Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Independent Auditor's Report

To the Participants and Administrator of
Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees

We have audited the accompanying financial statements of Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2012 and December 31, 2011, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2012 and changes therein for the year then ended and its financial status as of December 31, 2011, and changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matter

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedule of assets (held at end of year) is presented for the purpose of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Schedule SB, line 24 — Change in Actuarial Assumptions

Actuarial Assumption Changes Since Prior Valuation

- Mortality rates were updated from 2011 to 2012 in accordance with PPA.
- Expenses loaded on the normal cost increased from $1,502,294 to $1,516,375 to reflect our expectations for the current plan year.
- The assumed benefit commencement age for current and future term vesteds changed from age 65 to 50% at age 64 and 50% at age 65 to better reflect expected future plan experience.

Schedule SB, line 25 — Change in Method

We changed to a new liability valuation system this year. This change did not materially affect liability amounts and qualified for automatic IRS approval under final Section 430 regulations.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

Actuarial Methods for Funding

Asset Methods – effective January 1, 2011

The asset valuation method is an average of the adjusted market value for each year during the last 24 months preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110 percent and no less than 90 percent of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant methods – effective January 1, 2011

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** Affiliated Computer Services, Inc. provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does have insurance contracts. Participating annuity contracts in the plan's IPG contracts with John Hancock and Aetna are included in the valuation data.

Minimum funding methods – effective January 1, 2011

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

(d) Minimum for service to December 31 1984: Retirees on and after October 1, 1985 shall not receive less than the following: 1% of Average Past Earnings up to a maximum of $15,000 plus 1.25% of Average Past Earnings in excess of $15,000 times Credited Service prior to January 1, 1985.

e) As a result of the July 7, 2000 sale, all benefit accruals have been frozen.

Early retirement	
• Eligibility	Age 55 and 5 years of vesting service.
• Benefit	As described under Normal Retirement reduced 6% for each year that the participant's early retirement date precedes his/her 64th birthday. There is no reduction in annual benefit payable prior to age 64 for employees with 40 or more years of Vesting Service.
Late retirement	
• Benefit	Benefits described under Normal Retirement based on Compensation and Credited Service at actual retirement date.
Vesting	
• Eligibility	All employees who terminate after completing 60 months of Vesting Service and completing 5 Annual Eligibility Test Periods during which 1,000 or more hours are worked.
• Exception	Employees whose employment was terminated by a transfer to Yeargin Inc. shall be fully vested in their benefit accrued to date of transfer.
• Annual Benefit	Upon attaining age 65, the vested terminated employee will receive the benefit credited under Normal Retirement prior to his/her date of termination. Participants are eligible for benefits as early as age 55, reduced as described under Early Retirement.
Disability	
• Eligibility	Participants who are permanently disabled shall retire on an early retirement date requested by the participant and fixed by the Company.
• Benefit	Benefit credit as described under Normal Retirement continued through the disability and actuarially reduced for early payment of benefits.

Schedule SB, Part V — Summary of Plan Provisions

Death Benefits	
• Pre-Retirement	A benefit payable for the spouse's life beginning when the participant would have been age 55 or his/her age at death, if later. This benefit is calculated as if the participant had separated from service on the date of death, survived until eligible for early retirement, and retired with a 50% contingent annuity. This coverage is provided free of charge to all participants.
• Post-Retirement	None except as provided by the normal or an optional form of benefit.
Unpredictable contingent event benefits	N/A
Form of benefits	
• Automatic form for unmarried participants	Single life annuity
• Automatic form for married participants	Actuarially equivalent 50% Joint & Survivor Annuity
• Optional forms	50% Joint & Survivor Annuity 66 2/3% Joint & Survivor Annuity 75% Joint & Survivor Annuity 100% Joint & Survivor Annuity Life Annuity with 10-Year Certain
• Optional form conversion factors	Optional forms of annuity are converted based upon Actuarial Equivalence using the 1971 TPF&C Forecast Mortality Table and an interest rate of 7%
Miscellaneous	
• Maximum compensation	Compensation for any 12-month period used to determine accrued benefits may not exceed the limits in IRC Section 401(a)(17) for the calendar year in which the 12-month period begins. This limit is indexed annually. For 2012, the limit is $250,000.
• Maximum benefits	Annual benefits may not exceed the limits in IRC Section 415. This limit is indexed annually. For 2012, the limit is $200,000.

Schedule SB, Part V — Summary of Plan Provisions

Special provisions for employees of the Raytheon Aircraft Credit Corporation

Eligibility	Age 21 and one year of service. The plan is closed to new entrants.
Final Average Earnings	Annualized average of earnings during highest 60 consecutive months out of last 120 months. "Earnings" include base pay, cost of living adjustments, bonus, commissions, discretionary and productivity awards, unbankable sick leave, area pay and shift differentials, but may not exceed the compensation limit as specified in Section 401(a)(17) of the Internal Revenue Code.
Normal retirement	
• Eligibility	Age 65 and five years of service.
• Benefit	The greatest of: • 1.8 percent for the first 20 years of Membership plus 1.2 percent for the next 29 years multiplied by the excess of Final Average Earnings over the primary Social Security benefit, with a maximum adjustment for Social Security of 60%. • For Raytheon employees who became participants prior to January 1, 1989, 1.2% of Final Average Earnings multiplied by service, but not to exceed 60% of Final Average Earnings less 50% of the Primary Social Security benefit. • The dollar credit in effect for bargaining unit employees under the Raytheon Aircraft Company Retirement Income Plan for Hourly-Paid Employees (currently $492) multiplied by service. Benefits may not exceed the maximum benefit limit as specified in Section 415 of the Internal Revenue Code.
Early retirement	
• Eligibility	Age 55 and five years of service.
• Benefit	Accrued benefit reduced 5/12 percent for each month that the first payment date precedes age 62.
Late retirement	
• Benefit	Benefit will continue to accrue until retirement.
Vesting	
• Eligibility	5 years of service

