Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Independent Auditor's Report

To the Participants and Administrator of the
L-3 Communications KEO Pension Plan:

We have audited the accompanying financial statements of L-3 Communications KEO Pension Plan (the "Plan"), which comprise the statement of net assets available for benefits as of December 31, 2012, and the related statement of changes in net assets available for benefits for the period from February 6, 2012 (inception) through December 31, 2012, and the statement of accumulated plan benefits as of February 6, 2012, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2012 and changes therein for the period from February 6, 2012 (inception) through December 31, 2012, and its accumulated plan benefits as of February 6, 2012 in accordance with accounting principles generally accepted in the United States of America.

L-3 COMMUNICATIONS KEO PLAN
NOTES TO FINANCIAL STATEMENTS
(Dollars in thousands)

1. Plan Description

The following brief description of the L-3 Communications KEO Pension Plan (the “Plan”) is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

The Plan was established effective February 6, 2012, in connection with the acquisition of the Kollmorgen Electro-Optical business (named L-3 KEO) from Danaher Corporation by L-3 Communications Corporation (the “Company”), a wholly owned subsidiary of L-3 Communications Holdings, Inc. (“Holdings”). As of that date, the Plan accepted a transfer of assets of \$29,937 and accumulated benefit obligations of \$24,379 attributable to certain employees, former employees, and employee beneficiaries of L-3 KEO who participated in the Danaher Corporation & Subsidiaries Pension Plan (the “Prior Plan”).

The Plan is a non-contributory defined benefit plan. Participation in the Plan commenced on February 6, 2012 for all employees, union and non-union, that were accruing a benefit under the Prior Plan on February 5, 2012 and became an employee of L-3 KEO on February 6, 2012. Employees hired by L-3 KEO on or after February 6, 2012, commence participation in the Plan after completing one year of eligibility service.

The Plan is subject to the Employee Retirement Income Security Act of 1974, as amended (“ERISA”).

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared using the accrual basis of accounting.

Interest in Master Trust

Investment assets of the Plan are maintained in the L-3 Communications Corporation Master Trust (the “Master Trust”) administered by The Bank of New York (“BNY”) Mellon, as Trustee. The Plan participates in the Master Trust along with other defined benefit plans sponsored by the Company (collectively, the “L-3 Participating Plans”). The only investment of the Plan is its undivided interest in the net assets of the Master Trust. The fair value of the Plan’s interest in the Master Trust is determined based on the beginning of year value of the Plan’s undivided interest in the trust plus actual contributions and allocated investment income (loss) less actual distributions and actual administrative expenses. Assets held in the Master Trust primarily consist of corporate equity securities, commingled trust funds and mutual funds, and corporate bonds. See Note 6 for a description of the valuation methodologies of the assets of the Master Trust.

The Master Trust records investment transactions on the trade-date, dividend income on the ex-dividend date, interest income as earned, and determines realized gains and losses on sales of securities based on the average cost method.

L-3 COMMUNICATIONS KEO PENSION PLAN
NOTES TO FINANCIAL STATEMENTS - continued
(Dollars in thousands)

Net Investment Income from Master Trust

The net investment income from the Master Trust includes interest and dividend income and net appreciation or depreciation in the fair value of investments, which includes net gains or losses realized upon disposition of investments and net unrealized appreciation or depreciation of investments. The net investment income or loss is allocated to the L-3 Participating Plans based upon the relationship of each plan's respective monthly balances in the investment pool to the total investments of the Master Trust, as determined on a monthly basis.

Benefit Payments

Benefit payments are recorded when paid.

Plan Expenses

The administrative expenses of the Plan are paid for by the Plan. Administrative expenses are allocated to the Plan at the direction of the Company based upon the Plan's respective portion of the expense. Investment management fees of the Master Trust are allocated to the L-3 Participating Plans based upon the relationship of each plan's respective monthly balances in the investment pool to the total investments of the Master Trust, as determined on a monthly basis.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP") requires management to make significant estimates and assumptions that affect the reported amounts of assets, liabilities, benefit obligations, and changes therein, disclosures of contingent assets, liabilities and benefit obligations, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results will differ from those estimates.

