General

The Plan participates in a deferred compensation salary reduction plan program available to Credit Union National Association, Inc. (the Company). The Plan qualifies as a tax-exempt plan under the provisions of the Internal Revenue Code (IRC) and complies with the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Eligibility

The Plan covers substantially all employees of the Company as of the date of hire.

Contributions

Participant: As a condition of employment, participants are required to contribute a minimum of 3% of annual compensation, as defined in the Plan. Participants may also make voluntary contributions into the Plan, subject to certain limitations. Employees who do not affirmatively elect to defer compensation into the Plan, an automatic enrollment of 6% will be deferred. Participants can elect to waive this auto enrollment. Participants who have attained age 50 before the end of the Plan year are eligible to make catch-up contributions. Participants may also contribute amounts representing distributions from other qualified defined benefit or defined contribution plans. The Plan also allows Roth elective deferrals to be made to the Plan.

Employer: The Company makes a profit sharing contribution to the Plan, contributing 5% of compensation of eligible participants. This profit sharing contribution totaled approximately \$1,125,300 and \$1,048,900 during 2012 and 2011, respectively. NOTE 1 - DESCRIPTION OF THE PLAN (continued)

Participant Accounts

Each participant's account is credited with the participant's contribution and allocations of the Company's contributions and Plan earnings. Allocations are based on participant compensation or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting

Participants are immediately vested in their contributions, the Company's lump sum contribution, and actual earnings thereon. The Company safe harbor matching contribution is 100% vested as well as any Company matching contributions made to the Plan. Vesting in the Company's profit sharing portion of their accounts plus actual earnings thereon is based on years of service. A participant becomes 100% vested after five years of credited service.

Participant Investment Options

Participants must direct their accounts to selected investments as made available and determined by the Plan sponsor. Participants may change their investment options at any time.

Notes Receivable from Participants

Participants may borrow from their fund accounts a minimum of \$1,000 up to a maximum equal to the lesser of \$50,000 or 50% of their vested account balance. The notes are secured by the participant's account balance and bear interest at rates that range from 4.25% to 7.65%, which are commensurate with the prevailing interest rates charged on similar commercial notes under like circumstances by persons in the business of lending money. Terms of the note may not exceed five years, unless the note qualifies as a home loan. Principal and interest is paid ratably through payroll deductions.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting.

Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. The Plan invests in investment contracts with an insurance company. The statements of net assets available for benefits presents the fair value of the investment contracts with insurance company as well as the adjustment of the investment contracts with insurance company from fair value to contract value relating to the underlying investment contracts held by the insurance company. The statement of changes in net assets available for benefits is prepared on a contract value basis.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price which would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at measurement date. See Note 4 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is accounted for on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation/(depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities; it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' accounts balances and the amounts reported in the statement of net assets available for benefits.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Payments of Benefits

Benefit payments to participants are recorded when paid.

Notes Receivable from Participants

Notes receivable from participants are measured at their unpaid principal balance plus any accrued but unpaid interest. Delinquent participant loans are reclassified as distributions based upon the terms of the plan document.

NOTE 4 - FAIR VALUE MEASUREMENTS

Accounting principles generally accepted in the United States of America establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements).

CREDIT UNION NATIONAL ASSOCIATION, INC
CAPITAL ACCUMULATION PLAN
NOTES TO FINANCIAL STATEMENTS
December 31, 2012 and 2011

NOTE 4 - FAIR VALUE MEASUREMENTS (continued)

The three levels of the fair value hierarchy are described as follows:

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 - Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies utilized as of December 31, 2012 and 2011.

Shares of registered investment companies are reported at fair value based on the quoted market price of the fund which represents the net asset value of the shares held by the Plan at year-end.

Common/collective trusts are reported at fair value based on the underlying investments comprising of the common/collective trusts as reported by the trust's sponsor using the audited financial statements of the common/collective trusts at year-end. The NAV, as provided by the custodian, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV. Participant transactions (purchased and sales) may occur daily. The common/collective trusts represent investments with various investment managers. The respective fair values of these investments are determined by reference to the fund's underlying assets, which are principally marketable equity and fixed income securities and cash equivalents. Units held in the collective fund are valued based on the market prices of the underlying investments in the funds at year-end.

