asset value.

(4) The primary objective of the Daily S&P 500 Equity Index Fund - DC - Non Lending, a collective fund for qualified plans, is to approximate the risk and return characterized by the S&P 500 Index. This Index is commonly used to represent the large cap segment of the U.S. equity market. To achieve its objective, the Fund employs a replication technique, which generally seeks to hold each index constituent in its proportional index weight. The fund may hold units of the NTGI-QM Collective Daily S&P 500 Equity Index Fund - Non Lending. The Fund may make limited use of futures and/or options for the purpose of maintaining equity exposure. This Fund does not participate in securities lending. The S&P 500 Fund is valued daily and has a trade notification deadline of trade date minus one business day (T-1) at 9:30 Central.

(5) The investment objective of the Pyramis Small Company Commingled Pool (Portfolio) is to achieve long-term growth of capital, principally by investing in the equity securities of smaller, growing companies. The Portfolio's management is based on the selection of equity securities of companies which have relatively small market capitalizations, the potential for above average earnings-per-share growth and whose equity valuations are close to or below the average valuation level of established, larger companies' shares. The Portfolio has daily liquidity and the only restrictions to cash flow activity in the pool pertain to anti-dilution measures, wherein any flow in to or out of the pool that exceeds 2% of the total net assets of the pool must use a transition account, so as not to adversely affect other investors in the pool.

(6) The investment objective of the Funds is to approximate as closely as practicable, before expenses, the performance of the Russell 1000 Index over the long term. The Funds attempt to achieve their investment objective by investing in other collective investment funds (each an "Underlying Fund"), managed by the Trustee, which have characteristics consistent with the Funds' overall investment objective. The net asset value per unit of the Funds is determined each business day and thus issuances and redemptions of Funds' units may be made on such days based upon the transaction price per unit of the Funds. Redemption from the Funds may be subject to certain withdrawal safeguards.

7. Interest in the Schlumberger Group Trust (cont'd)

Valuation of investments and financial liabilities

Cash and cash equivalents are stated at fair value. Foreign currency included in cash is translated using closing spot rates of exchange. Cash equivalents include repurchase agreements, U.S Treasury bills and other highly liquid investments that are within three months of maturity when acquired, and short-term investment funds. Repurchase agreements are valued at amortized cost, which approximates fair value. U.S. government securities and government agency obligations included in cash equivalents are stated at fair value based on a bid evaluation. Short-term investment funds are stated using a constant price (or amortized cost) of $1 per unit of participation, which approximates fair value. Other cash equivalents are valued on the basis of a bid evaluation or at amortized cost, which approximates fair value.

Equity securities include U.S. and international equity securities. U.S. equities include companies that are well diversified by industry sector and equity style (i.e., growth and value strategies). Active and passive management strategies are employed. Investments are primarily in large capitalization stocks and, to a lesser extent, mid-and small-cap stocks. International equities are invested in companies that are traded on exchanges outside the U.S. and are well diversified by industry sector, country and equity style. Active and passive strategies are employed. The vast majority of the investments are made in companies in developed markets with a small percentage in emerging markets.

Common stocks and most of other equities are stated at fair value as determined by closing quoted market prices in active markets in which the securities are traded. Certain other equity investments are valued at fair value based on bid or mid prices (i.e., the average of the bid and ask prices).

Mutual funds and other registered investment companies are stated at fair value. Mutual funds are valued at quoted market prices (available to institutions and retail clients) which represent the net asset value of shares owned by the Group Trust at year-end. Certain other registered investment companies are valued based on the net asset value of the units owned by the Group Trust at year-end as determined by the investment manager of the other registered investment companies based on the fair value of the underlying investments of the other registered investment companies. Exchange traded funds, also considered to be other registered investment companies, are valued at quoted market prices, which may not represent the net asset value of the units owned by the Group Trust at year-end. Other registered investment companies include an open-end interval management investment fund that offers its shareholders the opportunity to purchase and redeem shares on a periodic basis.

7. Interest in the Schlumberger Group Trust (cont'd)

Valuation of investments and financial liabilities (cont'd)

Collective and other trusts are stated at fair value, represented by the net asset value of the units of participation owned by the Group Trust at year end as determined by the trustees of the collective and other trusts based on the fair value of the underlying investments of the collective and other trusts.

