We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained certifications from the trustee as of and for the years ended December 31, 2012 and 2011, that the information provided to the plan administrator by the trustee is complete and accurate.

Funding target	Present value of accrued benefits
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year.
Actuarial value of assets	Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2011 plan year.) The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.
Benefits not valued	All benefits described in the Plan Provisions section of this report were valued including based on discussions with SCA regarding the likelihood that these benefits will be paid. Towers Watson has reviewed the plan provisions with SCA and, based on that review, is not aware of any significant benefits required to be valued that were not.
Change in assumptions and methods since prior valuation	The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2010 to September 2011. The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements. The MAP-21 interest rate corridors were applied.

1. Description of Plan

The following description of the SCA Tissue Hourly Pension Plan (the "Plan") is provided for general information purposes only. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

General

The Plan is a noncontributory defined benefit pension plan established September 1, 2001. The Plan was amended and restated effective January 1, 2010. The Plan covers hourly employees of SCA Tissue North America, LLC (the "Company") employed at the Company's Brattleboro, Vermont facility who are members of the Paper, Allied-Industrial, Chemical, Energy Workers International Union, Local 1594 and non-union hourly employees of the Company's LaGrange, Georgia facility. As described below, no new participants will be added to the Plan and benefit accruals were frozen for active participants. The Plan sponsor is SCA Americas, Inc. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA").

Effective December 31, 2002, the SCA Tissue Hourly Pension Plan for Collectively Bargained Employees at Alsip ("Alsip Plan") merged with and into the Plan. Net assets representing the funded portion of the actuarial present value of accumulated plan benefits for former participants of the Alsip Plan were transferred into the Plan on that date. Benefit accruals were frozen effective September 1, 2002, at the Alsip location.

Effective March 1, 2003, participants who were employed at the Company's LaGrange, Georgia or Brattleboro, Vermont facilities as of March 1, 2003 and whose employment status was directly and adversely affected by the closure of those facilities during 2003 became fully vested in their retirement benefits. As these locations were shutdown in 2003, there will be no future credited service accruals. Additionally, effective June 1, 2003, participants who were employed at the Company's Alsip, Illinois facility as of May 31, 2003 and whose employment status was directly and adversely affected by the reduction in workforce at that facility during 2003 became fully vested in their retirement benefits.

SCA Tissue ceased operations at its Alsip, Illinois manufacturing facility in December 2008, and as a result, certain employees who were participants of the Plan were separated from employment. SCA Americas, Inc. notified the Pension Benefit Guarantee Corporation ("PBGC") of this cessation of operations. The PBGC asserted that this cessation of operations was subject to the provisions of 4063 of ERISA under which it could attempt to impose a liability upon SCA Americas, Inc. The PBGC and SCA Americas, Inc. reached an understanding with respect to the cessation of operations and the settlement of the PBGC claims. More specifically, effective July 22, 2009, SCA Americas, Inc. and the PBGC entered into an agreement to make additional contributions of $86,500 for each of the calendar years 2009 through 2013. Each additional contribution must be made by January 10 of the calendar year to which it relates, except for the additional contribution for the calendar year January 1, 2009 which was made within 90 days of July 22, 2009.

Funding Policy

The Company's funding policy is to make contributions in such amounts as may be required to meet the minimum funding requirements of ERISA. Employer contributions are made based on actuarially determined amounts using the projected unit credit cost method. Minimum contribution requirements have been met for 2012 and 2011.

Vesting

Participants become 100% vested upon completion of five years of credited service, as defined. If a participant terminates before completing five years of service, the right to receive accumulated benefits is forfeited, unless the participant has reached age 65 or termination of employment is attributable to death or disability.

Retirement Benefits
Upon disability or at normal retirement (age 65), participants are entitled to monthly pension benefits based on a stipulated rate per year of credited service, as defined by the Plan. A participant may elect early retirement at the age of 55 with reduced monthly pension benefits between ages 55 and 62, as defined by the Plan. The Plan will pay a benefit to the surviving spouse of a participant who dies after completing five years of credited service, as defined by the Plan.

