Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Participants and Administrator
Retirement Plan for Certain Agricultural, Brewery
and Packaging Hourly Employees

Report on the financial statements

We have audited the accompanying financial statements of the Retirement Plan for Certain Agricultural, Brewery and Packaging Hourly Employees (the Plan), which comprise the statements of net assets available for benefits as of December 31, 2012 and 2011, and the related statements of changes in net assets for the years then ended, and the related notes to the financial statements.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes

evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2012, and changes therein for the year then ended, and its financial status as of December 31, 2011, and changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

RETIREMENT PLAN FOR CERTAIN AGRICULTURAL, BREWERY AND PACKAGING HOURLY EMPLOYEES

NOTES TO FINANCIAL STATEMENTS

December 31, 2012 And 2011

1. Description Of The Plan

The following brief description of the Retirement Plan for Certain Agricultural, Brewery and Packaging Hourly Employees (the Plan) is intended to give a general summary of its principal provisions. Participants should refer to the Plan Document for more complete information.

General

The Plan is a defined benefit plan that provides normal retirement, early retirement, disability and death benefits to certain eligible union and nonunion employees of Anheuser-Busch, LLC (the Company). Employees do not contribute to the Plan. The Plan is subject to the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

The Company amended the Plan to freeze the accrual of future benefits for certain participants in the Plan. Once the Plan is frozen, there will be no loss in vested benefits of the participants, and no additional accrual of service credit after that date.

Plan Administration

The Plan Administrator is the Company. The Plan's custodian and trustee is The Bank of New York Mellon (Mellon). Mellon, as sole trustee of the Plan, holds all Plan assets and is responsible for benefit payments from the Anheuser-Busch Companies, LLC Master Defined Benefit Trust (Master Trust) according to information submitted by the Plan Administrator.

Plan Contributions

The Company makes contributions to the Plan to satisfy the minimum funding requirements as determined by the Plan's actuary (Note 4).

**RETIREMENT PLAN FOR CERTAIN
AGRICULTURAL, BREWERY AND
PACKAGING HOURLY EMPLOYEES**

Notes To Financial Statements (*Continued*)

Plan Benefits

Plan benefits are determined in accordance with the provisions of each supplement to the Plan Document.

Vesting service is used in determining eligibility for early retirement and disability benefits, as defined in each supplement to the Plan Document.

Expenses Of The Plan

Under the Master Trust agreement with the Trustee, the Company may pay all expenses incurred in the administration of the Plan, including trustee fees, but is not obligated to do so. Trustee expenses not paid by the Company are paid by the Master Trust and proportionately allocated to participating plans. All other direct expenses are paid by the Plan.

Plan Termination

The Company anticipates the Plan will continue without interruption but reserves the right to discontinue its participation in the Plan. In the event that such discontinuance results in termination of the Plan, the Plan provides that the net assets will be allocated among the participants and beneficiaries of the Plan in the order of preference and in the manner outlined in the Plan Document. To the extent unfunded vested benefits exist, ERISA provides that such benefits are payable by the Pension Benefit Guaranty Corporation (PBGC) to participants, up to specified limitations. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all.

2. Summary Of Significant Accounting Policies

Basis Of Accounting

The Plan's financial statements are prepared on the accrual basis of accounting.

Use Of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements and the reported amounts of additions to and deductions from net assets during the reporting period. Actual results could differ from those estimates.

Investment Valuation And Income Recognition

The Plan's investments are reported at fair value. See Note 6 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation in fair value of investments includes the Master Trust's gains and losses on investments bought and sold as well as held during the year.

Allocation Of Assets In Master Trust

The Master Trust was established for the investment of the Plan's assets and certain other Company sponsored retirement plans.

The interest of each participating plan is represented in units. Each unit represents an undivided interest in the Master Trust. The value of each plan's interest in the Master Trust is based on the beginning of year value of the plan's interest in the trust plus actual contributions and allocated investment income, net of investment expenses, less actual distributions and allocated administrative expenses. The allocation of investment income and administrative expenses is based on each plan's ownership of Master Trust units at the end of each month.

Payment Of Benefits

Benefit payments are recorded when paid.

