INDEPENDENT AUDITORS' REPORT

Retirement Committee
Central States Indemnity Co. of Omaha Employees' Pension Plan
Omaha, Nebraska

Report on the Financial Statements

We have audited the accompanying financial statements of Central States Indemnity Co. of Omaha Employees' Pension Plan (the Plan), which comprise the statements of net assets available for benefits as of December 31, 2012 and 2011, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2012 and 2011, and the changes in net assets available for benefits for the years then ended, in accordance with accounting principles generally accepted in the United States of America.

Other Matter - Report on Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules of Schedule of Assets (Held at End of Year) – Schedule H – Item 4i and Schedule of Reportable Transactions – Schedule H – Item 4j as of or for the year ended December 31, 2012 are presented for the purpose of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Central States Indemnity Co. of Omaha Employees' Pension Plan

Notes to Financial Statements

December 31, 2012 and 2011

1. Plan Description

The following brief description of the Central States Indemnity Co. of Omaha Employees' Pension Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General

The Plan is a defined benefit pension plan covering certain employees of Central States Indemnity Co. of Omaha (the Company). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Effective June 1, 2006, the Plan was amended to close participation in the Plan to employees who are first employed by the Company after May 31, 2006. Employees hired prior to June 1, 2006 were included in the Plan on the first day of the month after satisfying the eligibility requirements of attaining age 19 and completing one year of employment with 1,000 hours of service.

Pension Benefits

Eligible employees are entitled to pension benefits at the normal retirement of age 65 equal to 1.5% of final average compensation times years of credited service less .62% of the final average compensation, up to covered compensation, times years of credited service. Final average compensation is the average of base salary over the five consecutive years prior to the employees' normal retirement date or for the period of employment, if shorter, which would produce the highest average. Covered compensation is the average of the taxable wage bases for 35 years ending with a participant's social security retirement age. Credited service is limited to 25 years. The Plan also provides for pre-retirement death benefits, late retirement benefits and early retirement benefits. Early retirement benefits commence at age 55, with a reduction in the normal retirement benefit. Participants may elect to receive their pension benefits in the form of a life annuity or a joint and survivor annuity with three available options. If the participant terminates employment before the normal retirement age or the early retirement age, the Company may require the participant to accept a lump-sum payment of their vested benefits for any amounts below \$5,000. The Plan requires that lump-sum payments between \$1,000 and \$5,000 be directly rolled over to an individual retirement account designated by the plan administrator in the event the participant does not elect otherwise. Lump-sum payments under \$1,000 will be paid out to the participant in the event the participant does not elect one of two options. Benefits are recorded when paid.

The Plan provided a one-time election, to certain terminated participants to receive the distribution of their vested accrued benefit at an early distribution date of December 28, 2012 and provide certain terminated participants who are eligible for early retirement a right to receive the distribution of their vested accrued benefit in the form of a single lump sum distribution on December 28, 2012.

Death and Disability Benefits

If a married, vested participant dies prior to being eligible for early retirement, the participant's surviving spouse will be eligible to receive a monthly benefit beginning on the participant's early retirement date. The monthly benefit is equal to 50% of the vested accrued benefit reduced for early retirement and to reflect payment in the form of a joint and 50% survivor annuity. If a married participant, who is eligible for early retirement dies, the participant's spouse is entitled to an immediate monthly benefit. The benefit is equal to the monthly annuity the spouse would have received if the participant had retired the day before the participant's death and had elected the "joint and 50% survivor" option. Active employees who become totally disabled will remain active Plan participants. If the employee remains disabled until the normal retirement date, the employee will receive retirement benefits computed as though they had been employed to normal retirement age with their annual compensation remaining the same as the last complete year of employment prior to disability. Benefit payments are recorded when paid.

Vesting

Participants become 100% vested in their benefits after five years of service or attainment of age 55.

2. Summary of Significant Accounting Policies

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements is set forth below.

