Independent Auditor's Report

To the Participants and Administrator of Xerox Corporation Retirement Income Guarantee Plan

We have audited the accompanying financial statements of Xerox Corporation Retirement Income Guarantee Plan (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2012 and December 31, 2011, and the related statement of changes in net assets available for benefits for the years then, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2012 and changes therein for the year then ended and its financial status as of December 31, 2011, and changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Xerox Corporation Retirement Income Guarantee Plan

Notes to Financial Statements

December 31, 2012 and 2011

1. Plan Description

The following description of the Xerox Corporation Retirement Income Guarantee Plan (the "Plan") provides only general information. Participants should refer to the plan document for a more complete description of the Plan's provisions. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA").

General

The Plan is a noncontributory defined benefit pension plan that provides benefits and covers substantially all full and part-time U.S. employees of Xerox Corporation (the "Company") and participating subsidiaries who were hired before January 1, 2005, except those covered by a collective bargaining agreement unless that agreement calls for participation in the Plan.

As discussed in Notes 2 and 7, plan assets are held under The Xerox Trust Agreement to Fund Retirement Plans ("Master Trust").

Plan Benefits

The Plan provides participants who commenced employment with the Company prior to January 1, 2003 with the greater of the following benefits:

- (i) 1.4% Retirement Income Guarantee Plan ("RIGP") Formula - This is a monthly benefit determined by multiplying .117% (1.4% annual benefit divided by twelve) times the average pay for the five highest calendar years of compensation, multiplied by the number of full and fractional years of participation, up to thirty years, less: (i) the vested accrued monthly benefit which would be payable as a Life Annuity from Company contributions under Equitable Group Annuity Contract No. AC-158 assuming commencement of such benefit at the same time as the commencement of benefits under the Plan; (ii) the vested accrued monthly benefit which would be payable as a Life Annuity under any TIAA-CREF Policy to which the Company or any of its predecessors made contributions assuming commencement of such benefit at the same time as the commencement of benefits under the Plan; (iii) the vested accrued monthly benefit which would be payable as a Life Annuity under the Retirement Income Guarantee Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards plan assuming commencement of such benefit at the same time as the commencement of benefits under the Plan to the extent that assets have not been transferred from the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards plan to the Plan; and (iv) the vested accrued monthly benefit which would be payable as a Life Annuity from the respective central pension funds maintained by the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, the International Printing and Graphics Communications Union, the Columbus Typographical Union and the Graphic Arts International Union and 50% of the vested accrued monthly benefit which would be payable as a Life Annuity from the central pension funds maintained by the International Union of Operating Engineering.
- (ii) 1.0% RIGP Formula – This is a monthly benefit determined by multiplying .083% (1.0% annual benefit divided by twelve) times the average pay for the five highest calendar years of compensation, multiplied by the member's full and fractional years of participation, less: (i) the vested accrued monthly benefit which would be payable as a Life Annuity from Company contributions under Equitable Group Annuity Contract No. AC-158 assuming commencement of such benefit at the same time as the commencement of benefits under the Plan; (ii) the vested accrued monthly benefit which would be payable as a Life Annuity under any TIAA-CREF Policy to which the Company or any of its predecessors made contributions assuming

commencement of such benefit at the same time as the commencement of benefits under the Plan; (iii) the vested accrued monthly benefit which would be payable as a Life Annuity under the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards plan assuming commencement of such benefit at the same time as the commencement of benefits under the Plan to the extent that assets have not been transferred from the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards plan to the Plan; and (iv) the vested accrued monthly benefit which would be payable as a Life Annuity from the respective central pension funds maintained by the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, the International Printing and Graphics Communications Union, the Columbus Typographical Union and the Graphic Arts International Union and 50% of the vested accrued monthly benefit which would be payable as a Life Annuity from the central pension funds maintained by the International Union of Operating Engineering.

- (iii) Transitional Retirement Account ("TRA") - Effective January 1, 1990, the active employees' retirement accounts under the Xerox Corporation Profit Sharing Retirement and Savings Plan, renamed in 2001 to the Xerox Corporation Savings Plan, were transferred to the Plan and renamed TRAs. The TRA balances change based upon subsequent investment results of the funds in which they are invested. As further described in Note 4, the TRAs are fully funded by assets that have been specifically allocated for this purpose ("TRA assets").
- (iv) Cash Balance Retirement Account ("CBRA") - Effective January 1, 1990, CBRA accounts were established and credited with a notational amount equal to the employee's retirement account balance under the Xerox Corporation Profit Sharing Retirement and Savings Plan, renamed in 2001 to the Xerox Corporation Savings Plan. The notational value of the CBRA account grows in two ways. First, the account is credited annually with an amount equal to 4% of a participant's pay, as defined in the Plan. Second, the account is credited daily with interest earned at a fixed annual rate. This annual crediting rate, which is determined before the beginning of the year and varies from year to year, is based upon the average effective yield of the one-year Constant Maturity Treasury as of the first business day of each of the 12 months of the preceding year (as published by the Federal Reserve Board), plus 1%. The CBRAs are not funded by assets specifically designated for this benefit.

Participants who commenced employment with the Company between January 1, 2003 and December 31, 2004 are eligible for the CBRA benefit only. Individuals who commenced employment with the Company on or after January 1, 2005 are not eligible to participate in the Plan. Employees who are rehired by the Company who begin employment on or after January 1, 2007 are not eligible to participate. Participants with fewer than forty two years of service as of January 1, 2009, with respect to benefits accrued after November 30, 2009, will not accrue any further benefits under (ii) above.