**RETIREMENT PLAN FOR CERTAIN
AGRICULTURAL, BREWERY AND
PACKAGING HOURLY EMPLOYEES**

Notes To Financial Statements (*Continued*)

3. Recent Accounting Pronouncements

In May 2011, the FASB issued guidance to improve the comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with GAAP and International Financial Reporting Standards. The amendments are of two types: (i) those that clarify the application of existing fair value measurement and disclosure requirements and (ii) those that change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements. The update is effective for annual periods beginning after December 15, 2011. The implementation of this guidance is disclosed in Note 6.

4. Funding Policy

Pension contributions are funded by the Company. Annually, an independent actuary performs a valuation of the Plan and related trust fund to determine the status of the fund and the normal cost and contribution limits prescribed by ERISA. The methods of valuation employed by the actuary were the Traditional Unit Credit Method for liabilities and a smoothed value of assets. The Plan met the minimum funding requirements of ERISA, as determined by the independent actuary, for the Plan years ended December 31, 2012 and 2011.

5. Actuarial Present Value Of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on an employee's credited service. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered up to the valuation date.

RETIREMENT PLAN FOR CERTAIN AGRICULTURAL, BREWERY AND PACKAGING HOURLY EMPLOYEES

Notes To Financial Statements (*Continued*)

The actuarial present value of accumulated plan benefits is determined by the Plan's independent actuary by applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment.

Significant actuarial assumptions used in the valuation as of January 1, 2012 and 2011 are as follows:

Mortality:

2012	RP-2000 Mortality Tables for males and females, with blue-collar adjustment, projected to 2016 using Scale AA with a two year set-forward age adjustment
2011	RP-2000 Mortality Tables for males and females, with blue-collar adjustment, projected to 2015 using Scale AA with a two year set-forward age adjustment

Assumed rate of return:

2012	7.2%
2011	7.5%

Retirement:

2012	According to a graded retirement schedule based on years of service and age Years of service - less than 30 years or 30 years or more Age - ranges from age 55 to age 68
2011	According to a graded retirement schedule based on years of service and age Years of service - less than 30 years or 30 years or more Age - ranges from age 55 to age 65

Actuarial Cost Method:

2012	Traditional unit credit
2011	Traditional unit credit

The foregoing actuarial assumptions were based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Direct Financing Lease

The Company has contributed real estate properties to the Master Trust, which are leased back to the Company through a direct financing lease. Revenue from the direct financing lease is recognized over the lease term on the interest method, which results in a level rate of return on the net investment in the lease.

The components of the Master Trust's direct financing lease at December 31, 2012 and 2011 are as follows:

	<u>2012</u>	<u>2011</u>
Future minimum rentals receivable	\$ 260,538,338	\$ 253,155,779
Unearned income to be recognized in future years	(131,129,478)	(132,177,361)

Fair Value Measurements

The Master Trust follows current accounting standards, which provide a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Master Trust has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

**RETIREMENT PLAN FOR CERTAIN
AGRICULTURAL, BREWERY AND
PACKAGING HOURLY EMPLOYEES**

Notes To Financial Statements (*Continued*)

Following is a description of the valuation methodologies used for assets measured at fair value:

Collective Trusts

The fair values of participation units held in the collective trusts are based on the net asset value (NAV) of the underlying investments as reported by the fund managers at the end of the Plan year. The Master Trust is permitted to redeem investment units at NAV on the measurement date, and as a result, the investment is classified as a Level 2 asset in the fair value hierarchy.

Real Estate Properties

The fair value of the real estate properties held by the Plan is valued on the basis of its market value based upon independent appraisals of each property conducted by an independent, MAI-certified appraiser. The appraisals were based upon a combination of the sales comparison and income capitalization approaches, consistent with prior year. The appraiser takes into account historical and projected cash flow, the terms of the lease on the property and comparable sales, and as a result, the investment is classified as a Level 3 asset in the fair value hierarchy.

The valuation process involves the Plan's independent fiduciary's selection of an independent, MAI-certified appraiser. The independent fiduciary and representatives of the tenants accumulate the data concerning the properties for the appraiser. The appraiser prepares draft reports for each property which the Plan's independent fiduciary reviews in detail and discusses with the appraiser. The final report for each property is approved by the independent fiduciary and delivered to the Plan's Trustee. Management reviews the results of the certified appraisals and believes the results are fairly stated.