Schedule SB, Part V — Summary of Plan Provisions

• Benefit	Accrued benefit payable at age 65, or as early as age 55 reduced 5/9% for each of the first 60 months and 5/18% for each additional month that the first payment date precedes Normal Retirement Date.
Disability	
• Eligibility	Termination due to total and permanent disability.
• Benefit	1.2% of Final Average Earnings times service, but not to exceed 60% of Final Average Earnings less 50% of the Primary Social Security benefit, commencing: • if disability is work connected, after absence of two months. • if disability is not work connected and participant has at least 10 years of Vesting Service, after absence of six months.
Death Benefits	
• Eligibility for Pre-Retirement	5 years of vesting service.
• Pre-Retirement	Surviving Spouse Benefit equal to the amount payable to the member's spouse as if the member had survived to early retirement age, retired early, elected a 50 percent Joint and Survivor Annuity and then died. Benefit commences on first of month following the date the member would have been eligible to retire early and is payable for the lifetime of the spouse. For active participants eligible for early retirement or with at least 20 years of Vesting Service, the actuarial equivalent value of this benefit shall not be less than the Basic or Alternate Death Benefits. Basic Death Benefit: (if eligible for early retirement) 90 times accrued benefit less base group life insurance. Alternate Death Benefit: (if 20 years of service but not eligible for early retirement) accrued benefit times age plus service (not to exceed 90).
Form of benefits	
• Automatic form for unmarried participants	Single life annuity
• Automatic form for married participants	Actuarially equivalent 50% Joint & Survivor Annuity
• Optional forms	66 2/3% Joint & Survivor Annuity 5-Year or 10-Year Certain and Life

Schedule SB, Part V — Summary of Plan Provisions

• Eligibility	For salaried employees of Hangar One, Inc. on December 31, 1987.
• Annual Benefit	For periods of service to December 31, 1987, a benefit based on the prior plan formula.
Miscellaneous	
• Maximum compensation	Compensation for any 12-month period used to determine accrued benefits may not exceed the limits in IRC Section 401(a)(17) for the calendar year in which the 12-month period begins. This limit is indexed annually. For 2012, the limit is $250,000.
• Maximum benefits	Annual benefits may not exceed the limits in IRC Section 415. This limit is indexed annually. For 2012, the limit is $200,000.

Schedule SB, Part V — Summary of Plan Provisions

Benefits Included or Excluded

Unless noted below, all benefits provided by the plan, as restated and amended through December 15, 2010.

- **Most recent plan amendments included:** December 15, 2010.
- **Plan amendments excluded:** None
- **Late retirement increases:**
  - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued including the late retirement actuarial increase.
- **IRC Section 415(b) benefit limitations:** The limitations of Internal Revenue Code Section 415(b) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60 percent of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

Plan Provisions Specific to Funding
Additional Benefits Included or Excluded

- **IRC Section 436 benefit restrictions:**
  - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
  - *Plan amendments:* See above.
  - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
  - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
  - *Scheduled benefit increases:* None.
- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.

Plan Provision Changes Since Prior Valuation

Supplemental Schedule

Schedule of Assets (Held at End of Year) as of December 31, 2012 37

The supplemental schedules to the Plan's Form 5500 are not required for the Plan's assets that are held in a Master Trust. Accordingly, the Plan Administrator must file detailed financial information for the Master Trust, including the supplemental schedules, separately with the Department of Labor.

Certain supplemental schedules related to Plan assets that are held outside of the Master Trust that are required by the Employee Retirement Income Security Act of 1974 (ERISA) have been omitted because they are not applicable.

Independent Auditor's Report

To the Participants and Administrator of
Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees

We have audited the accompanying financial statements of Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2012 and December 31, 2011, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2012 and changes therein for the year then ended and its financial status as of December 31, 2011, and changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matter

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedule of assets (held at end of year) is presented for the purpose of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

1. Plan Description

General

The Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees (the "Plan") is a noncontributory defined benefit plan covering salaried employees of Raytheon Aircraft Credit Corporation and former salaried employees of Raytheon Engineers & Constructors, Inc. On July 7, 2000 (the "Closing Date"), the stock of Raytheon Engineers & Constructors, Inc. and its subsidiaries was sold to Morrison Knudsen Corporation. In addition, on the Closing Date, the following occurred: (1) the name of the Plan was changed to the Raytheon Retirement Plan for Engineers & Constructors and Aircraft Credit Employees, (2) the sponsorship of the Plan was assumed by Raytheon Aircraft Credit Corporation, a subsidiary of Raytheon Company (the "Company"), (3) the Plan was frozen with respect to the employees of Raytheon Engineers & Constructors, Inc., and (4) the portion of the Raytheon Aircraft Company Retirement Income Plan for Salaried Employees that covered the active employees of Raytheon Aircraft Credit Corporation on the Closing Date, was spun off and merged into the Plan. A portion of the investments is held in the Raytheon Master Pension Trust ("Master Trust"). The remaining funds are invested in insurance contracts with John Hancock Mutual Life Insurance Company, Aetna Life Insurance Company and ING Life Insurance and Annuity Company (the "Insurance Companies"). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

The Plan was amended and restated in its entirety on February 26, 2002 with a retroactive effective date of January 1, 1998, and has been subsequently amended.