The RIGP Unallocated portion of the Plan is comprised of assets in excess of those specifically allocated to fund the TRA accounts. This portion of the Plan funds the benefits described in parts (i), (ii) and (iv) of Plan Benefits.

Notes to Financial Statements

December 31, 2012 and 2011

Plan Termination

Although it has not expressed any intention to do so, the Company expressly reserves the right under the Plan to terminate the Plan at any time. In the event the Plan terminates, the TRA assets are reserved to fully fund the TRAs. The remaining net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- (i) Vested benefits insured by the Pension Benefit Guaranty Corporation ("PBGC") up to the applicable limitations (discussed below).
- (ii) Vested benefits not insured by the PBGC.
- (iii) All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are insured by the PBGC at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the PBGC.

Vesting

Prior to January 1, 2008 participants in the Plan became 100% vested in their calculated retirement benefits upon completing five years of service or attaining age 65. Participants in the Plan are fully vested in their RIGP benefits if they are in Xerox employment on or after January 1, 2008.

Administration

The Plan Administrator is a committee (instead of a named individual) whose members are appointed by the Vice President of Human Resources. The trustee of the Plan is State Street Bank and Trust Company (the "Trustee"). Aon Hewitt was the recordkeeper of the Plan through December 31, 2012.

Benefit Payments and Annuity Purchases

Annuity purchases represent benefits to be provided via contracts under which an insurance company is obligated to pay the benefits. As such, upon purchase of such contracts, both the assets and the related obligations are removed from the Plan. Benefit payments and annuity purchases include payments relating to the TRA and the RIGP Unallocated portion of the Plan. The CBRA benefits are paid from the RIGP Unallocated portion of the Plan. See Note 4 for further information on TRA payments.

Administrative Expenses

Certain administrative expenses, such as trustee, custodian, recordkeeping and investment manager fees, are paid by the Master Trust and are netted against Master Trust investment income (loss). Certain other administrative expenses are paid by the Company. Expenses paid directly by the Plan include actuarial, legal fees, audit fees, and PBGC premiums.

2. Summary of Accounting Principles and Practices

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Benefit Payments

Benefit payments are recorded when paid.

Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, accumulated benefits and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from these estimates.

Basis of Presentation

The assets of the Plan are held in the Xerox Corporation Trust Agreement to Fund Retirement Plans (the "Master Trust"). The value of the Plan's interest in the Master Trust is based on the beginning of year value of the Plan's interest in the Master Trust, plus contributions and allocated investment income (loss), less distributions and allocated administrative expenses. For financial reporting purposes, income or loss on plan assets and any realized or unrealized gains or losses on such assets and expenses in the Master Trust are allocated to the Plan based on the Plan's balances.

The Master Trust holds assets for other Company-sponsored plans, some of which may be defined benefit plans and some defined contribution plans. Because the Plan's interest in the Master Trust is not based on participant investment options, such as those offered by the defined contribution plans, there are certain Master Trust investments in which the Plan does not invest.

Valuation of Investments and Income Recognition

The Plan's investment in the Master Trust is recorded at an amount equal to the Plan's interest in the underlying investments of the Master Trust. Investments of the Master Trust are stated at fair value. Shares of registered investment company funds are valued at the net asset value as reported by the fund managers at year-end. Common and preferred stock are stated at fair value based on published market closing prices. Fixed income investments are valued on the basis of valuations furnished by Company-approved independent pricing services. These services determine valuations for normal institutional-size trading units of such securities using valuation models or matrix pricing, which incorporates yield and/or price with respect to bonds that are considered comparable in characteristics such as rating, interest rate and maturity date and quotations from security dealers to determine current value. If these valuations are deemed to be either not reliable or not readily available, the fair value will be determined in good faith by the Company. The fair value of the common collective trusts are valued at the net asset value on the last business day of the year. Limited partnerships including real estate trusts, are valued at estimated fair value based on fair value as reported in their audited financial statements, as well as information received from the investment advisor. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Risks and Uncertainties

Investments are exposed to various risks, such as interest rate and market risk. Due to the risk associated with certain investments and the level of uncertainty related to changes in the value of investments, it is at least reasonably possible that the changes in values of investments in the near term could materially affect the amount reported in the statements of assets available for benefits and the statement of changes in assets available for benefits.

The Plan invests a portion of its assets in securities with contractual cash flows, such as asset backed securities, collateralized mortgage obligations and commercial mortgage backed securities. The value, liquidity, and related income of these securities are sensitive to changes in economic conditions, including real estate value, delinquencies and/or defaults and may be adversely affected by shifts in the market's perception of the issuers, including the issuers' creditworthiness. Early repayment of principal on some mortgage – related securities may expose the plan to a lower rate of return upon reinvestment of the principal.

The Plan also invests in foreign securities. Investing in foreign securities may include certain risks and considerations not typically associated with investing in U.S. securities, such as fluctuating currency values and changing local and regional economic, political and social conditions, which may result in greater market volatility. In addition, certain foreign securities may not be as liquid as U.S. securities.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

Recent Accounting Pronouncements

In May 2011, the FASB issued ASU 2011-04 *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS*. ASU 2011-04 is intended to improve comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with U.S. GAAP and IFRS. The amendments are of two types: (i) those that clarify the Board's intent about the application of existing fair value measurement and disclosure requirements and (ii) those that change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements. This update changed certain fair value measurements. We adopted this update prospectively effective for our fiscal beginning January 1, 2012. This update did not have a material effect on Plan's financial statements.