Short-Term Investments

Short-term investments are considered to be cash equivalents due to their short maturities, and are valued at cost, which approximates fair value. The Master Trust is permitted to redeem investment units at NAV on the measurement date, and as a result, the investment is classified as a Level 2 asset in the fair value hierarchy.

**RETIREMENT PLAN FOR CERTAIN
AGRICULTURAL, BREWERY AND
PACKAGING HOURLY EMPLOYEES**

Notes To Financial Statements *(Continued)*

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth, by level within the fair value hierarchy, assets measured at fair value on a recurring basis at December 31, 2012 and 2011:

			Caparable capitalization rates	6.20% - 12.02%

There have been no changes in the valuation methodologies used at December 31, 2012 or 2011.

7. Transactions With Parties-In-Interest

The Master Trust holds investments in collective trust funds managed by the Trustee. Therefore, these transactions are allowable party-in-interest transactions under ERISA.

The Master Trust also holds operating properties that are leased to the Company. The fair value of the properties at December 31, 2012 and 2011 was \$152,650,000 and \$138,260,000, respectively. The Master Trust received rental payments for the years ended December 31, 2012 and 2011 of \$11,466,800 and \$10,487,524 respectively. These transactions are allowable party-in-interest transactions under ERISA.

**RETIREMENT PLAN FOR CERTAIN
AGRICULTURAL, BREWERY AND
PACKAGING HOURLY EMPLOYEES**

Notes To Financial Statements (*Continued*)

8. Income Tax Status

The IRS has determined and informed the Company by a letter dated January 25, 2012, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code (the IRC). Therefore, the underlying trust of such a plan is exempt from federal income taxes under Section 501 of the Code. The Plan has been amended since receiving the latest determination letter, however, the Plan Administrator and the Plan's tax counsel believe that the Plan is designed and being operated in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements.

GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS or other applicable taxing authorities. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan Administrator believes it is no longer subject to income tax examinations for Plan years prior to 2009.

9. Risks And Uncertainties

Investment securities are exposed to various risks such as significant world events, interest rate, credit and overall market volatility risk. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is reasonably possible that changes in the values of investments will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Schedule SB, Line 4 Additional Information for Plans in At-risk Status

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the normal form of payment for employees covered by the Supplement for the Supplemental Retirement Plan for Locals 6 and 367 Teamster Employees of Anheuser-Busch, Inc., a 10-year certain (normal form of payment for employees at the Manitowoc location) for employees covered by the Supplement for the Busch Agricultural Resources Plan for Hourly Employees, and a single life annuity (10-year certain for employees at the Arnold, Columbus, and Jacksonville locations) for employees covered by the Supplement for Anheuser-Busch Packaging Group Hourly Employee Retirement Plan.

Covered Group

Employees covered by the Supplement for the Supplemental Retirement Plan for Locals 6 & 367 Teamster Employees

Effective Date

The following plan provisions reflect those in the plan document restated and effective on January 1, 2011, including the second amendment signed December 15, 2011.

Plan Year

The twelve-month period ending December 31.

Coverage and Participation

All employees are eligible to participate under the plan on the first of the month coincident with or next following date of hire as a union employee. "Employee" means any person who is covered by the collective bargaining agreement between the Company and Local No. 6 and Local No. 367, both affiliated with the International Brotherhood of Teamsters, Chauffeurs, Warehousemen, and Helpers of America.

Credited Service

Years and fractions thereof credited to a participant under the St. Louis Teamster Brewery Workers Pension Plan.

Vesting Service

The number of calendar years in which credited service is at least 1,000 hours.

Normal Retirement Benefit

Normal Retirement Date: The first of the month coincident with or next following age 65.

Monthly Benefit Formula: \$1.80 times credited service, which is limited to 25 years.

Normal Form of Benefit: Life Only.

Optional Forms of Benefit: Temporary life only, ERISA 50% joint and survivor, temporary 50% joint and survivor, ERISA 75% joint and survivor.

Late Retirement

If retirement occurs after the normal retirement date, the late retirement income will be equal to the normal retirement benefit calculated using credited service as of the late retirement date, offset by the actuarial equivalent value of any retirement payments received.

