Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

REPORT OF INDEPENDENT AUDITORS

Plan Administrator
Lockheed Martin Aerospace Pension Plan for Michoud Hourly Employees
in the Bargaining Unit

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of Lockheed Martin Aerospace Pension Plan for Michoud Hourly Employees in the Bargaining Unit, which comprise the statements of net assets available for benefits as of December 31, 2012 and 2011, and the related statement of changes in net assets available for benefits for the year ended December 31, 2012, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the certified investment information described in Note 7, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the entity that certified the investment information meets the requirements of 29 CFR 2520.103-8. The plan administrator has obtained certifications as of December 31, 2012 and 2011, and for the year ended December 31, 2012, stating that the investment information provided to the plan administrator is complete and accurate.

Disclaimer of Opinion on Financial Statements

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Lockheed Martin Aerospace Pension Plan for
Michoud Hourly Employees in the Bargaining Unit

Notes to Financial Statements

1. Description of the Plan

The following description of the Lockheed Martin Aerospace Pension Plan for Michoud Hourly Employees in the Bargaining Unit (the Plan) provides only general information. Participants should refer to the Summary Plan Description or the Plan Document for a more complete description of the Plan's provisions.

General

The Plan is a defined benefit plan covering certain bargaining employees of Lockheed Martin Corporation (the Corporation) located at its Michoud facility, and has been amended from time to time. The Corporation is the Plan Sponsor and the Plan Administrator. Active participants become fully vested in the Plan upon the earlier of the completion of five years of service or attainment of age 65. During 2009, there was a significant reduction in the workforce in the Michoud business resulting in a partial plan termination, and affected participants became 100% vested. Effective July 1, 2010 new hires and rehired employees are not eligible to participate in the Plan.

The assets of the Plan, excluding the "Employer contributions receivable," are held and invested on a commingled basis in the Lockheed Martin Corporation Master Retirement Trust (the Master Trust). The assets of the Master Trust are held by The Northern Trust Company (the Trustee), with the exception of certain assets that are not held under custody by the Trustee as described in Note 7.

Funding Policy

The Corporation has agreed to contribute such amounts as are necessary to satisfy the funding requirements under the Employee Retirement Income Security Act of 1974 (ERISA) and also satisfy the funding requirements for U.S. Government Cost Accounting Standards (CAS) reimbursements. Contributions by the Corporation, if any, met the ERISA minimum funding requirements. The Corporation has the right under the Plan to discontinue such contributions at any time and/or terminate the Plan. In the event of termination, the Plan's net assets are to be used first for the payment of retirement benefits that former employees or their beneficiaries have been receiving, next for the payment of vested benefits, and finally for the payment of nonvested benefits for the remaining participants. If the net assets allocated for one of the above categories are not sufficient to pay all the benefits in such category, the available net assets shall be allocated pro rata to all the benefits in that category. However, in the event of termination of the Plan, the Pension Benefit Guaranty Corporation (PBGC) guarantees the payment of nonforfeitable retirement benefits subject to certain limitations prescribed by ERISA.

2. Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared based on the accrual basis of accounting.

Accumulated Plan Benefits

Accumulated plan benefits are those estimated future periodic payments that are attributable under the Plan's provisions for credited service by participants from their date of eligibility to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired, terminated and disabled participants or their beneficiaries, and (b) present participants or their beneficiaries. Benefits for retired, terminated and disabled participants or their beneficiaries are based on each former participant's credited service prior to his or her termination or retirement date. Accumulated plan benefits for active participants are based on each participant's credited service preceding the valuation date. Benefits payable under all circumstances—retirement, death, disability and termination of employment—are included to the extent they are deemed attributable to employee service prior to the valuation date.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits. Actual results could differ from those estimates.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Risks and Uncertainties

The Plan, through the Master Trust, invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Investment Valuation and Income Recognition

Investments in the Master Trust are reported at fair value. Fair value is the price that would have been received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 7 for additional disclosure of fair value measurements.

