Profit Sharing And Savings Plan**

Notes To Financial Statements

Note 1. Plan Description

The following description of the Ag Trucking, Inc. Profit Sharing and Savings Plan (the "Plan") provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General:

The Plan is a defined contribution plan covering substantially all full-time employees of Ag Trucking, Inc. (the "Company") who have one year of service (1,000 hours of service). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions:

Participants may contribute a percentage of their annual compensation, as defined by the Plan, up to the maximum annual IRS limitation. Participants may also contribute amounts representing distributions from other qualified defined benefit or contribution plans. Participants' contributions are directed by the trustee into various investment options offered by the Plan based on a risk profile form completed by the participant.

The Company may, at its discretion, make a matching contribution to the Plan, as well as an additional discretionary contribution. The Company made a matching contribution of 75% of the employee deferrals up to 4% of employee compensation and a discretionary contribution of 2% of each participant's annual compensation for the year ended December 31, 2012. The Company's matching and discretionary contributions are invested into the various investment options in a manner that is consistent with the participant contributions. Contributions are subject to certain limitations.

Participant accounts:

Each participant's account is credited with the participant's contributions and an allocation of (a) the Company's contributions, if any, (b) Plan earnings, and (c) forfeitures of terminated participants' non-vested accounts, and charged with an allocation of certain administrative expenses. Allocations are based on participant compensation or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's account.

Vesting:

Participants are immediately vested in their voluntary contributions and the Company's matching contributions plus actual earnings thereon. Vesting in the Company's discretionary contribution portion of their accounts plus actual earnings thereon is based on years of continuous service. A participant is 100 percent vested after six years of credited service.

Payment of benefits:

Upon retirement or termination of service, participants or beneficiaries may elect to receive installment benefit distributions or a lump sum distribution in an amount equal to the value of the participant's vested account. Benefit payments are recorded when paid.

**Ag Trucking, Inc.
Profit Sharing And Savings Plan**

Notes To Financial Statements

Forfeitures:

Forfeited balances of terminated participants' non-vested accounts are reallocated to participants based on participant compensation. At December 31, 2012 and 2011, forfeited non-vested accounts totaled approximately \$18,300 and \$6,500 respectively. No forfeitures were reallocated to participants during the year ended December 31, 2012.

Administration of Plan assets:

Certain administrative functions are performed by officers or employees of the Company. No such officer or employee receives compensation from the Plan.

Note 2. Significant Accounting Policies

Basis of accounting:

The financial statements of the Plan are prepared under the accrual method of accounting.

Use of estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Investment valuation and income recognition:

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See below for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Investment securities, in general, are exposed to various risks, such as interest rate, credit, and overall market volatility. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the value of investment securities will occur in the near-term and those changes could materially affect the amounts reporting in the statement of net assets available for benefits.

Fair value measurements:

Accounting standards establish a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

- Level 1** Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Ag Trucking, Inc.
Profit Sharing And Savings Plan

Notes To Financial Statements

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value.

Shares of Registered Investment Companies: Valued at the closing price reported on the active market on which the individual securities are traded.

Money Market Accounts: Valued at fair value by discounting the related cash flows based on current yields of similar instruments with comparable durations considering the credit-worthiness of the issuer.

Shares of Common Trust Funds: Shares held in common trust funds are reported at fair value based on the unit prices quoted by the fund, representing the fair value of the underlying investments.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Recently issued accounting pronouncements:

In May 2011, the FASB issued ASU 2011-04, "Amendments to Achieve Common Fair Value Measurements and Disclosure Requirements in U.S. GAAP and IFRSs, (ASU 2011-04)". ASU 2011-04 amended ASC 820, "Fair Value Measurements". This update changes certain fair value measurement principles and enhances the disclosure requirements particularly for Level 3 fair value measurements. The amendments are to be applied prospectively and are effective for annual periods beginning after December 15, 2011.

Notes To Financial Statements

In October 2012, the FASB issued ASU 2012-04, "Technical Corrections and Improvements". The amendments in this update cover a wide range of Topics in the Accounting Standards Codification, including plan accounting. These amendments include technical corrections and improvements to the Accounting Standards Codification and conforming amendments related to fair value measurements. The amendments in this update will generally be effective for fiscal periods beginning after December 15, 2013, except for amendments in this update where there was no transition guidance which were immediately effective upon issuance. The adoption of immediately effective amendments was not significant to these financials. The adoption of ASU 2012-04 is not expected to have a material impact on subsequent periods.

Subsequent events:

The Plan has evaluated subsequent events for potential recognition and/or disclosure through October 1, 2013, the date the financial statements were available to be issued.

Note 3. Investments and Information Certified by Reliance Trust Company ("Reliance")

The plan administrator has elected the method of compliance as permitted by 29 CFR 2520.103-8 of the United States Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the plan administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to the following information certified by Reliance, except for comparing such information certified by the trustee to the information included in the Plan's financial statements and supplemental schedules.

The Plan's investments are held by Reliance and stated at fair value. The following table presents the fair values of those investments as reported by Reliance at December 31, 2012 and 2011 respectively. Investments that represent five percent or more of the Plan's net assets are separately identified.

Changes in fair value levels:

To assess the appropriate classification of investments within the fair value hierarchy, the availability of market data is monitored. Changes in economic conditions or valuation techniques may require the transfer of investments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

We evaluate the significance of transfers between levels based upon the nature of the investment and size of the transfer relative to total net assets available for benefits. For the year ended December 31, 2012, there were no transfers between levels.

Note 5. Plan Termination

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of plan termination, participants will become 100 percent vested in their employer contributions.

Note 6. Income Tax Status

The Plan is an adopter of a non-standardized form of a prototype plan sponsored by The Standard. The prototype plan has received an opinion letter from the Internal Revenue Service as to the prototype plan's qualified status. The prototype plan opinion letter has been relied upon by this Plan.

The Plan's administrator has evaluated the Plan's tax positions and concluded that the Plan has maintained its tax exempt status and had taken no uncertain tax positions that require adjustment to the financial statements. With few exceptions, the Plan is no longer subject to income tax examinations by the U.S. federal, state or local tax authorities for years before 2009.

Note 7. Related Party Transactions

Certain Plan investments are managed by Reliance. Reliance performed services for the Plan, and therefore these transactions qualify as party-in-interest. Fees paid to the trustee by the Plan for the year ended December 31, 2012 were approximately \$56,000.
