Independent Auditors' Report

The Plan Administrator
Gerber – Ft. Smith Hourly Pension Plan:

We were engaged to audit the accompanying statements of net assets available for benefits and of accumulated plan benefits of the Gerber – Ft. Smith Hourly Pension Plan (Plan) as of December 31, 2011 and 2010, and the related statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the years ended. These financial statements are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan Administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in notes 5, 7 and 8, which was certified by The Northern Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the Plan Administrator that the trustee holds certain Plan investment assets and executes investment transactions. The Plan Administrator has obtained certifications from the trustee as of and for the years ended December 31, 2011 and 2010, that the information provided to the Plan Administrator by the trustee is complete and accurate.

Because of the significance of the information in the Plan's financial statements that we did not audit, we are unable to, and do not, express an opinion on the accompanying financial statements taken as a whole. The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

As explained in note 5, the financial statements include investments whose carrying values have been estimated by management in the absence of readily determinable fair values. Management's estimates are based on information provided by the fund managers or the general partners. These investments are held in the Nestlé in the USA Pension Trust (Pension Trust), and represent 34% and 32% of the total net assets of the Pension Trust as of December 31, 2011 and 2010, respectively.

GERBER – FT. SMITH HOURLY PENSION PLAN

Notes to Financial Statements

December 31, 2011 and 2010

(1) Description of the Plan

The following brief description of the Gerber – Ft. Smith Hourly Pension Plan (Plan) is provided for general information purposes only. Participants should refer to the Plan document for more complete description of the Plan's provisions.

(a) General

The Plan is a noncontributory defined benefit pension plan covering substantially all of the hourly employees of the Ft. Smith Plant of Gerber Products Company, a wholly owned subsidiary of Nestlé SA (Nestlé). Nestlé has designated Nestlé USA, Inc. (Company) as the Plan sponsor and administrator.

The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

(b) Pension Benefits

Employees are entitled to monthly pension benefits upon the attainment of age 65 after completing at least five years of vesting service. The benefit is determined as of the participant's date of termination of employment based on the Plan provisions then in effect. For participants who terminated employment after December 31, 1989, the benefit is the greater of (i) or (ii) below:

- (i) The sum of (a) the accrued benefit as of December 31, 1989, computed in the same manner as participants who terminated employment before January 1, 1990, and (b) years of participation after December 31, 1989 (up to a maximum of 40 years of participation less years credited before 1990) multiplied by the Dollar Accrual Factors (as defined in the Plan Document) appropriate for such years (including the improvement to the Dollar Accrual Factors effective for years of participation in 2010 and later as negotiated with the collective bargaining unit in April 2010); or
- (ii) Years of participation (up to a maximum of 40 years of participation) multiplied by the Dollar Accrual Factors appropriate for such years.

Periodically, changes to the plan's provisions are negotiated to increase the base rate used to calculate pension benefits including benefit level increases to take place in future periods. No changes to the base rate were made in 2010 or 2011.

The Plan permits early retirement of active vested employees beginning at age 57. The participant can receive benefits computed as of the date of early retirement, in the same manner as a normal retirement benefit. Except in case of a participant with 40 or more full years of uninterrupted employment and who has attained age 60 at the time of early retirement, the monthly retirement benefit shall be reduced by 1/2 of 1% for each month by which the retirement date precedes age 62.

The normal form of payment is a life annuity payable in monthly installments. A participant may elect various optional forms of payment which are actuarially equivalent to the normal form. Unless revoked in writing, a married participant will be deemed to have automatically elected a 50% contingent annuitant option with his spouse named as beneficiary.

GERBER – FT. SMITH HOURLY PENSION PLAN

Notes to Financial Statements

December 31, 2011 and 2010

Participants terminating employment for any reason other than death or retirement shall be entitled to a vested deferred benefit pension determined as of the date of termination of employment in the same manner as the normal benefit and payable according to the same normal and early retirement provisions as apply to active employees.

After having attained the age of 50 years and completing 15 years of employment, employees who are eligible for disability benefits under Title II of the Federal Social Security Act are eligible for the monthly disability retirement pension under the Plan determined as of the date of disability retirement, reduced by certain other benefits provide by or at the expense of the Company.