In December 2011, the FASB issued ASU 2011-11 *Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities* that requires additional information regarding financial instruments and derivatives instruments that are offset or subject to an enforceable master netting arrangement or similar agreement. The amendment is effective for the Plan on January 1, 2013. Plan management does not anticipate that the adoption of the amendment will have a material effect on the Plan's financial statements.

3. Actuarial Present Value of Accumulated Plan Benefits in Excess of Employees' TRAs

Accumulated plan benefits are estimated future benefit payments attributable to service rendered to date in excess of an employee's TRA assets. Such accumulated benefits arise when an

Xerox Corporation Retirement Income Guarantee Plan

Notes to Financial Statements

December 31, 2012 and 2011

employee's RIGP formula or CBRA benefit exceeds the employee's TRA. Accumulated plan benefits include benefits expected to be paid to:

- (i) Retired or terminated employees or their beneficiaries,
- (ii) Beneficiaries of employees who have died, and
- (iii) Current employees upon termination or retirement, or their beneficiaries upon the employee's death. With respect to the RIGP formula benefit, which is based on the highest average pay, the accumulated plan benefits for active employees is based upon the highest five-year average pay prior to the date the benefit information is presented as of December 31, 2011.

Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent that they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits in excess of employees' TRAs is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of death, disability or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuation as of December 31, 2010 and 2011 were:

- (i) **Mortality Rates:** As of December 31, 2010, for recurring benefit payments and pre-retirement discounting is the RP-2000 CH table projected to 2013 with Scale AA. Lump sums are determined according to current applicable table projected with 5 years of improvement under scale AA. As of December 31, 2011, for recurring benefit payments and pre-retirement discounting is the RP-2000 CH generational table projected with Scale AA. Lump sums are determined according to current applicable table projected with past improvements for years after 2013 under scale AA.
- (ii) **Retirement Age:** The average retirement age is based on rates from age 55 to 70 (150% of the rates for those with more than 30 years of service below age 64). For December 31, 2010 and 2011 the average was 62.9.
- (iii) **Interest Rate:** As of December 31, 2010, 8.0% (net of assumed administrative expenses of 0.25%), as of December 31, 2011, 7.5% (net of assumed administrative expenses of 0.25%).
- (iv) **Lump Sum Interest Rate:** As of December 31, 2010 and 2011, 6.0%.
- (v) **Cash Balance Interest Crediting Rate:** As of December 31, 2010, 5.5%, as of December 31, 2011, 4.25%.
- (vi) **Assumed Percentage Married:** As of December 31, 2010 and 2011, 70% of employees are assumed to be married. Females are assumed to be 3 years younger than their spouses.
- (vii) **Assumed Percentage Electing Lump Sums:** As of December 31, 2010 and 2011, 100%.

5. Funding

The Plan is in compliance with the minimum funding standards of ERISA. Under the provisions of the Pension Protection Act of 2006, the minimum funding requirements have been increased. Plan sponsors will be required to make larger contributions in the future if plan obligations are less than 100% funded. There was no contribution to the Plan for the year ended December 31, 2012. For the year ended December 31, 2011 \$257,872,000 was contributed in cash and \$130,000,000 was contributed in Xerox Common Stock.

6. Tax Status

As stated in Note 14, "Subsequent Events, the Plan obtained its latest determination letter from the Internal Revenue Service ("IRS") on April 29, 2013, covering plan amendments through May 16, 2002, indicating that the Plan, as designed, was in compliance with the applicable requirements of the Internal Revenue Code (the "IRC"). The Plan has been amended since receiving the determination letter. However, the plan administrator believes that the Plan, as currently designed and operated, is in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2012, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the

Xerox Corporation Retirement Income Guarantee Plan

Notes to Financial Statements

financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2009.

7. Master Trust

As discussed in Note 2, the Plan participates in the Master Trust. The Trustee holds the Master Trust's investment assets, provides administrative functions for each of the Plans participating in the Master Trust, and executes investment transactions as directed by participants.

The following Xerox employee benefit plans represent the following percentages in the net assets of the Master Trust as of December 31:

Investment Strategy Fiduciary

The named fiduciary with respect to the overall investment strategy for the Master Trust investments, along with all other day to day fiduciary investment responsibilities, is the Xerox Retirement Investment Committee ("XRIC"). The Xerox Corporate Treasurer chairs the XRIC, which is composed of corporate members who oversee the management of the funds on a regular basis.

8. Fair Value Measurement

ASC 820 defines fair value, establishes a market-based framework hierarchy for measuring fair value, and expands disclosures about fair value measurements in the footnotes to the financial statements. ASC 820 is applicable whenever another accounting pronouncement requires or permits assets and liabilities to be measured at fair value.

In accordance with ASC 820, fair value is defined as the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date in the principal or most advantageous market of the asset.

ASC 820 established a three-tier hierarchy based on transparency of inputs to the valuation of an asset or liability:

- Level 1: Unadjusted quoted prices in active markets for identical, unrestricted assets or liabilities.
- Level 2: Prices determined using other significant observable inputs. Observable inputs are inputs that other market participants would use in valuing a portfolio instrument. These may include quoted prices for similar securities, interest rates, foreign exchange rates, prepayment speeds, credit risk and others.
- Level 3: Prices determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable (for example, when there is little or no market activity for an investment at the end of the period), unobservable inputs may be used. Unobservable inputs reflect the Plan Administrator's own assumptions about the factors market participants would use in valuing a portfolio instrument, and would be based on the best information available.