Purchases and sales of securities in the Master Trust are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net realized and unrealized gains and losses on investments bought and sold as well as held during the year are included in interest in net investment gain of Master Trust on the Statement of Changes in Net Assets Available for Benefits.

Administrative Expenses

Direct administrative expenses are paid by the Master Trust and generally allocated to the Plan proportionally based on the Plan's interest in the Master Trust's net assets or directly if specifically related to the Plan. Other indirect administrative expenses are paid by the Corporation.

Recent Accounting Pronouncements

In May 2011, the Financial Accounting Standards Board (FASB) issued guidance to clarify the application of existing fair value measurement requirements and for disclosing information about fair value measurements. The amended guidance became effective for the Plan on January 1, 2012 and did not have a material impact on the Plan's financial statements and disclosures.

Subsequent Events

The Plan's management has evaluated subsequent events through October 9, 2013, the date the financial statements were available to be issued. Other than the Corporation obtaining an updated Internal Revenue Service (IRS) determination letter for the Plan (see Note 4), no other material subsequent events have occurred since December 31, 2012 that required recognition or disclosure in these financial statements.

3. Actuarial Present Value of Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is the amount that results from applying actuarial assumptions to the accumulated plan benefits earned by the participants to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits is as follows:

	December 31,	
	2012	2011
	(In thousands)	
Vested benefits:		
Participants currently receiving payments	$ 94,136	$ 76,094
Other participants	66,200	68,476
Total vested benefits	160,336	144,570
Nonvested benefits	598	1,195
Total actuarial present value of accumulated plan benefits	$160,934	$145,765

The significant actuarial assumptions used in the valuations were (a) life expectancy of participants (Prescribed IRS Static Mortality Table - Separate), (b) turnover based upon the termination experience of the Plan, (c) assumed retirement age probabilities based on the experience of the Plan resulting in an average retirement age of 62, and (d) an annual discount rate of 4.00% and 4.75% for 2012 and 2011, respectively. The discount rate assumption used to calculate the actuarial present value of accumulated plan benefits is adjusted annually to reflect current yields on long-term high-quality corporate bonds. This can result in significant year to year fluctuations in the valuations.

Changes in the actuarial present value of accumulated plan benefits are as follows:

	Year ended December 31, 2012 *(In thousands)*
Actuarial present value of accumulated plan benefits at beginning of year	$ 145,765
Increase (decrease) during the year attributable to:	
Increase for interest due to the decrease in the discount period	6,717
Benefits paid	(8,751)
Benefits accumulated	2,338
Plan amendment	218
Changes in actuarial assumptions	14,647
Net increase	15,169
Actuarial present value of accumulated plan benefits at end of year	$ 160,934

During 2012, the contract for the participants in the Plan was renegotiated and the Plan was amended to increase the benefit formula. The amendment resulted in an unrecognized prior service cost of $218,000 for the year ended December 31, 2012.

The actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Income Tax Status

The IRS has determined and informed the Corporation by letter dated May 29, 2013, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the Plan Administrator and the Plan's counsel believe that the Plan is designed and is currently being operated in compliance with the applicable provisions of the IRC.

GAAP requires plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2012, there are no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan

Administrator believes it is no longer subject to income tax examinations for years prior to 2005.

5. Reconciliation of Financial Statements to Form 5500

Interest in net investment gain of Master Trust reported in the financial statements is $592,000 greater than the amount reported on Form 5500 for the year ended December 31, 2012. Administrative expenses reported in the financial statements are $592,000 greater than the amounts reported on Form 5500 for the year ended December 31, 2012. These differences arose from the classification of certain administrative expenses which are included in the net investment gain in the Master Trust for Form 5500 reporting purposes.

6. Parties-in-Interest Transactions

The Master Trust invests in funds managed by The Northern Trust Company, the Trustee. Investments in these funds qualify as party-in-interest transactions for which a statutory exemption exists.

