Century Aluminum of West Virginia, Inc. Hourly Employees Pension Plan

Notes to Financial Statements December 31, 2012 and 2011

Note 1 - Plan Description

The following description of Century Aluminum of West Virginia, Inc. Hourly Employees Pension Plan (the "Plan") provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General - The Plan is a noncontributory defined benefit pension plan and covers substantially all employees of Century Aluminum of West Virginia, Inc. (the "Company") who are represented by the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industries and Service Workers International Union, AFL-CIO-CLC (the "Union"). The Plan is a "spin-off" of all active employees at the Ravenswood facility who were participants in the Kaiser Aluminum and Chemical Corporation Pension Plan (KAPP). In connection with the spin-off, the Company is responsible for the benefits of active participants of the Company who were formerly in the KAPP. The spin-off met applicable government regulations. Represented employees hired after February 7, 1989 are eligible to participate in the Plan in accordance with the Plan's provisions.

In accordance with the Plan and the February 7, 1989 Asset Purchase Agreement between the Company and Kaiser Aluminum and Chemical Corporation (KACC), the Plan grants credit for service under KAPP for purposes of eligibility, vesting, and benefit accruals. The Plan is subject to the requirements of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions - All contributions to the Plan are made by the Company. The Company contributes such amounts, as determined on an actuarial basis, to provide the Plan with assets sufficient to meet the projected benefits to be paid to plan participants. No participant contributions are permitted.

Funding - Contributions are made by the Company in actuarially determined amounts. The Company's policy is to make contributions necessary to satisfy ERISA funding standards. Annual contributions meet the minimum funding requirements of ERISA.

Pension Benefits - Retirement benefits under the Plan are based upon age attained and years of service. The collective bargaining agreement between the Company and the Union specifies the pension factors by job class which are utilized in the determination of monthly benefits. Eligibility for normal retirement requires the participant to attain the age of 62 and have 10 years of service or to have 30 or more years of continuous service, but not to have attained age 62. The Plan permits early retirement at age 60 provided the participant has completed at least 10 years of continuous service. The Plan also provides for death and disability benefits. Participants become vested following the completion of five years of service.

Notes to Financial Statements December 31, 2012 and 2011

Note 1 - Plan Description (Continued)

Party-in-interest Transactions - Frank Russell Trust Company and SEI Private Trust Company (collectively, the "Custodians") were the custodians of the Plan for the year ended December 31, 2012. Certain plan assets were managed by the Custodians and their affiliates. Transactions in such investments qualify as party-in-interest transactions as defined under ERISA guidelines.

Note 2 - Summary of Significant Accounting Policies

Investment Valuation - The Plan's investments are stated at fair value. The common collective trust funds were valued at net asset value per share (or its equivalent) of the funds, which was based on the fair value of the funds' underlying assets. There were no unfunded commitments or restrictions on redemptions for such funds as of December 31, 2011. The Plan's mutual fund investments are valued based on quoted market prices. See Note 3 for additional information.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Actuarial Present Value of Accumulated Plan Benefits - Accumulated plan benefits are those future periodic payments that are attributable, under the Plan's provisions, to the service employees have rendered. These include benefits expected to be paid to:

- a. Retired or terminated employees or their beneficiaries
- b. Beneficiaries of employees who have died
- c. Present employees or their beneficiaries

Actuarial Assumptions - The actuarial present value of accumulated plan benefits is determined by an actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and probability of payment between the valuation date and the expected date of payment.

Century Aluminum of West Virginia, Inc.

Hourly Employees Pension Plan

Notes to Financial Statements December 31, 2012 and 2011

Note 2 - Summary of Significant Accounting Policies (Continued)

The significant actuarial assumptions used in the valuation of the Plan at January 1, 2013 and 2012 are summarized as follows:

Actuarial cost method	- Unit credit actuarial cost method
Assumed rate of return	- 7.25 and 8.00 percent per annum for January 1, 2013 and 2012, respectively
Mortality basis	- RP-2000 Mortality Table for males and females projected to 2025 with a blue collar adjustment
Incident of retirement	- Early retirement age assumptions beginning at age 55 with full retirement at age 70

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Benefit Payments - Benefits are recorded when paid.

Administrative Expenses - Certain administrative costs including custodial, retirement services, and Pension Benefit Guaranty Corporation (PBGC) fees and expenses are paid by the Plan. All other administrative costs are paid by the Company.

Risks and Uncertainties - Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, employee compensation, and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the statement of net assets available for benefits.

Use of Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

Notes to Financial Statements

December 31, 2012 and 2011

Note 2 - Summary of Significant Accounting Policies (Continued)

Subsequent Events - The financial statements and related disclosures include evaluation of events up through and including October 2, 2013, which is the date the financial statements were available to be issued.