Prior to September 29, 2010, a portion of the Plan's benefit liability was covered under an annuity contract with Principal Financial Group (Principal), which is a frozen contract. All benefit payments due under the contract were made directly by Principal to the retiree. The contract with Principal was liquidated on September 29, 2010, with the proceeds immediately re-invested in the Plan. All benefit payments thereafter will be paid to the participants directly from the Plan's assets held in the Nestlé in the USA Pension Trust.

(c) *Death Benefits*

If the participant dies while in service and being eligible for deferred vested, early, normal or postponed retirement benefits, the eligible spouse may receive 50% of the employee's accrued normal retirement benefit to date of death.

(2) Summary of Significant Accounting Policies

The following is a summary of the significant accounting policies followed by the Plan:

(a) *Basis of Accounting*

The financial statements of the Plan are prepared under the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

(b) *Investment Valuation*

Plan assets are held in the Nestlé in the USA Pension Trust, which was established by the Company for the pooled investment of assets for various qualified pension plans sponsored by the Company. The Pension Trust is maintained by The Northern Trust Company, as trustee.

The Pension Trust investments are stated at fair value, in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures*. Refer to note 8, *Fair Value Measurements*, for further information related to the valuation of Pension Trust investments.

Purchases and sales of securities are recorded on a trade-date basis. Interest and other income are recorded on an accrual basis. Dividend income is recorded on the ex-dividend date. Net appreciation/depreciation includes the Pension Trust's gains and losses on investments bought and sold as well as held during the year.

(c) Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries.

The accumulated plan benefits for active employees are based on years of participation and the applicable benefit multiplier, as defined, in effect for given calendar years. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an independent actuary, Towers Watson, and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements due to death, disability, termination, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations as of December 31, 2011 and 2010 were as follows:

Life expectancy of participants	RP-2000
Retirement age	Probabilities varying by age
Discount rate	8.50%

The discount rate for obligations was 8.50% in 2011 and 2010. These rates are consistent with the long-term expected return on assets. The mortality table of RP-2000 remains the same for 2011 and 2010; however, mortality projections have been changed in 2011 from 2026 to 2027 for preretirement participants and from 2018 to 2019 for postretirement participants.

The foregoing actuarial assumptions used are based on the presumption the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

(d) Administrative Expenses

The Plan allows for administrative expenses such as trustee fees, investment management fees, actuarial valuation fees, accounting fees, and recordkeeping fees to be paid from Plan assets.

(e) Payment of Benefits

Benefit payments to participants are recorded upon distribution.

(f) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosures of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

(g) Risks and Uncertainties

The Pension Trust invests in various investment securities. Investment securities are exposed to various risks such as interest rate risk, market risk and credit risk. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and those changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

(h) Derivative Financial Instruments

The Plan accounts for derivatives and hedging activities in accordance with ASC 815, *Derivatives and Hedging*, which requires that all derivative instruments not qualifying for hedge accounting be recorded on the statements of net assets available for benefits at their respective fair values.

The Company uses derivatives for the benefit of the plans in the Pension Trust as a tool to reduce risk and as an investment strategy. The Pension Trust holds the following types of derivative instruments: interest rate swaps, credit default swaps (CDS), equity swaps, commodity swaps, financial futures, commodities futures, foreign exchange forward contracts and options, and swaptions and options. The derivative instruments outstanding as of period-end and the amounts of realized and unrealized gains and losses, as well as other income on derivative instruments during the period (as disclosed in the derivatives tables in note 7), serve as indicators of the volume of derivative activity for the Pension Trust. Derivative strategies involve risk and like other investments, can lose money. The impact on Pension Trust performance can be positive or negative, and will vary depending on market movements.

The Company manages the Pension Trust's interest rate risk using interest rate swaps (interest rate hedge). The objective of the interest rate hedge is to lengthen the effective duration of the Pension Trust's assets to better match its defined benefit obligations, thereby protecting the funded ratio of the Pension Trust as interest rates fluctuate. Interest rate swaps used in this manner adjust interest rate and yield curve exposures and substitute for physical securities.