Early Retirement Benefit

Eligibility: Age 56 and 10 years of credited service. Benefits commence the first of the month following the participant's Retirement Date. Retirement Date means the first of the month coincident with or immediately following the later of the attainment of age 56 and the date the participant retires under the plan.

At-Risk Calculations

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the normal form of payment.

Methods

Valuation date

First day of the plan year

Funding target

Present value of accrued benefits

Target normal cost

Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year

Asset method

Average of the fair market value of assets on the valuation date and the dates 12 and 24 months before the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22) . The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2011 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants.

Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under the plan.

Changes in assumptions and methods since last actuarial valuation

1. The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2010 to September 2011.
2. The segment rates used to determine minimum funding requirements and benefit restrictions were revised by applying the corridors of MAP-21.
3. The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.
4. The assumed plan-related expenses added to the target normal cost were changed from \$1,025,000 to \$1,250,000.

At-Risk Calculations

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the normal form of payment (for the Manitowoc location) and the 10-year certain (for all other locations).

Asset method

Average of the fair market value of assets on the valuation date and the dates 12 and 24 months before the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22) . The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2011 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not included in valuation

Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants.

Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under the plan.

The plan pays small benefits (with a present value up to \$5,000) in a single lump sum payment. Such lump sums are not explicitly valued as such; rather such participants' benefits are valued using the benefit choice assumptions described above.

Changes in assumptions and methods since last actuarial valuation

1. The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2010 to September 2011.
2. The segment rates used to determine minimum funding requirements and benefit restrictions were revised by applying the corridors of MAP-21.
3. The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.
4. The assumed plan-related expenses added to the target normal cost were changed from \$1,025,000 to \$1,250,000.

10-year certain annuities are valued using the substitution of annuity form under Proposed IRC §1.430(d)-1(f)(4). The 2012 unisex PPA combined optional post-retirement mortality table is used for conversions.

Marriage

For purposes of valuing the pre-retirement surviving spouse's benefit, 90% of eligible participants are assumed to be married and male spouses are assumed to be 3 years older than female spouses.

Employees

Employee data was supplied electronically by Anheuser-Busch. Data on persons receiving benefits was supplied electronically by Anheuser-Busch. It was assumed that there will be no new or rehired employees.

At-Risk Calculations

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the normal form of payment (for the Manitowoc location) and the 10-year certain (for all other locations).

Asset method

Average of the fair market value of assets on the valuation date and the dates 12 and 24 months before the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22) . The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2011 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not included in valuation

Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants.

Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under the plan.

The plan pays small benefits (with a present value up to \$5,000) in a single lump sum payment. Such lump sums are not explicitly valued as such; rather such participants' benefits are valued using the benefit choice assumptions described above.

Changes in assumptions and methods since last actuarial valuation

1. The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2010 to September 2011.
2. The segment rates used to determine minimum funding requirements and benefit restrictions were revised by applying the corridors of MAP-21.
3. The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.
4. The assumed plan-related expenses added to the target normal cost were changed from \$1,025,000 to \$1,250,000.

Methods

Valuation date

First day of the plan year

Funding target

Present value of accrued benefits

Target normal cost

Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year

Asset method

Average of the fair market value of assets on the valuation date and the dates 12 and 24 months before the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22) . The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2011 plan year.)

that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not included in valuation

Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants.

Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under the plan.

The plan pays small benefits (with a present value up to \$5,000) in a single lump sum payment. Such lump sums are not explicitly valued as such; rather such participants' benefits are valued using the benefit choice assumptions described above.

Changes in assumptions and methods since last actuarial valuation

1. The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2010 to September 2011.
2. The segment rates used to determine minimum funding requirements and benefit restrictions were revised by applying the corridors of MAP-21.
3. The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.
4. The assumed plan-related expenses added to the target normal cost were changed from \$1,025,000 to \$1,250,000.
5. The assumed retirement rates for participants at the Newburgh location have changed to reflect anticipated experience. The rates used last year were the same as shown above, except there was no additional 5% reduction for ages 60-67.
6. The assumed representative termination rates for participants at the Newburgh location have changed to reflect anticipated experience. The rates used last year were the same as shown above, except the multipliers shown above applied for those with less than four years of employment.