7. Master Trust

General

The Plan's investments are held by the Master Trust, which was established for the investment of the Plan's assets and the assets of several other defined benefit plans sponsored by the Corporation. The assets, realized and unrealized gains and losses, and investment income of the Master Trust are allocated among the plans included therein proportionally based on each plan's interest in the Master Trust's net assets. The Plan's interest in the Master Trust's net assets as of December 31, 2012 and 2011 was approximately 0.45% and 0.39%, respectively.

The Master Trust owes direct reimbursements to the Corporation for certain expenses incurred by the Corporation and its subsidiaries in providing services to the Plan.

Other than the financial information in the following table, the reported total fair value by asset class as disclosed in the fair value of assets tables including investments held as of December 31, 2012 and 2011, and net appreciation (depreciation) in fair value of investments, interest income, and dividend income for the year ended December 31, 2012, was obtained or derived from information certified as complete and accurate by The Northern Trust Company, the Trustee of the Master Trust. The following financial information was not certified by the Trustee, as the net assets are not held in custody by the Trustee:

Fair Value of Assets

The accounting standard for fair value measurements defines fair value, establishes a market-based framework or hierarchy for measuring fair value, and requires disclosures regarding fair value measurements. The standard is applicable whenever assets and liabilities are measured and included in the financial statements at fair value.

The fair value hierarchy established in the standard prioritizes the inputs used in valuation techniques into three levels as follows:

- Level 1 – Observable inputs – quoted prices in active markets for identical assets and liabilities;
- Level 2 – Observable inputs other than the quoted prices in active markets for identical assets and liabilities – includes quoted prices for similar instruments, quoted prices for identical or similar instruments in inactive markets, and amounts derived from valuation models where all significant inputs are observable in active markets; and
- Level 3 – Unobservable inputs – includes amounts derived from valuation models where one or more significant inputs are unobservable and require us to develop relevant assumptions.

The following table presents the fair value of the assets in the Master Trust by asset category and their level within the fair value hierarchy as of December 31, 2012 and their appreciation (depreciation) for the year ended December 31, 2012:

International equity and corporate debt securities in the amounts of $1,086,000 and $2,160,000, respectively, were reclassified as Level 3 securities in 2012 due to changes in fair value hierarchy parameters as recognized by the Trustee. $31,404,000 were reclassified from Level 3 to Level 2 following an assessment of the liquidity provisions of the hedge funds. The Master Trust recognizes transfers between levels of the fair value hierarchy as of the date of the change in circumstances that causes the transfer.

Valuation Techniques

Cash equivalents are mostly comprised of short-term money-market instruments and are valued at cost, which approximates fair value.

U.S. equity securities and international equity securities categorized as Level 1 are traded on active national or international exchanges and are valued at their closing prices on the last trading day of the year. For U.S. equity securities and international equity securities not traded on an active exchange, or if the closing price is not available, the Trustee obtains indicative quotes from a pricing vendor, broker, or investment manager. These securities are categorized as Level 2 if the custodian obtains corroborated quotes from a pricing vendor or categorized as Level 3 if the custodian obtains uncorroborated quotes from a broker or investment manager.

Commingled equity funds are investment vehicles valued using the Net Asset Value (NAV) provided by the fund managers. The NAV is the total value of the fund divided by the number of shares outstanding. Commingled equity funds are categorized as Level 1 if traded at their NAV on a nationally recognized securities exchange or categorized as Level 2 if the NAV is corroborated by observable market data (e.g., purchases or sales activity). Funds may be redeemed daily, monthly, or annually, depending upon notification requirements, liquidity, and other matters. Certain funds may require notification of management's intent to redeem at least one to 90 days in advance of exercising management's redemption right.