Basis of Presentation

The accompanying financial statements are prepared on the accrual basis of accounting and in conformity with accounting principles generally accepted in the United States of America.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of plan assets available for benefits and the actuarial present value of accumulated plan benefits as of the date of the financial statements. Actual results could differ from those estimates. The Plan uses an actuary to determine the actuarial present value of accumulated plan benefits. A change in the actuarial assumptions used could significantly change the amount of the actuarial present value of accumulated plan benefits reported in the accompanying financial statements.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an investment in an orderly transaction between market participants at the measurement date. See Note 6 for further discussion of fair value measurements.

Central States Indemnity Co. of Omaha Employees' Pension Plan

Notes to Financial Statements

December 31, 2012 and 2011

Purchases and sales of investments are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Risks and Uncertainties

Plan contributions and the actuarial present value of accumulated plan benefits are prepared based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Other

Administrative expenses, audit and investment management fees of the Plan are paid by the Plan.

Subsequent Events

Subsequent events are events or transactions that occur after the statement of net assets available for benefits date but before the financial statements are available to be issued and may require potential recognition or disclosure in the financial statements. Management has considered such events or transactions through August 27, 2013, see Note 4 for discussion of a subsequent event.

3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to service rendered by employees as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. The actuarial present value of accumulated plan benefits is determined by an independent actuary, Milliman, Inc. (Milliman), and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in these valuations are (a) life expectancy of participants (the RP-2000 Mortality Table with generational mortality improvements was used), (b) 5% annual increase in current salary levels, (c) retirement age assumptions (the assumed retirement age was 65) and (d) investment return. The December 31, 2012 and 2011 valuations included assumed long-term rates of return of 7.0%. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Central States Indemnity Co. of Omaha Employees' Pension Plan

Notes to Financial Statements

December 31, 2012 and 2011

At December 31, 2012 and 2011, actuarial present value of accumulated plan benefits for the Plan is as follows:

	<u>2012</u>	<u>2011</u>
Vested Benefits		
Participants Currently Receiving Benefits	\$ 2,655,897	\$ 2,383,776
Other Participants	6,322,869	7,052,740
Total Actuarial Present Value of Accumulated Plan Benefits	<u>\$ 8,978,766</u>	<u>\$ 9,436,516</u>

The changes in accumulated plan benefits of the Plan for the years ended December 31, 2012 and 2011 are as follows:

	<u>2012</u>	<u>2011</u>
Actuarial Present Value of Accumulated Benefits at Beginning of Year	<u>\$ 9,436,516</u>	<u>\$ 8,674,457</u>
Increase (Decrease) During the Year Attributable to:		
Increase Due to the Passage of Time	589,744	407,432
Benefits Accumulated	1,010,521	597,455
Benefits Paid Directly to Participants	(2,058,015)	(242,828)

Actuarial Present Value of Accumulated Benefits at End of Year	<u>\$ 8,978,766</u>	<u>\$ 9,436,516</u>

4. Funding Policy

Contributions to provide benefits under the Plan are made solely by the Company. The Company's contributions to the Plan totaled \$900,000 for 2012 and 2011. The Company's funding policy is to make cash contributions to the Plan in amounts as determined by the Board of Directors with the direction of the Retirement Committee and Milliman. There were minimum required contributions of \$277,166 based on the January 1, 2013 actuarial valuation report of which \$450,000 has been funded subsequent to December 31, 2012.

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue their contributions at any time and to terminate the Plan subject to the provisions set forth by ERISA.

5. Investments

The following presents investments at December 31, 2012 and 2011 that represent 5% or more of the Plan's net assets:

	<u>2012</u>	<u>2011</u>
Charles Schwab Value Advantage Money Fund Select, 2,515,641 Shares	\$ *	\$ 2,515,641
Charles Schwab Advisor Cash Premier Fund, 928,095 and 618,928 Shares, Respectively	928,095	618,928
Other Investments Less than 5% of Net Assets	10,866,522	8,988,183
	<u>\$ 11,794,617</u>	<u>\$ 12,122,752</u>

* Investment not over 5% for applicable year.

