Actuarial Cost Method

Actuarial Cost Method

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described in “Actuarial Assumptions” of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Target Normal Cost

The Target Normal Cost is the present value of benefits expected to accrue during the plan year for all Participants plus an estimate of the expenses to be paid from the plan assets during the plan year.

Target Liability and Funding Shortfall

As of November 3, 2008, a Target Liability is established which represents the present value of accrued benefits. This Target Liability is offset by adjusted assets, and the remainder (i.e. Funding Shortfall), if any, is amortized over seven years.

Subsequent changes in the Funding Shortfall due to asset experience, liability experience, plan amendments, and/or actuarial assumption changes will be amortized over a seven year period from their valuation dates.

Discount Rate

The plan sponsor has elected to use the Segment Rate approach for discount rate purposes, with an applicable month that is 4 months prior to the valuation date.

The plan sponsor elected not to phase in the new interest rate basis. Refer to the actuarial assumptions section for additional detail.

Asset Valuation Method

Assets have been valued in accordance with generally accepted procedures as described below.

Funds invested in the General Accounts of an insurance company:

Stated contract value of funds with a market value adjustment. The market value of the Guaranteed Deposit Account is an estimate only and not the result of the precise calculation which would be done at contract discontinuance or to measure the impact of excess withdrawals in any calendar year. It does not constitute an offer by Prudential or a final experience adjustment.

Funds invested in Separate Accounts:

Market value.

Actuarial Assumptions

Assumptions have been chosen to anticipate the long range experience of the Plan. Consistency among assumptions is important as each interacts with the others; equally important is the recognition of inflationary trends in the economy.

As the Enrolled Actuary for the Plan, I will certify to the reasonableness of these assumptions, in aggregate, as required by ERISA.

The actuarial assumptions used to compute Plan costs are:

Mortality:

PPA Funding: IRS 2011 Static Mortality Table.

FAS 35: IRS 2011 Static Mortality Table.

Termination:

The probabilities that Participants at the ages indicated will terminate before reaching the assumed retirement age are:

<u>Age</u>	<u>Male</u>	<u>Female</u>
20	93.4%	98.2%
25	85.4%	94.5%
30	73.4%	86.8%
35	57.3%	72.7%
40	38.3%	52.1%
45	19.8%	28.4%
50	5.8%	8.7%
55	0.0%	0.0%

This is Prudential Term Scale D.

Retirement Age:

Participants at or beyond the age of 65 are assumed to retire immediately.

Interest rates:

PPA Funding:	Segment Rates:	<u>Years</u>	<u>Rate</u>
		0-5	2.18%
		6-20	5.36%
		21+	6.33%

These are the July 2011 Non-Transitional Segment Rates. The effective rate is 5.39%.

FAS: 6.00% per annum, compounded annually, net of investment and contract fees.

Actuarial Assumptions

Estimated Expenses: Assumed to be \$23,500.

Social Security:

Primary Insurance Amount: Not Applicable

Covered Compensation: Not Applicable

Survivor's Benefit:

It is assumed that husbands are 3 years older than wives and that 90% of the male Participants and 60% of the female Participants who are or will become eligible for coverage under the Survivor's Benefit will be survived by an eligible survivor.

Disability:

The 1952 Disability Study of the Society of Actuaries, Period 2, Benefit 5 rates were used.

Actuarial Cost Method

Actuarial Cost Method

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described in “Actuarial Assumptions” of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Target Normal Cost

The Target Normal Cost is the present value of benefits expected to accrue during the plan year for all Participants plus an estimate of the expenses to be paid from the plan assets during the plan year.

Target Liability and Funding Shortfall

As of November 3, 2008, a Target Liability is established which represents the present value of accrued benefits. This Target Liability is offset by adjusted assets, and the remainder (i.e. Funding Shortfall), if any, is amortized over seven years.

Subsequent changes in the Funding Shortfall due to asset experience, liability experience, plan amendments, and/or actuarial assumption changes will be amortized over a seven year period from their valuation dates.

Discount Rate

The plan sponsor has elected to use the Segment Rate approach for discount rate purposes, with an applicable month that is 4 months prior to the valuation date.

The plan sponsor elected not to phase in the new interest rate basis. Refer to the actuarial assumptions section for additional detail.

Asset Valuation Method

Assets have been valued in accordance with generally accepted procedures as described below.