Benefits Eligibility and Vesting

The only active participants in this Plan are those employed by the Raytheon Aircraft Credit Corporation. Salaried employees of the Raytheon Aircraft Credit Corporation are eligible to participate in the Plan if they have completed one year of eligibility service, as defined in the Plan, and have attained age 21. A participant will be fully vested in his or her accrued benefit upon the first to occur of the following events; a) attainment of age 65 and completion of 5 years; (b) completion of 5 years of vesting service; c) total and permanent disability as a result of a non-work related injury or illness; or d) complete or partial termination of the Plan. Former employees of RE&C are vested if they have completed five years of vesting service or were eligible employees as of the Closing Date.

Effective January 1, 2007, employees hired or rehired (after the expiration of any salary continuation payments) are not eligible to participate in the Plan. In addition, former employees who are rehired on or after March 1, 2007, and who have received or are receiving payments from a Company-sponsored pension plan are not eligible to participate in the Plan.

The plan document details the benefit owed upon attaining normal retirement and the factors used in determining the benefit amount.

The plan document details benefit calculation and alternative benefits (i.e., terminated employees, death benefits, etc.)

Contributions
The Company makes contributions to the Plan to ensure assets are sufficient to pay the benefits of the Plan. The Plan is a noncontributory defined benefit plan.

The above description of the Plan is for general information purposes only. In addition, participants should refer to the Summary Plan Description or the Plan document for more complete information.

2. Summary of Significant Accounting Policies

Basis of Presentation
The accompanying financial statements are prepared on the accrual basis of accounting.

Investment Valuation and Income Recognition
The Plan's interest in the Master Trust is stated at fair value. Net investment income/ (loss) from the Master Trust is allocated proportionately, on a monthly basis based on the Plan's interest in the Master Trust. See Note 6 for additional information.

The Plan also invests in insurance contracts with the Insurance Companies. The contracts consist of both general account and separate account components. The general accounts are valued at contract value (which represents contributions made under the contract, plus earnings, less withdrawals and administrative expenses) which approximates fair value. The separate account is valued at the fair value of the net assets of the accounts as reported by ING Life Insurance and Annuity Company.

Insurance contracts distribute to the Plan the income earned by the investment accounts referred to above based on the ratio of the Plan's monies invested to total monies invested in the account.

Contributions
Employer contributions are funded and recorded as determined by actuarial computation. See Note 4 for additional information.

Benefit Payments
Benefit payments to participants are recorded when paid.

Administrative Expenses
The Plan is administered by the Plan Administrator appointed by the Company's Senior Vice President of Human Resources. All expenses of the Plan, which primarily consist of professional and administrative fees, are paid by the Plan. Expenses specifically related to the Plan are included in the Statements of Changes in Net Assets Available for Benefits under "Administrative expenses." Additionally, expenses paid directly by the Master Trust, which primarily consist of investment management fees, are included in the Statements of Changes in Net Assets Available for Benefits under "Raytheon Master Pension Trust investment income/ (loss)."

Use of Estimates
The preparation of the Plan's financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan Administrator to make significant estimates and assumptions that affect the reported amounts of net assets available for benefits at the date of the financial statements, the actuarial present value of accumulated plan benefits as of the benefit information date, the changes in net assets available for benefits during the reporting period and when applicable, the disclosures of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

Reclassifications
Certain prior year amounts of the Master Trust (see Note 6) have been reclassified to conform to the current year's presentation.

New Accounting Pronouncements
In May 2011, the Financial Accounting Standard Board ("FASB") issued ASU No. 2011-4, *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S.GAAP and IFRS.* The amendments in this update result in common fair value measurements and disclosure requirements in U.S. Generally Accepted Accounting Principles ("GAAP") and International Financial Reporting Standards. Consequently, the amendments change the wording used to describe many of the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements. Some of the amendments clarify FASB's intent about the application of existing fair value measurements, while other amendments change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements. The update is effective for annual periods beginning after December 15, 2011. The Plan's financial statements reflect the adoption of this accounting standard.

In December 2011, the FASB issued ASU No. 2011-11, *Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities* that requires additional information regarding financial instruments and derivatives instruments that are offset or subject to an enforceable master netting arrangement or similar agreement. The amendment is effective for the Plan on January 1, 2013. Management is currently evaluating the impact ASU No. 2011-11 will have on the Plan's financial statements.

