The Budd Company Pension Plan for Executive and Administrative Employees

Notes to Financial Statements December 31, 2012 and 2011

Note 1 - Plan Description

The following brief description of The Budd Company Pension Plan for Executive and Administrative Employees (the "Plan") is provided for general information purposes only. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General - The Plan, as restated through December 31, 2010 and subsequently amended, is a noncontributory defined benefit plan sponsored by ThyssenKrupp Budd Company (the "Company"). Generally, all salaried employees not covered by another qualified plan of the company, which includes ThyssenKrupp USA, Inc., or by a collective bargaining agreement are eligible to participate in the Plan immediately upon hire by the Company or any of its domestic subsidiaries or affiliates that have adopted the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

In December 2006, the Company sold the majority of its operating facilities which employed substantially all active employees covered under the Plan.

Effective May 31, 2012, benefits under the Plan were frozen and no additional benefits will accrue under the Plan. Any participant who was actively employed by the Company on May 31, 2012 was credited with three additional years of credited service under the Plan. The three additional years of credited service were not conditioned upon future employment of the Company and will not count towards eligibility for early retirement; they may be used to increase the Participant's accrued benefit only. Additionally, all participants actively accruing benefits on May 31, 2012 became fully vested in their accrued benefits on that date. The changes above are not contemplated in the computation of the actuarially computed amounts in Note 4 due to the amendment occurring during 2012.

Eligibility and Vesting - Employees become fully vested upon completion of five years of service. Employees who terminate service before becoming fully vested forfeit all benefits under the Plan.

Pension Benefits - Normal retirement is permitted at the age of 65 with five years of continuous service. The Plan permits early retirement at ages ranging from 55 to 64. Monthly benefits are based on years of credited service and an annualized average of the participants' monthly base earnings, as described in the plan document. The Plan also contains provisions for disability, deferred vesting, and surviving spouse benefits.

Death Benefits - In certain circumstances, if an active or terminated employee who has a vested interest in the Plan dies prior to his or her normal retirement age, the surviving spouse or designated beneficiary shall receive a survivor benefit, as defined in the Plan.

**Notes to Financial Statements
December 31, 2012 and 2011**

Note 1 - EBP of Risks and Uncertainties (Continued)

Funding Policy - Contributions are made by the Company in actuarially determined amounts. The Company's policy is to make contributions necessary to satisfy ERISA funding standards. The Company also, from time to time, will make additional contributions, with the total not to exceed the maximum contribution deductible under the Internal Revenue Code. Annual contributions meet the minimum funding requirements of ERISA.

Note 2 - Summary of Significant Accounting Policies

Basis of Presentation - The accompanying financial statements have been prepared on the modified cash basis of accounting. Under the modified cash basis of accounting, contributions and investment income are recorded when received, benefit payments and expenses are recorded when paid, and investments are recorded at fair market value.

Investment Valuation - The Plan's investments are stated at fair value. The fair value of the Plan's interest in the ThyssenKrupp USA Master Trust (the "Master Trust") is based on the beginning of year value of the Plan's interest in the Master Trust plus actual contributions and allocated investment income less actual distributions and allocated administrative expenses. The common collective trust funds are valued at net asset value per share (or its equivalent) of the funds, which are based on the fair value of the funds' underlying net assets.

The government securities and corporate obligations are valued using quoted market prices and/or other market data for the same or comparable instruments and transactions in establishing the prices, discounted cash flow models and other pricing models. These models are primarily industry-standard models that consider various assumptions, including time value and yield curve as well as other relevant economic measures. Investments in partnerships are valued at net asset value per share (or its equivalent) of the funds based on audited financial statements of the funds, where available, with adjustments to account for partnership activity and other applicable valuation adjustments. The money market funds and interest-bearing cash are valued at fair value based on their outstanding balances. All other investments are valued based on quoted market prices. See Note 6 for additional information.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Benefit Payments - Benefits are recorded when paid.

The Budd Company Pension Plan for Executive and Administrative Employees

Notes to Financial Statements December 31, 2012 and 2011

Note 2 - Summary of Significant Accounting Policies (Continued)

Administrative Expenses - Administrative expenses associated with the Plan are paid by the Plan unless voluntarily paid by the Company. During 2012 and 2011, all expenses were paid by the Plan.

Use of Estimates - The preparation of financial statements in conformity with the modified cash basis of accounting requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

Risks and Uncertainties - Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee compensation and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the statement of net assets available for benefits.

Subsequent Events - The financial statements and related disclosures include evaluation of events up through and including October 3, 2013, which is the date the financial statements were available to be issued.