Funds invested in the General Accounts of an insurance company:

Stated contract value of funds with a market value adjustment. The market value of the Guaranteed Deposit Account is an estimate only and not the result of the precise calculation which would be done at contract discontinuance or to measure the impact of excess withdrawals in any calendar year. It does not constitute an offer by Prudential or a final experience adjustment.

Funds invested in Separate Accounts:

Market value.

Actuarial Assumptions

Assumptions have been chosen to anticipate the long range experience of the Plan. Consistency among assumptions is important as each interacts with the others; equally important is the recognition of inflationary trends in the economy.

As the Enrolled Actuary for the Plan, I will certify to the reasonableness of these assumptions, in aggregate, as required by ERISA.

The actuarial assumptions used to compute Plan costs are:

Mortality:

PPA Funding: IRS 2011 Static Mortality Table.

FAS 35: IRS 2011 Static Mortality Table.

Termination:

The probabilities that Participants at the ages indicated will terminate before reaching the assumed retirement age are:

<u>Age</u>	<u>Male</u>	<u>Female</u>
20	93.4%	98.2%
25	85.4%	94.5%
30	73.4%	86.8%
35	57.3%	72.7%
40	38.3%	52.1%
45	19.8%	28.4%
50	5.8%	8.7%
55	0.0%	0.0%

This is Prudential Term Scale D.

Retirement Age:

Participants at or beyond the age of 65 are assumed to retire immediately.

Interest rates:

PPA Funding:	Segment Rates:	<u>Years</u>	<u>Rate</u>
		0-5	2.18%
		6-20	5.36%
		21+	6.33%

These are the July 2011 Non-Transitional Segment Rates. The effective rate is 5.39%.

FAS: 6.00% per annum, compounded annually, net of investment and contract fees.

Actuarial Assumptions

Estimated Expenses: Assumed to be \$23,500.

Social Security:

Primary Insurance Amount: Not Applicable

Covered Compensation: Not Applicable

Survivor's Benefit:

It is assumed that husbands are 3 years older than wives and that 90% of the male Participants and 60% of the female Participants who are or will become eligible for coverage under the Survivor's Benefit will be survived by an eligible survivor.

Disability:

The 1952 Disability Study of the Society of Actuaries, Period 2, Benefit 5 rates were used.

NOTE A – DESCRIPTION OF PLAN

The following brief description of the Admiral Foundry, Inc. Pension Plan for Hourly Employees Represented by UAW Local 70 (Plan) is provided for general information purposes only. Participants should refer to the Plan agreement for more complete information.

General

The Plan is a defined benefit pension plan covering employees of Admiral Foundry, Inc. (Company) who have completed one year of service and are a member of a collective bargaining unit represented by the International Union United Auto, Aerospace & Agricultural Implement Workers of America UAW-Amalgamated Local No. 70. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Pension Benefits

A participant is entitled to annual pension benefits beginning at normal retirement age (65) equal to \$282 multiplied by the number of a participant's years of credited service if the participant's cessation of service occurs on or after August 3, 2001. A participant is entitled to annual pension benefits beginning at normal retirement age (65) equal to \$270 multiplied by the number of the participant's years of credited service if the participant's cessation of service occurs on or after August 3, 2000, but prior to August 3, 2001. If the participant's cessation of service occurs on or prior to August 2, 2000, they are entitled to varying types (depending on length of service) of annual pension benefits as described in Section 5.2 of the Plan agreement. Early retirement is allowed at age 60 upon completion of five years of service. Employees forfeit the right to receive any portion of their accumulated plan benefits if they terminate before rendering five years of service. Employees may elect to receive their pension benefits in the form of a joint and survivor annuity or as a life annuity.

Death and Disability Benefits

If an active participant dies on or before his normal retirement age, a death benefit will be paid to the employee's spouse equal to 50 percent of the value of the employee's accumulated pension benefits reduced by the appropriate early retirement and joint and survivor factors. An active employee with ten years of credited service who becomes disabled is entitled to receive disability benefits until normal retirement age at which time a disabled participant begins receiving normal retirement benefits or until the date the participant is no longer disabled.

Administrative Expenses

The Plan is responsible for payment of the custodian expenses and fees, including actuarial and recordkeeping services, however the Company may pay the Plan expenses directly.

