NOTE 1 - DESCRIPTION OF PLAN

The following is a brief description of the Memphis Publishing Company Mailers' Union No. M-119 of the International Brotherhood of Teamsters Retirement Benefit Plan (Plan) which was most recently amended effective August 31, 2010. Participants should refer to the Plan agreement for more complete information.

General

As mentioned above, the plan was amended on July 14, 2010 effective on August 31, 2010; this amendment was to "freeze" the plan, as no further participants are allowed after the effective date of the amendment, and no further accruals of service will be used after the effective date of the amendment. The Plan is a defined benefit pension plan covering all employees in the Collective Bargaining Unit represented by the Union who were hired before August 31, 2010.

Pension Benefits

Benefit Level

From January 1, 1999 through December 31, 2001 the monthly benefit provided under the plan was calculated as \$22 times the number of years of service. The monthly benefit calculation was updated January 1, 2002 to be \$30 times the number of years of service.

Service Credit

Service credit for service prior to January 1, 1958 is equal to service shown on cards prepared by the Publisher and signed by employee. Service credit for service after January 1, 1958 shall be granted for each calendar year in which the employee completes 220 straight time shifts. A proportionate part of the year shall be granted for less than 220 straight shifts except that no credit will be given for less than 10 straight shifts.

However, no service credit will accrue after August 31, 2010. Also, maximum years of service credit for purposes of this plan are forty-five (45).

Eligibility Service

Eligibility service before January 1, 1976 shall be computed in the same manner as service credit above. For periods on or after January 1, 1976 it shall be credited for each calendar year beginning with 1976 in which the employee completes 1,000 or more hours. But no service after August 31, 2010 will be considered eligible.

Break-in Service

A one year break-in service occurs for any calendar year in which an employee is compensated for fewer than 501 hours or fewer than 10 straight time shifts, provided the employee is not on an approved leave of absence.

NOTE 1 - DESCRIPTION OF PLAN (continued)

Normal Retirement Benefit

Normal retirement begins after age 65 and the completion of 5 or more years of eligibility service. The amount of the monthly benefit payable for life is determined annually in advance by the Board with advice from the actuary. If the employee has less than 45 years of service credit, the benefit is reduced accordingly.

Postponed Retirement Benefit

The monthly benefit is equal to the normal pension based on service at actual retirement date.

Early Retirement Benefit

After age 55 and the completion of 10 or more years of service credit, the benefit amount is determined as for normal retirement but reduced by .6% for each month the payments begin prior to age 65.

Vested Lump Sum Benefit

A lump sum benefit may be paid at any age, provided the employee has 10 years of service credit. The benefit is equal to 50% of the aggregate contributions made on behalf of the employee after January 1, 1964 if he has less than 15 years of service credit. The benefit is 75% of the aggregate contributions made on behalf of the employee after January 1, 1964 if he has more than 15 years of service credit. If this benefit is paid, the participant may not be eligible to receive a deferred withdrawal benefit.

Deferred Withdrawal Benefit

A deferred withdrawal benefit may be available at any age, provided the employee has 5 years of eligibility service. The benefit payable at age 65 for life is computed as for normal retirement, considering service to date of normal retirement and is then reduced by the ratio that accrued service bears to the anticipated service the employee would have at his normal retirement date.

Disability Benefit

Upon disability, a benefit is available at any age prior to 65, provided the employee has 15 years of service credit. The benefit payable immediately for life is computed as for normal retirement, considering service to date of disability.

NOTE 1 - DESCRIPTION OF PLAN (continued)

Death Benefit

An automatic survivorship option becomes operative in the form of a 100% survivorship annuity upon actual retirement payable to the designated spouse of the employee if they have been married at least one year; though there are some exceptions.

Asset Priority Upon Plan Termination

Should the plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all.

Party-in-Interest Transactions

The Plan's trustee, Russell Trust Company (Russell), is also a fund service provider offering various mutual funds, money funds, and fixed income funds which are held as investments in the plan. This arrangement results in Russell receiving indirect (fund management) compensation from the plan in addition to direct compensation they receive for holding the Plan's assets. The receivable from investments sold on the balance sheet is due from this party-in-interest.