During 2012 and 2011, the Plan's investments (including gains and losses on investments bought and sold, as well as held during the year) appreciated (depreciated) in value by \$632,398 and \$(9,410), respectively, as follows:

	<u>2012</u>	<u>2011</u>
Government and Municipal Bonds	\$ 2,154	\$ 12,512
Corporate Bonds	22,448	(25,218)
Common Stocks	607,796	(21)
Mutual Fund	-	3,317
	<u>\$ 632,398</u>	<u>\$ (9,410)</u>

6. Fair Value Measurements

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

- Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.
- Level 2 Inputs to the valuation methodology include:
- Quoted prices for similar assets or liabilities in active markets;
 - Quoted prices for identical or similar assets or liabilities in inactive markets;
 - Inputs other than quoted prices that are observable for the asset or liability;
-

Central States Indemnity Co. of Omaha Employees' Pension Plan

Notes to Financial Statements

December 31, 2012 and 2011

- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2012 and 2011.

Common Stocks, Corporate Bonds and Government and Municipal Bonds: Valued at the closing price reported on the active market on which the individual securities are traded.

Money Market Funds: Valued at the daily closing price as reported by the fund.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

7. Tax Status

The Plan is qualified as a defined benefit pension plan under Section 401(a) of the Internal Revenue Code and is exempt from federal income taxation under Section 501(a) of the Internal Revenue Code.

The plan administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code. Therefore, no provision for income taxes has been included in the financial statements.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the applicable taxing authority. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2009.

Notes to Financial Statements

December 31, 2012 and 2011

8. Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations.

Generally, the Pension Benefit Guaranty Corporation (PBGC) guarantees most vested normal retirement age benefits, early retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically on the amount of an individual's monthly benefit that the PBGC guarantees.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

9. Related Party Transaction

Certain Plan investments are shares of money market funds managed by Charles Schwab and Company, Inc. (Charles Schwab). Charles Schwab is the custodian of the Plan, and therefore, these transactions qualify as party-in-interest transactions.

Schedule SB, Line 22 – Calculation of Weighted Average Retirement Age
Plan Name: Central States Indemnity Co. of Omaha Employees Pension Plan
EIN/PN: 47-0591908/001

We assume retirement at age 65 or current age if older.

Attachment to Schedule SB, Part V, Summary of Actuarial Assumptions/Methods

EIN/PN: 47-0591908/001

The actuarial cost method is a particular technique used by the actuary for establishing the amount and incidence of annual actuarial costs. The actuarial cost method determines the portion of the ultimate cost of a pension plan that should be allocated to each year (known as the normal cost). The cost method is thus a budgeting tool that helps to ensure that the pension plan will be adequately and systematically funded.

The annual cost for a pension plan is determined using the unit credit cost method. The ultimate cost for a pension plan will be determined not by the cost method but by the benefits and expenses which become payable and the earnings which are obtained on the investments of the Plan. In addition, the choice of actuarial assumptions will affect the current level of contributions and pattern of future contributions.

Under the unit credit cost method, the target normal cost for each participant is equal to the present value of the projected benefit (salary increases may be included) one year from the valuation date minus the present value of accrued benefits as of the valuation date. The target normal cost for the Plan is the total of the individually computed target normal costs for all participants including the costs for any death or disability benefits under the Plan.

The target liability at any point in time for an active participant is the present value of the participant's accrued benefit. For persons receiving benefits or entitled to a deferred vested retirement income, the target liability is equal to the present value of their future benefit payments. The total target liability for the Plan is the total of the individually computed target liability amounts for all participants.

Certain assumptions are made in the calculation of the target liability, such as: interest rates, mortality, turnover, etc. which are assumed to hold for many years into the future. Since actual experience may differ somewhat from the assumptions, the costs determined by the valuation must be regarded as estimates of the true costs of the Plan.

For actuarial valuation purposes, the plan assets are valued using the average asset value described in Revenue Notice 2009-22. The averaging period is three years and the expected return on assets is 7.0%.