Xerox Corporation Retirement Income Guarantee Plan

Notes to Financial Statements

December 31, 2012 and 2011

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

Our primary Level 3 assets are Real Estate and Private Equity/Venture Capital investments. The fair value of our real estate investment funds are based on the Net Asset Value ("NAV") of our ownership interest in the funds. NAV information is received from the investment advisers and is primarily derived from third-party real estate appraisals for the properties owned. The fair value for our private equity/venture capital partnership investments are based on our share of the estimated fair values for the underlying investments held by these partnerships as reported in their audited financial statements. The valuation techniques and inputs for our Level 3 assets have been consistently applied for all periods presented. The investment advisers are selected by the Xerox Retirement Investment Committee ("XRIC"), (see page 10). The authority for monitoring the valuation process of all investments is delegated by the XRIC to the Chief Investment Officer to whom the Xerox Trust Investment group reports. The Trust Investment group meets with investment advisers and performs quarterly reviews of the funds' fair value measurements with investment advisers comparing those valuations to similar funds' valuations outside of the Master Trust. Any changes in the fair value measurements are followed up and brought to the XRIC's attention at their quarterly meetings.

Level 3 Investment Assets

The Level 3 investment assets represent approximately five percent of the total Master Trust investments and are comprised of the partnerships, real estate funds and investments in restricted stock. The table below sets forth a summary of changes in the fair value of the Master Trust's Level 3 investment assets for the year ended December 31, 2012. The classification of an investment within Level 3 is based upon the significance of the unobservable inputs to the overall fair value measurement.

¹ These categories represent investments in Common Collective Trusts investing in domestic equity, international equity and fixed income securities. All the Common Collective Trust funds have daily liquidity and are not subject to any redemption restrictions at the measurement date. The funds have different trading terms varying from one to three days.

² This category includes two partnership funds that invest in international equity. The funds allow for monthly redemptions and contributions on the first of each month. The fund manager must be notified by the 15th of the preceding month for redemptions and contributions.

³ This category includes 14 partnership funds that invest in private equity both domestically and internationally. These investments can never be redeemed during the life of the funds. Instead, distributions are received through the liquidation of the underlying assets of the funds. It is estimated that

Xerox Corporation Retirement Income Guarantee Plan

Notes to Financial Statements

the underlying assets will be liquidated over the next 1 to 6 years. Unfunded commitments of \$42.5M remain on seven of the funds.

⁴ This category includes 15 investments in domestic and international real estate funds. The fair value of these investments is estimated using the Net Assets Value (NAV) of the Trust's ownership interest in partners' capital. The valuation inputs of these investments are derived from third party appraisals. These investments can never be redeemed during the life of the funds. Distributions from each fund will be received as the underlying investments if the funds are liquidated over the next 1 to 7 years. Unfunded commitments of \$4.9M remain in eleven of the funds.

9. Derivative Policy

The Master Trust may enter into contractual arrangements (derivatives) in carrying out its investment strategy, and is limited to the use of derivatives allowed by the Investment Policy Statement, principally to: (1) hedge a portion of the Master Trust's portfolio to limit or minimize exposure to certain risks, (2) gain an exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (3) reduce the cost of structuring the portfolio or capture value disparities between financial instruments. The Master Trust may utilize both exchange traded investment instruments such as equity and fixed income futures and options on fixed income futures, forward currency contracts, interest rate swaps, credit default swaps, swaptions and options. When engaging in forward currency contracts, there is exposure to credit loss in the event of non-performance by the counterparties to these transactions. The Master Trust manages this exposure through credit approvals and limited monitoring procedures. Procedures are in place to regularly monitor and report market and counterparty credit risks associated with these instruments. During the year ended December 31, 2012, derivatives were used only in the defined benefit plans, during the year ended December 31, 2011, derivatives were used in both the defined benefit and defined contribution plans of the Master Trust.

The following is a summary of the significant accounting policies associated with the Master Trust's use of derivatives.

Forward Foreign Currency Exchange Contracts

Forward currency contracts are generally utilized to hedge a portion of the currency exposure that results from the Master Trust's holdings of equity and fixed income securities denominated in foreign currencies.

Forward currency contracts are generally marked-to-market at the prevailing forward exchange rate of the underlying currencies and the difference between contract value and market value is recorded as unrealized appreciation (depreciation) in Master Trust net assets. When the forward currency contract is closed, the Master Trust transfers the unrealized appreciation (depreciation) to a realized gain (loss) equal to the change in the value of the forward exchange contract when it was opened and the value at the time it was closed or offset. Sales and purchases of forward currency contracts having the same settlement date and broker are offset and any gain (loss) is realized on the date of offset.

Certain risks may arise upon entering into a forward currency contract from the potential inability of counterparties to meet the terms of their contracts. Additionally, when utilizing forward currency contracts to hedge, the Master Trust gives up the opportunity to profit from favorable exchange rate movements during the term of the contract. As of December 31, 2012 and 2011, the value of currencies under forward currency contracts represents less than 1% of total investments.