Corporate debt securities, U.S. government securities, real estate funds, and other fixed income securities categorized as Level 2 are valued by the Trustee using pricing models that use verifiable observable market data (e.g., interest rates and yield curves observable at commonly quoted intervals), bids provided by brokers or dealers, or quoted prices of securities with similar characteristics. Corporate debt securities and other fixed income securities are categorized at Level 3 when valuations using observable inputs are unavailable. The Trustee obtains pricing based on indicative quotes or bid evaluations from vendors, brokers or the investment manager.

Private equity funds, real estate funds, and hedge funds are valued using the NAV based on the valuation models of underlying securities that include significant unobservable inputs and cannot be corroborated using verifiable observable market data. Valuations for private equity funds and real estate funds are determined by the general partners. Depending on the nature of the assets, the general partners may use various valuation methodologies, including the income and market approaches in their models. The market approach consists of analyzing market transactions for comparable assets while the income approach uses earnings or the net present value of estimated future cash flows adjusted for liquidity and other risk factors. Hedge funds are valued by independent administrators using various models based on the nature of the securities.

Private equity funds consist of investments in private equities that are held primarily by limited partnerships and are in various strategies, including venture capital, corporate finance, opportunistic, and distressed. The term of each private equity fund is generally 10 years, and the fund's investors do not have the right to redeem their investment at its NAV. Instead, the investors receive distributions as the underlying assets of the fund are liquidated. Unfunded capital commitments related to the Master Trust's investment in private equity funds as of December 31, 2012 and 2011 totaled $1,699,995,000 and $1,558,500,000, respectively. Real estate funds consist of investments in U.S. and

international commercial real estate that are held primarily by limited partnerships. The term of each real estate fund is generally 10 years, and the fund's investors do not have the right to redeem their investment at its NAV. Instead, the investors receive distributions as the underlying assets of the fund are liquidated. Hedge fund investments are made through fund-of-funds vehicles which invest in a diversified array of hedge funds across a multitude of strategies. Depending on the hedge fund, redemptions can be monthly or annually. The redemption notice period, depending on the hedge fund, is 45 to 180 days in advance.

Commodities categorized as Level 1 are traded on an active commodity exchange and are valued at their closing prices on the last trading day of the year. Commodities categorized as Level 2 as of December 31, 2011 represent shares in a commingled commodity fund valued using the NAV, which is corroborated by observable market data. The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while management believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

In estimating the fair value of the investments in Level 3, management may use third-party pricing sources or appraisers. In substantiating the reasonableness of the pricing data provided by third parties, management evaluates a variety of factors including review of methods and assumptions used by external sources, recently executed transactions, existing contracts, economic conditions, industry and market developments, and overall credit ratings.

Derivative Instruments

Derivative instruments are used in the Master Trust to achieve certain portfolio objectives and to adjust asset allocation in order to manage market risk. Derivative instruments allow internal and external investment managers to achieve these goals efficiently while maintaining appropriate liquidity.

At December 31, 2012 and 2011, the Master Trust utilized four types of derivative instruments:

Futures Contracts – The purchase of futures contracts allows the Master Trust to achieve desired portfolio positions in various commodities without the need to physically own

and store them. Futures are used to manage the overall risk to equity and fixed income markets. Foreign exchange futures are used to separate the management of currency exposure from foreign equity exposure. Futures contracts are exchange-traded with initial margin required from both parties and daily settlement of gains and losses; therefore credit and counterparty risks are minimal, and futures contracts have no net market value.

Forward Contracts – Forward contracts are similar to futures contracts except that they are traded over-the-counter rather than over a standardized exchange. Foreign exchange forwards are used by investment managers as another means of separating currency risk from investment risk. These contracts allow a manager to lock into a rate at which to exchange an upcoming settlement in a foreign currency into US dollars. Commodity forward contracts are used by investment managers to achieve desired portfolio positions in various commodities. While forward contracts are traded over-the-counter, they are generally very short-term which minimizes counterparty risk.