3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of deceased employees, and (c) active employees or their beneficiaries. Benefits under the Plan are based on employees' credited service and the benefit rate in effect at the time of retirement unless subsequently amended. Benefits payable under all circumstances - such as retirement, death, disability and termination of employment - are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Company's consulting actuary, Mercer, and is the amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuations as of December 31, 2011 and 2010 are as follows:

Assumed rate of return on investments for accumulated benefits-	- 8.75% as of December 31, 2011 - 8.50% as of December 31, 2010
Mortality basis	- Section 430(h)(3) prescribed separate static annuitant and non annuitant mortality tables for PPA projected with mortality improvement to the valuation year plus 7 and 15 years based on scale AA
Retirement age	- Several rates, varying by age from 55 to 70

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Assumption Changes

- The assumed rate of return increased from 8.50 to 8.75%.
- Mortality rates were updated from 2011 to 2012 in accordance with PPA.
- The assumed benefit commencement age for current and future term vesteds changed from age 65 to 50% at age 64 and 50% at age 65.

The above changes were made to better reflect anticipated experience.

As of December 30, 2011, the most recent valuation date, the actuarial present value of accumulated plan benefits is as follows:

Vested benefits	
Participants receiving benefits	$ 292,964,177
Participants with deferred benefits	173,020,231
Active participants	2,675,486
Total vested benefits	468,659,894
Nonvested benefits	31,277
Total actuarial present value of accumulated plan benefits	$ 468,691,171

The following is an analysis of changes in the present value of accumulated plan benefits:

Actuarial present value of accumulated plan benefits as of December 31, 2010	$ 464,577,128
Benefits accumulated and non-investment (gains)/ losses	5,475,239
Increase for interest due to decrease in discount period	37,767,147
Benefit payments	(37,398,917)
Change in actuarial assumptions	(1,729,426)
Actuarial present value of accumulated plan benefits as of December 31, 2011	$468,691,171

The Plan includes assets of $790,945 and $816,749 at December 31, 2012 and 2011, respectively, which are funds that were voluntarily contributed by employees of the former Badger division of the Company to provide for a supplemental pension benefit. These funds were contributed prior to the merger of the Badger Plan into the Plan. Benefits for these employees are paid from these contributed funds, and are not included in the total actuarial value of accumulated plan benefits above.

4. Funding Policy

The employer's contributions are actuarially determined to fund the Plan's current normal costs on a current basis and to generally fund the existing unfunded liability on account of qualified service prior to the valuation date in accordance with the amortization schedules prescribed by ERISA minimum funding requirements (as amended by the Pension Protection Act). At the Company's discretion, and to the extent allowable under maximum tax deductibility regulations, contributions above the ERISA minimum requirements may be made to the Plan. Based on the minimum funding requirements of ERISA, the Company was not required to and did not make contributions for the years ended December 31, 2012 and 2011.

5. Fair Value Measurements

The accounting standard for fair value measurements provides a framework for measuring fair value and requires expanded disclosures regarding fair value measurements. Fair value is defined as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants on the measurement date. The accounting standard established a fair value hierarchy which requires an entity to maximize the use of observable inputs, where available. The following summarizes the three levels of inputs required as well as the assets and liabilities that we value using those levels of inputs.

Level 1:	Unadjusted quoted prices in active markets for identical assets or liabilities.
Level 2:	Observable inputs, other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or have been corroborated by observable market data for substantially the full term of the related assets or liabilities.
Level 3:	Unobservable inputs supported by little or no market activity that are significant to the fair value of the assets or liabilities.

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. During the year ended December 31, 2012, there were no transfers between levels.

	Fair Value of Investment Assets as of 12/31/2012			
	Level 1	**Level 2**	**Level 3**	**Total**
Insurance contracts	$ -	$ -	$ 9,784,052	$ 9,784,052
Total assets, excluding plan interest in Raytheon Master Pension Trust	$ -	$ -	$ 9,784,052	$ 9,784,052

	Fair Value of Investment Assets as of 12/31/2011			
	Level 1	**Level 2**	**Level 3**	**Total**
Insurance contracts	$ -	$ -	$ 9,458,789	$ 9,458,789
Total assets, excluding plan interest in Raytheon Master Pension Trust	$ -	$ -	$ 9,458,789	$ 9,458,789

Level 3 Investments

The table below summarizes changes in the fair value of the Plan's level 3 investment assets for the years ended December 31, 2012 and 2011.

	Level 3 Investment Assets - 12/31/2012	
	Insurance contracts	
Balance, beginning of year	$	9,458,789
Realized gains (losses)		-
Unrealized gains (losses)		-
Purchases		325,263
Sales		-
Transfers in (out) of level 3		-
Balance, end of year	$	9,784,052

	Level 3 Investment Assets - 12/31/2011	
	Insurance contracts	
Balance, beginning of year	$	9,044,908
Realized gains (losses)		-
Unrealized gains (losses)		-
Purchases, issuances, settlements		413,881
Transfers in (out) of level 3		-
Balance, end of year	$	9,458,789

Unallocated insurance contracts are valued at their contract price, which approximates fair value.

6. Master Trust

Summary Financial Information

The Plan's assets are held in the Master Trust, which was established for the investment of assets of the Plan and several other Company sponsored retirement plans. The assets of the Master Trust are held by the Trustee. The Investment Committee, appointed by the Chairman and CEO of the Company, periodically reviews the asset allocation and performance of the investments held in the Master Trust. The investment policy, as approved by the Investment Committee, permits asset diversification to include a combination of cash and cash equivalents, publicly traded equity securities, private equity funds, fixed-income securities, private real estate funds, commingled funds and other investments such as insurance contracts, derivatives and repurchase agreements.