A summary of open forward currency contracts of the Master Trust at December 31, 2012 and 2011 is

Future Contracts

The Master Trust used equity index and fixed income futures contracts to manage exposure to the market. Buying futures tends to increase the Master Trust's exposure to the underlying instrument. Selling futures tends to decrease the Master Trust's exposure to the underlying instrument held or hedge the fair value of other fund investments. The Master Trust does not employ leverage in its use of derivatives. Futures contracts are valued at the last settlement price at the end of each day on the exchange upon which they are traded. Upon entering into a futures contract, the Master Trust is required to deposit either in cash or securities an amount ("initial margin") equal to a certain percentage of the nominal value of the contract. Pursuant to the futures contract, the Master Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin" which are generally settled daily and are included in the unrealized gains (losses) on futures contracts. The Master Trust will record a variation margin receivable or payable in the Master Trust net assets for variation margins which have not yet been paid at the end of the year.

Futures contracts involve, to varying degrees, credit and market risks. The Master Trust enters into futures contracts on exchanges where the exchange acts as the counterparty to the transaction. Thus, credit risk on such transactions is limited to the failure of the exchange. The daily settlement on the futures contracts serves to greatly reduce credit risk. Losses in value may arise from changes in the value of the underlying instruments or if there is an illiquid secondary market for the contracts. In addition, there is the risk that there may not be an exact correlation between a futures contract and the underlying index or security. As of December 31, 2012 and 2011, the unrealized gain/loss of future contracts represents less than 1% of total investments.

Interest Rate and Credit Default Swaps and Swaptions

The Master Trust may invest in interest rate swap contracts. The Master Trust uses interest rate swap contracts to manage its exposure to interest rates. Interest rate swap contracts typically represent the exchange between the Master Trust and a counterparty of respective commitments to make variable rate and fixed rate payments with respect to a notional amount of principal. Such contracts have a term coincident with the maturity date of the Master Trust, with settlement scheduled for the termination date of the contract.

During the period that the swap contract is open, the contract is marked-to-market as the net amount due to or from the Master Trust in accordance with the terms of the contract based on the closing level of the relevant index or security and interest accrual through valuation date. Swaps are marked to market daily based upon values from third party vendors or quotations from market makers to the extent available and the change in value, if any, is recorded as an unrealized gain or loss on the Statement of Net Assets Available for Benefits. Periodic cash settlements on interest rate swaps are recorded as realized gains or losses. Interest rate swap contracts may include extended effective dates.

Entering into a swap contract involves, to varying degrees, elements of credit, market and/or interest rate risk in excess of the amounts reported in the Statement of Assets and Liabilities. Notional principal amounts are used to express the extent of involvement in the transactions, but are not delivered under the contracts. Accordingly, credit risk is limited to any amounts receivable from the counterparty. To reduce credit risk from potential counterparty default, the Master Trust enters into swap contracts with counterparties whose creditworthiness has been approved by the Company. The Master Trust bears the market risk arising from any change in index or security values or interest rates. Under certain circumstances, the Master Trust may be required to pledge collateral to or may receive collateral from swap counterparties.

The Master Trust's International Swap and Derivatives Association Master Agreements (ISDA Agreements), which are separately negotiated with each counterparty, may contain provisions allowing, absent other considerations, a counterparty to exercise rights, to the extent not otherwise waived, against the Master Trust in the event the Master Trust's net assets decline over a period of time by a predetermined percentage or decrease below a predetermined floor amount. The ISDA Agreements also contain certain provisions, absent

Xerox Corporation Retirement Income Guarantee Plan

Notes to Financial Statements

December 31, 2012 and 2011

other conditions, for the Master Trust to exercise rights, to the extent not otherwise waived, against counterparties, such as a decline in a counterparty's credit rating below a specified level. Such rights for both the counterparty and the Master Trust often include the ability to terminate (i.e., close out) open contracts at prices which may favor the counterparty, which could have an adverse affect to the Master Trust. The ISDA Agreements with certain counterparties allow the Master Trust and counterparty to offset certain derivative instruments' receivables or payables with collateral posted to a segregated custody account.

The following credit default swap contracts were open at December 31, 2012:

Counterparty	Fixed rate	Reference Obligation	Maturity date	Buy / Sell	Notional amount (\$ thousands)	Premiums paid (received) (\$ thousands)	Value (\$ thousands)	Unrealized gain/(loss) (\$ thousands)
Morgan Stanley	5%	Block Financial LLC	12/20/2016	Buy	1,100	7	(124)	(131)

Credit default swap contracts are agreements in which one party pays fixed periodic payments to a counterparty in consideration for a guarantee from the counterparty to make a specific payment should a specified negative credit event(s) take place. The Master Trust entered into credit default swap contracts to hedge the Master Trust's exposure on a debt security that it owns or in lieu of selling such debt security.

As the purchaser of a credit default swap contract, the Master Trust purchases protection by paying a periodic interest rate on the notional amount to the counterparty. The interest amount is accrued daily as a component of unrealized appreciation (depreciation) and is recorded as a realized loss upon payment. If a credit event as specified in the contract occurs, the Master Trust may have the option either to deliver the reference obligation to the seller in exchange for a cash payment of its par amount, or to receive a net cash settlement equal to the par amount less an agreed-upon value of the reference obligation as of the

date of the credit event. The difference between the value of the obligation or cash delivered and the notional amount received will be recorded as a realized gain (loss).