Interest rates

For purposes of determining the Adjusted Funding Target Attainment Percentage (AFTAP) and minimum required contribution, the valuation interest rates used are the MAP-21 rates issued by the Department of the Treasury in Notice 2012-55 for 2012:

<u>Segment one</u>	<u>Segment two</u>	<u>Segment three</u>
5.54%	6.85%	7.52%

For all other purposes, the valuation interest rates are the three segmented rates as of January 1, 2012:

<u>Segment one</u>	<u>Segment two</u>	<u>Segment three</u>
1.98%	5.07%	6.19%

The interest rate used to determine the present value of accumulated benefits for FAS 35 is 7.00%

Report on the Financial Statements

We have audited the accompanying financial statements of Central States Indemnity Co. of Omaha Employees' Pension Plan (the Plan), which comprise the statements of net assets available for benefits as of December 31, 2012 and 2011, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2012 and 2011, and the changes in net assets available for benefits for the years then ended, in accordance with accounting principles generally accepted in the United States of America.

Other Matter - Report on Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules of Schedule of Assets (Held at End of Year) – Schedule H – Item 4i and Schedule of Reportable Transactions – Schedule H – Item 4j as of or for the year ended December 31, 2012 are presented for the purpose of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Central States Indemnity Co. of Omaha Employees' Pension Plan

Notes to Financial Statements

December 31, 2012 and 2011

1. Plan Description

The following brief description of the Central States Indemnity Co. of Omaha Employees' Pension Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General

The Plan is a defined benefit pension plan covering certain employees of Central States Indemnity Co. of Omaha (the Company). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Effective June 1, 2006, the Plan was amended to close participation in the Plan to employees who are first employed by the Company after May 31, 2006. Employees hired prior to June 1, 2006 were included in the Plan on the first day of the month after satisfying the eligibility requirements of attaining age 19 and completing one year of employment with 1,000 hours of service.

Pension Benefits

Eligible employees are entitled to pension benefits at the normal retirement of age 65 equal to 1.5% of final average compensation times years of credited service less .62% of the final average compensation, up to covered compensation, times years of credited service. Final average compensation is the average of base salary over the five consecutive years prior to the employees' normal retirement date or for the period of employment, if shorter, which would produce the highest average. Covered compensation is the average of the taxable wage bases for 35 years ending with a participant's social security retirement age. Credited service is limited to 25 years. The Plan also provides for pre-retirement death benefits, late retirement benefits and early retirement benefits. Early retirement benefits commence at age 55, with a reduction in the normal retirement benefit. Participants may elect to receive their pension benefits in the form of a life annuity or a joint and survivor annuity with three available options. If the participant terminates employment before the normal retirement age or the early retirement age, the Company may require the participant to accept a lump-sum payment of their vested benefits for any amounts below \$5,000. The Plan requires that lump-sum payments between \$1,000 and \$5,000 be directly rolled over to an individual retirement account designated by the plan administrator in the event the participant does not elect otherwise. Lump-sum payments under \$1,000 will be paid out to the participant in the event the participant does not elect one of two options. Benefits are recorded when paid.

The Plan provided a one-time election, to certain terminated participants to receive the distribution of their vested accrued benefit at an early distribution date of December 28, 2012 and provide certain terminated participants who are eligible for early retirement a right to receive the distribution of their vested accrued benefit in the form of a single lump sum distribution on December 28, 2012.

December 31, 2012 and 2011

Death and Disability Benefits

If a married, vested participant dies prior to being eligible for early retirement, the participant's surviving spouse will be eligible to receive a monthly benefit beginning on the participant's early retirement date. The monthly benefit is equal to 50% of the vested accrued benefit reduced for early retirement and to reflect payment in the form of a joint and 50% survivor annuity. If a married participant, who is eligible for early retirement dies, the participant's spouse is entitled to an immediate monthly benefit. The benefit is equal to the monthly annuity the spouse would have received if the participant had retired the day before the participant's death and had elected the "joint and 50% survivor" option. Active employees who become totally disabled will remain active Plan participants. If the employee remains disabled until the normal retirement date, the employee will receive retirement benefits computed as though they had been employed to normal retirement age with their annual compensation remaining the same as the last complete year of employment prior to disability. Benefit payments are recorded when paid.