Note 3 - Unaudited Investment Information

The Bank of New York Mellon/BNY Mellon, N.A. (the "Trustee"), holds the Master Trust's investments and executes all related investment transactions. The investment balances and related investment results included in the accompanying financial statements, including information summarized in Note 5, are based solely on information provided by the Trustee.

Certain assets of the Master Trust are in investment funds managed by The Bank of New York Mellon/BNY Mellon, N.A. or its affiliates. Since The Bank of New York Mellon/BNY Mellon, N.A. is the trustee of the Plan, these transactions qualify as party-in-interest transactions as defined under ERISA guidelines. The market value of these investments was approximately \$50,000,000 and \$96,000,000 at December 31, 2012 and 2011, respectively.

The Budd Company Pension Plan for Executive and Administrative Employees

Notes to Financial Statements December 31, 2012 and 2011

Note 4 - Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable, under the Plan's provisions, to the service employees have rendered to the valuation date. These include benefits expected to be paid to retired or terminated employees or their beneficiaries, beneficiaries of employees who have died, and present employees or their beneficiaries.

The normal individual retirement benefit is based on the participant's years of credited service and their compensation, as defined in the plan document.

The actuarial present value of accumulated plan benefits is determined by an independent actuary, Towers Watson, and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The determination was made as of January 1, 2012 and 2011.

The more significant actuarial assumptions underlying the actuarial computations at January 1, 2012 and 2011 are as follows:

- | | |
|-----------------------|--|
| Actuarial cost method | - Traditional Unit Credit Cost Method |
| Interest rate | - 7.30 percent and 7.25 percent in 2012 and 2011, respectively |
| Mortality basis | - RP-2000 Mortality Table for males and females projected using scale AA |
| Retirement | - Based upon a defined table of ages and percentages |
| Salary projection | - 3.25 percent |

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Notes to Financial Statements December 31, 2012 and 2011

Note 4 - Actuarial Present Value of Accumulated Plan Benefits (Continued)

The actuarial present value of accumulated plan benefits as of January 1, 2012 and 2011 was as follows:

	2012	2011
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Participants currently receiving benefit payments	\$ 268,138,408	\$ 262,879,664
Other vested participants	52,955,372	51,779,521
Total vested benefits	321,093,780	314,659,185
Nonvested benefits	622,193	935,403
Total actuarial present value of accumulated plan benefits	<u>\$ 321,715,973</u>	<u>\$ 315,594,588</u>

The following schedule summarizes the components of net increase in actuarial present value of accumulated plan benefits for the years ended January 1, 2012 and 2011:

	2012	2011
Actuarial present value of accumulated plan benefits -		
Beginning of year	\$ 315,594,588	\$ 310,669,631
Increase (decrease) during the year attributable to:		
Benefits accumulated including actuarial gains and losses	3,427,283	(3,263,983)
Increase due to the decrease in the discount period	21,906,323	23,036,042
Benefits paid	(28,174,719)	(27,973,018)
Change of assumptions	8,962,498	13,125,916
Net increase	<u>6,121,385</u>	<u>4,924,957</u>
Actuarial present value of accumulated plan benefits -		
End of year	<u>\$ 321,715,973</u>	<u>\$ 315,594,588</u>

The increase in actuarial present value of accumulated plan benefits for the years ended January 1, 2012 and 2011 due to actuarial assumption changes is primarily due to a change in the discount rate from 7.25 percent in 2011 to 7.30 percent in 2012, and from 7.75 percent in 2010 to 7.25 percent in 2011, to better reflect anticipated plan experience.

Note 5 - Interest in Master Trust

The Plan's investments are in the Master Trust which was established for the investment of assets of the Plan and several other pension plans sponsored by affiliated participating employers of ThyssenKrupp USA, Inc. Each participating retirement plan has an undivided interest in the Master Trust. The assets of the Master Trust are held by the Trustee. At December 31, 2012 and 2011, the Plan's interest in the net assets of the Master Trust was approximately 29 and 27 percent, respectively. Investment income and administrative expenses relating to the Master Trust are allocated to the individual plans based upon their pro rata share in the net assets of the Master Trust.

	2012	2011

Mutual funds	\$ 2,945,688	\$ 724,295

Net investment income	<u>\$ 136,125,029</u>	<u>\$ 56,018,928</u>

Securities Lending - The Master Trust participates in a securities lending program with the Trustee for its U.S. and non-U.S. securities held in custody with the Trustee. The program allows up to \$100,000,000 of the qualified assets to be on loan at any given time. These securities are lent to certain unrelated third-party brokers in exchange for cash and noncash collaterals. U.S. assets and non-U.S. assets on loan are collateralized at 102 percent and 105 percent, respectively, of the assets' market value.

