To the Participants and Administrator of
Retirement Plan for Certain Employees of
Anheuser-Busch and InBev USA

We have audited the accompanying statement of net assets available for benefits of the Retirement Plan for Certain Employees of Anheuser-Busch and InBev USA (the Plan) as of December 31, 2011, and the related statement of changes in net assets available for benefits for the year then ended. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements of the Plan as of and for the year ended December 31, 2010, were audited by other auditors. Those auditors expressed an unqualified opinion on those financial statements in their report dated October 10, 2011.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America as established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the Plan's net assets available for benefits as of December 31, 2011, and the changes therein for the year then ended, and the accumulated plan benefits as of December 31, 2010, and the changes therein for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

NOTES TO FINANCIAL STATEMENTS

December 31, 2011 And 2010

1. Description Of The Plan

The following brief description of the Retirement Plan for Certain Employees of Anheuser-Busch and InBev USA (the Plan) is intended to give a general summary of its principal provisions. Participants should refer to the Plan Document for more complete information.

General

The Plan is a defined benefit plan that provides normal retirement, early retirement, disability and death benefits to eligible hourly-paid employees at covered operations of the participating employers who have completed one year of service and who are not covered by a collective bargaining agreement under which the participating employers are required to make contributions to another retirement plan. Employees do not contribute to the Plan. The Plan is subject to the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

The Company amended the Plan to freeze the accrual of future benefits as of December 31, 2011 and January 1, 2012 for certain participants. Once the Plan is frozen, there will be no loss in vested benefits of the participants, and no additional accrual of service credit after that date.

Participating and former employers include Anheuser-Busch, LLC (the Company), Golden Eagle Distributing Company, August A. Busch & Co. of Massachusetts, Eagle Snacks, Inc., InBev USA, LLC and Busch Properties, Inc.

Plan Administration

The Plan Administrator is the Company. Effective January 1, 2011, the Plan changed custodians and trustees from State Street Bank and Trust Company to The Bank of New York Mellon (Mellon). Mellon, as sole trustee of the Plan, holds all Plan assets and is responsible for benefit payments from the Anheuser-Busch Companies, LLC Master Defined Benefit Trust (Master Trust) according to information submitted by the Plan Administrator.

Plan Contributions

The Company makes contributions to the Plan to satisfy the minimum funding requirements as determined by the Plan's actuary (Note 4).

Notes To Financial Statements (*Continued*)

Plan Benefits

Plan benefits are determined in accordance with the provisions of each supplement to the Plan Document.

Vesting service is used in determining eligibility for early retirement and disability benefits, as defined in each supplement to the Plan Document.

The Plan is subject to certain restrictions relating to the payment of accelerated benefit payments. In addition, the Plan is prohibited from executing amendments that would increase benefits without additional funding. These restrictions resulted from the Plan falling below certain funding levels as required by the Pension Protection Act of 2006.

Expenses Of The Plan

Under the Master Trust agreement with the Trustee, the Company may pay all expenses incurred in the administration of the Plan, including trustee fees, but is not obligated to do so. Trustee expenses not paid by the Company are paid by the Master Trust and proportionately allocated to participating plans. All other direct expenses are paid by the Plan.

Plan Termination

The Company anticipates the Plan will continue without interruption but reserves the right to discontinue its participation in the Plan. In the event that such discontinuance results in termination of the Plan, the Plan provides that the net assets will be allocated among the participants and beneficiaries of the Plan in the order of preference and in the manner outlined in the Plan Document. To the extent unfunded vested benefits exist, ERISA provides that such benefits are payable by the Pension Benefit Guaranty Corporation (PBGC) to participants, up to specified limitations. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all.

2. Summary Of Significant Accounting Policies

Basis Of Accounting

The Plan's financial statements are prepared on the accrual basis of accounting.

Use Of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements and the reported amounts of additions to and deductions from net assets during the reporting period. Actual results could differ from those estimates.

Investment Valuation And Income Recognition

The Plan's investments are reported at fair value. See Note 6 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Net appreciation in fair value of investments includes the Master Trust's gains and losses on investments bought and sold, as well as held during the year.

Allocation Of Assets In Master Trust

The Master Trust was established for the investment of the Plan's assets and certain other Company sponsored retirement plans.

