Actuarial Cost Method

I. ACTUARIAL COST METHOD

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described in “Plan Assumptions” of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Target Normal Cost

The Target Normal Cost is the present value of benefits expected to accrue during the plan year for all Participants plus an estimate of the expenses to be paid from the plan assets during the plan year.

Target Liability and Funding Shortfall

As of January 1, 2008, a Target Liability is established which represents the present value of accrued benefits. This Target Liability is offset by adjusted assets, and the remainder (i.e. Funding Shortfall), if any, is amortized over seven years.

Subsequent changes in the Funding Shortfall due to asset experience, liability experience, plan amendments, and/or actuarial assumption changes will be amortized over a seven year period from their valuation dates.

Discount Rate

The plan sponsor has elected to use the Segment Rate approach for discount rate purposes, with an applicable month that is 4 months prior to the valuation date.

In addition, beginning with the 2012 plan year, solely for purposes of determining the minimum required contribution level, applicability of benefit restrictions, and for the at-risk determination, the adjusted 24-month average segment rates established by MAP-21 have been incorporated.

The adjusted 24-month average segment rates are generated by taking the unadjusted 24-month average segment rates for the sponsor-chosen lookback month and adjusting them so that each individual segment rate is not outside of the stipulated corridor around the corresponding 25-year average segment rate for the given plan year. For the 2012 plan year, the stipulated corridor is 90% - 110% of these 25-year average segment rates.

II. ASSET VALUATION METHOD

Assets have been valued in accordance with generally accepted procedures as described below.

All funds invested are valued in the following manner:

Definitions

i(t)	assumed growth rate, set equal to the lesser of the expected return on assets or the applicable 3 rd segment rate for Plan Year t.
C(t)	sum of contributions and other additions to the fund from all sources other than investment transactions in Plan Year t
W(t)	sum of all withdrawals and other decreases to the fund from all sources other than investment transactions in Plan Year t
AV(t)	Actuarial Value of Assets as of Plan Year t
MV(t)	Market Value of Assets as of Plan Year t
EV(t)	Expected Value of Assets as of Plan Year t
G/L(t)	Gain or Loss for Plan Year t

Actuarial Cost Method

Method

A description of the method used to determine the current year's Actuarial Value of Assets {AV(t)} is below.

For the preceding 2 years, G/L(t) is determined as follows:

$$EV(t) = MV(t-1) * (1 + i(t-1)) + [C(t-1) - W(t-1)] * (1 + i(t-1) * m)$$

Where m represents a proportionate yield consistent with the portion of the year for which C and W are invested

$$G/L(t-1) = EV(t) - MV(t)$$

For the current year, AV(t) is determined as follows:

$$AV(t) = MV(t) + 2/3 * G/L(t-1) + 1/3 * G/L(t-2)$$

Corridor Limits

The Actuarial Value of Assets may not be less than 90% or more than 110% of the current market value of plan assets as of the applicable valuation date [as required by IRC Section 430(g)(3)(B)(iii)].

Please note, as highlighted above, the assumed asset growth rate for each year is limited to the applicable 3rd segment rate by law. As a result, if the plan's expected rate of return is greater than this applicable rate, this method is expected to produce an actuarial value of assets that can be expected to be slightly less than the market value of assets, on average.

A monthly benefit equal to the accrued normal retirement benefit earned to date of termination computed as a normal retirement benefit payable at 65. If a participant has at least 15 years of service, he may elect to have his vested benefit commence at age 60 (the benefit is subject to the reduction for early retirement benefits).

Preretirement Death Benefit

Eligibility

A married participant (active or terminated) is eligible for a surviving spouse benefit after meeting the service requirements for vesting.

Benefit

If a married participant dies after attaining his earliest retirement age, the monthly benefit is 50% of the reduced benefit he would have received had he retired on the day immediately preceding his date of death and elected a 50% joint and survivor annuity. If a married participant dies on or before his earliest retirement age, the monthly benefit is 50% of the benefit he would have received had he separated from service on his date of death, survived to and retired at the earliest retirement age, and elected a 50% joint and survivor annuity.

This coverage may be waived only with the written consent of the spouse.