Corporate bonds and other fixed income obligations consist primarily of investment grade bonds from diversified industries. Corporate bonds and other fixed income obligations are stated at fair value. Certain corporate bonds and other fixed income obligations are valued based on a bid evaluation while others are valued based on mid and bid prices (i.e., a bid price represents a price a dealer is ready to pay for a security). Oftentimes, bid evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Government and other related bonds are comprised primarily of inflation protected U.S. treasuries, and to a lesser extent, other government-related securities (e.g., government agency obligations, municipal, and provincial bonds). Government and other related bonds are stated at fair value. Government and other related bonds, other than for those which have quoted market prices available, are valued based on a bid evaluation (i.e., an estimated price at which a dealer would pay for a security). Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Government mortgage-backed securities and other collateralized obligations are debt obligations that represent claims to the cash flows from pools of credit cards, auto loans and mortgage loans which are purchased from banks, mortgage companies, and other originators and then assembled into pools by governmental, quasi-governmental and private entities. Government mortgage-backed securities and other collateralized obligations are stated at fair value. Government mortgage-backed securities and other collateralized obligations are valued based on a bid evaluation. Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

The GIC is stated at fair value, represented by the net asset value, as determined by the insurance company, of the underlying investments in the separate account. The GIC's fair value approximates its contract value. The GIC is 100% allocable to the Schlumberger Master Profit Sharing Trust.

Asset derivatives include options, swaps, swaptions and pending foreign exchange purchases. Derivatives are stated at fair value. Exchange traded options are valued based on a settlement price which is the price set by the exchange at the end of each day's trading. Pending foreign exchange purchases are marked-to-market based upon year-end forward exchange rates. Other derivatives are valued based on a mid evaluation (i.e., the average of the estimated prices at which a dealer would pay for and sell a security). Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Short-term securities under security lending agreement represent short-term investments purchased with proceeds from cash collateral received from borrowers of the Group Trust's securities. Short-term securities under the security lending agreement are valued at cost, which approximates fair value.

Other short-term securities are valued based on a bid evaluation or at amortized cost, which approximates fair value.

Liability derivatives (which include options, swaps, and pending foreign exchange sales) and other liabilities are stated at fair value. Exchange traded options are valued based on a settlement price which is the price set by the exchange at the end of each day's trading. Pending foreign exchange sales are marked-to-market based upon year-end forward exchange rates. Other derivatives are valued on the basis of a mid evaluation. Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks. Other liabilities are valued at cost which approximates fair value.

The obligation under security lending agreement represents amounts due to borrowers of Group Trust's securities for the cash collateral received from them. The amount due approximates fair value.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Group Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The disclosures required by FASB ASC Topic 820 are not required for due from brokers for securities sold, due to brokers for securities purchased, accrued income, other assets and other liabilities.

Securities transactions and investment income

Net appreciation or depreciation in fair value of investments includes realized gains or losses on investments sold and unrealized gains or losses on investments held. Unrealized gains or losses on investments represent the change in the difference between the cost and fair value of investments at the end of the year and at the beginning of the year.

Purchases and sales of securities are recorded on a trade-date basis. Gains or losses on securities transactions are recorded as the difference between proceeds received and cost, with cost determined on the moving average basis. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date.

Derivative financial instruments

The Group Trust enters into various derivative financial instruments in carrying out its investment strategy, principally to: (1) hedge a portion of the Group Trust's portfolio to limit or minimize exposure to certain risks such as foreign exchange risk, interest rate risk, credit risk, and equity risk, (2) gain an exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (3) increase investment returns by reducing the cost of structuring the portfolio or by capturing value disparities between financial instruments.

Forward foreign exchange contracts are used to protect the Group Trust against the exchange risk associated with the Group Trust's investment in common stock and fixed income obligations denominated in foreign currency because the Group Trust is able to secure an exchange rate in the present for settlement at a future date. The terms of these contracts generally do not exceed one year. Risks in forward foreign exchange contracts arise from the possible inability of counterparties to meet the contract's terms and from movements in currency values.

The Group Trust reflects the fair value of all forward contracts as an asset (forward contracts to purchase foreign currency) or liability (forward contracts to sell foreign currency) in the Group Trust's statement of net assets. The change in value of these forward exchange contracts is included as unrealized gains or losses in the changes in Group Trust net assets. When the forward exchange contract is closed, the Group Trust transfers the unrealized appreciation or depreciation to a realized gain or loss equal to the change in the value of the forward exchange contract when it was opened and the value at the time it was closed or offset. Unrealized and realized gains and losses are included in net appreciation (depreciation) in the Group Trust's statement of changes in net assets.