Investment securities are exposed to various risks, such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the value of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

At December 31, 2012 and 2011, the Plan owned approximately 4% of the fair value of the Master Trust net assets. The total net assets of the Master Trust at December 31, 2012 and 2011 were:

Fair Value Measurements
The accounting standard for fair value measurements provides a framework for measuring fair value and requires expanded disclosures regarding fair value measurements. Fair value is defined as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants on the measurement date. The accounting standard established a fair value hierarchy which requires an entity to maximize the use of observable inputs, where available. The following summarizes the three levels of inputs required as well as the assets and liabilities that we value using those levels of inputs.

Level 1:	Unadjusted quoted prices in active markets for identical assets or liabilities.
Level 2:	Observable inputs, other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs which are observable or have been corroborated by observable market data for substantially the full term of the related assets or liabilities.
Level 3:	Unobservable inputs supported by little or no market activity that are significant to the fair value of the assets or liabilities.

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. In evaluating the level at which the Plan's commingled funds have been classified within this hierarchy, several factors have been assessed including, but not limited to price transparency, the ability to redeem these investments at net asset value at the measurement date, and the existence or absence of certain restrictions at the measurement date. See valuation policy section for further information.

Changes in Fair Value Levels
The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

For the years ended December 31, 2012 and December 31, 2011, there were no transfers in or out of Levels 1, 2 or 3.

The following tables summarize the fair value of investment assets and liabilities as of December 31, 2012.

Change in unrealized loss of ($17,090,044) relates to investment assets held by the Plan at December 31, 2011.

Level 3 investments, which are mainly commingled funds, private equity funds and private real estate funds, are estimated at fair market value which primarily utilizes net asset values reported by the investment manager or fund manager. Members of the Coordinating Investment Fiduciary's team and the Chief Accounting Officer's team review independently appraised values, audited financial statements and other pricing information to evaluate the net asset values. Further, for the very limited group of securities and other assets that do not utilize net asset values and for which market quotations are not readily available, additional information is obtained from the investment manager and evaluated to ensure the reported values reflect fair value. This group represents less than 1% of the Master Trust assets. See Valuation Policy section for further information.

Valuation Policy

The Plan's interest in the Master Trust is stated at fair value. The Trustee values Master Trust investments as follows:

Cash and cash equivalents are valued at amortized cost, which approximates fair value.

Investments in equity securities (common and preferred) and equity securities sold short, if any, are valued at the exchange traded closing price.

Investments in fixed income securities (U.S. Government, domestic and foreign bonds, asset backed securities and term loans) are valued by a pricing service which determines valuations for normal institutional-size trading units of such securities using methods based upon market transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders, or at fair value as determined in good faith by the trustee of the Master Trust and management.

Investments denominated in foreign currencies are translated into U.S. Dollars using the last reported exchange rate.

Commingled funds, registered investment companies, private equity funds and private real estate funds are generally valued at their last reported net asset value. Certain commingled funds, private equity funds and private real estate funds are recorded at fair market value which considers, but is not limited to fair values reported by the investment advisor, audited financial statements, and independently appraised values. In the event that audited financial statements for these investments are not available in time to prepare our financial statements or management believes the value reported by the investment advisor does not accurately reflect fair value due to an event in the market place, such as a prime-broker filing for bankruptcy, management will adjust the reported value to fair value based upon information provided by the investment manager or independent valuation experts.

Unallocated insurance contracts are valued at their contract price which approximates fair value.

Securities and other assets for which market quotations are not readily available or for which the above valuation procedures are deemed not to reflect fair value are valued in a manner that is intended to reflect their fair value.

Valuation policies for derivative investments are disclosed in the Derivative Policy paragraph.

Investment Income (Loss)
The Trustee maintains separate records of each plan's proportionate share in the Master Trust's investment accounts. The Plan's share of investment income (loss) and net appreciation (depreciation) in the fair value of investments of the Master Trust is included in the Statements of Changes in Net Assets Available for Benefits as Master Trust investment income (loss). The net appreciation (depreciation) in the fair value of investments consists of the realized gains or losses and the change in unrealized appreciation (depreciation) on those investments.

Under the Master Trust Agreement, each plan's assets are jointly invested. The Plan uses the unit participation method to calculate the Plan's interest in the Master Trust. Under this method, contributions made to and benefits paid from the Master Trust result in increases or decreases in units of participation. All Master Trust income or loss results in a change in unit value.

Dividends are recorded on the ex-dividend date and interest income is accrued as earned. All security transactions are recorded on the trade date. Premiums and discounts on debt securities are amortized to maturity. Gains or losses on sales of securities are based on average cost.

Defined Benefit / Defined Contribution Master Trust
The Defined Benefit / Defined Contribution Master Trust (the "DB/DC Master Trust") is a master trust established for the investment of assets of the Company sponsored defined benefit and defined contribution plans. The assets of the DB/DC Master Trust are held by the Trustee. Under the DB/DC Master Trust Agreement, the assets of the Master Trust and the Company sponsored defined contribution plan, the Raytheon Savings and Investment Plan, (the "Defined Contribution Plan"), are jointly invested. The unit participation method is used to calculate the Master Trust's interest in the DB/DC Master Trust. The DB/DC Master Trust was closed effective March 31, 2011.

