INDEPENDENT AUDITOR'S REPORT

Administrative Committee of Precision
Components International, Inc. Employee
Savings Plan
Columbus, Georgia

I was engaged to audit the financial statements and supplemental schedules of Precision Components International, Inc. Employee Savings Plan as of December 31, 2012 and 2011, the related statements of changes in net assets available for plan benefits for the years then ended, and the schedules of assets held for investment and of transactions or series of transactions in excess of 5% of the current value of plan assets as of or for the years ended December 31, 2012 and 2011. These financial statements and schedules are the responsibility of the Plan's management.

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed me not to perform, and I did not perform, any auditing procedures with respect to the information summarized in Note D, which was certified by Mass Mutual Life Insurance Company, the trustees of the Plan, except for comparing the information with the related information included in the accompanying financial statements and schedules. I have been informed by the plan administrator that the trustee holds certain of the Plan's investment assets and executes investment transactions. The plan administrator has obtained certifications from the trustee as of and for the years ended December 31, 2012 and 2011, that the financial information provided to the plan administrator by the trustee is complete and accurate.

Because of the significance of the information which I did not audit, I am unable to, and do not, express an opinion on the accompanying financial statements and supplemental schedules taken as a whole. The supplemental schedules are presented for the purpose of additional analysis and are not a required part of the financial statements, but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The form and content of the information included in the financial statements and supplemental schedules, other than that derived from the information certified by the trustee, have been audited by me in accordance with auditing standards generally accepted in the United States of America and, in my opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

NOTES TO FINANCIAL STATEMENTS

PRECISION COMPONENTS INTERNATIONAL, INC. EMPLOYEE SAVINGS PLAN

NOTE A--SIGNIFICANT ACCOUNTING POLICIES

Accounting Records: The accounting records of the Plan are maintained on the accrual basis.

Investments: Investments are maintained and managed by Massachusetts Mutual Life Insurance Company. Investments are recorded at fair value. The current value of the investments as reflected in the accompanying financial statements have been determined by Mass Mutual for assets held by them.

The change in the difference between current value and the cost of investments at the beginning of the year and the end of the year, as adjusted for sales during the year of investments held at the beginning of the year, is reflected in the statements of changes in net assets available for plan benefits as unrealized appreciation or depreciation in the aggregate current value of investments. Notes receivable from participants are valued at their outstanding balances plus any accrued but unpaid interest, which, approximate fair value. Delinquent notes receivable from participants are recorded as a distribution based upon the terms of the plan document.

The realized gain or loss on investments is the difference between the proceeds received and the current value as of the end of the preceding year.

Use of Estimates: The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Risks and Uncertainties: The Plan invests in various investments securities (primarily pooled separate accounts with MassMutual). Investments are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risks associated with certain investment options, it is at least reasonably possible that changes in the values of investments will occur in the near term and that such changes could be materially affect the amounts reported in the statement of net assets available for plan benefits.

Subsequent events: The Plan has evaluated subsequent events through September 24, 2013 the date the financial statements were available to be issued.

Payment of Benefits: Benefits are recorded when paid.

Information Certified by Trustee: In accordance with DOL regulations, the audit may be restricted with respect to assets held and transactions executed by certain institutions. In an ERISA limited scope audit, the plan administrator can instruct the auditor to limit the scope of testing in investment information prepared and certified by a qualified trustee, custodian, or insurance company as complete and accurate.

NOTE G—FAIR VALUE MEASUREMENTS

FASB ASC 820 provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

NOTES TO FINANCIAL STATEMENTS – CONTINUED

NOTE G—FAIR VALUE MEASUREMENTS —CONTINUED

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodology used for December 31, 2012 and 2011.

Pooled separate accounts(psa)-- value determined on a participant unit basis. The balance of participant units credited to the equity accounts held on behalf of the Plan are multiplied by the current units value which is valued daily based on investment results. The value of each psa is based on the value of the mutual fund shares held by each fund.

Guaranteed interest account—valued at fair value by discounting the related cash flows based on current yields

The preceding methods described may produce a fair value calculation that may not be indicative of the net realizable value or reflective of future fair values. Furthermore, although the plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine fair value of certain financial instruments could result in a different fair value measurement at the reporting date.