The interest of each participating plan is represented in units. Each unit represents an undivided interest in the Master Trust. The value of each plan's interest in the Master Trust is based on the beginning of year value of the plan's interest in the trust plus actual contributions and allocated investment income, net of investment expenses, less actual distributions and allocated administrative expenses. The allocation of investment income and administrative expenses is based on each plan's ownership of Master Trust units at the end of each month.

Payment Of Benefits

Benefit payments are recorded when paid.

3. Recent Accounting Pronouncements

In January 2010, the Financial Accounting Standards Board (FASB) issued guidance for improving disclosures about fair value measurements. The new guidance requires new disclosures for transfers in and out of Level 1 and 2 classifications and for more detail about the activity in Level 3 fair value measurements. The new guidance also clarifies previous disclosure requirements by increasing the level of disaggregation to the class level for investments and by requiring more disclosures about inputs and valuation techniques for fair value measurements in Level 2 and Level 3 investments. The disclosures required under this guidance for the current year are included in Note 6 and did not have a material impact on the Plan's financial statements. The additional disclosure requirements effective for periods beginning after December 31, 2010 did not have a material impact on the Plan's financial statements.

In May 2011, the FASB issued guidance to improve the comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with GAAP and International Financial Reporting Standards. The amendments are of two types: (i) those that clarify the application of existing fair value measurement and disclosure requirements and (ii) those that change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements. The update is effective for annual periods beginning after December 15, 2011. Plan management is in the process of evaluating the impact of the adoption of this guidance on the Plan's financial statements.

4. Funding Policy

Pension contributions are funded by the Company. Annually, an independent actuary performs a valuation of the Plan and related trust fund to determine the status of the fund and the normal cost and contribution limits prescribed by ERISA. The methods of valuation employed by the actuary were the Traditional Unit Credit Method for liabilities and a smoothed value for assets. The Plan met the minimum funding requirements of ERISA, as determined by the independent actuary for the Plan years ended December 31, 2011 and 2010.

RETIREMENT PLAN FOR CERTAIN EMPLOYEES OF ANHEUSER-BUSCH AND INBEV USA

Notes To Financial Statements (*Continued*)

The Company elected funding relief under the Preservation of Access to Care for Medicare Beneficiaries and Pension Relief Act of 2010 for the 2009 and 2011 Plan years, using the 15-year amortization method. This allows the Company to extend amortization periods of the Plan years' losses. Electing to lengthen the amortization schedule for a given Plan year reduces that Plan year's minimum contribution requirement.

5. Actuarial Present Value Of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on an employee's credited service. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered up to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Plan's independent actuary by applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment.

RETIREMENT PLAN FOR CERTAIN EMPLOYEES OF ANHEUSER-BUSCH AND INBEV USA

Notes To Financial Statements (*Continued*)

Significant actuarial assumptions used in the valuation as of January 1, 2011 and 2010 are as follows:

Mortality:

- | | |
|-------------|--|
| 2011 | RP-2000 Mortality Tables for males and females, with blue-collar adjustment, projected to 2015 using Scale AA with a two year set-forward age adjustment |
| 2010 | RP-2000 Mortality Tables for males and females, with blue-collar adjustment, projected to 2007 using Scale AA with a three year set-forward age |

Assumed rate of return:

- | | |
|-------------|------|
| 2011 | 7.5% |
| 2010 | 7.5% |

Retirement:

- | | |
|-------------|---|
| 2011 | According to a graded retirement schedule based on years of service and age
Years of service - range from 20 to 30 years
Age - ranges from age 55 to age 68 |
| 2010 | According to a graded retirement schedule based on years of service and age
Years of service - range from 25 to 30 years
Age - ranges from age 50 to age 65 |

Actuarial Cost Method:

- | | |
|-------------|-------------------------|
| 2011 | Traditional unit credit |
| 2010 | Traditional unit credit |

The foregoing actuarial assumptions were based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Notes To Financial Statements *(Continued)*

The Plan's deficiency of net assets compared to benefit obligations during the year ended December 31, 2011 will continue to be funded in compliance with ERISA requirements imposed by the Internal Revenue Service (the IRS).

6. Interest In Anheuser-Busch Companies Master Trust

At December 31, 2011 and 2010, the Plan's interest in the investments of the Master Trust was approximately 2.6% and 3.1%, respectively.