For the year ended December 31, 2011, the net income (loss) related to the DB/DC Master Trust was $8,686,729. During 2011, the Master Trust was allocated $2,655,865 net income gain, which consisted of $(206,528) unrealized appreciation/depreciation principally on corporate stock-common, $251,926 dividend and interest income, $(102,810) expenses and $2,713,277 net appreciation/ depreciation, which consists principally of net realized gain/loss from sale of assets.

Investments Sold Short
As of December 31, 2012 and 2011, the Master Trust was not invested in any securities sold short.

The Master Trust may sell a security it does not own in anticipation of a decline in the fair value of that security or as part of its core investment strategy. The Master Trust, in "selling short," sells borrowed securities that must at some date be repurchased and returned to the lender. The risk associated with this practice is that if the market value of the securities sold short increases, the Master Trust may realize losses upon repurchase at prices which may exceed the proceeds received from the sale of the security. Further, in unusual circumstances, the Master Trust may be unable to purchase securities to close its short positions. The Master Trust is obligated to pay a prime broker interest based on the value of the securities sold short and any dividends declared on the securities sold short. Such fees and dividends are recorded on the accrual basis as an expense to the Master Trust.

Repurchase Agreements
As of December 31, 2012 and 2011, the Master Trust was not invested in any repurchase agreements.

The Master Trust may lend extra cash through the use of repurchase agreements whereby the Master Trust agrees to purchase and automatically agrees to sell certain securities at a mutually agreed-upon date and price. At the same time, the counterparty to this agreement agrees to pledge some of its securities. The underlying collateral securities consist of securities in which the Master Trust is permitted to invest.

Securities Lending Program

The Master Trust directly participates in a securities lending program with the Trustee. The program allows the Trustee to loan securities, which are assets of the Master Trust, to approved brokers (the "Borrowers"). The Trustee requires Borrowers, pursuant to a security loan agreement, to deliver collateral to secure each loan. The collateral requires 102% of the fair value of U.S. securities borrowed and 105% for non-U.S. securities borrowed. The Master Trust bears the risk of loss with respect to the unfavorable change in fair value of the invested cash collateral. However, the Borrower bears the risk of loss related to the decrease in the fair value of the securities collateral and, therefore, will have to deliver additional securities to maintain the required collateral. In the event of default by the Borrower, the Trustee shall indemnify the Master Trust by purchasing replacement securities equal to the number of unreturned loaned securities or, if replacement securities are not able to be purchased, the Trustee shall credit the Master Trust for the market value of the unreturned securities. In each case, the Trustee would apply the proceeds from the collateral for such a loan to make the Master Trust whole.

The market value of the securities on loan to Borrowers at December 31, 2012 and 2011 was $14,285,259 and $62,606,189, respectively. The market value of the securities on loan decreased and is expected to continue to decrease as the Master Trust exits the program. Cash collateral obligations of $14,810,658 and $64,416,804 were received for securities on loan at December 31, 2012 and 2011, respectively. Cash collateral was invested in a separately maintained and managed cash collateral investment account and had a fair market value of $11,246,750 and $56,532,293 at December 31, 2012 and 2011, respectively. At December 31, 2012 investments include, $4,670,266 invested in overnight repurchase agreements and $6,581,089 invested in asset backed securities. At December 31, 2011 investments include, $789,977 invested in overnight repurchase agreements and $55,739,637 invested in asset backed securities.

A portion of the income generated upon investment of cash collateral is remitted to the Borrowers, and the remainder is allocated between the Master Trust and the Trustee in its capacity as a security agent. Securities lending income allocated to the Master Trust amounted to $622,396 and $759,183 as of December 31, 2012 and 2011, respectively. Security lending income allocated to the Trustee amounted to $157,306 and $193,055 as of December 31, 2012 and 2011, respectively.

Derivative Policy

The Master Trust enters into contractual arrangements classified as derivatives in carrying out its investment strategy, principally to: (1) hedge a portion of the Master Trust's portfolio to limit or minimize exposure to certain risks, (2) gain exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (3) increase investment returns by reducing the cost of structuring the portfolio. The Master Trust may utilize both exchange traded investment instruments such as equity and future contracts, options, forward contracts and swaps. Select major financial institutions are used in derivatives transactions. When engaging in over the counter derivatives and forward foreign exchange contracts, there is exposure to credit loss in the event of nonperformance by the counterparties to these transactions. The Master Trust manages this exposure through credit approvals, limits, monitoring procedures, and to the extent possible, by restricting the period over which unpaid balances are allowed to accumulate. Procedures are in place to regularly monitor and report market and counterparty credit risks associated with these instruments. The Master Trust does not anticipate nonperformance by counterparties to these contracts.

Forward Foreign Currency Exchange Contracts
A forward foreign currency exchange contract ("forward currency contract") is a commitment to purchase or sell a foreign currency at a future settlement date and at a negotiated rate.

Forward currency contracts are utilized to hedge a portion of the currency exposure that results from the Master Trust's holdings of equity and fixed income securities denominated in foreign currencies.

Forward currency contracts are marked-to-market at the prevailing forward exchange rate of the underlying currencies and the difference between contract value and market value is recorded as unrealized appreciation (depreciation) in Master Trust net assets. When the forward exchange contract is closed, the Master Trust transfers the unrealized appreciation (depreciation) to a realized gain (loss) equal to the change in the value of the forward exchange contract when it was opened and the value at the time it was closed or offset. Sales and purchases of forward currency contracts having the same settlement date and broker are offset and any gain (loss) is realized on the date of offset.