Options, including Options on Futures – These contracts allow the holder to buy or sell a security or a futures contract at a specified price prior to an expiration date. Options are primarily used to protect against downside risk in an equity, commodity or currency position held by the Master Trust.

Swaps – Swaps are over-the-counter agreements between counterparties to exchange the return stream of one security for another. Swaps are utilized either to provide exposure to a security for which there is no available futures contract, or to achieve an exposure over a specific time horizon.

A long derivative position increases (decreases) in value when the price of the underlying asset (e.g., currency, equity index) increases (decreases). A short derivative position increases (decreases) when the price of the underlying asset decreases (increases).

Discussion of Actuarial Assumptions and Methods

For the funding valuation, the allowable interest rates and mortality tables available to measure Plan liabilities are prescribed by IRC Section 412. Aon Hewitt provided guidance with respect to the alternative interest rate and mortality table options, and it is our belief that the options prescribed by Lockheed Martin Corporation are appropriate for funding purposes. It is our belief that all other actuarial assumptions used for the funding valuation represent reasonable expectations of anticipated Plan experience. The Actuarial Cost Method used is prescribed by IRC Section 412. While the method used to value assets is prescribed by Lockheed Martin Corporation, Aon Hewitt provided guidance with respect to the use of this method, and it is our belief that the method is appropriate for funding purposes.

Calculation of Normal Costs and Liabilities

The method used to calculate the ERISA Target Normal Cost and Funding Target is the Unit Credit Cost Method. The Funding Target under IRC Section 430 is calculated as the present value of all benefits that have been accrued or earned under the Plan as of the first day of the Plan Year, based on current service and current pay. The Target Normal Cost is the present value of all benefits expected to accrue or be earned under the Plan during the Plan Year, including any increase in benefits earned in prior Plan Years attributable to compensation increases in the current Plan Year.

Under this method, benefits are estimated at each decrement age using service and earnings as of the valuation date. The present value of these estimated benefits using the applicable ERISA assumptions is the ERISA Funding Target. The Target Normal Cost is the present value of the benefits earned during the year.

For calculating the Actuarial Present Value of vested benefits, benefits at each decrement age are determined in the same manner, but are then multiplied by each participant's vesting percentage as of the valuation date. The present value of these estimated vested benefits is determined without recognition of any benefit for which a participant will become entitled only through the advancement in service or age while actively employed. In addition, certain ancillary benefits have been treated as vested consistent with PBGC premium regulations.

The ERISA Funding Target for lump sum benefits is determined by valuing the annuity that corresponds to the distribution using special actuarial assumptions, as described under Treasury Regulations Section 1.430(d). Under these special assumptions, for the period beginning with the annuity starting date, the current IRC Section 417(e) applicable mortality table is substituted for the mortality table otherwise used.

Effective Date of Plan:	January 1, 1979.
Most Recent Collective Bargaining Agreement:	January 1, 2012
Eligibility:	Employees hired prior to July 1, 2010 are eligible on their date of employment. Employees hired on or after July 1, 2010 are not eligible to participate in the Plan.
Normal Retirement -	
Eligibility Requirement:	The later of age 65 and the 5th anniversary of date of hire.
Benefit:	$68 ($65 prior to the most recent Collective Bargaining Agreement) multiplied by the number of years of credited service.
Regular Early Retirement -	
Eligibility Requirement:	Age 55 and 10 years of Credited Service.
Benefit:	Monthly benefit computed as in Normal Retirement, reduced for payment commencing prior to age 65 in accordance with the following:

Special Early Retirement -

Eligibility Requirement:	Age 55 and 10 years of Credited Service under mutually satisfactory conditions. Since these conditions are difficult to estimate, this benefit is not valued.
Benefit:	An unreduced monthly benefit computed as in Normal Retirement, plus a monthly supplement to age 65 equal to the current benefit level, multiplied by the number of years of Credited Service to a maximum of 25 years.