Notes to Financial Statements

December 31, 2011 and 2010

The Company also uses derivatives as a substitute for physical securities in order to gain exposure to certain asset classes. Using derivatives instead of physical securities may be a more efficient means to gain exposure to an index or a market sector due to its characteristics of increased liquidity and reduced transaction costs. Using derivatives may also reduce the need to sell assets when there is a difficult trading environment. Swaps and futures are used to create credit, equity and commodities exposure. Commodities exposure may only be obtained through the use of either futures or swaps derivative instruments, which is industry standard.

The Company uses a mix of equity, fixed income and commodity futures to securitize a large cash position. Use of these derivatives enables the cash of the Pension Trust to earn a return as if it were invested in the various asset classes as defined by the strategic asset allocation. It allows the Pension Trust to retain liquidity and flexibility, while still earning equity, fixed income, or commodity returns.

The Company uses derivatives to execute portable alpha strategies. Portable alpha strategies involve the use of futures or swaps to provide market exposure in equities, fixed income and commodities, combined with investment in market neutral total return strategies. Use of derivatives in this manner enables the Pension Trust to use market neutral strategies to earn an active return, while still complying with the strategic asset allocation.

The Company manages credit risk through use of CDS. These derivatives are used to manage credit exposure without buying or selling securities outright. Written CDS increase credit exposure (selling protection), obligating the portfolio to buy bonds from counterparties in the event of a default. Purchased CDS decrease exposure (buying protection) providing the right to “put” (sell) bonds to the counterparty in the event of a default.

The Company manages the foreign currency risk inherent in international equity portfolios through the use of foreign exchange forwards, which are foreign exchange transactions that have settlement periods longer than three days. The Company also uses foreign exchange forwards and currency options as an investment strategy.

Counterparty risk for swaps and forwards is mitigated through the use of International Swaps and Derivatives Association (ISDA) standardized agreements that require gains and losses owed to and from the counterparty to be agreed daily, and gains or losses to be collateralized with cash. For futures, the gain (loss) is calculated and funds are transferred to and from the Pension Trust on a daily basis, based on the prior day’s market valuation. The types of counterparties are large banks and brokers, and the investment managers each have netting arrangements within their accounts to reduce the exposure to any single counterparty.

Holding derivatives has a significant impact on cash flow. Daily mark to markets and accumulated gains and losses can be large, depending on the volatility of the markets. The Company has maintained liquidity necessary to settle any losses, regardless of the severity of the market change. In addition, the Pension Trust has the ability to borrow from the Company through an interest-free loan, if needed, to cover cash flow needs.

Notes to Financial Statements

December 31, 2011 and 2010

(i) *Foreign Currency*

The Pension Trust's investment securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts at the date of valuation. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into U.S. dollar amounts on the respective dates of such transactions.

The Pension Trust does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net appreciation and depreciation from investments.

(3) **Funding Policy**

The Company's general funding policy is to make contributions to the Plan for each plan year in an amount not less than the minimum required contribution under ERISA, and to target 100% funded status on a Pension Protection Act (PPA) basis. This will not exceed the maximum tax-deductible contribution. The minimum and maximum contributions are calculated on an annual basis by the Plan's actuary. Contributions made for the plan years ended December 31, 2011 and 2010 were \$1,198,000 and \$979,000, respectively, and met the Company's policy.

(4) **Plan Termination**

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan, subject to the provisions set forth in ERISA.

In the event the Plan terminates, the net assets of the Plan will be allocated as prescribed by ERISA and its related regulations. The assets allocated to each participant would be distributed through either (a) continuance of the trust fund that is attributable to the current Plan or the establishment of a new trust fund, and/or (b) purchase of annuity contracts. In addition, certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal-age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling on the amount of an individual's monthly benefit that the PBGC guarantees, which is adjusted periodically.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits and may also depend on the level of benefits guaranteed by the PBGC.

(5) Trustee Certifications

The plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the plan administrator has obtained certifications from The Northern Trust Company as of and for the years ended December 31, 2011 and 2010, as trustee of the Plan, that all of the information provided by them is complete and accurate. Information included in the accompanying financial statements and notes thereto, as to investments and investment income (loss), is presented in reliance upon those certifications, with the exception of the Pension Trust's investments in real estate funds, hedge funds, and venture capital and partnership funds. These investments are held by the investment fund managers, who report the net asset values of the Pension Trust's interests to the Company, as well as Northern Trust, on a periodic basis. Information included in the accompanying financial statements related to these funds is based upon these net asset values as of December 31, 2011 and 2010.