The following table presents the fair values of investments in the Master Trust at December 31, 2011 and 2010:

Direct Financing Lease

The Company has contributed real estate properties to the Master Trust, which are leased back to the Company through a direct financing lease. Revenue from the direct financing lease is recognized over the lease term on the interest method, which results in a level rate of return on the net investment in the lease.

The components of the Master Trust's direct financing lease at December 31, 2011 and 2010 are as follows:

	<u>2011</u>	<u>2010</u>
Future minimum rentals receivable	\$ 253,155,779	\$ 152,915,647
Unearned income to be recognized in future years	<u>(132,177,361)</u>	<u>(82,654,466)</u>

Fair Value Measurements

The Master Trust follows current accounting standards, which provide a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Master Trust has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

RETIREMENT PLAN FOR CERTAIN EMPLOYEES OF ANHEUSER-BUSCH AND INBEV USA

Notes To Financial Statements (*Continued*)

Following is a description of the valuation methodologies used for assets measured at fair value:

Collective Trusts

The fair values of participation units held in the collective trusts are based on the net asset value (NAV) of the underlying investments as reported by the fund managers at the end of the Plan year. The Master Trust is permitted to redeem investment units at NAV on the measurement date, and as a result, the investment is classified as a Level 2 asset in the fair value hierarchy.

Real Estate Properties

Fair value is based on the estimated fair value of the underlying properties. The properties are valued based on appraisals performed using a combination of the income approach and sales approach.

Short-Term Investments

Short-term investments are considered to be cash equivalents due to their short maturities, and are valued at cost, which approximates fair value.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

There have been no changes in the methodologies used at December 31, 2011 or 2010.

7. Transactions With Parties-In-Interest

The Master Trust holds investments in collective trust funds managed by the Trustee. Therefore, these transactions are allowable party-in-interest transactions under ERISA.

The Master Trust also holds operating properties that are leased to the Company. The fair value of the properties at December 31, 2011 and 2010 was \$138,260,000 and \$74,870,001, respectively. The Master Trust received rental payments for the years ending December 31, 2011 and 2010 of \$10,487,524 and \$4,773,843, respectively. These transactions are allowable party-in-interest transactions under ERISA.

RETIREMENT PLAN FOR CERTAIN EMPLOYEES OF ANHEUSER-BUSCH AND INBEV USA

Notes To Financial Statements (*Continued*)

8. Income Tax Status

The IRS has determined and informed the Company by a letter dated November 21, 2003, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code (the Code). Therefore, the underlying trust of such a Plan is exempt from federal income taxes under Section 501 of the IRC. The Plan has been amended since receiving the latest determination letter, however, the Plan Administrator and the Plan's tax counsel believe that the Plan is designed and being operated in compliance with the applicable requirements of the Code. Therefore, no provision for income taxes has been included in the Plan's financial statements.

GAAP requires plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS or other applicable taxing authorities. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan Administrator believes it is no longer subject to income tax examinations for Plan years prior to 2008.

9. Plan Merger

Effective as of the close of business on December 31, 2010, the Retirement Plan for Hourly Employees of Busch Properties, Inc. and the InBev U.S.A., LLC Pension Plan for Salaried Employees were merged into the Plan.

10. Risks And Uncertainties

Investment securities are exposed to various risks such as significant world events, interest rate, credit and overall market volatility risk. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is reasonably possible that changes in the values of investments will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

RETIREMENT PLAN FOR CERTAIN EMPLOYEES OF ANHEUSER-BUSCH AND INBEV USA

Notes To Financial Statements (*Continued*)

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

11. Subsequent Events

The Company also made a cash contribution to the Plan totaling \$2,344,572 in 2012, which was allocated to the 2011 Plan year and included in contributions receivable at December 31, 2011.

Management has evaluated subsequent events through October 15, 2012, the date which the financial statements were available to be issued.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Line 4 Additional Information for Plans in At-risk Status

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants not just those eligible to begin benefits within the next 11 years are assumed to elect the most valuable form of benefit under the plan, which is usually the 10-year certain (single life annuity for supplemental portability benefit participants) for employees covered Supplement for the Retirement Plan for Certain Hourly Employees of Anheuser-Busch, Inc., the 10- year certain for employees covered by the Supplement for the Retirement Plan for Hourly Employees of Busch Properties, Inc., or the single life annuity (lump sum for those less than age 55 with present values less than \$50,000) for employees covered by the Supplement for the InBev USA Pension Plan for Salaried Employees.