Early Retirement with LISA -

Eligibility Requirement:	Age 60 and 20 years of Credited Service or age 58 and 30 years of Credited Service.
Benefit:	An unreduced monthly benefit computed as in normal retirement plus a monthly supplement to age 62 equal to $565 ($525 prior to the most recent Collective Bargaining Agreement).

Total and Permanent Disability Retirement -

Eligibility Requirement:	10 years of Credited Service.
Benefit:	An unreduced monthly benefit computed as in Normal Retirement, plus a monthly supplement to age 65 or commencement of Social Security Disability Benefit, whichever comes first, equal to the current benefit level, multiplied by the number of years of Credited Service to a maximum of 25 years.

Preretirement Surviving Spouse's Benefit -

Eligibility Requirement:	5 years of Vesting Service.
Benefit:	If the participant died from active status, 55% of the monthly benefit the Participant would have received if he had retired on the first of the month preceding or coincident with his death. If the participant died from terminated vested status, 50% of the monthly benefit the participant would have received if he had retired on the first of the month preceding or coincident with his death. If the participant had 10 years of service and had not attained age 55 upon his death, the benefit is deferred to the month he would have attained age 55. If the participant had between 5 and 10 years of service and had not attained age 65 upon his death, the benefit is deferred to the month he would have attained age 65.

Termination -

Eligibility Requirement:	5 years of Vesting Service.
Benefit:	A deferred monthly benefit computed as in Normal Retirement, payable at age 62.

Normal Form of Benefit Payment:

Married Participants -

A reduced 55% Joint and Survivor Annuity with a 5 Year Certain Period.

Unmarried Participants -

5 Year Certain and Continuous Annuity.

Plan Changes Since the Prior Year -

The funding valuation reflects the following plan changes:
-The benefit multiplier increased from $65 to $68.
-The LISA supplement increased from $525 to $565.

Discussion of Actuarial Assumptions and Methods

For the funding valuation, the allowable interest rates and mortality tables available to measure Plan liabilities are prescribed by IRC Section 412. Aon Hewitt provided guidance with respect to the alternative interest rate and mortality table options, and it is our belief that the options prescribed by Lockheed Martin Corporation are appropriate for funding purposes. It is our belief that all other actuarial assumptions used for the funding valuation represent reasonable expectations of anticipated Plan experience. The Actuarial Cost Method used is prescribed by IRC Section 412. While the method used to value assets is prescribed by Lockheed Martin Corporation, Aon Hewitt provided guidance with respect to the use of this method, and it is our belief that the method is appropriate for funding purposes.

Calculation of Normal Costs and Liabilities

The method used to calculate the ERISA Target Normal Cost and Funding Target is the Unit Credit Cost Method. The Funding Target under IRC Section 430 is calculated as the present value of all benefits that have been accrued or earned under the Plan as of the first day of the Plan Year, based on current service and current pay. The Target Normal Cost is the present value of all benefits expected to accrue or be earned under the Plan during the Plan Year, including any increase in benefits earned in prior Plan Years attributable to compensation increases in the current Plan Year.

Under this method, benefits are estimated at each decrement age using service and earnings as of the valuation date. The present value of these estimated benefits using the applicable ERISA assumptions is the ERISA Funding Target. The Target Normal Cost is the present value of the benefits earned during the year.

For calculating the Actuarial Present Value of vested benefits, benefits at each decrement age are determined in the same manner, but are then multiplied by each participant's vesting percentage as of the valuation date. The present value of these estimated vested benefits is determined without recognition of any benefit for which a participant will become entitled only through the advancement in service or age while actively employed. In addition, certain ancillary benefits have been treated as vested consistent with PBGC premium regulations.

The ERISA Funding Target for lump sum benefits is determined by valuing the annuity that corresponds to the distribution using special actuarial assumptions, as described under Treasury Regulations Section 1.430(d). Under these special assumptions, for the period beginning with the annuity starting date, the current IRC Section 417(e) applicable mortality table is substituted for the mortality table otherwise used.