As the seller of a credit default swap contract, the Master Trust sells protection to a buyer and will generally receive a periodic interest rate on the notional amount. The interest amount is accrued daily as a component of unrealized appreciation (depreciation) and is recorded as a realized gain upon receipt of the payment. If a credit event as specified in the contract occurs, the Master Trust may either be required to accept the reference obligation from the buyer in exchange for a cash payment of its notional amount, or to pay the buyer a net cash settlement equal to the notional amount less an agreed-upon value of the reference obligation as of the date of the credit event. The difference between the value of the obligation or cash received and the notional amount paid will be recorded as a realized gain (loss). The maximum potential amount of undiscounted future payments the Master Trust could be required to make as the seller of protection under a credit default swap contract is equal to the notional amount of the reference obligation.

As a protection seller, the Master Trust bears the risk of loss from the credit events specified in the contract. Although specified events are contract specific, credit events are generally defined as bankruptcy, failure to pay, restructuring, obligation acceleration, obligation default, or repudiation/moratorium. For credit default swap contracts on credit indices, quoted market prices and resulting market values serve as an indicator of the current status of the payment/performance risk. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the reference entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the contract. Credit default swap contracts are valued daily, and the change in value is recorded as unrealized appreciation (depreciation) until the termination of the swap, at which time a realized gain (loss) is recorded.

Credit default swap contracts can involve greater risks than if a plan had invested in the reference obligation directly since, in addition to general market risks, credit default swaps are subject to counterparty credit risk, leverage risk, hedging risk, correlation risk and liquidity risk. The Master Trust will enter into credit default swap transactions only with counterparties that meet certain standards of creditworthiness.

At December 31, 2012, the Master Trust had pledged cash collateral of \$400,000 and Government Securities of \$484,149 to swap counterparties.

The Master Trust may write or purchase interest rate swaption agreements which are options to enter into a pre-defined swap agreement by some specified date in the future. The writer of the swaption becomes a counterparty to the swap if the buyer exercises. The interest rate swaption agreement will specify whether the buyer of the swaption will be a fixed rate receiver or a fixed rate payer upon exercise. Options on swap contracts are considered over-the-counter financial derivative instruments that derive

their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. These contracts are normally valued on the basis of broker dealer quotations or by pricing service providers.

In 2012, total premiums received was \$1,067,495.

At December 31, 2012, the Master Trust was in receipt of cash collateral of \$19,775,000 from the broker for swaptions.

Options Contracts

The Master Trust may purchase and sell put and call options on securities. The Master Trust uses options to manage against changes in the market value of the Master Trust's investments, mitigate exposure to fluctuations in currency values, or interest rates, or protect the Master Trust's unrealized gains. In addition, the Master Trust may use options to facilitate investment transactions by protecting the Master Trust against a change in the market price of the investment, enhance potential gains, or as a substitute for the purchase or sale of securities or currency.

Exchange-traded options are valued using the National Best Bid and Offer ("NBBO") close price. If the NBBO close price is not available, the NBBO bid (for long positions) or NBBO Ask (for short positions) will be used to value the option contract. Options traded over-the-counter are valued using a broker quotation or an internal valuation using an options pricing model such as Black-Scholes.

When the Master Trust writes an option, the premium received is recorded as a liability and is subsequently adjusted to the current fair value of the option written. Premiums received from writing options that expire unexercised are treated by the Master Trust on the expiration date as realized gains from written options. The difference between the premium and the amount paid for a closing purchase, including brokerage commissions, is also recorded as a realized gain / (loss). When an instrument is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of an instrument acquired or deducted from (or added to) the proceeds of the instrument sold.

Writing puts and buying calls may increase the Master Trust's exposure to changes in the value of the underlying instrument. Buying puts and writing calls may decrease the Master Trust's exposure to such changes. Losses may arise when buying and selling options if there is an illiquid secondary market for the options, which may cause a party to receive less than would be received in a liquid market, or if the counterparties do not perform under the term of the options.

10. Securities Lending

The Master Trust is not restricted from lending securities to other qualified financial institutions, provided such loans are callable at any time and are at all times fully collateralized by cash (including both U.S. and foreign currency), cash equivalents or securities issued or guaranteed by the U.S. government or its agencies and the sovereign debt of foreign countries. The portfolios may bear the risk of delay in recovery of, or even of rights in, the securities loaned should the borrower of the securities fail financially.

Xerox Corporation Retirement Income Guarantee Plan

Notes to Financial Statements

December 31, 2012 and 2011

Consequently, loans of portfolio securities will only be made to firms deemed by the sub advisors to be creditworthy. The portfolios receive compensation for lending their securities either in the form of fees or by retaining a portion of interest on the investment of any cash received as collateral. Cash collateral, if any, is invested in the State Street Quality A Short Term Investment Fund. There were no securities loaned by Master Trust at December 31, 2012 and 2011.

11. Related Party Transactions

The Plan pays administrative expenses related to salaries of Xerox employees responsible for plan administration. The Plan also allows rollovers to an affiliated plan, the Xerox Corporation Savings Plan and these transactions qualify as party-in-interest transactions. Certain funds are managed by an affiliate of the Trustee and therefore, qualify as party-in-interest transactions. The Plan has \$169,000 payable to the Retirement Income Guarantee Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards due to the erroneous allocation of a benefit payment in 2012.