All participants who elect coverage for this benefit are charged as follows:

Ages of Death Coverage	Reduction Charge per Month of Coverage Applies to Vested Benefit Otherwise Payable
60 to 64	.08%
55 to 59	.05%
45 to 54	.02%
Less than 45	.01%

Plan Provisions

Dependent Child Death Benefit Eligibility	Not applicable.
Benefit	None.
Normal Form of Annuity Without Spouse	Life annuity.
With Spouse	Joint and survivor annuity reduced to 85% of the benefit otherwise payable if participant and spouse have same calendar year of birth, payable for employee's lifetime. Participant receives reduced lifetime benefit and, in event of participant's death, 50% of reduced benefit continues to surviving spouse.
Optional Form of Annuity	100%, 66% or 50% joint and survivor annuity, or a 10-year certain and life annuity.
Compensation Definition	Not applicable.
Service Definitions Vesting Service	For each 1,000 or more hours of work in a plan year, one year of vesting service is acquired.
Benefit Service	Prior to September 1, 1976, benefit service for determination of benefit amounts will equal credited service. After August 31, 1976 and before June 1, 1988 a participant accrues 1/12 of a year of benefit service for each 173 hours of work up to a maximum of one year of benefit service in any 12 month plan year. After May 31, 1988, a participant accrues 1/12 of a year of benefit for each 156 hours of work up to a maximum of one year of benefit service in any 12 month plan year. Benefit service includes only periods of employment that a participant accrues while a member of the Joint Labor Board.
Actuarial Equivalent Definition	A benefit of equivalent value when computed on the basis of the UP-1984 Mortality Table and an assumed 6% rate of interest.
Cost-of-Living Increase	Not applicable.
Social Security Definition	Not applicable.
Transfers Transfers In	Benefit otherwise calculated is reduced by the amount of benefit payable under any other plan. The amount of reduction is determined as if the other benefit is payable in the form of a single life annuity at the date of termination (actuarially adjusted if the payment form is other than a single life annuity).

Plan Provisions

Transfer Out

If transferred to employment status no longer covered by Labor Agreement, vesting service will continue to accrue so long as employment is maintained within the Company or subsidiary. The benefit payable is determined using the benefit service up to date of transfer and using the benefit amount in effect upon termination.

Section I

Summary of Valuation Results (continued)

Changes Since Last Year's Valuation

Changes in Pension Plan Provisions

Due to the closure of the Brokaw Mill, the benefit multiplier increases previously negotiated after June 1, 2011 will not take effect.

New Legislation

Effective with this valuation, we are reflecting the provisions of the Moving Ahead for Progress in the 21st Century Act (MAP-21), which was signed into law on July 6, 2012.

Changes in Actuarial Assumptions

The ASC 960 mortality assumption was changed from the RP-2000 Mortality Table projected to 2010, to the IRS 2012 Static Mortality Table.

The expense load assumption for PPA funding was changed from \$50,000 to \$75,000.

There were no other changes in the non-prescribed Actuarial Assumptions recognized with this actuarial valuation.

Changes in Actuarial Cost Method

Effective with this valuation, we have incorporated the adjusted 24-month average segment rate methodology established by MAP-21. These rates for the current plan year have been detailed within IRS Notice 2012-55. Further details on this change in the actuarial cost method, and the rates incorporated in this report, can be found within the Actuarial Cost Method and Actuarial Assumptions sections.

Benefit Restrictions and "At Risk" Status

There are no benefit restrictions associated with the current plan year.

The plan is not considered "At Risk" for the current plan year.

Actuarial Cost Method

I. ACTUARIAL COST METHOD

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described in “Plan Assumptions” of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Target Normal Cost

The Target Normal Cost is the present value of benefits expected to accrue during the plan year for all Participants plus an estimate of the expenses to be paid from the plan assets during the plan year.

Target Liability and Funding Shortfall

As of January 1, 2008, a Target Liability is established which represents the present value of accrued benefits. This Target Liability is offset by adjusted assets, and the remainder (i.e. Funding Shortfall), if any, is amortized over seven years.

Subsequent changes in the Funding Shortfall due to asset experience, liability experience, plan amendments, and/or actuarial assumption changes will be amortized over a seven year period from their valuation dates.