(6) Parties in Interest

During 2011 and 2010, Nestle in the USA Pension Trust had parties-in-interest that included Plan Sponsor, trustee, investment advisory, legal, actuarial and administrative service providers. The fees paid by the Pension Trust to these parties-in-interest were \$14,156,928 and \$14,585,374 in 2011 and 2010, respectively. The Pension Trust also invests in the common stock of The Northern Trust Company. The fair value of this investment was \$991,500 and \$664,920 in 2011 and 2010, respectively.

(7) Interest in Nestlé in the USA Pension Trust

The assets of the Plan are invested in the Pension Trust, in which the assets of the Plan are combined with the assets of other affiliated Company plans for investment purposes.

Pursuant to Northern Trust's method of allocating the investment holdings between the plans, contributions into the Pension Trust are treated as additions in the Pension Trust, withdrawals are treated as deductions in the Pension Trust, and investment income (loss) is allocated proportionately. Accordingly, the value of the Plan's investment in the Pension Trust is equal to the Plan's interest in each applicable investment increased or decreased by the Plan's allocated share in income, gains, and losses attributable to each applicable investment, which share is generally based upon the Plan's respective share of the Pension Trust's combined net assets available for benefits each month before investment income (loss) and net appreciation (depreciation) in the fair value of investments. Those administrative expenses of the Pension Trust, which can be specifically identified as being applicable to the Plan, are charged to the Plan. The remaining expenses are allocated to the Plan based on the Plan's respective share of the Pension Trust's combined net assets available for benefits on a monthly basis.

(8) Fair Value Measurements

The Plan has adopted the guidance in ASC 820, which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The fair value framework requires the categorization of assets and liabilities into three levels based upon the assumptions (inputs) used to price the assets or liabilities. Level 1 provides the most reliable measure of fair value, whereas Level 3 generally requires significant judgment. The three levels are defined as follows:

- **Level 1:** Assets or liabilities that are valued based on unadjusted quoted prices in active markets that are accessible at measurement date.
- **Level 2:** Assets or liabilities that are valued based on inputs other than quoted prices that are observable, including quoted prices for similar assets or liabilities and other pricing models (which use observable inputs).
- **Level 3:** Assets or liabilities that are valued based on unobservable inputs, including the reporting entity's own analysis of the underlying economic data that market participants would factor into the pricing of the asset or liability.

Notes to Financial Statements

December 31, 2011 and 2010

Due to the Company's policy to diversify the holdings of the Pension Trust portfolio, there is no significant concentration of investments within any particular class of investments included above. The valuation methodologies utilized by the Plan and Pension Trust for the above investments as of December 31, 2011 and 2010, are as follows:

- (a) Based on quoted market prices in active markets.
- (b) Based on investment manager or industry pricing services. Certain fixed income pricing is on a bid-evaluation basis. Institutional bid evaluations are estimated prices. Pricing vendors use models, which are generally proprietary, to arrive at the estimated prices. These prices represent the price a dealer would pay for a security. Model inputs vary depending on the type of security, but typically include trade data, institutional bids, comparable trades, dealer quotes and news media. Market data is provided by multiple independent sources, including primary and secondary dealers, portfolio managers and research analysts.

Collateralized mortgage models are based on trade and quote activity of bonds with similar features including issuer, vintage, prepayment speeds and purpose of the underlying loan (first or second lien).

Cash equivalents include short term fixed income instruments whose valuations are determined based upon maturity date, issue date and credit ratings.

Commingled Funds are valued based on the net asset value of the fund as determined by the investment manager based on quoted market prices for equity funds. The net asset value is the market value of all of the securities owned by a fund, minus its total liabilities divided by the number of shares issued. There are no redemption restrictions that would impact the liquidity of the fund. These funds are valued and traded at the net asset value on a daily basis.

U.S. Treasuries are priced by obtaining feeds from various live data sources including market makers and inter-dealer brokers.