In 2011, as part of the minimum funding requirement, the plan sponsors contributed Xerox Common Stock to the Plan. The Plan along with the Retirement Income Guarantee Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards invest in a unitized stock fund, The Xerox Stock Fund (the "Fund"), which is primarily comprised of Xerox Corporation common shares. The unit values of the Fund are recorded and maintained by the Trustee. During the year ended December 31, 2012, the Plans received common shares in the Fund in the approximate amount of \$130,000,000, sold common shares in the Fund in the approximate amount of \$56,320,000, and had net depreciation in the Fund of approximately \$23,629,000. The total value of the Plans' investment in the Fund was approximately 97,979,000 and \$47,928,000 at December 31, 2012 and 2011, respectively. During 2012 dividends paid on Xerox Corporation common shares amounted to \$2,527,000. These transactions qualify as party-in-interest transactions.

12. Commitments and Contingencies

In the normal course of business, the Plan enters into agreements that contain a variety of representations and warranties which provide general indemnifications. The Plan's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Plan that have not yet occurred. However, based on experience, the Plan expects the risk of loss to be remote.

The Master Trust is committed to invest \$858,190,602 in certain private equity and real estate funds, of which \$810,766,930 has been contributed as of December 31, 2012.

13. Litigation

Frommert et al. v. RIGP et al.

This is an ERISA litigation matter involving our treatment of prior lump-sum distributions from RIGP for employees that had left the Company and then were subsequently re-hired. The matter focuses on the offset done by RIGP from the employees' second distribution to account for the amount previously distributed to them. The 2nd Circuit Court of Appeals ruled against RIGP both with respect to liability and the appropriate calculation of benefits. RIGP filed a petition for certiorari with the United States Supreme Court with respect to the calculation of benefits issue and simultaneously moved the District Court (the court that this matter was originally filed in) for a stay of the payment of additional benefits pending the Supreme Court's decision on the petition for certiorari. In 2009, the District Court denied the motion to

Xerox Corporation Retirement Income Guarantee Plan

Notes to Financial Statements

stay and approved a payment schedule regarding the additional benefits due the plaintiffs. The U.S. Supreme Court eventually granted RIGP's petition for certiorari and the District Court then stayed additional payments. Prior to the stay, approximately \$4.6 million was paid out in 2009.

On April 21, 2010, the United States Supreme Court ruled in RIGP's favor and reversed the ruling of the 2nd Circuit. Specifically, it held that the lower court erred in not giving the proper deference to the Plan Administrator's interpretation of RIGP. It remanded the matter for further proceedings consistent with its opinion. On November 17, 2011, on remand the District Court ruled in RIGP's favor and adopted the Plan Administrator's proposed damages calculation. It entered final judgment with respect to the foregoing ruling on December 14, 2011 and the plaintiffs filed a notice of appeal of the judgment with the 2nd Circuit on January 3, 2012. Pursuant to the District Court's ruling with respect to damages, RIGP paid out an additional \$2.4 million in 2012 and \$0.2 million in 2013. The 2nd Circuit must now decide whether to uphold the District Court's ruling which adopted the Plan Administrator's calculation.

14. Subsequent Events

Effective January 1, 2013 to the Plan's record keeper changed from Aon Hewitt to Xerox Services.

Effective January 1, 2013 the RIGP formula benefit as described in subsection (i) and (ii) and CBRA pay credits described in subsection (iv) under Plan Benefits in Note1 were frozen.

The Plan received a favorable IRS determination letter dated April 29, 2013.

Effective July 2013, RIGP annuity benefits are paid directly by the Plan, instead of being provided via contracts from an insurance company.

The Plan has evaluated subsequent events through September 27, 2013, the date the financial statements were available to be issued. All subsequent events requiring recognition have been incorporated into these financial statements.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, line 22—Description of Weighted Average Retirement Age

The average retirement age shown in line 22 has been calculated by assuming the following retirement rates and no decrements other than retirement for this calculation. All retirements are assumed to occur at beginning of year.

(a) Age	(b) Rate	(c) Weight	(d) Product (a) × (b) × (c)
55	5.00%	1.0000	2.75
56	2.00%	0.9500	1.06
57	2.00%	0.9310	1.06
58	2.00%	0.9124	1.06
59	2.00%	0.8941	1.06
60	5.00%	0.8762	2.63
61	7.50%	0.8324	3.81
62	30.00%	0.7700	14.32
63	15.00%	0.5390	5.09
64	10.00%	0.4582	2.93
65	65.00%	0.4123	17.42
66	25.00%	0.1443	2.38
67	30.00%	0.1082	2.18
68	35.00%	0.0758	1.80
69	50.00%	0.0492	1.70
70	100.00%	0.0246	1.72
Weighted Average			62.97

As shown in line 22 of the Schedule SB, the weighted average retirement age is 63. The retirement rates for employees with 30 years of service are 150% of the retirement rates for employees with fewer than 30 years of service. The average age upon which employees would have 30 years of service is between ages 60 and 61. Therefore, we have included the retirement rates for employees with fewer than 30 years of service at ages 60 and younger and retirement rates for employees with 30 years of service at ages 61 to 63.

Normal Retirement
(continued)

- (c) The benefit that can be provided by the participant's Cash Balance Retirement Account converted at the applicable rates. The annual cash balance credit is 4% of compensation (was 5% prior to 2003) plus interest, or;
- (d) The benefit that could be provided by the participant's Transitional Retirement Account converted at the applicable rates.

The minimum benefit provided to an employee who was covered by the XDS Retirement Plan and became covered by this Plan is his accrued benefit earned in that plan, plus the greater of (c) or (d).