Discount Rate

The plan sponsor has elected to use the Segment Rate approach for discount rate purposes, with an applicable month that is 4 months prior to the valuation date.

In addition, beginning with the 2012 plan year, solely for purposes of determining the minimum required contribution level, applicability of benefit restrictions, and for the at-risk determination, the adjusted 24-month average segment rates established by MAP-21 have been incorporated.

The adjusted 24-month average segment rates are generated by taking the unadjusted 24-month average segment rates for the sponsor-chosen lookback month and adjusting them so that each individual segment rate is not outside of the stipulated corridor around the corresponding 25-year average segment rate for the given plan year. For the 2012 plan year, the stipulated corridor is 90% - 110% of these 25-year average segment rates.

II. ASSET VALUATION METHOD

Assets have been valued in accordance with generally accepted procedures as described below.

All funds invested are valued in the following manner:

Definitions

i(t)	assumed growth rate, set equal to the lesser of the expected return on assets or the applicable 3 rd segment rate for Plan Year t.
C(t)	sum of contributions and other additions to the fund from all sources other than investment transactions in Plan Year t
W(t)	sum of all withdrawals and other decreases to the fund from all sources other than investment transactions in Plan Year t
AV(t)	Actuarial Value of Assets as of Plan Year t
MV(t)	Market Value of Assets as of Plan Year t
EV(t)	Expected Value of Assets as of Plan Year t
G/L(t)	Gain or Loss for Plan Year t

Actuarial Cost Method

Method

A description of the method used to determine the current year's Actuarial Value of Assets {AV(t)} is below.

For the preceding 2 years, G/L(t) is determined as follows:

$$EV(t) = MV(t-1) * (1 + i(t-1)) + [C(t-1) - W(t-1)] * (1 + i(t-1) * m)$$

Where m represents a proportionate yield consistent with the portion of the year for which C and W are invested

$$G/L(t-1) = EV(t) - MV(t)$$

For the current year, AV(t) is determined as follows:

$$AV(t) = MV(t) + 2/3 * G/L(t-1) + 1/3 * G/L(t-2)$$

Corridor Limits

The Actuarial Value of Assets may not be less than 90% or more than 110% of the current market value of plan assets as of the applicable valuation date [as required by IRC Section 430(g)(3)(B)(iii)].

Please note, as highlighted above, the assumed asset growth rate for each year is limited to the applicable 3rd segment rate by law. As a result, if the plan's expected rate of return is greater than this applicable rate, this method is expected to produce an actuarial value of assets that can be expected to be slightly less than the market value of assets, on average.

WAUSAU PAPER CORP. PENSION PLAN

NOTES TO FINANCIAL STATEMENTS AS OF DECEMBER 31, 2012 AND 2011, AND FOR THE YEAR ENDED DECEMBER 31, 2012

1. DESCRIPTION OF PLAN

The following brief description of the Wausau Paper Corp. Pension Plan (the “Plan”) provides only general information. Participants should refer to the Plan Agreement for a more complete description of the Plan’s provisions.

General—The Plan is a defined benefit plan covering all regular full-time employees of Wausau Paper Mills, LLC (the “Company”) who were covered by a Joint Labor Agreement between the union at the Brokaw mill and the Company. An employee became eligible to participate in the Plan on either (1) their date of hire if expected to be credited with 1,000 hours of work during the first 12 consecutive months of employment, or (2) the first day of any plan year in which the employee performed 1,000 hours of work. The Employee Benefits Committee of the Company controls and manages the operation and administration of the Plan. Prudential Retirement Insurance and Annuity Company (“Prudential”) serves as the trustee of the Plan and manages the Plan’s investments. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (“ERISA”).

Pension Benefits—Participants with five or more years of service are entitled to annual pension benefits beginning at normal retirement age, as defined in the Plan. The Plan permits early retirement at age 55 with 15 years of vesting service and a reduced pension benefit. The form of pension payment is a monthly income for participants for their lifetime with payments terminating at death. There are, however, alternative optional payment methods available. The amount of monthly pension payment is dependent upon years of credited service with the Company.

Death and Disability Benefits—If a married participant (active or terminated) dies prior to retirement and has met the service requirements for vesting, their spouse is eligible for a surviving spouse benefit. Active participants who become totally disabled and have rendered 15 years of vesting service are eligible for a monthly benefit equal to the accrued normal retirement benefit earned to date of disability.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting—The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America.