Vesting

Participants become 100% vested in their benefits after five years of service or attainment of age 55.

2. Summary of Significant Accounting Policies

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements is set forth below.

Basis of Presentation

The accompanying financial statements are prepared on the accrual basis of accounting and in conformity with accounting principles generally accepted in the United States of America.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of plan assets available for benefits and the actuarial present value of accumulated plan benefits as of the date of the financial statements. Actual results could differ from those estimates. The Plan uses an actuary to determine the actuarial present value of accumulated plan benefits. A change in the actuarial assumptions used could significantly change the amount of the actuarial present value of accumulated plan benefits reported in the accompanying financial statements.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an investment in an orderly transaction between market participants at the measurement date. See Note 6 for further discussion of fair value measurements.

Central States Indemnity Co. of Omaha Employees' Pension Plan

Notes to Financial Statements

December 31, 2012 and 2011

Purchases and sales of investments are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Risks and Uncertainties

Plan contributions and the actuarial present value of accumulated plan benefits are prepared based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Other

Administrative expenses, audit and investment management fees of the Plan are paid by the Plan.

Subsequent Events

Subsequent events are events or transactions that occur after the statement of net assets available for benefits date but before the financial statements are available to be issued and may require potential recognition or disclosure in the financial statements. Management has considered such events or transactions through August 27, 2013, see Note 4 for discussion of a subsequent event.

3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to service rendered by employees as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. The actuarial present value of accumulated plan benefits is determined by an independent actuary, Milliman, Inc. (Milliman), and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in these valuations are (a) life expectancy of participants (the RP-2000 Mortality Table with generational mortality improvements was used), (b) 5% annual increase in current salary levels, (c) retirement age assumptions (the assumed retirement age was 65) and (d) investment return. The December 31, 2012 and 2011 valuations included assumed long-term rates of return of 7.0%. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Central States Indemnity Co. of Omaha Employees' Pension Plan

Notes to Financial Statements

December 31, 2012 and 2011

At December 31, 2012 and 2011, actuarial present value of accumulated plan benefits for the Plan is as follows:

	<u>2012</u>	<u>2011</u>
Vested Benefits		
Participants Currently Receiving Benefits	\$ 2,655,897	\$ 2,383,776
Other Participants	6,322,869	7,052,740

Actuarial Present Value of Accumulated Benefits at End of Year	<u>\$ 8,978,766</u>	<u>\$ 9,436,516</u>

4. Funding Policy

Contributions to provide benefits under the Plan are made solely by the Company. The Company's contributions to the Plan totaled \$900,000 for 2012 and 2011. The Company's funding policy is to make cash contributions to the Plan in amounts as determined by the Board of Directors with the direction of the Retirement Committee and Milliman. There were minimum required contributions of \$277,166 based on the January 1, 2013 actuarial valuation report of which \$450,000 has been funded subsequent to December 31, 2012.

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue their contributions at any time and to terminate the Plan subject to the provisions set forth by ERISA.

5. Investments

The following presents investments at December 31, 2012 and 2011 that represent 5% or more of the Plan's net assets:

	<u>2012</u>	<u>2011</u>
Charles Schwab Value Advantage Money Fund Select, 2,515,641 Shares	\$ *	\$ 2,515,641
Charles Schwab Advisor Cash Premier Fund, 928,095 and 618,928 Shares, Respectively	928,095	618,928
Other Investments Less than 5% of Net Assets	10,866,522	8,988,183
	<u>\$ 11,794,617</u>	<u>\$ 12,122,752</u>

* Investment not over 5% for applicable year.

During 2012 and 2011, the Plan's investments (including gains and losses on investments bought and sold, as well as held during the year) appreciated (depreciated) in value by \$632,398 and \$(9,410), respectively, as follows:

	<u>2012</u>	<u>2011</u>
Government and Municipal Bonds	\$ 2,154	\$ 12,512
Corporate Bonds	22,448	(25,218)
Common Stocks	607,796	(21)
Mutual Fund	-	3,317
	<u>\$ 632,398</u>	<u>\$ (9,410)</u>

6. Fair Value Measurements

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

- Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.
- Level 2 Inputs to the valuation methodology include:
- Quoted prices for similar assets or liabilities in active markets;
 - Quoted prices for identical or similar assets or liabilities in inactive markets;
 - Inputs other than quoted prices that are observable for the asset or liability;
-

Central States Indemnity Co. of Omaha Employees' Pension Plan

Notes to Financial Statements

December 31, 2012 and 2011

- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2012 and 2011.