Effective November 30, 2009, the formula under (b) above will only apply to those participants with 42 years of service as of January 1, 2009. Others will be entitled to the benefits accrued under this formula to November 30, 2009 as a minimum benefit.

Early Retirement

The normal retirement benefit based on years of participation and average monthly compensation on the date of termination. If benefit payments are to commence prior to age 65, the benefit determined under (a) or (b) above will be reduced $1/240^{\text{th}}$ for each month by which the commencement of benefits precedes age 65, or age 62 if the employee had 30 or more Years of Service at retirement.

The Cash Balance Retirement Account and the Transitional Retirement Account will be converted based on an immediate annuity factor at early retirement age.

Other Benefits	The IAP settlement provides an annuity benefit for a class of employees meeting certain requirements between January 1, 1982 and November 17, 1982. The IAP benefit is a non-cumulative increasing annuity with an initial benefit of .96% of the accrued normal retirement benefit as of November 17, 1982, increasing by the initial amount each year.
Deferred Vested	The normal retirement benefit based on years of participation and average monthly compensation on the date of termination. This benefit is payable in full beginning at age 65 or in an actuarially reduced form as of any earlier age.
Disability	A member continues to accrue years of service and cash balance credits until the earlier of when he ceases to be disabled, becomes an inactive participant, or becomes eligible for a normal retirement benefit.
Preretirement Death	A benefit of 50% of the excess of the benefit [greater of (a) or (b)] the member would have received if he had survived to his earliest retirement age and retired the day before his death, over the annuity value of the greater of the Cash Balance Retirement Account or the Transitional Retirement Account, and is payable for the life of the participant's spouse. In addition, the greater of the Cash Balance Retirement Account or Transitional Retirement Account is payable in any event upon the participant's death.
Normal Form of Payment	Life annuity. A member who is married at the time he retires shall have his unreduced benefit paid on a 50% joint and survivor basis unless he elects to the contrary. A terminated employee who later reaches retirement age will receive an actuarially reduced benefit payable as a 50% joint and survivor unless he elects to the contrary.
Optional Forms of Payment	All options provided by the insurance company can be chosen on an actuarially equivalent basis. Additionally, a lump sum payment is available with spousal consent.

Years of Service

All periods of employment measured on an elapsed time basis. ERISA break-in-service rules apply except that periods of employment which terminated before January 1, 1976 shall be excluded. Salaried employees of XES, Inc. receive credit for all past years of service (prior to 1993) as determined for the XES, Inc. Employee Retirement Plan. The XES, Inc. salaried population ceased benefit accrual under RIGP effective December 31, 1998. Employees of PARC, Inc. ceased benefit accrual under RIGP effective January 31, 2002.

Years of Participation

All periods of employment subject to the following adjustments:

- (1) Part-time service shall be adjusted to a proportion of full-time service;
- (2) Periods while on disability leave shall be included;
- (3) Periods of employment which terminated before January 1, 1976 shall be excluded;
- (4) Periods of employment rendered while not in the eligible group shall be excluded;
- (5) Certain periods for which a lump sum payment has been made shall be excluded; and
- (6) Periods while on leave of absence shall be included.

Salaried employees of XES, Inc. receive credit for years of participation as of January 1, 1993 equal to their prior years of service under the XES, Inc. Employee Retirement Plan.

Average Monthly Compensation

The highest 5 calendar years of compensation divided by 60. Compensation is W-2 pay excluding non-cash or reimbursement items and payments from other plans plus amounts under any before-tax savings or medical plan. Salaried employees of XES, Inc. will be treated as having compensation in all years prior to 1993, for benefit calculation purposes which is equal to their 1992 compensation reflected by their prior plan. Compensation after 2012 will not be considered.

Conversion Factors

The applicable interest rate permitted by IRC Section 417(e) in effect for the prior August along with the applicable mortality table are used to convert the Transitional Retirement Account and Cash Balance Retirement Account to annuities. Conversion for a married retiring member is on a 50% contingent annuitant basis while a single member or married member who is not retirement eligible will have his accounts converted on a life annuity basis.

Plan Year

January 1 to December 31.

Contributions

Schedule SB, line 22—Description of Weighted Average Retirement Age

The average retirement age shown in line 22 has been calculated by assuming the following retirement rates and no decrements other than retirement for this calculation. All retirements are assumed to occur at beginning of year.

(a) Age	(b) Rate	(c) Weight	(d) Product (a) × (b) × (c)
55	5.00%	1.0000	2.75
56	2.00%	0.9500	1.06
57	2.00%	0.9310	1.06
58	2.00%	0.9124	1.06
59	2.00%	0.8941	1.06
60	5.00%	0.8762	2.63
61	7.50%	0.8324	3.81
62	30.00%	0.7700	14.32
63	15.00%	0.5390	5.09
64	10.00%	0.4582	2.93
65	65.00%	0.4123	17.42
66	25.00%	0.1443	2.38
67	30.00%	0.1082	2.18
68	35.00%	0.0758	1.80
69	50.00%	0.0492	1.70
70	100.00%	0.0246	1.72
Weighted Average			62.97

As shown in line 22 of the Schedule SB, the weighted average retirement age is 63. The retirement rates for employees with 30 years of service are 150% of the retirement rates for employees with fewer than 30 years of service. The average age upon which employees would have 30 years of service is between ages 60 and 61. Therefore, we have included the retirement rates for employees with fewer than 30 years of service at ages 60 and younger and retirement rates for employees with 30 years of service at ages 61 to 63.