Prior Year's Funding Percentage for Purposes of Determining Whether Carryover/Prefunding Balances May Be Used to Reduce Current Year's Funding Requirement

Effective as of the close of business on December 31, 2010, the Retirement Plan for Hourly Employees of Busch Properties, Inc. ("BPH") and the InBev USA LLC Pension Plan for Salaried Employees ("IUSA") merged into the Retirement Plan for Certain Hourly Employees of Anheuser-Busch, Inc. ("ABI"). The merged plan was renamed the Retirement Plan for Certain Employees of Anheuser-Busch and InBev USA. The Prior Year's Funding Percentage for Line 16 for all three plans was less than 80%, as shown below, therefore carryover/prefunding balances were not allowed to be used for the merged plan for the current year. The amount shown on the Schedule SB is for the surviving plan in the merger.

Employee data was supplied electronically by Anheuser-Busch. Data on persons receiving benefits was supplied electronically by Anheuser-Busch. It was assumed that there will be no new or rehired employees.

At-Risk Calculations

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the 10-year certain (single life annuity for supplemental portability benefit participants).

Methods

Valuation date

First day of the plan year

Funding target

Present value of accrued benefits

Target normal cost

Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year

Asset method

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22) . The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2010 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a

result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not included in valuation

Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants.

Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under the plan.

Special early retirement incentives available under the plan to certain union employees in the controlled group are not valued due to the assumptions that the probability of the event over the lifetime of the agreement would be 5%, the number who would receive the offer would be 10-15 employees, and the resulting liability impact would be de minimis.

The plan pays small benefits (with a present value up to \$5,000) in a single lump sum payment. Such lump sums are not explicitly valued as such; rather such participants' benefits are valued using the benefit choice assumptions described above.

Changes in assumptions and methods since last actuarial valuation

1. The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2009 to September 2010.
2. The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.
3. The assumed plan-related expenses added to the target normal cost were changed from \$500,544 (\$144,053 for ABI, \$56,491 for BPH, and \$300,000 for IUSA) to \$600,000.

Marriage

For purposes of valuing the pre-retirement surviving spouse's benefit, 90% of eligible participants are assumed to be married and male spouses are assumed to be 3 years older than female spouses.

Employees

Employee data was supplied electronically by Anheuser-Busch. Data on persons receiving benefits was supplied electronically by Anheuser-Busch. It was assumed that there will be no new or rehired employees.

It is assumed that all full-time employees remain full-time employees for the duration of their employment. It is assumed that seasonal/temporary employees remain seasonal/temporary in future years.

At-Risk Calculations

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the 10-year certain.

Asset method

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22) . The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2010 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not included in valuation

Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants.

Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under the plan.

The plan pays small benefits (with a present value up to \$5,000) in a single lump sum payment. Such lump sums are not explicitly valued as such; rather such participants' benefits are valued using the benefit choice assumptions described above.

Changes in assumptions and methods since last actuarial valuation

1. The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2009 to September 2010.
2. The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.
3. The assumed plan-related expenses added to the target normal cost were changed from \$500,994 (\$144,053 for ABI, \$56,941 for BPH, and \$300,000 for IUSA) to \$600,000.

 - o the plan actuarial equivalence basis of 6.50% and UP-84 mortality, or
 - o the funding valuation interest rate assumption and PPA unisex combined mortality for 2011

At-Risk Calculations

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the 10-year certain (single life annuity for supplemental portability benefit participants).

result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not included in valuation

Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants.

Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under the plan.

Special early retirement incentives available under the plan to certain union employees in the controlled group are not valued due to the assumptions that the probability of the event over the lifetime of the agreement would be 5%, the number who would receive the offer would be 10-15 employees, and the resulting liability impact would be de minimis.

The plan pays small benefits (with a present value up to \$5,000) in a single lump sum payment. Such lump sums are not explicitly valued as such; rather such participants' benefits are valued using the benefit choice assumptions described above.

Changes in assumptions and methods since last actuarial valuation

1. The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2009 to September 2010.
2. The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.