Common Stocks, Corporate Bonds and Government and Municipal Bonds: Valued at the closing price reported on the active market on which the individual securities are traded.

Money Market Funds: Valued at the daily closing price as reported by the fund.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

7. Tax Status

The Plan is qualified as a defined benefit pension plan under Section 401(a) of the Internal Revenue Code and is exempt from federal income taxation under Section 501(a) of the Internal Revenue Code.

The plan administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code. Therefore, no provision for income taxes has been included in the financial statements.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the applicable taxing authority. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2009.

Central States Indemnity Co. of Omaha Employees' Pension Plan

Notes to Financial Statements

December 31, 2012 and 2011

8. Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations.

Generally, the Pension Benefit Guaranty Corporation (PBGC) guarantees most vested normal retirement age benefits, early retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically on the amount of an individual's monthly benefit that the PBGC guarantees.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

9. Related Party Transaction

Certain Plan investments are shares of money market funds managed by Charles Schwab and Company, Inc. (Charles Schwab). Charles Schwab is the custodian of the Plan, and therefore, these transactions qualify as party-in-interest transactions.

The actuarial cost method is a particular technique used by the actuary for establishing the amount and incidence of annual actuarial costs. The actuarial cost method determines the portion of the ultimate cost of a pension plan that should be allocated to each year (known as the normal cost). The cost method is thus a budgeting tool that helps to ensure that the pension plan will be adequately and systematically funded.

The annual cost for a pension plan is determined using the unit credit cost method. The ultimate cost for a pension plan will be determined not by the cost method but by the benefits and expenses which become payable and the earnings which are obtained on the investments of the Plan. In addition, the choice of actuarial assumptions will affect the current level of contributions and pattern of future contributions.

Under the unit credit cost method, the target normal cost for each participant is equal to the present value of the projected benefit (salary increases may be included) one year from the valuation date minus the present value of accrued benefits as of the valuation date. The target normal cost for the Plan is the total of the individually computed target normal costs for all participants including the costs for any death or disability benefits under the Plan.

The target liability at any point in time for an active participant is the present value of the participant's accrued benefit. For persons receiving benefits or entitled to a deferred vested retirement income, the target liability is equal to the present value of their future benefit payments. The total target liability for the Plan is the total of the individually computed target liability amounts for all participants.

Certain assumptions are made in the calculation of the target liability, such as: interest rates, mortality, turnover, etc. which are assumed to hold for many years into the future. Since actual experience may differ somewhat from the assumptions, the costs determined by the valuation must be regarded as estimates of the true costs of the Plan.

For actuarial valuation purposes, the plan assets are valued using the average asset value described in Revenue Notice 2009-22. The averaging period is three years and the expected return on assets is 7.0%.

Interest rates

For purposes of determining the Adjusted Funding Target Attainment Percentage (AFTAP) and minimum required contribution, the valuation interest rates used are the MAP-21 rates issued by the Department of the Treasury in Notice 2012-55 for 2012:

<u>Segment one</u>	<u>Segment two</u>	<u>Segment three</u>
5.54%	6.85%	7.52%

For all other purposes, the valuation interest rates are the three segmented rates as of January 1, 2012:

<u>Segment one</u>	<u>Segment two</u>	<u>Segment three</u>
1.98%	5.07%	6.19%

The interest rate used to determine the present value of accumulated benefits for FAS 35 is 7.00%

Mortality rates - PPA Funding

Post-retirement: Annuitant tables as prescribed on the valuation date

Pre-retirement: Non-annuitant tables as prescribed on the valuation date

Mortality rates - FAS 35 and Accounting Expense