Certain risks may arise upon entering into a forward currency contract from the potential inability of counterparties to meet the terms of their contracts. Additionally, when utilizing forward currency contracts to hedge, the Master Trust gives up the opportunity to profit from favorable exchange rate movements during the term of the contract.

Future Contracts

A future contract is a contractual agreement to make or take delivery of a standardized quantity of a specified grade or type of commodity or financial instrument at a specified future date in accordance with terms specified by a regulated future exchange.

The Master Trust may use equity index, fixed income, cash and cash equivalents and commodities future contracts to manage exposure to the market. Buying futures tends to increase the Master Trust's exposure to the underlying instrument. Selling futures tends to decrease the Master Trust's exposure to the underlying instrument held, or hedge the fair value of other fund investments.

Future contracts are valued at the last settlement price at the end of each day on the exchange upon which they are traded. Upon entering into a future contract, the Master Trust is required to deposit either in cash or securities an amount equal to a certain percentage of the nominal value of the contract ("initial margin"). Pursuant to the future contract, the Master Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the future contract. Such receipts or payments are recorded as “margin flows,” and the accumulated balances resulting from those flows are represented on the balance sheet as “cash held at broker.” The Master Trust will also record an unrealized gain or loss on futures, which is calculated as the difference between the notional cost and the notional market value of open futures contracts.

Future contracts involve, to varying degrees, credit and market risks. The Master Trust enters into future contracts on exchanges where the exchange acts as the counterparty to the transaction. Thus, credit risk on such transactions is limited to the failure of the exchange. The daily settlement on the future contracts serves to greatly reduce credit risk. Losses in value may arise from changes in the value of the underlying instrument or if there is an illiquid secondary market for the contracts. In addition, there is the risk that there may not be an exact correlation between a future contract and the underlying index or security.

At December 31, 2012, U.S. Government Bonds with a par value of $9,034,000 ($9,027,882 fair value) were pledged as collateral for open equity and fixed income future positions. These bonds are restricted from trading until the future positions for which they are pledged as collateral are settled. A cash balance of $6,296,213 was pledged to cover margin requirements for open future contracts.

At December 31, 2011, no securities were pledged as collateral or restricted from trading. A cash balance of $8,042,544 was pledged to cover margin requirements for open future contracts.

Options

The Master Trust may invest in option contracts. An option contract is a contract in which the writer of the option grants the buyer of the option the right to purchase from ("call option"), or sell to ("put option"), the writer a designated instrument at a specified price within a specified period of time. Certain options, including options on indices, will require cash settlement by the Master Trust if the option is exercised. The Master Trust may enter into put or call option contracts in order to: hedge against potential adverse price movements in the value of the portfolio assets; as a temporary substitute for selling selected investments; to lock in the purchase price of a security or currency which it expects to purchase in the near future; as a temporary substitute for the purchase of selected investments; and to enhance potential gain.

When the Master Trust purchases or writes an option, an amount equal to the premium paid or received by the Master Trust is recorded as an asset or liability and is subsequently adjusted to the current market value of the option purchased or written. Options purchased or written are valued at the last sale price or, in the absence of a sale, the mean between the closing bid and asked prices or at the most recent asked price (bid for purchased options) if no bid and asked price are available. Over-the-counter purchased or written options are valued using dealer supplied quotations. Gain and loss is recognized when the option contract expires or is closed.

If the Master Trust writes a covered call option, the Master Trust foregoes, in exchange for the premium, the opportunity to profit during the option period from an increase in the value of the underlying security above the exercise price. If the Master Trust writes a put option, it accepts the risk of a decline in the value of the underlying security below the exercise price. Over-the-counter options have a risk of the potential inability of counterparties to meet the terms of their contracts. The Master Trust's maximum exposure to purchased options is limited to the premium initially paid. In addition, certain risks may arise upon entering into option contracts prior to the expiration date and that a change in value of the option contract may not correlate exactly with changes in the value of the securities or currencies hedged.

As of December 31, 2011, the Master Trust did not have any options.

A summary of open purchased equity options as of December 31, 2012 is presented below:

	Put Options	
	2012	
	Number of Contracts	Market Value
Total purchased equity options	155	$ 17,980
Premiums paid in aggregate as of December 31, 2012		$ 169,365

Swaps

As of December 31, 2012 and 2011, the Master Trust was not invested in any swaps.

The Master Trust may invest in interest rate swap contracts. The Master Trust uses interest rate swap contracts to manage its exposure to interest rates. Interest rate swap contracts entered into by the Master Trust typically represent the exchange by the Master Trust with a counterparty of a commitment to make variable rate and fixed rate payments with respect to a notional amount of principal. Such contracts may have a term of one to ten years, but typically require periodic interim settlement in cash, at which time both the value of the index or security and the specified interest rate are reset for the next settlement period. During the period that the swap contract is open, the contract is marked-to-market as the net amount due to or from the Plan in accordance with the terms of the contract based on the closing level of the relevant index or security and interest accrual through the valuation date. Changes in the value of the swap contract are recorded as unrealized gains or losses, while periodic cash settlements are recorded as realized gains or losses.

