Report of Independent Auditors

The Administrative Committee
Hitachi Metals America, Ltd.
Employees' Retirement Plan

We were engaged to audit the accompanying statements of net assets available for plan benefits and statements of accumulated plan benefits of Hitachi Metals America, Ltd. Employees' Retirement Plan as of March 31, 2012 and 2011, and the related statements of changes in net assets available for plan benefits and statements of changes in accumulated plan benefits for the years then ended, and the supplemental schedules of assets (held at end of year) as of March 31, 2012, and reportable transactions for the year then ended. These financial statements and supplemental schedules are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the investment information summarized in Note 4, which was certified by Union Bank, N.A., the trustee of the Plan, except for comparing such information with the related information included in the financial statements and supplemental schedules. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of and for the years ended March 31, 2012 and 2011, that the information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information that we did not audit, we are unable to, and do not, express an opinion on these accompanying financial statements and supplemental schedules as a whole. The supplemental schedules are presented for the purposes of additional analysis and are not a required part of the financial statements, but are required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The form and content of the information included in the financial statements and supplemental schedules, other than that derived from the investment information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Hitachi Metals America, Ltd.
Employees' Retirement Plan

Notes to Financial Statements

March 31, 2012

1. Plan Description

General

The Hitachi Metals America, Ltd. Employees' Retirement Plan (the "Plan") includes the employees of Hitachi Metals America, Ltd. ("HMA"), the employees of the Hitachi Metals America Division of HMA and former non-union employees of Hi Specialty America Division of HMA. Hi Specialty America Division was closed as of March 22, 2009.

The following brief description of the Plan is provided for general information purposes only. Participants should refer to the Plan agreement for more complete information.

The Plan is a defined benefit plan which provides benefits to participants upon retirement at normal retirement age based upon a formula, which takes into account years of credited service, Social Security Covered Compensation, and a percentage of annual compensation. The Plan contains provisions for early retirement, disability, and death benefits.

Eligibility

Employees become eligible to enter the Plan on the April 1 following the date on which the employee completes one hour of service. An eligible participant (the "Participant") must work 1,000 hours in any plan year to be credited with one year of service. Service with either the Hi Specialty America Division of HMA or the Hitachi Metals America Division of HMA will be counted for eligibility. All rotating Japanese nationals are excluded from eligibility.

Funding

Actuarial valuations of the Plan are made annually to determine whether the contributions are sufficient to meet the accruing liabilities of the Plan and to determine whether adjustments are necessary on the basis of past experience with the Plan. All contributions are invested by HMA, which is acting as the named fiduciary of the Plan. The Plan met the minimum funding requirements of the Employee Retirement Income Security Act of 1974 ("ERISA") for the years ended March 31, 2012 and 2011.

1. Plan Description (continued)

Vesting

A participant is 100% vested after five years of service. If a participant terminates employment prior to completing five years of service, all benefits are forfeited. Benefits provided by the Plan are paid by the trustee, Union Bank, N.A. (the "Bank"), from net assets available for plan benefits.

Benefits

The normal retirement allowance per annum payable to the participant is an amount equal to the sum of:

The greater of (a) or (b):

(a) The Participant's accrued benefit as of March 31, 2005; or

(b) The sum of the following:

(i) 1.25% of the Participant's Average Monthly Compensation (as defined) multiplied by the Participant's total number of Years of Service (as defined), up to a maximum of 35 years.

(ii) 0.65% of the Participant's Average Monthly Compensation in excess of one-twelth of Covered Compensation (as defined) multiplied by the Participant's total number of Years of Service (as defined) up to a maximum of 35 years.

(iii) 1.4% of the Participant's Average Monthly Compensation multiplied by the Participant's total number of Years of Service in excess of 35 years.

1. Plan Description (continued)

Plan Termination

Although it has not expressed any intention to do so, HMA has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan.

   The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.

2. Other vested benefits insured by the Pension Benefit Guaranty Corporation ("PBGC") (a U.S. government agency) up to the applicable limitations (discussed below).

3. All other vested benefits (that is, vested benefits not insured by the PBGC).

4. All non-vested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For Plan terminations occurring

1. Plan Description (continued)

Plan Termination (continued)

during 2012, that ceiling is $4,653 per month. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or Plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying financial statements have been prepared on an accrual basis.

Investment Valuation and Income Recognition

The Plan's investments are held by the Bank as of March 31, 2012 and 2011.