Use of Estimates—The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits and changes therein at the date of the financial statements. Actual results could differ from those estimates.

Investment Valuation and Income Recognition—The Plan’s investments in pooled separate accounts are recorded at estimated fair value in accordance with Accounting Standards Codification (“ASC”) Topic 820 on the last day of the Plan year. ASC 820 discusses acceptable valuation techniques and inputs to these techniques. These inputs are assumptions market participants use in pricing investments. ASC 820 establishes a fair value hierarchy that prioritizes the inputs, which are summarized as follows:

Level 1 – Quoted prices in active markets (e.g., NYSE, NASDAQ, or other exchange) for assets identical to the securities to be valued. If a level 1 input is available, it must be used.

Level 2 – Inputs other than quoted market prices that are observable for securities, either directly or indirectly. Examples include matrix pricing utilizing yield curves, quoted prices for similar assets in active markets, and inputs derived from observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 – Unobservable inputs, which contain assumptions by the party valuing those assets. For level 3 inputs, there is no market data or correlations with market assumptions.

All of the Plan’s investments are in pooled separate accounts. The pooled separate accounts invest in actively managed domestic and international stocks, fixed income securities, and publicly quoted mutual funds, and are valued using level 2 inputs. The fair values of these pooled separate accounts are primarily based on quoted market prices for the underlying securities or similar instruments. The Plan’s fair value is based on the Plan’s proportionate ownership of the underlying investments. These fair values are classified within level 2 of the valuation hierarchy since the net asset value of the pooled separate account itself is not publicly quoted, but the values are not dependent on the input of any significant judgments or assumptions by management.

Purchases and sales of securities are recorded on a trade-date basis (the date the order to buy or sell is executed). Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan’s gains and losses on investments bought and sold as well as held during the year.

Payment of Benefits—Benefit payments to participants are recorded upon distribution.

Expenses—Administrative expenses of the Plan are paid by the Plan, as provided in the Plan Document.

Subsequent Events—Subsequent events have been evaluated through October 7, 2013, the date that the financial statements were available to be issued, and noted no events occurring during such period that would require recognition or disclosure in the financial statements.

3. RISKS AND UNCERTAINTIES

The Plan utilizes investment securities consisting of pooled separate accounts. Investment securities, in general, are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and such changes could materially affect the amounts reported in the financial statements.

4. FAIR VALUE MEASUREMENT

The following summarizes the classification of investments by level and method of valuation in accordance with the requirements of ASC 820:

Fair Value Measurement at December 31, 2012				
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Pooled Separate Accounts:				
Small cap funds	\$ 2,032,306	\$ -	\$ 2,032,306	\$ -
Mid cap funds	2,084,740	-	2,084,740	-
Large cap funds	9,548,953	-	9,548,953	-
International funds	5,040,778	-	5,040,778	-

U.S. bond funds	14,597,148	-	14,597,148	-
Short-term bond fund	971,208	-	971,208	-
Emerging markets fund	1,294,202	-	1,294,202	-
Total	\$ 39,986,918	\$ -	\$ 39,986,918	\$ -

Fair Value Measurement at December 31, 2011				
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Pooled Separate Accounts:				
Small cap funds	\$ 1,822,065	\$ -	\$ 1,822,065	\$ -
Mid cap funds	1,760,033	-	1,760,033	-
Large cap funds	9,087,853	-	9,087,853	-
International funds	4,178,526	-	4,178,526	-
S&P 500 indexed fund	4,207,492	-	4,207,492	-
U.S. bond funds	12,950,096	-	12,950,096	-
Short-term bond fund	912,478	-	912,478	-
Emerging markets fund	1,068,170	-	1,068,170	-
Total	\$ 35,986,713	\$ -	\$ 35,986,713	\$ -

The net asset value of each of the pooled separate accounts is calculated in a manner consistent with accounting principles generally accepted in the United States of America for investment companies and is determinative of their fair value and represents the price at which the Plan would be able to initiate a transaction. All of the Plan's pooled separate accounts are reflected in level 2 of the valuation hierarchy. The pooled separate accounts invest in actively managed domestic and international stocks, fixed income securities, and publicly quoted mutual funds. The fair values of the underlying investments,

which are based on quoted prices of similar assets, are used to determine the net asset value of the separate account, which is not publicly quoted.