Interest rate contracts such as fixed income futures, interest rate swaps, and option premiums are used to manage the interest rate risk.

7. Interest in the Schlumberger Group Trust (cont'd)

Derivative financial instruments (cont'd)

The Group Trust enters into fixed-income futures contracts in the normal course of its investment activities to reduce the interest rate risk associated with its fixed-income investments, to replicate government bond positions, and as a duration management tool to enhance portfolio returns.

Upon entering into a fixed-income futures contract, the Group Trust is required to pledge to the broker an amount of cash and/or liquid securities equal to the minimum "initial margin" requirements of the exchange. Pursuant to the futures contract, the Group Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin" which is settled daily and is included in net appreciation (depreciation) in the changes in Group Trust net assets. The Group Trust records a variation margin receivable or payable in the Group Trust's statement of net assets for valuation margins which have not been received or paid at the end of the year. Fixed-income futures contracts are not included in the Group Trust's statement of net assets as cash settlements are made daily.

The risk of counterparty non-performance associated with the use of fixed-income futures is considered to be modest as performance is assured by the futures exchanges, which provide multiple layers of protection, such as the collection of variation margin on a daily basis and the use of standardized contracts to facilitate liquidity.

Interest rate swaps are used to adjust interest rate and yield curve exposures and as a substitute for physical securities. Swap agreements involve the exchange by the Group Trust with a counterparty of the respective commitments to pay or receive interest with respect to a notional amount of principal. Market risk of loss is limited to changes in the fair value from December 31 of each year presented through the applicable expiration date. Long swap positions increase exposure to long-term interest rates while short positions decrease exposure. The Group Trust is subject to the risk of the counterparty to an interest rate swap agreement being unable or unwilling to make timely interest payments, or to otherwise honor its obligations.

The Group Trust reflects the fair value of all interest rate swaps as an asset or liability in the Group Trust's statement of net assets. Gains or losses on interest rate swaps are accounted in net appreciation (depreciation) in the Group Trust's statement of changes in net assets.

The Group Trust may buy or write put and call options through listed exchanges and in the over-the-counter ("OTC") market. When the Group Trust buys or writes an option, an amount equal to the premium paid or received by the Group Trust is recorded as an asset or liability and is subsequently adjusted to the current market value of the option purchased or written. The premiums paid or received from buying or writing options are recorded as realized gains or losses upon the expiration of the options. The difference between the premium and the amount paid or received on effecting a closing purchase or sale transaction also is treated as a realized gain or

7. Interest in the Schlumberger Group Trust (cont'd)

loss. If an option is exercised, the premium paid or received is recorded as a realized gain or loss if sold or an adjustment to cost if acquired. The Group Trust, as a writer of an option, may have no control over whether the underlying securities may be sold (call) or purchased (put) and as a result bears the market risk of an unfavorable change in the price of the security underlying the written option. Options to purchase and sell fixed income securities and swaptions are used to manage interest rate and volatility exposure, while credit spreads are used to manage credit risk. Options will become worthless at expiration if the underlying instrument does not reach the strike price of the option.

Credit default swaps ("CDS") are used to manage credit exposure without buying or selling securities outright. Written CDS increase credit exposure ("selling protection"), obligating the portfolio to buy bonds from counterparties in the event of a default. Purchased CDS decrease exposure ("buying protection"), providing the right to "put" bonds to the counterparty in the event of a default. CDS agreements involve one party making a stream of payments (referred to as the buyer of protection) to another party (the seller of protection) in exchange for the right to receive a specified return in the event of a default or other credit event for the referenced entity, obligation or index. As a seller of protection on credit default swap agreements, the Group Trust will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap provided that there is no credit event. Typical credit events include bankruptcy, dissolution or insolvency of the referenced entity, failure to pay and restructuring of the obligations of the referenced entity. As the seller, the Group Trust would effectively add leverage to its portfolio because, in addition to its total net assets, the Group Trust would be subject to investment exposure on the notional amount of the swap.