Risks and Uncertainties

Plan contributions and the actuarial present value of accumulated plan benefits are determined based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in the estimates and assumptions in the near term would be material to the financial statements.

The investments held in the Master Trust are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investments and the level of uncertainty related to changes in the value of investments, it is at least reasonably possible that changes in risks in the near term would materially affect the investments and related allocation reported in the Statement of Net Assets Available for Benefits..

L-3 COMMUNICATIONS KEO PENSION PLAN
NOTES TO FINANCIAL STATEMENTS - continued
(Dollars in thousands)

Subsequent Events

The Plan continued to evaluate events after the Statement of Net Assets Available for Benefits date through October 3, 2013, the date the financial statements were available to be issued.

3. Contributions

Generally, the Company's funding policy is to contribute amounts in accordance with the Internal Revenue Code ("IRC") and the minimum funding requirements under ERISA. There was no funding required from the Company to the Plan in 2012 under the minimum funding requirements of ERISA. Contributions are calculated using the Projected Unit Credit Actuarial Cost Method. Under this method, the total actuarial liability for participants is the actuarial present value as of the valuation date of all benefits attributed by the pension benefit formula to employee service rendered prior to that date, which assumes the normal cost will increase each year for each employee as he or she approaches retirement age. The yield (interest, dividends and net realized and unrealized gains and losses) on investments of the Plan serves to adjust future contributions that will be required to provide for the defined level of benefits. The funding target is measured on an accrual-to-date basis using mandated mortality tables and interest rates with no salary projection past the end of the year.

4. Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump sum distributions that are attributable under the Plan's provisions to the service that employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries.

Participants are entitled to receive a monthly annuity benefit beginning at the normal retirement age of 65 with 5 years of vesting service for frozen benefits and age 65 with 3 years of vesting service for the cash balance benefit. The Prior Plan provided a benefit that was based on the participant's accrued benefit, determined under the Prior Plan as of December 31, 2000 and December 31, 2002 for non-union and union participants, respectively. The accrual of benefits on future service was frozen on such date. Participants that continued to receive a benefit under the Prior Plan after January 1, 2001, for non-union employees, and January 1, 2003, for union employees, in addition to a frozen benefit were entitled to receive a cash balance benefit. Participants that entered into the Prior Plan on or after January 1, 2001 and January 1, 2003, for non-union and union participants, respectively, or entered into the Plan on or after February 6, 2012, are only entitled to a cash balance benefit.

The cash balance benefit of the Plan is calculated by applying a compensation credit that is equal to 3.5% for non-union participants and 4.5% for union participants to eligible earnings monthly. Additionally, on a monthly basis, an interest credit is applied that is based on the average 30-year treasury rate as determined for the month of November preceding the plan year. The interest rate for 2012 was 3.02%. Retirees may elect to receive their pension benefits in the form of a joint

and survivor annuity or a life annuity payable monthly from the date of retirement. Under the joint and survivor annuity, if a vested participant dies prior to the date pension benefits commence, the surviving spouse of the deceased vested participant receives benefits equal to 50% of the amount which would have been payable to the retiree under a joint and survivor annuity. Under the life annuity, there are no continuing payments after the death of the retiree. If participants are terminated before completing 3 years of service for the cash balance benefit or 5 years of service for the frozen accrued benefit, they forfeit the right to receive their accumulated benefits.

Participants of the Plan may commence early retirement payment of the frozen accrued benefit after age 55 with 5 years of vesting service and at any time after termination of employment with 3 years of vesting service for the cash balance benefit.