Note 3 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

The following tables present information about the Plan's assets measured at fair value on a recurring basis at December 31, 2012 and 2011.

Level 1 - Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Level 2 - Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, and other inputs such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 - Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset.

In instances whereby inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

Note 3 - Fair Value Measurements (Continued)

Equity I Fund - Seeks higher long-term returns that exceed the Russell 1000 Index by investing in common stocks that rank among the largest 1,000 companies in the U.S. stock market.

All International Markets Fund - Seeks high, long-term returns comparable to the broad international stock market by investing in companies from developed and emerging countries around the world.

Large Cap Structured Equity Fund - Seeks to outperform its benchmark with above-average consistency relative to other investment managers by employing a diversified quantitative approach to modeling the investment universe.

Equity II Fund - Seeks high, long-term returns that exceed the Russell 2500 Index by investing in the smaller capitalization stocks of the U.S. stock market.

Note 4 - Unaudited Information

In 2012, the Plan changed custodians, from Russell Trust Company to SEI Private Trust Company (collectively, the "Custodians"). The Custodians of the Plan held the Plan's investments and executed all investment transactions during the periods under audit. The investment balances and related investment results included in the accompanying financial statements and supplemental schedules of assets held at end of year and reportable transactions are based solely on information provided by the Custodians.

Note 5 - Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is determined by consulting actuaries from PricewaterhouseCoopers, LLP. The calculations of the estimated present value of accumulated plan benefits attributable to participants in the Plan, which were made as of and for the years ended January 1, 2013 and 2012 (for the years ended December 31, 2012 and 2011, respectively), the most recent actuarial valuations, are as follows :

	January 1

Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Participants currently receiving benefit payments	\$ 39,080,808	\$ 37,104,262

Note 5 - Accumulated Information (Continued)

	Year Ended January 1

Actuarial present value of accumulated plan benefits -		
Beginning of year	\$ 49,158,393	\$ 46,650,871
(Decrease) increase during the year attributable to:		
Net benefits accumulated	(997,310)	1,681,892
Increase for interest due to the decrease in the discount period	3,770,645	3,574,335
Changes in actuarial assumptions	3,674,265	1,272,024
Benefits paid	(4,130,114)	(4,020,729)
Net increase	2,317,486	2,507,522
Actuarial present value of accumulated plan benefits -		
End of year	<u>\$ 51,475,879</u>	<u>\$ 49,158,393</u>

A summary of significant changes in the actuarial present value of accumulated plan benefits during the years ended are as follows:

The change in assumption in 2012 is the result of a change in the discount rate from 8.00 percent to 7.25 percent to better reflect anticipated plan experiences.

The change in assumption in 2011 is the result of a change in the mortality tables to better reflect anticipated plan experiences.

Note 6 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination letter, management believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

In accordance with guidance on accounting for uncertainty in income taxes, management evaluated the Plan's tax position and does not believe the Plan has any uncertain tax positions that require disclosure or adjustment to the financial statements. The plan administrator believes the Plan is no longer subject to tax examinations for years prior to 2009.

Century Aluminum of West Virginia, Inc. Hourly Employees Pension Plan

Notes to Financial Statements December 31, 2012 and 2011

Note 7 - Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro-rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guaranty while other benefits may not be provided for at all.

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods

Statement of Actuarial Methods (continued)

1. Actuarial Cost Method

The actuarial cost method is the Unit Credit Actuarial Cost Method.

Under this cost method, the actuarial accrued liability is defined as the present value of the accrued benefits on the valuation date. The unfunded actuarial accrued liability is the excess, if any, of the amount by which the accrued liability exceeds the actuarial value of plan assets.

The normal cost, determined on the valuation date, is the amount required to fund the benefit expected to be earned in the current year plus expected expenses.

2. Asset Valuation Method

Smoothed value method. Under this method the smoothed value is equal to the average of the fair market value on the valuation date and the adjusted fair market value on each of the preceding two valuation dates, but not less than 90% nor more than 110% of the Fair Value of Assets. The adjusted fair market value as of any preceding valuation date is equal to the fair market value as of such date increased for contributions reflected in the fair market value of assets on the current valuation that were not reflected in the fair market value of assets as of such preceding valuation date, decreased for benefit payments and expenses reflected in the fair market value of assets on the current valuation that were not reflected in the fair market value of assets as of such preceding valuation date, and adjusted for expected earnings (not in excess of the third segment rate with no phase-in applicable to the corresponding valuation date). Because the expected earnings are determined based on an investment return that is limited to the third segment rate, the resulting actuarial value of assets is more likely to be less than the fair value of assets over an extended period of time.
