Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year

Actuarial value of assets	Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2010 plan year). The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.
Benefits Not Valued	All benefits described in the Plan Provisions section of this report were valued based on discussions with Catholic Health Initiatives regarding the likelihood that these benefits will be paid. Towers Watson has reviewed the plan provisions with Catholic Health Initiatives and, based on that review, is not aware of any significant benefits required to be valued that were not.

1. DESCRIPTION OF PLAN:

The following description of the Consolidated Health Services, Inc. Retirement Plan (the "Plan") provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General

Effective January 1, 2011, Consolidated Health Services (the "Company"), a subsidiary of Catholic Health Initiatives, adopted the Plan as a noncontributory defined benefit pension plan covering certain employees. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Contributions

The Company contributes amounts as actuarially determined in order to provide assets sufficient to meet the benefits to be paid to Plan participants. The Plan has met the ERISA minimum funding requirements.

Pension benefits

Employees with three or more years of service are entitled to monthly pension benefits beginning at normal retirement age (65) equal to the sum of the product of the number of years of credited service times a percentage of compensation ranging from 5% - 10% based on years of vesting service, plus an additional 2% of first step compensation, plus an additional 3% of second step compensation. First step compensation is defined as the amount by which the eligible employee's compensation from the Company for the Plan year exceeds one-half of the Social Security Taxable Wage Base in effect for the Plan year. Second step compensation is defined as the amount of an eligible employee's compensation from the Company for the Plan year which is in excess of the Social Security Taxable Wage Base for such Plan year.

The Plan permits early retirement after age 55 and 3 years vesting service. If employees terminate before rendering three years of service, they forfeit the right to receive their accumulated plan benefits. Employees may elect to receive their pension benefits in the form of a joint and survivor annuity. Employees also may elect to receive the value of their accumulated plan benefits upon retirement or termination as a lump-sum distribution, or they may elect to receive a life annuity payable monthly from retirement.

Death and disability benefits

If an active employee dies at age 65 or older, a death benefit equal to the value of the employees' accumulated pension benefits is paid to the employees' beneficiary. Employees receive reduced benefits until they reach age 65. At age 65, employee will receive full benefits. Disability benefits are paid until normal retirement age at which time disabled participants begin receiving normal retirement benefits computed as though they had been employed at normal retirement age with their annual compensation remaining the same as at the time they became disabled.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Basis of accounting

The accompanying financial statements have been presented on the accrual basis of accounting.

Investment valuation and income recognition
Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 6 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Use of estimates
The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Payment of benefits
Benefit payments to participants are recorded upon distribution.

Administrative expenses
All expenses incurred in the administration of the Plan and actuarial services provided by the Plan are paid by the Plan.

Actuarial present value of accumulated plan benefits
Accumulated plan benefits (Note 3) are those estimated future periodic payments, including lump-sum distributions, which are attributable under the Plan's provisions to services rendered by the employees. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date, January 1, 2011.

Subsequent events
The Plan has evaluated subsequent events through May 9, 2013, the date the financial statements were available to be issued.

3. ACCUMULATED PLAN BENEFITS:

The Plan's actuary estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts of interest) and the probability of payment (by means of decrements such as death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. The more significant assumptions underlying the actuarial computations are as follows:

Mortality	Separate rates for non-annuitants (based on RP-2000 "Employees" table without collar or amount adjustments, projected to 2026 using Scale AA) and annuitants (based on RP-2000 "Healthy Annuitants" table without collar or amount adjustments, projected to 2018 using Scale AA)
Retirement	In general, age 65, or current age if older. Terminated vested participants with a Retirement Account are assumed to commence benefits at age 60.
Interest rate	6.38%
Turnover	Rates varying by age and service

The actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

There were no accumulated plan benefits as of January 1, 2011.

4. INVESTMENTS:

Investments whose fair value represents 5% or more of the Plan's net assets available for benefits at December 31, 2011 are as follows:

The Plan's share of investments in the Catholic Health Initiatives Master Trust (including gains and losses on investments bought and sold, as well as held during the year) depreciated in value by $46,365.

5. INTEREST IN MASTER TRUST:

The Catholic Health Initiatives Master Trust holds assets for trading purposes relating to various employee benefit plans administered by the Company. 6. FAIR VALUE MEASUREMENTS:

Financial Accounting Standards Board (FASB) provides a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below.

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value.

Money Market Funds: Valued at the closing price reported on the active market on which the individual securities are traded.

Corporate Stocks: The fair values of these securities are valued at the quoted price reported on the active market on which the individual securities are traded.

Corporate Debt Instruments: The fair values of these securities are primarily based on observable market quotations for identical or similar bonds, valued at the quoted price reported on the active market on which the individual securities are traded. When such quoted prices are not available, the bonds are valued using a discounted cash flows approach using current yields on similar instruments of issuers with similar credit ratings, including adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Registered Investment Companies: Valued at the net asset value (NAV) of shares held by the Plan at year end.

103-12 Investment Entities: Valued at the NAV per unit derived from the values of the underlying securities, which are valued using inputs derived principally from or corroborated by observable market data.

U.S. Government Securities: Certain U.S. government securities are valued at the closing price reported in the active market in which the security is traded. Other U.S. government securities are valued based on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available for identical or similar securities, the security is valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for

certain risks that may not be observable, such as credit and liquidity risks.
Partnerships/Joint Ventures: These funds consist primarily of U.S. government securities, corporate bonds, and corporate stocks, which are valued in a manner consistent with these types of investments, noted above.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Catholic Health Initiatives Master Trust's fair value measurements for investments held at December 31, 2011.

The Plan also holds an investment in a money market fund outside of the Catholic Health Initiatives Master Trust. The fair value measurement of this money market fund is Level 1.

7. INFORMATION CERTIFIED BY THE PLAN'S TRUSTEE:

The plan administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, investments, related interest and dividend income and net appreciation (depreciation) in fair value of investments presented in the financial statements are based on information certified as complete and accurate by the trustee of the Plan as of December 31, 2011 and for the years then ended, and were not subjected to any auditing procedures performed by the independent auditors.

8. RELATED PARTY TRANSACTIONS:

Plan administrative expenses, including fees and expenses connected with administrative services provided by external service providers, are paid from Plan assets. Fees paid for legal, accounting, and other services rendered by parties-in-interest were based upon customary and reasonable rates for such services.

9. PLAN TERMINATION:

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions and to terminate the Plan subject to the provisions of ERISA. In the event the Plan terminates, the net assets of the Plan will be allocated as prescribed by ERISA and its related regulations.

If the assets available for allocation under any category are insufficient to fully satisfy the benefits of all individuals, the assets will be distributed proportionately. If assets remain after all the liabilities for accrued benefits have been satisfied, such assets will be distributed to the Company.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal retirement benefits, early retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations.

10. INCOME TAX STATUS:

The Plan intends to apply for a determination letter from the Internal Revenue Service stating that the Plan is qualified under the Code Section 401(a). However, the plan administrator believes that the Plan is qualified, and therefore, the related trust is exempt from taxation.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2011, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

11. RISKS AND UNCERTAINTIES:

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.