The Plan's assets are managed within the Bank's mutual fund program. The Plan's investments are stated at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). See Note 5 for further discussion of fair value measurements.

Contributions

Contributions from the Employers for each Plan year are accrued based upon actuarially computed amounts required to be funded under the provisions of the Plan and the rules and regulations provided in the Internal Revenue Code ("IRC") and ERISA, as amended.

2. Summary of Significant Accounting Policies (continued)

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Administrative Expenses

Certain administrative expenses related to the Plan are paid by the Plan's sponsor.

Income Tax Status

The Plan has received a determination letter from the Internal Revenue Service ("IRS") dated July 6, 2012 stating that the Plan is qualified under Section 401(a) of the IRC and, therefore, the related trust is exempt from taxation. Once qualified, the Plan is required to operate in conformity with the IRC to maintain its qualification. The Plan administrator believes the Plan is being operated in compliance with the applicable requirements of the IRC and, therefore, believes the Plan is qualified and the related trust is exempt.

Accounting principles generally accepted in the United States require the plan administrator to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of March 31, 2012, there are no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes the Plan is no longer subject to income tax examinations for years prior to 2008.

Actuarial Cost Method

The actuarial cost method used is the frozen entry age actuarial cost method.

2. Summary of Significant Accounting Policies (continued)

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires Plan management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, and disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

New Accounting Pronouncements

In May 2011, the Financial Accounting Standards Board issued Accounting Standards Update 2011-04, *Amendments to Achieve Common Fair Value Measurements and Disclosure Requirements in U.S. GAAP and IFRSs*, (ASU 2011-04). ASU 2011-04 amended ASC 820, *Fair Value Measurement,* to converge the fair value measurement guidance in US generally accepted accounting principles (GAAP) and International Financial Reporting Standards (IFRSs). Some of the amendments clarify the application of existing fair value measurement requirements, while other amendments change a particular principle in ASC 820. In addition, ASU 2011-04 requires additional fair value disclosures [although certain of these new disclosures will not be required for nonpublic entities]. The amendments are to be applied prospectively and are effective for annual periods beginning after December 15, 2011. Plan management is currently evaluating the effect that the provisions of ASU 2011-04 will have on the Plan's financial statements.

3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' Covered Compensation during their years of credited service. The accumulated plan benefits for active employees are based on their Covered Compensation during their years of service up to the date of which the benefit information is presented (the "valuation date"). Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent that they are deemed attributable to employee service rendered to the valuation date.

3. Actuarial Present Value of Accumulated Plan Benefits (continued)

The actuarial present value of accumulated plan benefits is determined by an actuary from USI Consulting Group, Inc. and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations were as follows:

As of March 31, 2012:

(a) Life expectancy of participants: IRS 2012 Small Optional Combined Mortality Table.
(b) Retirement age assumption: 65 or present age, whichever is higher at valuation date.
(c) Investment return: 7% per annum, compounded annually.

As of March 31, 2011:

(a) Life expectancy of participants: IRS 2011 Small Optional Combined Mortality Table.
(b) Retirement age assumption: 65 or present age, whichever is higher at valuation date.
(c) Investment return: 7% per annum, compounded annually.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Investments

All investment information disclosed in the accompanying financial statements and schedules, including investments held at March 31, 2012 and 2011, and net appreciation in fair value of mutual fund investments, interest and dividends for the years ended March 31, 2012 and 2011, were obtained or derived from information supplied to the Plan administrator and certified as complete and accurate by the Bank.

The value of investments held by the Plan at March 31, 2012 and 2011 is as follows:

5. Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., an exit price). To measure fair value, the Plan follows a hierarchy to maximize the use of observable inputs and minimize the use of unobservable inputs. As such, the hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible to the reporting entity at the measurement date for identical assets and liabilities.

Level 2 – Inputs other than quoted prices in active markets for identical assets and liabilities that are observable either directly or indirectly for substantially the full term of the asset or liability.

Level 2 inputs include the following:

- Quoted prices for similar assets and liabilities in active markets
- Quoted prices for identical or similar assets or liabilities in markets that are not active
- observable inputs other than quoted prices that are used in the valuation of the assets or liabilities (i.e., interest rate and yield curve quotes at commonly quoted intervals)
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 – Unobservable inputs for the asset or liability (i.e., supported by little or no market activity). Level 3 inputs include management's own assumption about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).

The level in the fair value hierarchy within which the fair value measurement is classified is determined based upon the lowest level input that is significant to the fair value measurement in its entirety.

