US Labs & Radiology 401(k) Plan

Notes to Financial Statements

Note 1. Description of Plan

The following description of the US Labs & Radiology 401(k) Plan (the "Plan") provides only general information. Participants should refer to the Plan agreement for a more comprehensive description of the Plan's provisions.

General: The Plan is a defined contribution plan covering all eligible employees of US Labs & Radiology, Inc. (the "Plan Sponsor" or the "Company"), as defined. An employee must be 21 years of age and have three months of service to be eligible to become a participant in the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Contributions: Participants may contribute up to 75% of their annual pretax compensation, as defined by the Plan, subject to statutory limits. Participants age 50 or older may elect to defer additional amounts ("catch-up contributions") to the Plan. Participants may also contribute amounts representing distributions from other qualified defined benefit or contribution plans (rollovers). The Company may provide discretionary matching and/or profit sharing contributions determined at year-end by management. Discretionary contributions shall only be made on behalf of participants who are employed on the last day of the plan year. The Company elected to make a contribution of \$14,429 for 2012.

Participant Accounts: Each participant's account is credited with the participant's contributions and allocations of the Company's discretionary contributions, if any, and the Plan investment earnings and charged with distributions and an allocation of Plan investment earnings (losses) and administrative expenses. Allocations are based on participant contributions, compensation or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting: Participants are immediately vested in their salary deferrals and rollover contributions plus actual earnings (losses) thereon. Vesting in the Company contribution portion of their accounts plus actual earnings (losses) thereon is based on years of continuous service. A participant is 100% vested in the Company contribution portion after completing three years of credited service.

Notes Receivable from Participants: Participants may borrow from their accounts a minimum of \$1,000 and up to a maximum equal to the lesser of \$50,000 or 50% of their vested account balance. Loan terms range from one to five years or up to 30 years for the purchase of a primary residence. The notes are secured by the vested balance in the participant's account and bear interest at a rate commensurate with local prevailing rates. As of December 31, 2012, the notes bear interest at annual rates that range from 4.25% to 6.25%. Principal and interest are paid ratably through bi-weekly payroll deductions. Upon termination of employment, the outstanding principal and interest balance is immediately payable.

Payment of Benefits: Upon termination of service, due to death, disability or retirement, as defined, a participant or his or her designated beneficiary may elect to receive a lump-sum distribution equal to the value of the participant's vested interest in his or her account. The Plan provides for automatic distribution of account balances less than \$5,000 for terminated participants. A participant may also elect to receive in-service distributions under the Plan upon the attainment of age 59 ½. Hardship withdrawals of participant contributions are permitted.

US Labs & Radiology 401(k) Plan

Notes to Financial Statements

Note 1. Description of Plan (Continued)

Forfeitures: Forfeited balances of terminated participants' nonvested accounts are used to reduce Company contributions. To the extent the Company does not have contributions to the Plan, forfeitures can be used to reduce the Plan's administrative expenses. The amount of nonvested forfeited amounts shall be restored to a terminating participant's account upon resuming employment with the Company, as defined by the Plan. At December 31, 2012 and 2011, there were no forfeited nonvested accounts and no forfeitures were used during 2012.

Investment Options: Participants must direct their salary deferral contributions and employer contributions to selected investments as made available and determined by the Plan Administrator. Participants may change their investment fund options at any time.

Note 2. Summary of Significant Accounting Policies

Basis of Presentation: The accompanying financial statements have been prepared on the accrual method of accounting.

Investment Valuation and Income Recognition: Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's management determined the Plan's valuation policies utilizing information provided by the trustee.

The Plan invests in the Gartmore Morley Stable Value Series Fund, a common collective trust fund, which is invested in investment contracts. Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for the benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. The statement of net assets available for benefits presents the fair value of the investment contracts as well as the adjustment of the fully benefit-responsive investment contracts from fair value to contract value. The statement of changes in net assets available for benefits is prepared on a contract value basis.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Investment securities are exposed to various risks, such as interest rate, market, and credit risk. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the value of investment securities will occur in the near-term and such changes could materially affect participant account balances and the amounts reported in the Statements of Net Assets Available for Benefits.

Notes Receivable from Participants: Notes receivable from participants are measured at their unpaid principal balance plus any accrued but unpaid interest. Delinquent participant loans are reclassified as distributions based upon the terms of the plan document.

Use of Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of net assets available for benefits and changes therein. Actual results could differ from those estimates.

Payment of Benefits: Benefits are recorded when paid.