NOTE 4 - FAIR VALUE MEASUREMENTS (continued)

Investment contracts with insurance company are reported at fair value and are calculated by discounting the related cash flows based on current yields of similar instruments with comparable durations. Since the participants transact at contract value, fair value is determined annually for financial statement reporting purposes only.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2012:

NOTE 5 - INVESTMENT CONTRACT WITH INSURANCE COMPANY

The Plan has entered into a benefit-responsive stable value account in a group annuity contract with CMFG Life Insurance Company. CMFG Life Insurance Company maintains the contributions in an active life fund. This account is credited with interest at the rate specified in the contract and charged for participant withdrawals. Since the stable value account in the group annuity contract is fully benefit-responsive, contract value is the relevant measurement attribute for that portion of the net assets attributable to the stable value account in the group annuity contracts. Contract value, as reported to the Plan by CMFG Life Insurance Company, represents contributions made under the contract, plus earnings, less participant withdrawals. Participants may ordinarily direct the withdrawal or transfer all or a portion of their investment at contract value, less applicable penalties.

The average yields based on actual earnings were approximately 4.10% and 2.74% for 2012 and 2011, respectively. The average yields based on the interest rate credited to participants were approximately 2.35% and 2.75% for 2012 and 2011, respectively. The crediting interest rate was 2.35% and 2.75% for 2012 and 2011, respectively. The crediting interest rate is based on a formula agreed upon with the issuer, but may not be less than 2.35% and 2.75% per the contract for 2012 and 2011, respectively. The interest rates are reset quarterly based on expected earnings of the underlying assets held over the crediting period. There are not reserves against contract value for credit risk of the contract issuer or otherwise.

Certain events limit the ability of the Plan to transact at contract value with the issuer. Such events include the following: (i) amendments to the Plan documents (including complete or partial plan termination or merger with another Plan; (ii) changes to Plan's prohibition on competing investment options or deletion of equity wash provisions; (iii) bankruptcy of the Plan sponsor or other plan sponsor events which cause significant withdrawal from the plan or (iv) the failure of the trust to qualify for exemption from federal income taxes or any required prohibited transaction exemption under ERISA. The Plan does not believe that any occurrence of any such event, which would limit the Plan's ability to transact at contract value with participants, is probable. The stable value account in the group annuity contract does permit the insurance company to terminate the agreement if the Plan has failed to make the required contributions, the sum of all amounts to be withdrawn equals or exceeds the balance in the Active Life fund, or the Plan has failed to perform as required under the contracts.

NOTE 6 - RELATED PARTY TRANSACTIONS

The Plan investment in an investment contract is managed by CMFG Life Insurance Company. CMFG Life Insurance Company is a Plan custodian as defined by the Plan, and therefore, these transactions qualify as party-in-interest transactions. Fees were paid to CMFG Life Insurance Company by participants in the amount of \$269,141 and \$267,800 for the years ended December 31, 2012 and 2011, respectively. Participants were charged management fees; these fees are calculated monthly based on participant balances.

NOTE 6 - RELATED PARTY TRANSACTIONS (continued)

Marshall & Ilsley Trust Company provided Plan administration and investment management for the Plan and is a former custodian; and therefore, these transactions qualify as party-in-interest. Fees were paid to Marshall & Ilsley Trust Company by participants in the amount of \$2,300 for the year ended December 31, 2011.

Certain accounting and administrative functions are performed by officers or employees of the Company. No such officer or employee receives compensation from the Plan. In addition, the Company pays certain outside administrative expenses of the Plan.

NOTE 7 - PLAN TERMINATION

Although the Plan has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. Upon termination of the Plan, participants that have investments in mutual funds would receive a distribution of their entire account balance. In the event of termination, all participants would become fully vested.

NOTE 8 - INCOME TAX STATUS

The Internal Revenue Service has determined and informed the Sponsor by a letter dated April 4, 2011, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the Plan Administrator believes that the Plan is designed and is current being operated in compliance with the applicable requirements of the IRC and therefore believes that the Plan is qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the organization has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2009.