The net assets of the Master Trust reflects, as an asset, the collateral received under the securities lending arrangement with an offsetting liability representing the Master Trust's obligation to return the collateral to the borrower. The collateral received from borrowers totaled \$50,108,159 and \$95,922,480 as of December 31, 2012 and 2011, respectively. This consisted of cash collateral received of \$45,384,363 and \$93,179,439, which was invested in the ASL short-term fund, a money market fund, and noncash collateral of \$4,723,796 and \$2,743,041 at December 31, 2012 and 2011, respectively. The noncash collateral received primarily consisted of fixed-income securities and letters of credit. In the event that a loaned security is called, the Master Trust will receive the market value of the asset in cash. The market value of loaned securities totaled \$49,038,120 and \$93,676,810 at December 31, 2012 and 2011, respectively.

The Budd Company Pension Plan for Executive and Administrative Employees

Notes to Financial Statements December 31, 2012 and 2011

Note 5 - Interest in Master Trust (Continued)

Derivative Instruments - The Master Trust is party to certain agreements, which are designed to manage exposures to foreign exchange and interest rate risks. The interest rate and foreign currency instruments are used for the purpose of hedging changes in the fair value of assets that result from interest rate changes and currency fluctuations, or as an efficient substitute for traditional securities. The notional amount represents the contract amount, not the amount at risk. The notional amount of interest rate instruments was approximately \$15,600,000 and \$6,400,000 at December 31, 2012 and 2011, respectively. The notional amount of foreign currency instruments was approximately \$1,700,000 and \$5,600,000 at December 31, 2012 and 2011, respectively. The estimated fair value of derivative instruments at December 31, 2012 and 2011 is insignificant. For the years ended December 31, 2012 and 2011, a gain of \$1,381,146 and a gain of \$2,667,785, respectively, attributable to derivative instruments was recognized as investment income in the statement of changes in net assets available for benefits.

The investment managers, on behalf of the Master Trust, manage its interest rate and foreign currency risks by limiting exposure to and by monitoring the financial condition of each counterparty. In the unlikely event that a counterparty fails to meet the terms of an interest rate or foreign currency agreement, the Master Trust's risk is limited to the fair value of the instrument.

Note 6 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

The following tables present information about the Plan's assets measured at fair value on a recurring basis at December 31, 2012 and 2011 and the valuation techniques used by the Plan to determine those fair values.

Level 1 - Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Level 2 - Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, and other inputs such as interest rates and yield curves that are observable at commonly quoted intervals.

The Budd Company Pension Plan for Executive and Administrative Employees

Notes to Financial Statements December 31, 2012 and 2011

Note 6 - Fair Value Measurements (Continued)

Level 3 - Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset.

In instances whereby inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

The Plan's policy is to recognize transfers between levels of the fair value hierarchy as of the actual date of the event of change in circumstances that caused the transfer. There were no significant transfers between levels of the fair value hierarchy during 2012 and 2011.

The Budd Company Pension Plan for Executive and Administrative Employees

Notes to Financial Statements December 31, 2012 and 2011

Note 6 - Fair Value Measurements (Continued)

The Plan and Master Trust also hold other assets and liabilities not measured at fair value on a recurring basis, including accrued income, receivables for security sales, accrued liabilities, and payables and unsettled trades. The fair value of these assets and liabilities approximates the carrying amounts in the accompanying financial statements due to the short maturity of such instruments. Under the fair value hierarchy, these financial instruments are valued primarily using Level 2 inputs.

Investments in Entities that Calculate Net Asset Value per Share

The Plan holds shares or interests in investment companies at year end where the fair value of the investment held is estimated based on the net asset value per share (or its equivalent) of the investment company.

At December 31, 2012 and 2011, the fair value, unfunded commitments, and redemption rules of those investments are as follows:

Investments Held at December 31, 2012

The Budd Company Pension Plan for Executive and Administrative Employees

Notes to Financial Statements December 31, 2012 and 2011

Note 7 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code. Accordingly, no provision for income taxes has been made in the accompanying statements.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the trust and recognize a tax liability (or asset) if the trust has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2012, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes the Plan is no longer subject to tax examinations for years prior to 2009.

Note 8 - Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guaranty while other benefits may not be provided for at all.

Target Normal Cost

Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year.

Timing of Benefit Payments

Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

At-Risk Assumptions

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the lump sum form of payment.