Note 2. Summary of Significant Accounting Policies (Continued)

Administrative Expenses: As provided by the Plan agreement, administrative expenses related to Plan investments and recordkeeping are paid by the Plan and charged to participants. Loan origination fees are charged to the borrower/participant. Fees related to distributions from the Plan are charged to the beneficiary/participant. Other administrative fees related to the Plan, including certain professional fees (e.g., legal and consulting fees) are paid by the Company.

Income Taxes: GAAP requires Plan management to evaluate tax positions taken by the Plan, and recognize a tax liability (or asset) if the Plan has taken any uncertain tax positions that more likely than not would be sustained upon examination by a tax authority. Management evaluated the Plan's tax positions and concluded that that Plan had maintained its tax-exempt status and had taken no uncertain tax positions that require adjustment to the financial statements. Therefore, no provision or liability for income taxes has been included in the financial statements. With few exceptions, the Plan is no longer subject to income tax examinations by the U.S. federal, state or local tax authorities for years before 2009.

Subsequent Events: The Plan has evaluated subsequent events (events occurring after December 31, 2012) through October 14, 2013, the date the financial statements were available to be issued.

Note 5. Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

US Labs & Radiology 401(k) Plan

Notes to Financial Statements

Note 5. Fair Value Measurements (Continued)

An asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

To assess the appropriate classification of investments within the fair value hierarchy, the availability of market data is monitored. Changes in economic conditions or valuation techniques may require the transfer of investments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

The Plan evaluates the significance of transfers between levels based upon the nature of the investment and size of the transfer relative to total net assets available for benefits. For the year ended December 31, 2012, there were no significant transfers in or out of Levels 1, 2 or 3.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in valuation methodologies at December 31, 2012, compared to December 31, 2011.

Registered investment companies (mutual funds): Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value ("NAV") and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Common collective trust: Valued at the NAV of shares held by the plan at year end. The NAV, as provided by the Trustee, is used as a practical expedient to estimating fair value. The NAV is based upon the fair value of the underlying investments comprising the trust less its liabilities. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2012 and 2011:

Description	Assets at Fair Value as of December 31, 2012

Note 5. Fair Value Measurements (Continued)

Description	Assets at Fair Value as of December 31, 2011			
	Total	Level 1	Level 2	Level 3
Cash	\$ -	\$ -	\$ -	\$ -
Mutual funds				
Fixed income	197,852	197,852	-	-
Large U.S. equity	266,252	266,252	-	-
Small/mid-size U.S. equity	123,778	123,778	-	-
International equity	155,002	155,002	-	-
Common collective trust	162,039	-	162,039	-
Total	\$ 904,923	\$ 742,884	\$ 162,039	\$ -

The fair value of the common collective trust is estimated using the net asset value per share of the underlying investments. The investment objective is to protect principal while providing a higher rate or return than shorter term investments, such as money market funds. The fund invests at least 70% of its net assets in investment contracts. Its strategy seeks to invest primarily in investment grade debt. These strategies may also include investing up to 30% of its net assets in cash equivalents, including U.S. Treasuries and other debt guaranteed by the U.S. Government. As of December 31, 2012, the administrator of the common collective trust believes the occurrence of an event that would limit the ability of the common collective trust to transact at contract value with its participants is not probable. Units are issued and redeemed daily based on the net asset value of the common collective trust which is determined daily. Unit holders have agreed to the payment of redemption over a period of up to twelve months under certain circumstances. There were no unfunded commitments as of December 31, 2012.

Note 6. Party-in-Interest Transactions

The Plan issues loans to participants which are secured by the balances in the participants' accounts, therefore, transactions with participants qualify as party-in-interest transactions.

Note 7. Plan Termination

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event the Plan terminates, participants will become 100% vested in their accounts.

Note 8. Tax Status

Effective January 1, 2009, the Plan adopted a Volume Submitter Profit Sharing Plan with CODA sponsored by CCH Incorporated. The Volume Submitter Plan has received an opinion letter from the Internal Revenue Service as to the plan's qualified status. The Volume Submitter Plan opinion letter has been relied upon by this Plan. The Plan Administrator believes the Plan is designed and is being operated in compliance with the applicable provisions of the Internal Revenue Code.

Note 9. Prohibited Transactions

During 2012, the Plan sponsor inadvertently failed to deposit \$1,563 of participant contributions within the required timeframe as stated by the United States Department of Labor ("DOL") regulations. The Plan sponsor deposited lost earnings in the amount of approximately \$1 to correct this failure.