The actuarial present value of the accumulated plan benefits is determined by an independent actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuation as of February 6, 2012 were:

Mortality basis	RP-2000 Annuitant and Non-Annuitant Tables with static projection through the valuation date plus another 7 years for annuitants and 15 years for non-annuitants.
Retirement	Retirement starting at 60 through 65, at varying rates, with 100% by age 65.
Discount rate for the determination of the present value of accumulated plan benefits	8.25%

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors may be applicable in determining the actuarial present value of accumulated Plan benefits. The computation of the actuarial present value of accumulated plan benefits was made as of February 6, 2012.

6. Fair Value Measurements

The Plan adopted the standards for fair value measurements. The provisions of the standards are applicable to all of the Plan's assets and liabilities that are measured and recorded at fair value. The Benefit Plan Committee determines the Plan's valuation policies utilizing information provided by the investment advisors and custodian. The standards establish a framework for measuring fair value and expand related disclosures. The standards define fair value as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants. It establishes a fair value hierarchy that gives the highest priority to observable inputs and the lowest priority to unobservable inputs. The three levels of the fair value hierarchy are described below.

Level 1: Quoted market prices available in active markets for identical assets or liabilities as of the reporting date. The Plan's Level 1 assets include equity securities, a mutual fund classified under Fixed Income – Investment Grade and Real Estate Investment Trusts, all of which fair value is derived from quoted market prices.

Level 2: Pricing inputs other than quoted prices in active markets included in Level 1, which are either directly or indirectly observable as of the reporting date. The fair value is determined using a valuation model based on observable market inputs. The Plan's Level 2 assets primarily include commingled trust funds and corporate high-yield bonds.

Level 3: Pricing inputs that are generally unobservable inputs and not corroborated by market data. The Plan has no Level 3 assets.

The table below reports by level, within the fair value hierarchy, the assets held in the Master Trust at fair value as of December 31, 2012, including a description of the valuation methodologies. As required by the standards, each asset is classified based on the lowest level of input that is significant to the fair value measurement. There were no transfers during the year between levels 1, 2 or 3.

(1) Equity securities consist of investments in common stock of U.S. and international companies. The fair value of equity securities is based on quoted market prices available in active markets at the close of a trading day, primarily the New York Stock Exchange (NYSE), National Association of Securities Dealers Automated Quotations (NASDAQ), and various international exchanges. The Level 2 investment balance is derived from a regulated commingled equity trust fund, which fair value is based on the net asset value (NAV) at the end of each month. The NAV is calculated by the fund manager based on the fair value of the funds holdings, primarily equity securities traded in active markets, determined as of the end of each month. Withdrawals are permitted monthly based on NAV.

(2) Approximately 50% of plan assets that are invested in the Fixed Income — Investment Grade asset category consist of a mutual fund offered by a registered investment company (the “Fund”). The Fund invests in investment grade fixed income securities, mortgaged-backed securities, U.S. treasury and agency bonds and corporate bonds. This Fund is classified by the Company as a Level 1 measurement within the fair value hierarchy. The remaining 50% of plan assets are invested in a regulated commingled bond trust fund (the “Bond Fund”) and classified as Level 2. As this Bond Fund does not trade in an active market, the fair value is based on NAVs calculated by fund managers based on yields currently available on comparable bonds of issuers with similar credit ratings, quoted prices of similar bonds in an active market, or cash flows based on observable inputs. Withdrawals are permitted monthly based on NAV.

(3) Fixed Income — High Yield consists of investments in corporate high-yield bonds from various industries. The fair values of these investments are based on yields currently available on comparable bonds of issuers with similar credit ratings, quoted prices of similar bonds in an active market, or cash flows based on observable inputs.

(4) Real Estate Investment Trusts (REITs) consist of securities that trade on the major exchanges and invest directly in real estate, either through properties or mortgages.

(5) Other consists primarily of cash equivalents maintained in commingled trust funds, which invest primarily in short term, high quality money market securities such as government obligations, commercial paper, time deposits and certificates of deposit, and are classified as Level 2.

7. Tax Status

The Plan administrator and the Plan’s counsel believe that the Plan is designed and is currently being operated in compliance with the applicable regulations of the IRC; therefore, no provision for income taxes has been included in the Plan’s financial statements.