Benefit payments will be paid based upon a single life annuity if the participant is not married. A married retiree will automatically receive pension benefits in the form of a joint and survivor annuity. Elections may be made to receive the benefit in another form, as defined. If the present value of a participant's accrued benefit does not exceed $1,000, it will automatically be paid as a lump sum as soon as administratively feasible after separation from service.

Plan Termination
Although it has not expressed any intent to do so, the Company reserves the right to discontinue its contributions and terminate the Plan at any time under the provisions of ERISA. In the event the Plan terminates, participants become 100% vested in benefits earned as of the termination date regardless of length of service, to the extent such benefits are then funded, and the assets of the Plan shall be distributed in the manner and order set forth in the Plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation ("PBGC") if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivors' pensions. Whether all participants receive their benefits should the Plan terminate at some future point would depend on the sufficiency of the Plan's net assets at that time to provide those benefits and may also depend on the level of benefits guaranteed by the PBGC.

2. Summary of Significant Accounting Policies

Basis of Accounting
The financial statements have been prepared on the accrual basis of accounting.

Use of Estimates
The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Investment Valuation and Income Recognition
Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The benefits steering committee of the Plan sponsor determines the Plan's valuation policies utilizing information provided by trustees, custodians and investment advisors. See Note 4 for discussion of fair value measurements.

Purchases and sales of investments are recorded on a trade-date basis. Dividend income is recorded on the ex-dividend date. Net appreciation or depreciation in the fair value of investments consists of the realized gains or losses and the unrealized appreciation or depreciation of those investments.

Payment of Benefits
Benefit payments to participants are recorded upon distribution.

Administrative Expenses
In 2012 and 2011, certain investment and administrative expenses were paid out of the Plan, and include recordkeeping, trustee, and actuarial professional fees. Certain other administrative expenses of the Plan are paid directly by the Plan Sponsor and are excluded from these financial statements. Certain investment related expenses are included in net appreciation (depreciation) in fair value of investments presented in the statements of changes in net assets available for benefits.

Subsequent Events
The Plan has evaluated subsequent events through October 7, 2013, the date the financial statements were available to be issued.

Recently Issued Accounting Guidance
In May 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update No. 2011-04, *Fair Value Measurement (Topic 820), Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS.* The amendments change the wording used to describe many of the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements. Some of the amendments clarify the FASB's intent about the application of existing fair value measurement requirements. Other amendments change a particular principle requirement for measuring fair value or for disclosing information about fair value measurements. Some of the disclosures required by the amendments are not required for nonpublic entities. The adoption of the amendments did not have a significant effect on the Plan's net assets available for benefits or its changes in net assets available for benefits.

3. Financial Information Certified by Trustee (Unaudited)

The plan administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the following information included in the accompanying financial statements and supplemental schedules was certified by Vanguard Fiduciary Trust Company, the trustee, as complete and accurate:

- Registered investment companies (mutual funds) and cash as shown in the statements of net assets available for benefits at December 31, 2012 and 2011.
- Dividend income and net appreciation (depreciation) in the fair value of investments as shown in the statements of changes in net assets available for benefits for the years ended December 31, 2012 and 2011.
- The information for all registered investment companies (mutual funds) listed in the schedule of assets (held at end of year) at December 31, 2012, as shown in the supplemental schedule.
- The information for all reportable transactions listed in the schedule of reportable transactions during the year ended December 31, 2012, as shown in the supplemental schedule.

During 2012 and 2011, the Plan's investments (including gains and losses on investments bought and sold, as well as held during the year) appreciated (depreciated) in value as follows:

	2012	2011
Registered investment companies (mutual funds)	$ 154,932	$ (4,967)
Total	$ 154,932	$ (4,967)

The following presents investments that represent five percent or more of the Plan's net assets available for benefits at December 31, 2012 and 2011:

Registered investment companies (mutual funds):	2012	2011
Vanguard Total Stock Market Index Fund	$ 939,741	$ 803,747
Vanguard Total Bond Market Index Fund	532,336	502,358
Vanguard Developed Markets Index Fund	203,054	167,181
Vanguard Inflation Protection Securities Fund	343,212	306,071

4. Fair Value Measurements

FASB ASC 820, *Fair Value Measurement* provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described below:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in methodologies used at December 31, 2012 and 2011.