If the Group Trust is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Group Trust will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. If the Group Trust is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Group Trust will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

The Group Trust may use credit default swaps on corporate issues, sovereign issues of an emerging country or U.S. municipal issues to provide a measure of protection against defaults of the issuers (i.e., to reduce risk where the Group Trust owns or has exposure to the referenced obligation) or to take an active long or short position with respect to the likelihood of a particular issuer's default. The Group Trust also may use credit default swaps on credit indices to hedge a portfolio of credit default swaps or bonds, which is less expensive than it would be to buy many credit default swaps to achieve a similar effect. Credit default swaps on indices are benchmarks for protecting investors owning bonds against default, and traders use them to speculate on changes in credit quality. At December 31, 2011, the Group Trust did not hold credit default swaps where the Group Trust was a seller of protection. At December 31, 2010, the Group Trust held credit default swaps where the Group Trust was a seller of protection, with maturities ranging from March 20, 2011 to March 20, 2020.

The maximum potential amount of future payments (undiscounted) that the Group Trust as a seller of protection could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. These amounts were $0 and $9,200,000 as of December 31, 2011 and 2010, respectively. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into by the Group Trust for the same referenced entity or entities. Securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

The fair value of CDS for which the Group Trust was a seller of protection was $0 and $12,279 as of December 31, 2011 and 2010, respectively.

Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements on corporate, sovereign, U.S. municipal or U.S. Treasury obligation issues as of period end serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

The Group Trust reflects the fair value of all CDS as an asset or liability in the Group Trust's statement of net assets. Gains or losses on CDS are accounted in net appreciation (depreciation) in the Group Trust's statement of changes in net assets.

The objective of the S&P 500 Index futures contracts is to lock in the return of the S&P 500 Index and then use fixed income assets to add excess return over the benchmark. The risks involved with owning S&P 500 Index futures contracts are related to the volatility of the S&P 500 Index and that the performance of the Index and the futures may differ slightly. Changes in the contract values are settled daily and gains and losses are included in net appreciation (depreciation) in the fair value of investments in the Group Trust's statement of changes in net assets. S&P 500 Index futures contracts are not included in the Group Trust's statement of net assets as cash settlements are made daily.

U.S. Treasury Bills, U.S. Treasury Bonds, short-term investments, and cash with a fair value of $19,666,805 and $2,724,723 at December 31, 2011 and 2010, respectively, were posted by brokers and held by the Group Trust as collateral for derivative transactions. The notional amount of this collateral at December 31, 2011 and 2010 was $18,886,000 and $2,860,000, respectively.

Assets owned and included in the Group Trust's statement of net assets, with a fair value of $35,072,198 and $29,363,246 at December 31, 2011 and 2010, respectively, were held by the Group Trust's brokers as collateral for derivative transactions. The notional amount of this collateral at December 31, 2011 and 2010 was $34,484,000 and $29,436,450, respectively.

Certain of the Group Trust's derivative documents contain provisions, in addition to standard events of default, which if violated could cause a counterparty to declare a termination event and terminate the relevant agreement(s) with the Group Trust, which would result in a determination of the net amount due to or due from the counterparty and require immediate payment in accordance therewith. As an alternative to declaring a termination event, the counterparty may request additional collateralization on derivative instruments in net liability positions. The aggregate fair value of all derivative instruments with credit-risk-related contingency features that are in a net liability position on December 31, 2011 and 2010 was $14,589,113 and $7,131,385, respectively. If the credit-risk-related contingency features underlying these agreements were triggered on December 31, 2011 and 2010 with respect to one or more counterparties and any of such counterparties declared a termination event, as of the effective date of termination all derivative positions would be valued in accordance with the valuation procedures set forth in the derivatives documentation and the net amount due to or due from the counterparty would be payable by or payable to the Group Trust, respectively.

The Group Trust is subject to various Master Agreements, which govern the terms of certain transactions with select counterparties. These Master Agreements reduce the counterparty risk associated with relevant transactions by specifying credit protection mechanisms and providing standardization that improves legal certainty. Since different types of forward and over-the-counter ("OTC") financial derivative transactions have different mechanics and are sometimes traded out of different legal entities of a particular counterparty organization, each type of transaction may be covered by a different Master Agreement, resulting in the need for multiple agreements with a single counterparty. As the Master Agreements are specific to unique operations of different asset types, they allow the Group Trust to close out and net its total exposure to a counterparty in the event of a default with respect to all the transactions governed under a single agreement with that counterparty.