U.S. GAAP requires plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan administrator has analyzed the tax positions by the Plan, and has concluded that as of December 31, 2012, there are no uncertain tax positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

The Plan recognizes accrued interest and penalties related to unrecognized tax benefits in tax expense. There were no interest and penalties included in the Plan’s financial statements.

8. *Related Party Transactions*

Certain plan investments held in the Master Trust are units of a commingled trust fund managed by BNY Mellon, the Plan's trustee. As described in Note 2, the Plan (through the Master Trust) paid certain expenses related to plan operations and investment activity to various service providers. These transactions are exempt party in interest transactions under ERISA.

9. *Termination Priorities*

While the Company has not expressed any intention to do so, it is free to discontinue its contributions at any time and to terminate the Plan, subject to the provisions set forth in ERISA.

In the event the Plan terminates, the net assets of the Plan will be allocated as specified by the Plan in accordance with ERISA, generally to provide the following benefits in the order indicated:

- a. Benefits attributable to employee contributions, taking into account those paid out before termination.
- b. Benefits attributable to participants who have retired at least three years before the termination date of the Plan or those participants who were eligible to retire and receive pension benefits at least three years before, but who did not elect to retire at that time.
- c. Benefits commencing at retirement age to participants who are eligible to receive guaranteed benefits under ERISA.
- d. All vested and non-vested benefits.

Whether participants receive all benefits to which they are entitled under the terms of the Plan should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan Sponsor and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation, up to specified limits.

Actuarial Assumptions and Methodologies (Funding)

Measurement date	February 6, 2012 (acquisition date)																					
Interest:	The interest rates used for the 2012 plan year are the 24-month average corporate bond yields for February 2012. This valuation reflects the plan sponsor decision for the 2012 plan year not to opt out of funding stabilization. Under stabilization, the interest rates used for funding purposes are calculated in the usual manner but are then constrained to be within a corridor around a 25-year average. These discount rates are 5.54% for payments in the first 5 years, 6.85% for payments in years 6 – 20, and 7.52% for payments thereafter, which translates to an effective interest rate of 7.00%. Before reflecting funding stabilization, the discount rates are 1.96% for payments in the first 5 years, 5.01% for payments in years 6 – 20, and 6.13% for payments thereafter, which translates to an effective interest rate of 5.30%. The yield curve used to determine the PBGC variable rate premium is the same as funding, without reflecting funding stabilization.																					
Mortality rates:	RP2000 separate annuitant and non-annuitant tables with static projection. Mortality is projected through the valuation date plus another 7 years for annuitants, and through the valuation date plus another 15 years for non-annuitants.																					
Salary Increases:	4.00%.																					
Election of lump-sum option:	100% of active participants are assumed to elect lump sums at termination. Terminated vested participants that terminated during the prior plan year are assumed to elect an immediate lump sum as of the valuation date. All other terminated vested participants are assumed to elect a lump sum payment to be paid at age 65. Lump sums for the career average benefit are valued on the interest rate implied by the funding yield curve and the 2012 mandated mortality tables for lump sum conversion.

Asset method	<p>Assets are determined by averaging the market value as of the valuation date and the adjusted market values as of the preceding two years. The resulting value is limited to between 90% to 110% of market value of assets. The adjusted market values reflect cash flow and expected earnings to the valuation date. The expected earnings are based on an assumed rate of return of 7.50%, limited to the third segment of the funding interest assumption for the applicable year.</p> <p>Since the KEO plan is considered a newly established plan, the actuarial value of assets as of February 6th, 2012 was set equal to the market value of assets and corresponds to the transferred amount calculated as of February 6th (before applying any interest adjustment to the actual date of transfer). The asset smoothing methodology will first start to apply with the 2013 valuation.</p>
Funding method	<p>Funding method is unit credit actuarial cost method, as prescribed by law. The liability is measured on an accrual-to-date basis using mandated mortality tables and interest rates with no salary projection past the end of the year.</p>

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
