Note 1. **Description of Plan** - The following description of the Plan provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General - The Plan is a defined contribution plan covering all full-time employees of Peko Precision Products, Inc. and Marex Acquisition Corporation d/b/a Martec Industries (the "Companies"). Employees who have one year of service and are age twenty-one or older are eligible to make their own contributions to the Plan. All employees who are age twenty-one or older are eligible to receive profit sharing amounts from their respective employers into their participant accounts. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions - Eligible participants may defer up to 75% of their pre-tax annual compensation, as defined in the Plan, as a qualified pre-tax contribution subject to maximum annual dollar contribution restrictions of ERISA and the Internal Revenue Service. Participants may also contribute amounts representing distributions from other qualified defined benefit or contribution plans. Employer contributions are discretionary and calculated as a pro-rata portion of the contribution equal to the ratio of the participant's compensation to the compensation of all eligible participants of the contributing employer.

Participant Accounts - Each participant's account is credited with the participant's contribution and allocations of the Plan's earnings, and charged with an allocation of administrative expenses. Allocations are based on participant earnings, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account. The participants direct their allocation of investments to funds managed by John Hancock Retirement Plan Services.

Vesting - Participants are immediately vested in their contributions plus actual earnings thereon. Vesting for employer contributions is based on years of service with participant's becoming fully vested after six years of plan participation and seven years of service. Additional vesting breakdowns can be found in the Plan document.

Payment of Benefits - On termination of service due to death, disability, or retirement, a participant may elect to receive either a lump-sum amount equal to the value of the participant's vested interest in his or her account, or annual installments over a ten-year period. For termination of service due to other reasons, a participant may receive the value of the vested interest in his or her account as a lump-sum distribution.

Administrative Expenses - Administrative expenses are paid for by the Plan.

Forfeited Accounts - Any forfeitures arising under the Plan are first allocated to offset plan expenses. Any remaining forfeitures are allocated to participant accounts.

Note 2. **Summary of Significant Accounting Policies**

Method of Accounting - The financial statements of the Plan are prepared using the accrual method of accounting.

Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect the reported amounts and disclosures. Actual results may differ from those estimates.

Investment Valuation and Income Recognition - The Plan's investments are stated at fair market value using quoted market prices in an active market, except for its investment contract which is valued at contract value (Note 7).

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Payments of Benefits - Benefits are recorded when paid.

Risks and Uncertainties - The Plan provides for various investment options. Investment securities are exposed to various risks, such as interest rate, market and credit. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is at least reasonably possible that changes in risks in the near term would materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits and statement of changes in net assets available for benefits.

Subsequent Events - In accordance with ASC 855-10, the Company evaluated subsequent events through September 26, 2013, the date these financial statements were available to be issued.

Note 6. Fair Value of Financial Instruments

ASC 820-10, *Fair Value Measurements,* establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The following is a description of the valuation methodologies used for assets measured at fair value:

Money market and mutual funds - Valued at the net asset value of shares held by the plan at year end (Level 1).

Guaranteed interest account – Valued at fair value by the insurance company by discounting the related cash flows based on current yields of similar instruments with comparable durations considering the creditworthiness of the issuer. Because the participants transact at contract value, fair value is determined annually for financial statement reporting purposes only. In determining the reasonableness of the methodology, Contract value represents deposits made to the contract, plus earnings at guaranteed crediting rates, less withdrawals and fees (Level 3).

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Assets measured at fair value are summarized below:

Note 7. Investment Contract with Insurance Company

The Plan has an investment contract with 3-Year Compound sponsored by John Hancock Life Insurance Company of New York (JNY). 3-Year Compound maintains the contributions in a general account. The account is credited with earnings on the underlying investments and charged for Plan withdrawals and administrative expenses. The contract is included in the statements of net assets available for benefits at contract value, (which represents contributions made under the contract, plus earnings, less withdrawals and administrative expenses) because it is fully benefit responsive. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value. There are no reserves against contract value for credit risk of the contract insurer or otherwise. The adjustment from fair value to contract value for the investment contract is based on the contract value as reported to the Plan by 3-Year Compound.

The fair value of the investment contract at December 31, 2012 and 2011 was $164,803 and $169,835, respectively. The average yield and crediting interest rates for 2012 and 2011 were approximately 0.05% and 0.05%, and 0.05% and 0.05%, respectively. Such interest rates are reviewed on a quarterly basis for resetting.

Certain events, such as the premature termination of the contract by the Plan or the termination of the Plan, would limit the Plan's ability to transact at contract value with 3-Year Compound. The plan administrator believes the occurrence of such events that would also limit the Plan's ability to transact at contract value with the Plan participants is not probable.

At December 31, 2012 and 2011, the Plan's interest in the net assets of the 3-Year Compound was approximately 1.58% and 1.93%, respectively. Investment income and administrative expenses relating to the 3-Year Compound are allocated to the individual plans based upon average monthly balances invested by each plan.

The following information included in the financial statements of the 3-Year Compound was obtained from data that has been prepared and certified to as complete and accurate by John Hancock Life Insurance Company of New York, the underlying insurance contract investment of this 3-Year Compound. At December 31, 2012 and 2011, the insurance contract investment disclosure contains information only for the Plan.

Investment contracts with insurance company consisted of the following at December 31:

	2012	2011
JNY fixed income at fair value	$ 164,803	$ 169,835
Adjustment from fair value for fully benefit-responsive Investment contracts	708	1,305
Investment contract value	$ 165,511	$ 171,140

Note 8. Plan Termination

Although it has not expressed any intent to do so, the Companies have the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of plan termination, participants will become 100% vested in their accounts.

Note 9. Tax Status

The Plan obtained its latest determination letter on January 13, 2011, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The Plan has not been amended since receiving the determination letter.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Organization has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded as of December 31, 2012 there are no uncertain tax positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions and the Department of Labor; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2010.