5. Fair Value Measurements (continued)

Following is a description of the valuation methodologies used for major categories of assets and liabilities measured at fair value:

The investments in mutual funds are valued at quoted market prices in an active market. The money market fund is valued at net asset value as determined by the issuer.

The following tables set forth by level, within the fair value hierarchy, the Plan's assets carried at fair value as of March 31, 2012 and 2011:

6. Related-Party Transactions

Certain Plan investments are shares of mutual funds and a common collective fund managed by an affiliate of the Bank, which is the trustee as defined by the Plan. These transactions qualify as party in interest transactions; however they are exempt from the prohibited transactions rules under ERISA.

7. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for plan benefits.

Plan contributions are made and the actuarial present value of the accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

8. Subsequent Events

Subsequent events have been evaluated through January 11, 2013, the date the financial statements were available to be issued.

SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS

ACTUARIAL METHOD AND ASSUMPTIONS

General Description

The obligation of the plan with respect to the plan's benefits and the contributions to fund these obligations is determined as of each valuation date based on:

a) the provisions of the plan,

b) the data for plan participants,

c) the plan's assets, and

d) the actuarial assumptions and actuarial cost method.

Actuarial assumptions, other than the interest assumptions, are primarily made to estimate the amount and incidence of benefit payments; the interest rate assumption is made to estimate the portion of the plan benefits that will come from investment return and the portion that will come from contributions by the plan sponsor. No specific actuarial cost method or assumptions are prescribed by the plan. The assumptions selected for this valuation and the actuarial cost method are described below.

Actuarial Assumptions and Procedures

PPA 2006 Mandated Mortality Pre and Post Retirement: IRS 2011 Combined Static Mortality Table

The mortality rates are illustrated for selected ages below.

	Annual Rates of Mortality	
Attained Age	Males	Females
30	0.0390%	0.0203%
40	0.0876%	0.0477%
50	0.1447%	0.1106%
60	0.4854%	0.4548%

Effective Interest Rate: 5.74%

Liabilities are valued using the 3 segment rates based on the 24-month average of the corporate bond yield curve published by the Secretary of the Treasury for April 2011.

1st Segment Rate	2.51%
2nd Segment Rate	5.59%
3rd Segment Rate	6.38%

SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS (Cont'd)

Employee Withdrawal Rates: Withdrawal rates based upon attained age were used as shown below:

Withdrawal Rates by Quinquennial Ages

Age	Male
20	.07943
25	.07730
30	.07229
35	.06285
40	.05161
45	.03989
50	.02579
55	.00949

Credit Balances: $1,432,456 of funding standard account carryover balance has been forfeited
$0 of pre-funding standard account balance has been forfeited

Benefit Form: Life Annuity.

Top-Heavy Plan Years: The plan is not top-heavy. Actuarial costs assume that all future plan years are not top-heavy.

Miscellaneous: The valuation was prepared on an ongoing-plan basis. The valuation was based on participants of the Plan as of the valuation date and did not take future participants into account.

Asset Valuation Basis: The actuarial value of plan assets is developed as the 3-year average of the plan assets based on the market value of assets as of the valuation date and the "adjusted value" of market assets for each of the two immediately preceding valuation dates. The adjusted value of assets at each preceding valuation date is equal to the market value of assets on such valuation date plus the net cash flow amount (including expected earnings on investments) for each following year up to the current valuation date. In this way, one third of the investment gain or loss over the preceding twelve months is recognized in plan assets immediately, and the other two thirds is deferred. Valuation assets are further limited to a 10% corridor around market value..

SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS (Cont'd)

Data:	Census data were supplied by the Plan Sponsor. Asset data was supplied by the Plan Trustee. While a review was made for reasonableness and consistency, the valuation fully relied on the providers for the accuracy and comprehensiveness of the data.
Expense Load:	Not allowed under PPA of 2006.
Plan Benefits Not Considered:	None.
Mortality Used for Determining PBGC Premiums:	In accordance with legal mandate, the IRS-2011 Combined Static Mortality Table was used to determine liabilities and premiums.
Percent Married:	80% of males and 80% of females were assumed to be married.
Age of Spouse:	The female spouse is assumed to be 5 years younger than the male spouse.

In accordance with the Pension Protection Act of 2006 (PPA), the annual costs is equal to the Target Normal Cost plus the shortfall amortization charge minus any pre-funding and carry over funding standard account balances.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