Master Agreements can also help limit counterparty risk by specifying collateral posting arrangements at pre-arranged exposure levels. Under the Master Agreements, collateral is routinely transferred if the total net exposure to certain transactions (net of existing collateral already in place) governed under the relevant master agreement with a counterparty in a given account exceeds a specified threshold, which typically ranges from zero to $250,000 depending on the counterparty and the type of Master Agreement. United States Treasury Bills and U.S. dollar cash are generally the preferred forms of collateral, although other forms of AAA rated paper may be used. The Group Trust's overall exposure to counterparty risk can change substantially within a short period, as it is affected by each transaction subject to the relevant Master Agreement.

7. Interest in the Schlumberger Group Trust (cont'd)

Derivative financial instruments (cont'd)

Since different types of forward and OTC derivative transactions have different mechanics and are sometimes traded out of different legal entities of a particular counterparty organization, each type of transaction is sometimes covered by a different Master Agreement, hence the need for several agreements with a counterparty. Therefore, exposure cannot be netted and collateralized across all types of transactions. Exposure can only be netted and collateralized across transactions governed under the same Master Agreement with the same legal entity.

Fair value amounts recognized for derivative instruments and fair value amounts recognized for the right to reclaim or return cash collateral arising from derivative instruments recognized at fair value under master netting arrangements are presented on a gross basis in the Group Trust's statement of net assets. At December 31, 2011 and 2010, the Group Trust has the right to reclaim cash collateral under master netting arrangements of $9,455,000 and $3,400,000, respectively. At December 31, 2011 and 2010, the Group Trust has the obligation to return cash collateral under master netting arrangements of $2,815,000 and $1,880,000, respectively.

At December 31, 2011 and 2010, the notional values of derivative contracts were as follows:

Security lending

Pursuant to the investment objectives of the Group Trust, stock loan transactions are permitted with the objective of adding investment income to the Group Trust. The Group Trust may lend securities held to unaffiliated broker-dealers registered under the Securities Exchange Act of 1934, or banks organized in the United States of America through the Group Trust's participation in the Trustee's securities lending program. At all times, the borrower must maintain cash or equivalent collateral equal in value to at least 100 percent of the value of the securities loaned. The cash collateral generally is invested in short-term securities which generate income that is allocated between the security lending agent and the Group Trust at predetermined contractual rates. The primary risk in lending securities is that a third-party borrower may default during a sharp rise in the price of the security that was borrowed, resulting in a deficiency in the collateral posted by the third-party borrower. The Group Trust seeks to minimize this risk by requiring that the market value of the loaned securities is recomputed each day and that additional collateral is furnished daily, if necessary. The Group Trust records cash collateral received from the third-party borrower as an asset and also records a corresponding liability for the return of the cash collateral. The Group Trust bears the risk of loss with respect to the unfavorable change in fair value of the invested cash collateral. The fair value of the securities loaned in the Group Trust securities lending program amounted to $228,767,692 and $396,605,911 at December 31, 2011 and 2010, respectively, and is included in Investments in the Group Trust. The fair value of non-cash

collateral received for securities on loan at December 31, 2011 and 2010 amounted to $68,974 and $195,412, respectively. The Group Trust recorded gross earnings from lending securities of $1,253,462 and $1,487,524 in 2011 and 2010, respectively, and net income of $977,996 and $805,747 in 2011 and 2010, respectively. Participating brokers paid $143,317 and received $336,761 for rebates in 2011 and 2010, respectively, and the Trustee received $418,783 and $345,016 in 2011 and 2010, respectively, for fees relating to security lending activity.

8. Party-in-interest transactions

Custodial fees paid to the Trustee by the Pension Trust were approximately $701,000 and $674,000 for the years ended December 31, 2011 and 2010, respectively. A portion of these fees is allocated to the Plan.

Actuarial Assumptions and Methodologies (Funding)

Interest:

The interest rates used for the 2011 plan year are the 24-month average corporate bond yields applicable for the month of January 2011. These discount rates are 2.94% for payments in the first 5 years, 5.82% for payments in years 6 – 20, and 6.46% for payments thereafter, which translates to an effective interest rate of 6.19%. (Prior year 24-month average corporate bond rates were 4.60% for payments in the first 5 years, 6.65% for payments in years 6 – 20, and 6.76% for payments thereafter, which translates to an effective interest rate of 6.67%.)

The yield curve used to determine the PBGC variable rate premium is the same as funding.

Mortality rates:

RP2000 separate annuitant and non-annuitant tables with static projection. Mortality is projected through the valuation date plus another 7 years for annuitants, and through the valuation date plus another 15 years for nonannuitants. This assumption is one of the choices allowed by the regulations.