Registered investment companies (mutual funds)	Valued at quoted market prices, which represent the net asset value of shares held by the Plan at year-end.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's fair value measurements as of December 31, 2012:

	Level 1	Level 2	Level 3	Total
Registered investment companies (mutual funds):				
Fixed income funds	$ 875,548	$ 0	$ 0	$ 875,548
Domestic stock funds	939,741	0	0	939,741
International stock funds	203,054	0	0	203,054
Total investments at fair value	$2,018,343	$ 0	$ 0	$2,018,343

The following table sets forth by level, within the fair value hierarchy, the Plan's fair value measurements as of December 31, 2011:

	Level 1	Level 2	Level 3	Total
Registered investment companies (mutual funds):				
Fixed income funds	$ 808,429	$ 0	$ 0	$ 808,429
Domestic stock funds	803,747	0	0	803,747
International stock funds	167,181	0	0	167,181
Total investments at fair value	$1,779,357	$ 0	$ 0	$1,779,357

5. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' years of service on the date the benefit information is presented (the valuation date). Benefits payable under all circumstances (e.g. retirement, death, disability, and termination of employment) are included to the extent they are deemed attributable to employee service rendered prior to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Plan's consulting actuary and is that amount which results from applying actuarial assumptions to adjust the accumulated plan benefits earned by participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements, such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. As described in Note 1 and further detailed in the Plan document, no new participants will be added to the Plan and benefit accruals have been frozen since 2003 for the Brattleboro, Vermont and LaGrange, Georgia participants and since September 1, 2002, for the Alsip, Illinois participants. The present value of a participant's accrued benefit as of the valuation date assumes the participant will earn no more credited service and will receive no future salary.

The actuarial present value of accumulated plan benefits as of January 1, 2012 is as follows:

Vested benefits	
Participants currently receiving benefits	$ 739,565
Active and terminated vested participants	837,180
Total vested benefits	1,576,745
Nonvested benefits	0
Total actuarial present value of accumulated plan benefits	$ 1,576,745

The changes in the actuarial present value of accumulated plan benefits for the period ended January 1, 2012 are as follows:

Actuarial present value of accumulated plan benefits, beginning of period	$	1,548,555
Increase (decrease) during the year attributed to:		
Benefits paid		(91,501)
Decrease in the discount period		120,224
Actuarial (gains)/losses		(533)
Net increase		28,190
Actuarial present value of accumulated plan benefits, end of period	$	1,576,745

Significant actuarial assumptions used in the above valuations, are as follows:

Mortality	Prescribed mortality assumption under Section 430(h)(3)(A) of the Internal Revenue Code using static tables with separate mortality rates for annuitants and non-annuitants
Discount Rate	8% as of January 1, 2012
Withdrawal before retirement	Decreasing rates between ages 20 and 55
Retirement Age	Age 65

The foregoing assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

6. Tax Status

The Internal Revenue Service ("IRS") has determined and informed the Company by a letter dated July 13, 2011 that the Plan is designed in accordance with the applicable sections of the Internal Revenue Code ("IRC"). The plan administrator believes that the Plan is being operated in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2012, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2009.

7. Risk and Uncertainties

The Plan's investments are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investments and the level of uncertainty related to changes in the values of investments, it is at least reasonably possible that changes in risks in the near term would materially affect the amounts reported in the statements of net assets available for benefits and the statements of changes in net assets available for benefits.

The actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates and employee demographics. Due to the changing nature of these assumptions, it is at least

reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the value of accumulated plan benefits.

8. Related-Party and Party in Interest Transactions

Transactions involving shares of registered investment companies managed by affiliates of Vanguard Fiduciary Trust Company, the trustee, are considered party-in-interest transactions. These transactions are not, however, considered prohibited transactions under 29 CFR 408(b) of the ERISA regulations.