NOTE B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

NOTE B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Basis of Accounting

The Plan's financial statements are prepared on the accrual basis of accounting.

Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Investment Valuation and Income Recognition

Investments are recorded at estimated fair value (see Note C) as reported by the Prudential Retirement Insurance and Annuity Company (Prudential Retirement).

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died and (c) present employees or their beneficiaries. The accumulated plan benefits for active employees are based on their years of credited service ending on the date as of which the benefits information is presented (the valuation date). Benefits payable under all circumstances—retirement, death, disability and termination of employment—are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from Plan assets are excluded from accumulated plan benefits.

The actuarial present value of accumulated plan benefits is determined by an actuary from Prudential Retirement and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuations as of November 3, 2011 and 2010 were (a) life expectancy of participants (the IRS 2011 Mortality Table and RP 2000 Mortality Table projected to 2010 with scale AA, respectively), (b) retirement age assumptions (the assumed average retirement age was 65) and (c) investment return. The 2011 and 2010 valuations included assumed average rates of return of 6.50% and 6.00%, respectively, assuming administrative expenses of \$23,500. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Payment of Benefits

Benefit payments to participants are recorded upon distributions.

NOTE C – FAIR VALUE MEASUREMENTS

The Plan's investments are reported at fair value in the accompanying statement of net assets available for benefits. The methods used to measure fair value may produce an amount that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The fair value measurements authoritative literature establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy consists of three broad levels: Level 1 inputs consist of unadjusted quoted prices in active markets for identical assets and have the highest priority, Level 2 inputs consist of observable inputs other than quoted prices for identical assets, and Level 3 inputs are unobservable and have the lowest priority. The Plan uses appropriate valuation techniques based on the available inputs to measure the fair value of its investments. When available, the Plan measures fair value using Level 1 inputs because they generally provide the most reliable evidence of fair value. Level 3 inputs were used only when Level 1 or Level 2 inputs were not available.

Level 3 Fair Value Measurements

The fair value of the General Deposit Account is determined by Prudential Retirement by applying a market value adjustment to the book value of the account. The market value adjustment is determined by discounting expected future investment cash flow from both investment income and repayment of principal for each investment purchased directly for the General Deposit Account segment used for defined benefit contracts. The fair value of the pooled separate accounts is based on the quoted price of the underlying securities and the number of units owned by the Plan at year-end.

NOTE D – EMPLOYER PLAN SPONSOR

In 2006 the Plan Sponsor, Admiral Foundry, Inc. discontinued the segment of operations that employed the hourly workers represented by UAW Local 70. Accordingly, the participants covered under the plan no longer accrue benefits; however, it is management's intent to continue funding the annual actuarial determined minimum funding requirements as required by ERISA to allow the Plan to continue paying already accrued benefits or until such time as the Plan assets are sufficient to purchase annuity contracts that will fully fund the remaining vested interest of all participants.

NOTE E – FUNDING POLICY

The Company's funding policy is to make annual contributions to the Plan in amounts not less than the minimum funding requirement of ERISA or more than that permitted by the Internal Revenue Code (IRC). At November 2, 2012 and 2011, the Company's allowable contribution to meet the minimum funding requirements of ERISA totaled \$148,363 and \$78,545, respectively. At November 2, 2012, the Plan recognized these amounts.

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

NOTE F – PLAN TERMINATION

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.

Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations (discussed below).

All other vested benefits (that is, invested benefits not insured by the PBGC).

All non-vested benefits.

Benefits to be provided via contracts under which Prudential Retirement is obligated to pay the benefits would be excluded for allocation purposes.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For Plan terminations occurring during 2012 that ceiling is \$4,653 per month. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations, and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

NOTE G – CERTIFIED FINANCIAL INFORMATION

The Plan assets are invested in products sold by Prudential Retirement. Except for the Guaranteed Deposit Account, the investment balance and related investment information included in the financial statements, accompanying notes and supplemental schedules are derived from statements which have been certified by Prudential Retirement as complete and accurate in accordance with 29 CFR 2520.103-5(c) and CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

NOTE K – RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

NOTE L – TAX STATUS

The Internal Revenue Service has determined and informed the Company by a letter dated June 2, 2003, that the Plan and related trust are designed in accordance with applicable sections of the IRC. The Plan has been amended since receiving the determination letter. However, the Plan administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.
