RETIREMENT PLAN FOR EMPLOYEES OF MATSON

NOTES TO FINANCIAL STATEMENTS

AS OF DECEMBER 31, 2012 AND 2011 AND FOR THE YEAR ENDED DECEMBER 31, 2012

1. PLAN DESCRIPTION

The following brief description of the Retirement Plan for Employees of Matson (the “Plan”) is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

General — The Plan sponsored by Matson, Inc. (the “Company”) is a defined benefit pension plan generally covering salaried non-bargaining unit employees of Matson Navigation Company, Inc.; Matson Terminals, Inc.; Matson Freight Agencies, Inc.; Matson Services Company, Inc.; Matson Logistics, Inc. (except those first employed after 2005); Matson Leasing Company, Inc.; and Matson Logistics Solutions, Inc. The Plan also covers (1) regular clerical employees covered by the collective bargaining agreement between Matson Navigation Company, Inc. and ILWU Local 142 and (2) retired Special Officer employees who had been covered by the collective bargaining agreement between Matson Terminals, Inc. and ILWU Local 160 (Special Officers). The Retirement Committee of the Management of the Company controls and manages the operation and administration of the Plan. First Hawaiian Bank (the “Trustee”) serves as the trustee of the Plan, and together with several investment managers, manages the Plan’s investments. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Pension Benefits — Generally, eligible employees become eligible to participate in the Plan after one year of service. Matson Logistics, Inc. employees first employed after 2005 are not eligible to participate in the Plan. Effective January 1, 1968, the Plan became noncontributory. The Plan’s normal retirement age is 65 (62 for Special Officer employees). There are provisions for early and postponed retirement with relative adjustments in benefits. Normal retirement benefits are based on years of service and compensation. Generally, employees become fully vested after five years of service under the traditional defined benefit pension formula (“traditional formula”) or three years of service for employees covered under the cash balance benefits. If employees terminate before the earlier of normal retirement age or five years of service (or three years for those with cash balance benefits), they forfeit the right to receive their accumulated plan benefits upon retirement.

Effective December 31, 2011, the Company froze benefit accruals under the traditional formula for salaried, non-bargaining unit employees hired before January 1, 2008 and transitioned them to the same cash balance formula for salaried non-bargaining unit employees hired on or after January 1, 2008. Retirement benefits under the cash balance formula are based on a fixed percentage of employee eligible compensation, plus interest. The Plan’s interest credit rate will vary from year to year based on the 10-year U.S. Treasury rate. Upon termination of employment, the vested account can be paid out in the form of a lump sum or as a monthly annuity.

Retirement benefits for retired special officer employees were generally based on a flat dollar amount times years of service.

Separation — In December 2011, Alexander & Baldwin, Inc., a Hawaii corporation incorporated in 1900, announced that it would separate into two independent, publicly traded companies — Alexander & Baldwin, Inc. and Matson, Inc. Prior to this separation transaction, Matson Navigation Company, Inc. was a wholly owned subsidiary of Alexander & Baldwin, Inc. On June 29, 2012, Alexander &

Baldwin, Inc., and its subsidiary Alexander & Baldwin, LLC separated from Alexander & Baldwin Holdings, Inc., which was created during the separation, and its subsidiary Matson Navigation Company, Inc. Alexander & Baldwin Holdings, Inc., was renamed “Matson, Inc.” Following this separation transaction, there were two independent, publicly traded companies — Alexander & Baldwin, Inc. (of which Alexander & Baldwin, LLC is a subsidiary) and Matson, Inc. (of which Matson Navigation Company, Inc., is a subsidiary). As a result of the separation, the Plan sponsor is Matson, Inc.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting — The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP).

Use of Estimates — The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits and changes therein at the date of the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties — The Plan’s investment in the Matson Retirement and Pension Trust (the “Master Trust”) utilizes various investment securities, including common stocks, fixed-income securities, money market funds, limited partnership interests, and insurance contracts. Investment securities, in general, are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such change could materially affect the amounts reported in the financial statements.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumption pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Valuation of Investment in Master Trust — The Plan’s investment in the Master Trust is stated at fair value, which has been determined based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, of the Master Trust. See Note 5 for a description of the valuation methods. Net appreciation includes the Plan’s gains and losses on investments bought and sold as well as held during the year.

Administrative Expenses — Administrative expenses of the Plan are paid by the Master Trust, as provided in the Plan document.

Payment of Benefits — Benefit payments to participants are recorded upon distribution.