Currency forwards use quoted foreign exchange rates in an active market or exchange. Over-the-counter options are valued using bid, ask/offer quotes that are binding and corroborated. Swaps are valued using the discounted cash flow method. The two legs (fixed and floating) are priced independently as the present value of their expected cash flows.

Collateral (held at broker) is cash collateral held at the broker to cover unrealized losses on derivatives. Collateral held represents broker funds held by trust to cover unrealized gains due to the trust. The collateral is marked to market daily.

- (c) Certain equities and fixed income securities (primarily certain collateralized obligations) are valued based on upon evaluated prices using unobservable inputs (i.e. extrapolated data, proprietary models, indicative quotes).
- (d) Investments in real estate funds, hedge funds, and private equity funds are based on the net asset values reported to the Company and trustee by the fund managers or the general partners of the fund.

Notes to Financial Statements

December 31, 2011 and 2010

These net asset values are based on the fair value of the underlying portfolio investments held by the investment fund.

These fair values are determined by a variety of methods: real estate investments are valued at appraised values plus undistributed rental and interest income; hedge funds are valued by the investment manager using quoted market prices and evaluations supplied by industry pricing vendors; and private equity investments are valued using income and market based analysis.

Management has used the net asset value as a practical expedient to estimate the fair value of the investment fund. Limited partnerships are held until they unwind, which is typically ten years from the date of entering the investment. As of December 31, 2011 and 2010, unfunded commitments were \$124 million and \$223 million, respectively. For investments in hedge funds and real estate that allow redemptions, upon notice, the funds are typically paid out on a quarterly basis, sometimes over multiple quarters. There are no gates or lock ups that would substantially impact the liquidity of the investments. Redemptions occur at fair value, which is based on the most recent net asset value prior to the redemption. The Company currently has no intention of selling any of these investments at an amount other than the net asset value.

- (e) Fair value is based on the net asset value of the Core Collateral Fund as determined daily, by the trustee, using market prices and evaluations supplied by industry pricing vendors.
- (f) Certain other miscellaneous receivables and liabilities are based on unobservable inputs, as there is no active market for these net assets. These receivables and liabilities are short term in nature and were settled at their carrying value within 30 days of the plan year end. Therefore, Company management has estimated that their fair value is equal to their carrying value.

A summary of changes in the fair value of Level 3 assets and liabilities for the years ended December 31, 2011 and 2010 is as follows:

* The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another.

The significance of transfers between levels is evaluated based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. While not considered significant, a transfer of \$4M was made from Level 2 to Level 3 during 2011. There were no significant transfers in or out of Level 1 or 2 during 2011.

(9) Tax Status

The Internal Revenue Service (IRS) has determined and informed the Company by a letter dated January 7, 2003 that the Plan and related trust are designed in accordance with applicable Sections of the Internal Revenue Code (IRC). In accordance with IRS procedures, in December 2009 the Company adopted an amended and restated Plan document effective January 1, 2009. The Company submitted a determination letter ruling request with the IRS in January 2010 for the amended and restated Plan document with regard to EGTRRA and other items identified on the 2008 Cumulative List of Changes in Plan Qualification Requirements in IRS Notice 2008-108. The IRS issued a favorable ruling on the request on January 5, 2011; however, Nestlé legal counsel requested the IRS to reissue a corrected and clarifying letter on January 28, 2011. The plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require plan administrator to evaluate tax positions taken by the Plan. The financial statement effects are recognized when the Plan has taken an uncertain position that more likely than not would be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2011, there are no uncertain tax positions taken or expected to be taken.

The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes the Plan is no longer subject to income tax examinations for years prior to 2008.

Notes to Financial Statements

December 31, 2011 and 2010

(10) Reconciliation of Financial statements to Form 5500

Contributions of \$1,527,000 and \$1,198,000 were made by the Company during 2011 and 2010, respectively. Since the contributions were made prior to September 15, the contributions have been designated for the 2011 and 2010 plan years, respectively, for tax purposes on Form 5500. However, the Plan only recognized \$1,198,000 and \$979,000 in the 2011 and 2010 financial statements, as these were the amounts required to meet the minimum funding requirements and/or the Company's funding policy.