The Master Trust may invest in credit default swaps. Credit default swap contracts entered into by the Master Trust typically represent the exchange by the Master Trust with a counterparty of a commitment to provide a level of credit protection for a commitment to receive interest at a fixed rate based on the potential risk of default of the relevant underlying issuer. Providing credit protection to a counterparty tends to increase a Master Trust's exposure to the underlying instrument. Receiving credit protection from a counterparty tends to decrease a Master Trust's exposure to the underlying instrument held by a Master Trust, or hedge the fair value of other Master Trust investments. Such contracts may have a term of one to ten years, but typically require periodic interim settlement in cash. During the period that the credit default swap contract is open, the contract is marked-to-market in accordance with the terms of the contract based on the current interest rate spreads and credit risk of the referenced obligation of the underlying issuer and interest accrual through valuation date. Changes in the value of the credit default swap are recorded as unrealized gains or losses, while periodic cash settlements are recorded as realized gains or losses.

Entering into a swap contract involves, to varying degrees, elements of credit, market and interest rate risk in excess of the amounts reported in the statement of net assets available for benefits. Notional principal amounts are used to express the extent of involvement in the transactions, but are not delivered under the contract. Accordingly, credit risk is limited to any amounts receivable from the counterparty. To reduce credit risk from potential counterparty default, the Master Trust enters into swap contracts with counterparties whose creditworthiness has been approved by the trustee of the Trust. The Master Trust bears the market risk arising from any change in index or security values or interest rates.

7. Termination Policies

The Company has not expressed any intent to terminate the Plan or discontinue its contributions. However, in the event the Plan is discontinued:

a) The assets comprising the Plan, including the net income/ (loss) of the Plan shall be revalued at market by the Trustee.

b) The Plan provides that the net assets of the Plan shall be allocated among the participants and beneficiaries of the Plan in the order provided by ERISA.

c) To the extent unfunded vested benefits exist, ERISA provides that such benefits are payable by the Pension Benefit Guaranty Corporation (the "PBGC") to participants, up to specified limitations, as described in ERISA.

Whether all participants receive their full or partial benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated plan benefit obligations, and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the PBGC.

The Company may terminate the Plan in whole or in part at any time. This summary of termination priorities is provided for general information purposes only. Participants should refer to the Plan document for more information.

8. Party-in-Interest Transaction

Certain investments within the Master Trust were advised by or affiliated with The Bank of New York Mellon ("BNY Mellon"), the Trustee and Custodian, and related party. Transactions with BNY Mellon qualify as party-in-interest transactions. For the years ended December 31, 2012 and 2011, $91,907 and $114,043 of expenses paid to BNY Mellon, which were specifically related to the Plan, were incurred and included in "Administrative expenses." In addition, the Plan was allocated approximately $226,451 and $409,857 of expenses paid directly by the Master Trust to BNY Mellon and are included in "Raytheon Master Pension Trust investment income/ (loss)." As of December 31, 2012 and 2011, $32,282 and $65,656 of expenses to be paid to BNY Mellon were accrued, including the Plan's allocation of Master Trust accrued expenses to be paid to BNY Mellon.

For the years ended December 31, 2012 and 2011, $58,463 and $59,909 of insurance company expenses specifically related to the Plan were incurred. There were no insurance company expenses accrued as of December 31, 2012 and 2011.

9. Tax Status

The Internal Revenue Service (the "IRS") has determined and informed the Company by letter dated May 1, 2012, that the design of the Plan meets the requirements for qualification under Code section 401(a), on which the tax exemption of the Trust under Code section 501(a) is based. The Plan has been amended since receiving the determination letter. The Plan Administrator and the Company's benefits counsel believe that the current design and operation of the Plan are consistent with preservation of the qualification of the Plan and exemption of the Trust in the context of applicable IRS procedures. The Company is in the process of ensuring that the Plan conforms to the requirements of Section 401(a)(26) of the Internal Revenue Code concerning participation by a minimum number of active employees.

The Plan adopted the provisions of uncertain tax positions that provide criteria for the recognition, measurement, presentations and disclosure of uncertain tax positions beginning January 1, 2009. The Plan may from time to time hold investments that give rise to certain tax liabilities. Based upon management's assessment, the Plan has not recognized any tax liabilities at December 31, 2012 and 2011, respectively. The Plan is subject to examinations by taxing jurisdictions. Pursuant to a letter to the Company dated March 28, 2011, the IRS is conducting an examination of the Plan for the Plan year ended December 31, 2009.

10. Contracts with Insurance Companies

The Company has entered into contracts with insurance companies primarily for the purpose of distributing monthly pension payments on behalf of certain participants. Under the contracts, the Plan maintains a minimum balance in an unallocated account with each insurance company and the insurance company pays annual interest which ranged from 3.00% to 5.12% and 3.00% to 5.50% at December 31, 2012 and December 31, 2011, respectively.

11. Risks and Uncertainties

The Plan financial statements are based on the application of U.S. Generally Accepted Accounting Principles (GAAP), which require the Plan to make estimates and assumptions about future events that affect the amounts reported in financial statements and the accompanying notes.

Contributions to the Plan are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee compensation and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. The investments of the Plan, which are held in the Master Trust, are exposed to various risks, such as interest rate, market and credit risks. See Note 6 for additional information with respect to investment risk.

12. Subsequent Events

The Plan has evaluated subsequent events and transactions subsequent to December 31, 2012 through the date the Plan's financial statements were available to be issued, September 23, 2013.