Transfer into the Plan — Assets of \$610,245, related to ten salaried active participants who transferred employment from Alexander & Baldwin, Inc. to Matson, Inc. prior to the separation of the Master Trust, were recorded as a transfer into the plan during 2012.

Subsequent Events — For the year ended December 31, 2012, subsequent events were evaluated through October 22, 2013, the date the financial statements were available to be issued.

New Accounting Standards — The accounting standard initially adopted in 2012 is described below.

ASU No. 2011-04, Fair Value Measurement — The financial statements reflect the prospective adoption of FASB ASU No. 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*, which amends ASC 820, *Fair Value Measurements and Disclosures*, as of the beginning of the year ended December 31, 2012 (see Note 5). ASU 2011-04 is effective for financial statements issued for fiscal years beginning after December 15, 2011 and expands certain disclosures about fair value measurement. The ASU requires the categorization by level for items that are only required to be disclosed at fair value and information about transfers between Level 1 and Level 2. It provides guidance on measuring the fair value of financial instruments managed within a portfolio and the application of premiums and discounts on fair value measurements. The ASU requires additional disclosure for Level 3 measurements regarding the sensitivity of fair value to changes in unobservable inputs and any interrelationships between those inputs. The effect of the adoption of ASU 2011-04 had no impact on the Plan's statement of net assets available for benefits and statement of changes in net assets available for benefits.

3. FUNDING POLICY

Contributions to provide benefits under the Plan are made solely by the Company. The Company's funding policy is to make cash contributions to the Plan in amounts as determined by the Plan's independent actuary. The Company met the minimum funding requirements of ERISA for the year ended December 31, 2012.

4. INTEREST IN MASTER TRUST

The Plan's investment assets are held in a trust account by the Trustee, and consist of an undivided interest in an investment account of the Master Trust, a master trust established by the Company and administered by the Trustee. Use of the Master Trust permits the commingling of trust assets with the assets of the Company's various pension plans for investment and administrative purposes. Although assets of multiple plans are commingled in the Master Trust, the Trustee maintains supporting records for the purpose of allocating the net gain or loss of the investment account to the participating plans. The net investment income of the investment assets is allocated by the Trustee to each participating plan based on the relationship of the interest of each plan to the total of the interests of the participating plans.

In conjunction with the separation of Matson, Inc. and Alexander & Baldwin, Inc., assets with a fair value of \$134,272,469 assigned to plans sponsored by Alexander & Baldwin, Inc. were transferred from this Master Trust to a new Alexander & Baldwin, Inc. Master Trust on June 29, 2012.

The net assets and investments of the Master Trust at December 31, 2012 and 2011, are presented as follows:

5. FAIR VALUE MEASUREMENTS

In accordance with GAAP, the Plan classifies its investments into Level 1, which refers to securities valued using quoted prices from active markets for identical assets; Level 2, which refers to securities not traded on an active market, but for which observable market inputs are readily available; and Level 3, which refers to securities valued based on significant unobservable inputs. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

The following table sets forth by level within the fair value hierarchy a summary of the Master Trust's investments measured at fair value on a recurring basis at December 31, 2012 and 2011.

Transfers Between Levels — The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

For the year ended December 31, 2012, there were no significant transfers in and out of Level 1, 2, and 3.

A reconciliation of the beginning and ending balances of the fair value measurements using significant unobservable inputs (Level 3) for the years ended December 31, 2012 and 2011, is as follows:

	Limited Partnership Interests	Unallocated Insurance Contracts	Real Estate Partnerships	Total

Quantitative Information about Significant Unobservable Inputs Used in Level 3 Fair Value Measurements

— In estimating the fair value of insurance contract investments in Level 3, the Investment Committee uses a third-party pricing service. In substantiating the reasonableness of the pricing data provided by the third party, the Investment Committee evaluates a variety of factors, including review of methods and assumptions used by external sources, recently executed transactions, existing contracts, economic conditions, industry and market developments, and overall credit ratings.

The Plan's investment in the Master Trust is presented at fair value, which has been determined based on the fair value of the underlying investments of the Master Trust.

Equity Securities — Domestic and international common stocks are valued by obtaining quoted prices on recognized and highly liquid exchanges.

Fixed-Income Securities — Corporate bonds and U.S. government treasury and agency securities are valued based upon the closing price reported in the active market in which the security is traded. U.S. government agency and corporate asset-backed securities may utilize models, such as a matrix pricing model, that incorporates other observable inputs, such as cash flow, security structure, or market information, when broker-dealer quotes are not available.