The following is a reconciliation of net assets available for benefits per the financial statements as of December 31, 2011 and 2010 to Form 5500:

Administrative expenses For funding, 1% of beginning-of-year fair value of assets for Reedsburg, Fort Smith, and Gerber Life; 0.75% for Fremont and Infant Nutrition; and 0.25% for Puerto Rico.

At-risk assumptions For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan.

Timing of benefit payments Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

► Methods	
Valuation date	First day of plan year
Funding target	Present value of accrued benefits
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year
Actuarial value of assets	Market value of assets
Funding policy	Nestlé USA's general funding policy is to make contributions for each plan year in an amount not less than the minimum required contribution under ERISA and to target 100% funded status on a Pension Protection Act (PPA) basis. This will not exceed the maximum tax-deductible contribution. Nestlé may vary its contribution level, if appropriate to its tax and cash position and funded status.
Benefits not valued	All benefits described in the Plan Provisions section of this report were valued. Towers Watson has reviewed the plan provisions with Nestlé and based on that review, is not aware of any significant benefits required to be valued that were not.
Change in assumptions and methods since prior valuation	The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements. The assumed plan-related expenses added to the target normal cost were changed from 0.25% of beginning-of-year fair value of assets for Infant Nutrition and 0.50% for all other plans to 0.25% of beginning-of-year fair value of assets for Puerto Rico, 0.75% for Fremont and Infant Nutrition, and 1.00% for Gerber Life, Fort Smith and Reedsburg.

Plan Provisions

The most recent amendment reflected in the following plan provisions was effective in 2010.

Covered employees	Hourly paid employees on Ft. Smith, Arkansas hourly factory payroll
Participation date	Age 20 ½ and six months of service or upon attainment of age 40, if earlier.
Type of plan	Dollar per month plan

Definitions

Vesting service	The number of completed full plan years of employment with the Company or any Affiliate in which the employee works 1,000 hours.
Credited service	One full year for each year with at least 1,000 hours of service.
Accumulated benefit:	Monthly benefit is the largest of (a) and (b) below: (a) The sum of (1) and (2) below: (1) The accrued benefits as of December 31, 1989, based on participation service, final average compensation, and the primary Social Security benefit as of December 31, 1989. (2) For participation service after December 31, 1989 (maximum 40 years less pre-1989 credited service up to 33 1/3 years), the monthly benefit accrual in a given year is the applicable Dollar Accrual based on total years of participation. (b) For all participation service up to 40 years, the monthly benefit accrual in a given year is the applicable Dollar Accrual Factor.

The applicable Dollar Accrual Factor under (a) and (b) depends on the years of participation as shown below:

Early retirement	Retirement before NRD and on or after both attaining age 57 and completing five years of vesting service
Postponed retirement	Retirement after both attaining age 65 and completing five years of vesting service
Vested termination	Termination for reasons other than death or retirement after completing five years of vesting service
Disability	Permanent and total disability on or after both attaining age 50 and completing fifteen years of vesting service
Preretirement death benefit	Death while eligible for normal, early, postponed, or deferred vested retirement benefits, with a surviving spouse on or after completing five years of vesting service

Benefits Paid Upon the Following Events

Normal retirement (NRD)	Accrued benefit payable immediately
Early retirement	Monthly pension benefit determined as of early retirement date, reduced $\frac{1}{2}$ of 1% for each month by which the early retirement date precedes 62. Unreduced for employees retiring after attaining age 60 with 40 years of uninterrupted service
Postponed retirement	Accrued benefit payable immediately
Vested termination	Accrued benefit determined as of termination date, actuarially reduced for commencement of payments prior to NRD
Disablement	Accrued benefit determined as of disability retirement date reduced by certain other benefits by or at the expense of the company
Preretirement death	50% of the projected accrued benefit as of participant's normal retirement date is payable immediately to the dependent spouse until the death or remarriage of the dependent spouse. If not eligible for a dependent spouse benefit, a 50% surviving spouse benefit (100% if eligible for early retirement) is payable on the participant's early retirement age date. If neither a dependent nor surviving spouse benefit is payable, the lump sum balance as of the time of death is payable.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