5. MILL CLOSURE

In December 2011, the Company announced plans to permanently cease operations at the Brokaw, Wisconsin paper mill. Papermaking operations ceased in February 2012 and the paper mill was closed during the second quarter of 2012. The closure of the mill resulted in the immediate vesting of benefits for employees eligible to participate in the Plan as of the date of closure.

6. FUNDING POLICY

Contributions to provide benefits under the Plan are made solely by the Company. The Company's funding policy is to make cash contributions to the Plan in amounts as determined by the Plan's independent actuary. The Company met the minimum funding requirements of ERISA for the year ended December 31, 2012.

7. ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to service rendered by employees as of the valuation date. Accumulated plan benefits include benefits expected to be paid to: (1) retired or terminated employees or their beneficiaries, (2) beneficiaries of employees who have died, and (3) present employees or their beneficiaries. The actuarial present value of accumulated plan benefits is determined by an independent actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits as of December 31, 2012, is as follows:

Vested benefits:	
Participants and/or beneficiaries currently receiving benefits	\$ 21,252,648
Other participants	<u>15,944,181</u>
Total vested benefits	37,196,829
Nonvested benefits	<u>-</u>
Total actuarial present value of accumulated plan benefits	<u>\$ 37,196,829</u>

The changes in the actuarial present value of the Plan's accumulated plan benefits for the year ended December 31, 2012, are as follows:

Actuarial present value of accumulated benefits – beginning of year	\$ 37,168,905
Increase (decrease) during the year attributable to:	
Benefits accumulated and actuarial loss	(2,931,471)
Interest accreted	2,791,354
Changes in actuarial assumptions	2,514,699
Benefits paid	<u>(2,346,658)</u>
Net increase	<u>27,924</u>
Actuarial present value of accumulated benefits – end of year	<u>\$ 37,196,829</u>

The significant actuarial assumptions used in the December 31, 2012, valuations were:

- Mortality: The IRS Static Mortality Table Applicable for Minimum Funding Purposes
- Retirement age: Average retirement age of 63
- Investment return: 7.50% per annum, net of investment expenses, and net of a 0.50% reduction to reflect administrative fees paid out of the Plan

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

8. INVESTMENTS

The following table presents the fair value of investments at December 31, 2012 and 2011.

	<u>2012</u>	<u>2011</u>
Investments – at estimated fair value – pooled separate accounts	<u>\$ 39,986,918</u>	<u>\$ 35,986,713</u>

The following is a summary of the unaudited information regarding the Plan as of December 31, 2012 and 2011 and for the year ended December 31, 2012, included in the Plan's financial statements and supplemental schedules, that was prepared by or derived from information prepared by Prudential, the trustee of the Plan, and furnished to the plan administrator. The plan administrator has obtained certifications from the trustee that such information is complete and accurate.

10. FEDERAL INCOME TAX STATUS

The Internal Revenue Service ("IRS") has determined and informed the Company by a letter dated July 18, 2003, that the Plan and related trust were designed in accordance with the applicable regulations of the Internal Revenue Code ("IRC"). The Plan has been amended since the receipt of the determination letter; however, the Company and the plan administrator believe that the Plan is currently designed and operated in compliance with the applicable requirements of the IRC and the Plan and related trust continue to be tax-exempt. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in process. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2009.

11. PLAN TERMINATION

Although it has not expressed any intention to do so, the Company has the right under the Plan, in certain circumstances, to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event that the Plan is terminated, the net assets of the Plan will be allocated for payment of plan benefits to the participants in an order of priority determined in accordance with ERISA, applicable regulations thereunder, and the Plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation ("PBGC") if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid, and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all.

12. RELATED PARTY TRANSACTIONS

Certain plan investments are units of pooled separate accounts managed by Prudential, the trustee of the Plan, and therefore these transactions qualify as party-in-interest transactions. Fees paid by the Plan for investment management services were \$217,831 for the year ended December 31, 2012. These are not considered prohibited transactions by statutory exemption under ERISA regulations.