At-Risk Calculations

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the single life annuity (lump sum for those less than age 55 with present values less than \$50,000).

Methods

Valuation date

First day of the plan year

Funding target

Present value of accrued benefits

Target normal cost

Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year

Asset method

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22) . The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2010 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not included in valuation

Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants.

Changes in assumptions and methods since last actuarial valuation

1. The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of January 2010 to September 2010. This was in response to the plan merger on December 31, 2010, which made the PPA elections consistent with the other pre-merger plans.
2. The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.
3. The assumed plan-related expenses added to the target normal cost were changed from \$500,994 (\$144,053 for ABI, \$56,941 for BPH, and \$300,000 for IUSA) to \$600,000.
4. The rate of future increases in Social Security was changed from 3.75% to 3.00%.

Benefits not included in valuation

Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants.

Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under the plan.

Special early retirement incentives available under the plan to certain union employees in the controlled group are not valued due to the assumptions that the probability of the event over the lifetime of the agreement would be 5%, the number who would receive the offer would be 10-15 employees, and the resulting liability impact would be de minimis.

The plan pays small benefits (with a present value up to \$5,000) in a single lump sum payment. Such lump sums are not explicitly valued as such; rather such participants' benefits are valued using the benefit choice assumptions described above.

Future increases in Maximum Benefits and Plan Compensation Limitations

Accrued benefits projected to be paid in future years are limited to the maximum presently allowed under IRC Section 415. Plan compensation is limited to the maximum presently allowed under IRC Section 401(a)(17). No provision is made for future increases in the maximum annual benefit or compensation limit. These limitations do not affect the plan.

Marriage

For purposes of valuing the pre-retirement surviving spouse's benefit, 90% of eligible participants are assumed to be married and male spouses are assumed to be 3 years older than female spouses.

Employees

Employee data was supplied electronically by Anheuser-Busch. Data on persons receiving benefits was supplied electronically by Anheuser-Busch. It was assumed that there will be no new or rehired employees.

It is assumed that all full-time employees remain full-time employees for the duration of their employment. It is assumed that seasonal/temporary employees remain seasonal/temporary in future years.

At-Risk Calculations

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the 10-year certain.

Asset method

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22) . The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2010 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not included in valuation

Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants.

Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under the plan.

The plan pays small benefits (with a present value up to \$5,000) in a single lump sum payment. Such lump sums are not explicitly valued as such; rather such participants' benefits are valued using the benefit choice assumptions described above.

Changes in assumptions and methods since last actuarial valuation

1. The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2009 to September 2010.
2. The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.
3. The assumed plan-related expenses added to the target normal cost were changed from \$500,994 (\$144,053 for ABI, \$56,941 for BPH, and \$300,000 for IUSA) to \$600,000.

SCHEDULE SB ATTACHMENTS – PART V – SUMMARY OF PRINCIPAL PLAN PROVISIONS

Vested Benefits Upon Termination of Service

A participant is 100% vested upon completion of 5 years of vesting service or upon reaching his Normal Retirement Date.

Death Benefits for Participants in Active Service

Eligibility: Must be a vested participant

Monthly Benefit: The participant's spouse of at least one year will receive a monthly retirement income payable for life in an amount equal to 50% of the amount the participant would have received if he had terminated on his date of death (or actual termination date if earlier), survived to his earliest retirement date, elected to commence receiving benefits under the qualified joint-and-50% survivor option, and then immediately died.

Supplemental Portability Benefit

Eligibility: The participant must be within a collective bargaining unit covered by an Anheuser-Busch –Teamsters National Brewery Conference Master Agreement, or a similar agreement, which includes special job security provisions. The participant must have transferred from a location covered by a defined benefit plan, pursuant to a transfer opportunity described in the agreement, to a new location that does not participate in such plan, and the combined retirement benefit from both the original plan and the new plan is less than the benefit the participant would have received from the original plan had he not transferred. The participant must have 5 years of vesting service and can commence benefits after attaining age 55.

Monthly Benefit: The participant will receive a monthly benefit equal to the actuarial equivalent value of the benefit that would have been payable from the original defined benefit plan had the participant not transferred, less the actuarial equivalent values of the benefits actually payable to the participant from the original plan and new plan. The provisions for early retirement benefits under the original plan are used when determining the benefit that would have been payable had the participant not transferred.