NOTE 2 - SUMMARY OF ACCOUNTING POLICIES

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

Payment of Benefits

Benefit payments to participants are recorded upon distributions.

Valuation of Investments

Financial Accounting Standards Board Accounting Standards Codification (FASB ASC) 820, Fair Value Measurements and Disclosures, as amended. FASB ASC 820 establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described below:

RETIREMENT BENEFIT PLAN
NOTES TO FINANCIAL STATEMENTS
For the Years Ended December 31, 2012 and 2011

NOTE 2 - SUMMARY OF ACCOUNTING POLICIES (continued)

Valuation of Investments (continued)

Level 1 : Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 : Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 : Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2011 and 2010:

Assets at Fair Value as of December 31, 2012

NOTE 2 - SUMMARY OF ACCOUNTING POLICIES (continued)

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Risks and Uncertainties

Plan contributions are made, and the actuarial present value of accumulated Plan benefits are reported, based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term, and due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements.

The Plan's assets are concentrated in investment securities. These securities are exposed to various risks such as interest risk, market risk, and credit risk. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term, and that such changes could materially affect the amounts reported in the financial statements.

Date of Management's Review

Management has evaluated subsequent events through October 14, 2013, which was the date the financial statements were available to be issued. (See Note 8).

NOTE 3 - ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' compensation and years of credited service computed under a formula included in the plan. Significant assumptions are made by the actuary in determining the accumulated plan benefits, including a discount rate of 4.23% and 5.25% for 2012 and 2011, respectively. Other significant assumptions are listed in the actuary's report.

The actuarial present value of accumulated plan benefits, determined 01/01/13 by the actuary, Towers Watson (formerly named Towers Perrin), a global professional services firm with headquarters in Stamford, CT, is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected payment date.

MEMPHIS PUBLISHING COMPANY AND MEMPHIS MAILERS' UNION NO. M-119
OF THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS
RETIREMENT BENEFIT PLAN
NOTES TO FINANCIAL STATEMENTS
For the Years Ended December 31, 2012 and 2011

NOTE 3 - ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS (continued)

The significant actuarial assumptions used in the valuation as of January 1, 2013 from the latest report dated August 2013 were (a) life expectancy of participants, (b) retirement age assumptions, the assumed average retirement age was 61, and (c) investment return. The 2012 and 2011 valuations included assumed average rates of return of 4.65% and 5.30%, respectively, including a reduction to reflect anticipated administrative expense equal to prior year's associated with providing benefits.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits, as detailed in the Plan agreement.

NOTE 4 - FUNDING POLICY

The actuary calculates the contributions needed according to the unit credit method. This method is partially based upon the assets' fair values, which were, as of December 31, 2012 and December 31, 2011 approximately 110.1% and 91.0% respectively of the present value of all benefits to be paid by the Plan. These percentages included Employer contributions and Plan contributions receivable of \$0 and \$70,000 for 2012 and 2011 plan years, respectively. The Plan has met the minimum funding requirements of ERISA for 2012 and 2011. Prior service cost increases or decreases in the projected benefit obligation are netted and then amortized on a straightline basis over the expected average remaining service of the active employees expected to benefit under the plan. See the Actuarial report for further details on the funding policy.

NOTE 5 - INCOME TAX

The Internal Revenue Service ruled by an updated determination letter dated August 5, 2002 that the Plan was still qualified under Section 401(a) of the Internal Revenue Code (IRC) and is therefore not subject to tax under present income tax law. Once qualified, the Plan is required to operate in conformity with the IRC to maintain its qualification. The Pension Administrative Committee is not aware of any course of action or series of events that have occurred, including plan amendments subsequent to receipt of the determination letter, that adversely affect the Plan's qualified status.

NOTE 6 - DIFFERENCES FROM FORM 5500

Any differences between the Annual Return/Report of Employee Benefit Plan, Form 5500, and these financial statements are a result of different classifications between line items. Total Plan assets are in agreement.

Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