Real Estate and Private Equity Interests — The fair value of real estate and private equity funds are determined by the issuer based on the unit values of the funds. Unit values are determined by dividing the fund's net assets, as recorded in the fund's audited financial statements, by the number of units outstanding at the valuation date. Fair value for underlying investments in real estate is determined through independent property appraisals. Fair value of underlying investments in private equity assets is

determined based on information provided by the general partner taking into consideration the purchase price of the underlying securities, developments concerning the investee company subsequent to the acquisition of the investment, financial data and projections of the investee company provided to the general partner, and such other factors as the general partner deems relevant.

Insurance Contracts — Insurance contracts are invested in group annuity contracts, which are valued based on the present value of expected future payments.

Fair Value of Investments That Calculate Net Asset Value — Below is a summary of the Plan's Master Trust investments at December 31, 2012 and 2011, where fair value is estimated based on the net asset value:

Fair Value Estimated Using Net Asset Value per Share December 31, 2012				
Investment	Fair Value	Unfunded Commitment	Redemption Frequency (If Currently Eligible)	Redemption Notice Period
Real estate partnerships (a)	\$ 7,830,647	\$ -	Quarterly	45–90 days
Private equity partnerships (b)	<u>545,145</u>	<u> </u>		
Total	<u>\$ 8,375,792</u>	<u>\$ -</u>		

Fair Value Estimated Using Net Asset Value per Share December 31, 2011				
Investment	Fair Value	Unfunded Commitment	Redemption Frequency (If Currently Eligible)	Redemption Notice Period
Real estate partnerships (a)	\$ 14,446,711	\$ -	Quarterly	45–90 days
Private equity partnerships (b)	1,656,199	550,000		
Insurance contracts (c)	<u>1,373,753</u>	<u> </u>	No restriction	90 days
Total	<u>\$ 17,476,663</u>	<u>\$ 550,000</u>		

- (a) This class includes investments in limited partnership interests that invest in U.S. commercial real estate assets. The fair values of the investments in this class have been estimated using the net asset value of the Plan's limited partnership interest in underlying assets of the investment. Distributions from the investment will be received following a withdrawal request by the Plan. The fair values of each individual property are based on independent property appraisals and it is probable that all of the investments in this class will be sold at an amount different from the net asset value of the Plan's partnership interest.
- (b) This class includes private equity partnership interests that primarily invest in domestic technology companies. These investments cannot be redeemed. Instead, the nature of the investments in this class is that distributions are received through the liquidation of the underlying assets of the fund. As of December 31, 2012, it is probable that all of the investments in this class will be sold at an amount different from the net asset value of the Plan's ownership interest. The fair values of the investments in this class have been estimated using recent observable transaction information for similar investments, nonbinding bids received from potential buyers of the investments, developments concerning the investee company subsequent to the acquisition of the investment, financial data and projections of the investee company provided to the general partner, and such other factors as the general partner deems relevant.

- (c) This class includes investments in group annuity insurance contracts. The fair value of the investment in this class has been estimated using the present value of expected future payments to the contract holder. As of December 31, 2011, it is probable that the actual distributions from the contract will be different than the present value of the expected future payments.

6. INFORMATION CERTIFIED BY TRUSTEE

The following is a summary of the unaudited information regarding the Plan as of December 31, 2012 and 2011, and for the year ended December 31, 2012, included in the Plan's financial statements that was prepared by or derived from information prepared by the Trustee of the Plan and furnished to the Plan administrator. The Plan administrator has obtained certifications from the Trustee that such information is complete and accurate.

	2012	2011
Statements of net assets available for benefits — investment in Master Trust	\$ 146,685,549	\$ 123,848,655
Statement of changes in net assets available for benefits — appreciation from investment in Master Trust	18,604,785	

Notes 4 and 5: All investment balances and investment information have been certified by the Trustee, excluding the classification of investments by level in Note 5.

7. ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to service rendered by employees as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (1) retired or terminated employees or their beneficiaries, (2) beneficiaries of employees who have died, and (3) present employees or their beneficiaries. Benefits under the Plan are based on employees' compensation and service. The accumulated plan benefits for salaried non-bargaining active employees are based on their frozen final pay formula benefit as of December 31, 2011 plus their cash balance benefit. The actuarial present value of accumulated plan benefits is determined by an independent actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements, such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The following table presents the actuarial present value of accumulated plan benefits at December 31, 2012 and 2011, and changes in accumulated plan benefits for the year ended December 31, 2012:

	2012	2011
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Participants currently receiving payments	\$ 75,767,770	\$ 74,920,369
Other participants	<u>57,101,540</u>	<u>54,859,931</u>
Total vested benefits	132,869,310	129,780,300
Nonvested benefits	<u>823,481</u>	<u>1,069,689</u>
Total actuarial present value of accumulated plan benefits	<u>\$ 133,692,791</u>	<u>\$ 130,849,989</u>
Actuarial present value of accumulated plan benefits — beginning of year	\$ 130,849,989	
Increase (decrease) during the year attributable to:		
Increase for interest due to the decrease in the discount period	10,433,821	
Benefits paid net of transfer into the plan	(8,935,940)	
Present value of benefits accumulated	1,416,628	
Actuarial assumption changes	138,636	
Miscellaneous	<u>(210,343)</u>	
Actuarial present value of accumulated plan benefits — end of year	<u>\$ 133,692,791</u>	

The significant actuarial assumptions used in the December 31, 2012 and 2011, valuations were as follows:

- Mortality used in December 31, 2012 valuation: RP-2000 Mortality Table projected using Scale AA from 2000 to seven years after 2013 for annuitants and fifteen years after 2013 for nonannuitants
- Mortality used in December 31, 2011 valuation: RP-2000 Mortality Table projected using Scale AA from 2000 to seven years after 2012 for annuitants and fifteen years after 2012 for nonannuitants
- Retirement age assumptions (representative annual rates of retirement were used)
- Investment return: 8.25% per annum

The foregoing actuarial assumptions are based on the presumption that the Plan will continue indefinitely. If the Plan were to terminate, different actuarial assumptions and other factors would be applicable in determining the actuarial present value of accumulated plan benefits. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that certain changes in these estimates and assumptions could be material to the financial statements.

8. PLAN TERMINATION

Although it has not expressed any intention to do so, the Company has the right under the Plan, in certain circumstances, to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event that the Plan is terminated, the net assets of the Plan will be allocated for payment of Plan benefits to the participants in an order of priority determined in accordance with ERISA, applicable regulations thereunder, and the Plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal-age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid, and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guaranty, while other benefits may not be provided for at all.

9. EXEMPT PARTY-IN-INTEREST TRANSACTIONS

Certain investments in the Master Trust are invested in securities managed by the Trustee, and therefore, these transactions qualify as party-in-interest transactions. Fees paid by the Plan for the investment management services are included as a reduction of the return on each fund.

10. FEDERAL INCOME TAX STATUS

The Internal Revenue Service has determined and informed the employer, by letter dated June 4, 2013, that the Plan and related trust are designed in accordance with the applicable regulations of the Internal Revenue Code (IRC). The Plan has been amended since it was submitted to the Internal Revenue Service with the request for the determination letter. However, the Administrative Committee and the Investment Committee believe the Plan is currently designed and operated in compliance with the applicable requirements of the IRC, and the Plan and related trust continue to be tax exempt. Therefore, no provision for income taxes has been included in the Plan's financial statements.

The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2009.

The Plan's Form 5500 tax return accompanied by the audited financial statements is required to be filed by October 15, 2013. The Form 5500 tax return was not filed on time, and the Company plans to file the tax return with the Department of Labor under the Delinquent Filer Voluntary Compliance Program and will pay the necessary fees for voluntarily complying with annual reporting requirements.

Asset Valuation Method: Actuarial Value of Assets is market value as of the valuation date, including discounted receivable contributions, reduced by 2/3 and 1/3 of the gain/(loss) for each of the prior 2 years, respectively. The gain/(loss) for each period is determined as the actual return on market value during the period less the expected return on market value based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third segment rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value, including discounted receivable contributions.

The expected return on plan assets for the applicable measurement periods was 8.25% per annum, limited by PPA to the applicable third segment rate as follows:

2011 measurement period:	6.57%
2010 measurement period:	6.82%

Summary of Changes from the January 1, 2011 Valuation

- The 3-segment interest rates with four-month lookback used for funding purposes were updated to the current valuation date. The 2012 rates are constrained in accordance with MAP-21. 2011 valuation used 3-segment interest rates (with four-month lookback) of 3.78% (first segment rate), 6.31% (second segment rate) and 6.57% (third segment rate).
- The mortality tables used for funding purposes were updated with projections specified by IRS Regulation 1.430(h)(3)-1.
- For Matson Shoreside group, 2011 valuation used actual 2011 interest credit rate of 2.54% as the assumed interest credit rate for all future years.
- For Matson Shoreside group, IRC §417(e) mortality, used to convert Cash Balance Accounts into equivalent annuities, was updated to IRC §417(e) mortality used for the plan year beginning on the valuation date. 2011 valuation used the 2011 Applicable Mortality Table (IRC §417(e) mortality for 2011 plan year).
- The amount of expenses added to the Target Normal Cost was updated to the current valuation date. 2011 valuation used non-investment administrative expenses (paid from plan assets) of \$664,830.
- For 2011, the percentage of members assumed to be married was 68% for Matson Shoreside members and 67% for Matson Clerical BU (Honolulu) members, and males were assumed to be three years older than their female spouses.