The at-risk funding target was loaded 4% of the funding target calculated disregarding at-risk assumptions, plus \$700 per participant. The at-risk target normal cost was loaded 4% of the target normal cost calculated disregarding at-risk assumptions.

Actuarial value of assets

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22) . The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2011 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Change in assumptions and methods since prior valuation

There have been no changes in the assumptions and methods for funding purposes since the prior valuation other than updating the required interest segment rates and mortality table for one additional year of projection and application of interest rate corridors under MAP-21.

The expected rate of earnings for purposes of development of the actuarial value of assets as of January 1, 2012 was changed from 7.75% for the 2010 plan year to 7.25% for the 2011 plan year. Vested benefits upon termination of service

Eligibility: 5 years of Vesting Service.

Benefit: Accrued Benefit payable at age 65. The participant with 10 or more years of Vesting Service may elect a reduced pension starting immediately. The monthly retirement benefit is reduced for early commencement as follows:

Age	Factor	Age	Factor
65	100.0%	59	65.2%
64	92.3%	58	61.4%
63	85.6%	57	57.9%
62	79.6%	56	54.7%
61	74.3%	55	51.9%
60	69.5%		

The participant's accrued benefit will be reduced for the cost of the pre-retirement joint and survivor annuity coverage.

Normal form of retirement income

The normal form of benefit for a single participant is a monthly annuity payable for life. The normal form for a participant who is married on his annuity starting date is a split benefit, where half of the benefit is payable in a Joint and 50% Survivor form, and the other half is payable as a Joint & 60% Survivor form, with a pop-up in the event of the spouse's death before the retiree's death, for the portion of the benefit accrued before 2008. For the portion of the benefit accrued after 2007, the normal form for married participants is the Joint and 50% Survivor form.

The option conversion factors to calculate the normal form of payment from a straight life benefit for a married participant are:

- Option factor for Joint and 50% Survivor part of benefit: 87% decreased 0.5% for each year the retiree's age exceeds the spouse's age (minimum 77%) and increased 0.5% for each year the spouse's age exceeds the retiree's age (maximum 96%).
- Option factor for Joint and 60% Survivor part of benefit: 95% decreased 0.5% for each year the retiree's age exceeds the spouse's age by more than five years and increased 0.5% for each year the retiree's age exceeds the spouse's age by more than five years (maximum 100%).

Optional forms of payment

In lieu of the normal form of payment, the following actuarial equivalent optional forms of payment are available:

- Life Annuity
- Joint and Survivor Annuity with a 25%, 33-1/3%, 50%, 66-2/3%, 75% or 100% survivor benefit payable to the Participant's Spouse or other designated beneficiary (continuation percentages may be restricted for a non-spouse beneficiary depending on age of participant and beneficiary).

For the portion of the benefit accrued before 2008, participants may elect to receive their entire benefit under the Life Annuity or Joint and Survivor Annuity or receive half of their benefit under a form of payment listed above and the other half under the Joint and 60% Survivor Annuity described as part of the Normal form of payment.

Regardless of the form of payment selected, a participant other than a terminated vested participant, may elect to receive a temporary supplemental benefit of \$250, \$300 or \$350 per month payable until age 62, with an actuarially reduced benefit payable from age 62 on, for the portion of the benefit accrued before 2008.

If the actuarial equivalent for a terminated vested participant is less than \$5,000, the benefit shall be paid as a single sum payment.

In the event that the plan's AFTAP falls below certain thresholds employee may elect to bifurcate their benefit option or defer commencement until the option is no longer prohibited.

Pre-retirement death benefits

Eligibility: Completion of five or more years of Vesting Service and married at time of death.

Benefit: In the event of the death of an active participant after becoming eligible for early, normal or late retirement, the amount of the death benefit will be equal to the benefits payable as though the participant had terminated employment as of the date of death, elected the normal form of payment, and died the next day following the commencement of payments. If the employee and spouse have not been married for a full year prior to the date of death, the 50% Joint and Survivor form of payment will replace the Normal Form of payment. The participant will be treated as having given advance notice of retirement to determine the reduction factors for early commencement.

In the case where either (i) the employee was not yet eligible for early retirement at the date of death or, (ii) the participant was a former employee entitled to a deferred vested benefit, the benefit payable to the spouse is calculated as though the participant had terminated employment as of the date of death, elected the 50% Joint and Survivor form of payment commencing at the earliest age possible, and died the next day following the commencement of payments. The participant will be treated as not having given advanced notice of retirement to determine the reduction factors for early commencement.
