401(K) PLAN

NOTES TO FINANCIAL STATEMENTS

## 1. DESCRIPTION OF PLAN

The following description of the Guardian Fueling Technologies, Inc. 401(k) Plan provides only general information. Participants should refer to the Plan Agreement for a more complete description of the Plan's provisions.

### General

Guardian Fueling Technologies, Inc. (the "Company"), established the Guardian Fueling Technologies, Inc. 401(k) Plan (the "Plan") on January 1, 2001. The Plan is a defined contribution plan (401(k)) covering all full-time employees who have satisfied eligibility requirements that includes one year of service and no minimum age requirement. The Plan is intended to comply with Section 404(c) of ERISA (The Employee Retirement Income Security Act of 1974). One year of service is earned once the employee has 1,000 hours of service. The custodian of the Plan is the Principal Financial Group (the "Custodian").

### Contributions

Each year participants may contribute a percentage of their compensation not to exceed a certain dollar limit which is set by law. The Plan Sponsor (Guardian Fueling Technologies, Inc.) contributes a discretionary matching contribution equal to a uniform percentage of the amount of the salary reduction up to 4% of total payroll compensation. However, the Plan Sponsor suspended its discretionary match in 2012 and 2011. Contributions are subjected to limitations. Participants direct the investment of contributions made by them on their behalf to the Plan.

### Participant Accounts

Each participant's account is credited with the participant's contribution and allocations of (a) the Plan Sponsor's contribution and, (b) Plan earnings, and charged with an allocation of administrative expenses. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

### Vesting

Participants are immediately vested in their contributions plus actual earnings thereon. Vesting in the Company's contribution portion of their accounts plus actual earnings thereon is based on years of continuous service. A participant is 100% vested after six years of credited service, based on the six year graded provision of the Plan, which complies with a change in the retirement law effective for plan years beginning after December 31, 2001. A year of vesting

The Plan uses the accrual method of accounting. Under this method of accounting, contributions to the Plan are recognized when approved by the Employer. Revenues are recognized when earned, and expenses are recognized when incurred.

**Use of Estimates**

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities. Actual results could differ from reported amounts of additions to and deductions from net assets during the reporting period.

**Investment Valuation**

Investments are recorded at the fair market value on the last business day of the Plan year. Quoted market prices are used to value investments. Increases and decreases in market value of the investments are reflected in the statement of changes in net assets available for benefits.

**Risks and Uncertainties**

The Plan provides for various investment options. Investment securities are exposed to various risks, such as interest rate fluctuations, market changes and credit risks. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of these investment securities, it is at least reasonably possible that changes in risks in the near term would materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits and the statement of changes in net assets available for benefits.

## 3. PLAN TERMINATION

The Plan Sponsor has the right under the Plan to discontinue contributions at any time and to terminate the Plan subject to the provisions of ERISA. Participants are 100% vested in their account balances from the date of participation to termination. The Plan Sponsor stopped the employer match in August 2011.

## 4. TAX STATUS

The Internal Revenue Service has determined and informed the Plan Sponsor by a letter dated March 31, 2008, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination letter, the Plan Administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

## 5. CONCENTRATION OF CREDIT RISK

Contributions receivable from plan participants as of December 31, 2012 and 2011 was $-0-.

## 6. FAIR VALUE MEASUREMENTS

Fair value as defined under generally accepted accounting principles ("GAAP") is an exit price, representing the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. GAAP establishes a three-tier fair value hierarchy, which prioritize the inputs used in measuring fair value.

These tiers include:

- Level 1: Observable inputs such as quoted prices in active markets for identical assets that the Plan has the ability to access at the measurement date.
- Level 2: Inputs other than quoted prices within Level 1 that are observable for valuing the asset or liability, either directly or indirectly. Observable inputs include quoted prices for similar assets or liabilities in active or non-active markets. Level 2 may also include insignificant adjustments to market observable inputs.
- Level 3: Unobservable inputs used for valuing the asset or liability. Unobservable inputs are those that reflect the Plan's own assumptions about the assumptions that market participants would use in pricing the asset, based on the best information available in the circumstances.

**6. FAIR VALUE MEASUREMENTS** - Continued

When quoted prices are available in active markets for identical instruments, investment securities are classified within Level 1 of the fair value hierarchy. The Plan has no Level 1 investments.

Level 2 investments represent proprietary pooled separate accounts ("PSA") made up of a wide variety of underlying investments such as collective investment trusts, equities, preferred stocks, bonds, real estate and mutual funds through group annuity contracts. The net asset value ("NAV") is based on the market value of its underlying investments which include either observable Level 1 or 2 inputs or both. The PSA NAV is not a publicly quoted price in an active market. The PSA can be redeemed at NAV as of the measurement date.

Level 3 fair values is discontinuance value which is the amount plan participants would receive currently if they were to withdraw or transfer funds within the Plan prior to their maturity for an event other than death, disability, termination or retirement. Fair value represents the contract value adjusted to reflect current market interest rates only to the extent such market rates exceed crediting rates.

The following tables set forth by level within the fair value hierarchy the Plan's assets accounted for at fair value on a recurring basis as of December 31, 2012 and 2011.

## 8. BENEFIT RESPONSIVE CONTRACTS

The Principal Stable Value Fund is a fully benefit-responsive investment contract. Investments in contracts are presented in the portfolio of investments at contract value, which represent invested principal plus accrued interest thereon. The contracts are nontransferable but provide benefit responsive withdrawals and participant transfers to noncompeting options by plan participants at contract value. In the event facts and circumstances provide evidence that contract value is impaired, the contracts would be presented at fair value. In determining contract value, the Trustee considers such factors as the benefit responsiveness of the contracts, the ability of the parties to the contracts to perform in accordance with the terms of the contracts and the likelihood of default by the issuer of an investment security. The fair value of conventional investment contracts is determined using a discounted cash flow methodology where the individual contract cash flows are discounted at the prevailing interpolated yield curve rate as of year-end. These are reflected in Level 2. Individual assets of the synthetic investment contracts include domestic and foreign securities and investments in investment companies or collective investment trusts. When available, the fair value of securities is based on quoted prices of identical assets in active markets. When quoted prices are not available, the first priority is to obtain prices from third party pricing methodologies and to confirm they are utilizing observable market information. Their methodologies vary by asset class and include inputs such as estimated cash flows, benchmark yields, reported trades, broker quotes, credit quality, industry events and economic events. The net asset value of investment companies and collective investment trusts represent the price at which the Fund believes it would be able to initiate a transaction.

The net crediting rate is equal to the gross crediting rate minus the wrap fee due the contract issuer and if applicable, the sub-advisor fee for specific investment strategies. Crediting rates reflect the amortization of realized and unrealized gains and losses in the underlying portfolio over the duration of the portfolio and, in consequence, may not reflect the actual returns achieved in the portfolio. From time to time the crediting rate may be significantly greater or less than current market interest rates.

A number of factors can influence future credit rates, which may include but are not limited to: portfolio cash flows, underlying portfolio performance, current market interest rates for reinvestment, duration posture, change in credit ratings, default or bankruptcy by an asset or wrap issuer, the unexpected receipt of principal and interest payments, extraordinary withdrawals and certain wrap contract terms, including wrap fees. Wrap contracts typically resent on a monthly or quarterly basis as negotiated with the wrap issuer and guarantees a minimum 0% credit rate.

The weighted average yield to maturity of all underlying investments at year end was 0.88%.