Changes in assumptions were made either in accordance with applicable law and regulations or to better reflect the actuary's best estimate of anticipated experience under the plan.

Asset Valuation Method: Actuarial Value of Assets is market value as of the valuation date, including discounted receivable contributions, reduced by 2/3 and 1/3 of the gain/(loss) for each of the prior 2 years, respectively. The gain/(loss) for each period is determined as the actual return on market value during the period less the expected return on market value based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third segment rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value, including discounted receivable contributions.

The expected return on plan assets for the applicable measurement periods was 8.25% per annum, limited by PPA to the applicable third segment rate as follows:

2011 measurement period:	6.57%
2010 measurement period:	6.82%

Summary of Changes from the January 1, 2011 Valuation

- The mortality tables used for funding purposes were updated with projections specified by IRS Regulation 1.430(h)(3)-1.
- For Matson Shoreside group, 2011 valuation used actual 2011 interest credit rate of 2.54% as the assumed interest credit rate for all future years.
- For Matson Shoreside group, IRC §417(e) mortality, used to convert Cash Balance Accounts into equivalent annuities, was updated to IRC §417(e) mortality used for the plan year beginning on the valuation date. 2011 valuation used the 2011 Applicable Mortality Table (IRC §417(e) mortality for 2011 plan year).
- The amount of expenses added to the Target Normal Cost was updated to the current valuation date. 2011 valuation used non-investment administrative expenses (paid from plan assets) of \$664,830.
- For 2011, the percentage of members assumed to be married was 68% for Matson Shoreside members and 67% for Matson Clerical BU (Honolulu) members, and males were assumed to be three years older than their female spouses.

Changes in assumptions were made either in accordance with applicable law and regulations or to better reflect the actuary's best estimate of anticipated experience under the plan.

To determine the Weighted Average Retirement Age (WARA) for all participants, the sum of Weighted Ages (5) are divided by the sum of Expected Retirements (4) for all ages and rounded. For each age, the Expected Active Headcount (2) reflects the probability of surviving to that age reflecting all decrements.

Note to columns 2 and 3: Column 2's Expected Active Headcount includes members who are not yet eligible for retirement at a given age. The rates in Column 3 are therefore adjusted to reflect 0% probably for those not eligible to retire and the retirement rate percentages from the Attachment to Part V for those members who have attained eligibility requirements.

The rates shown above also reflect a combination of the rates shown in the tables in the Part V attachment based on actual eligibilities.

RETIREMENT PLAN FOR EMPLOYEES OF MATSON

EIN: 99-0032630; PN: 020

Schedule SB, line 24 – Change in Actuarial Assumptions

- For Matson Shoreside members with Cash Balance Accounts, updated cash balance interest credit rate assumption to current plan year's interest credit rate, i.e., arithmetic average of the month-end 10-year Treasury Constant Maturities for the months of August, September and October that immediately precede the plan year (from 2.54% for 2011 valuation to 2.11% for 2012 valuation).
- Updated IRC §417(e) mortality, used to convert cash balance accounts into equivalent annuities, to current plan year's IRC §417(e) mortality (from 2011 Applicable Mortality Table for 2011 valuation to 2012 Applicable Mortality Table for 2012 valuation).
- Marital Percentage:
 - For 2011 Valuation: For Matson Shoreside members, 68% of the members are assumed to be married, and males are assumed to be three years older than their spouses.

For Matson Clerical BU (Honolulu) members, 67% of the members are assumed to be married, and males are assumed to be three years older than their spouses.
 - For 2012 Valuation: For Matson Shoreside members, 80% of the members are assumed to be married, and males are assumed to be two years older than their spouses.
For Matson Clerical BU (Honolulu) members, 70% of the members are assumed to be married, and males are assumed to be two years older than their spouses.

The above changes were made to better reflect the actuary's best estimate of anticipated experience under the Plan.
