Report of Independent Auditors

To the Participants and Administrator of the
Revised Pension Plan for Hourly Rated Employees of Cincinnati Electronics Corporation - IBEW:

In our opinion, the accompanying statements of net assets available for benefits as of December 31, 2011 and January 31, 2011 and the related statements of changes in net assets available for benefits for the period from February 1, 2011 to December 31, 2011 and for the year ended January 1, 2011 and the statement of accumulated plan benefits as of February 1, 2011 and the related statement of changes in accumulated plan benefits for the year then ended, present fairly, in all material respects, information regarding the net assets available for benefits of the Revised Pension Plan for Hourly Rated Employees of Cincinnati Electronics Corporation - IBEW (the "Plan") at December 31, 2011 and changes therein for the period from February 1, 2011 to December 31 2011 and its financial status as of February 1, 2011, and changes therein for the year then ended in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

REVISED PENSION PLAN FOR HOURLY RATED EMPLOYEES OF CINCINNATI ELECTRONICS CORPORATION – IBEW
NOTES TO FINANCIAL STATEMENTS
(Dollars in thousands)

1. Plan Description

The following brief description of the Revised Pension Plan for Hourly Rated Employees of Cincinnati Electronics Corporation - IBEW (the "Plan") is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

The Plan is a non-contributory, defined benefit plan covering substantially all Cincinnati Electronics Corporation (the "Company"), a wholly owned subsidiary of L-3 Communications Holdings, Inc. employees represented by Local #1842 of the International Brotherhood of Electrical Workers, AFL-CIO ("IBEW"). The Plan is subject to the Employee Retirement Income Security Act of 1974, as amended by ("ERISA").

The Plan was frozen to new participants as of January 1, 2007. As such, any employees hired on or after January 1, 2007 are not eligible to participate in the Plan. All active participants had the option to either remain active in the Plan or to freeze their pension benefit effective January 1, 2007 and join the L-3 Communications Master Savings Plan.

Effective February 1, 2011 the Plan made an election to change its fiscal year ending January 31st to a calendar year ending December 31st. As a result, the activity during the year ended December 31, 2011 is presented for an eleven month period. For future years the Plan will be presented on a twelve month calendar year basis.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared using the accrual basis of accounting.

Investment in Master Trust

Investment assets of the Plan are maintained in the L-3 Communications Corporation Master Trust (the "Master Trust") administered by The Bank of New York Mellon, as Trustee. The Plan participates in the Master Trust along with other defined benefit plans sponsored by the Company (collectively, the "L-3 Participating Plans"). The only investment of the Plan is its interest in the net assets of the Master Trust. The fair value of the Plan's interest in the Master Trust is determined based on the beginning of year value of the Plan's interest in the trust plus actual contributions and allocated investment income (loss) less actual distributions and actual administrative expenses. Assets held in the Master Trust primarily consist of corporate equity securities, commingled trust funds and mutual funds, corporate bonds. See Note 6 for a description of the valuation methodologies of the assets of the Master Trust.

The Master Trust records investment transactions on the trade-date, dividend income on the ex-dividend date, interest income as earned and determines realized gains and losses on sales of securities based on the average cost method.

Net Investment Gain from Master Trust

The net investment gain from the Master Trust includes interest and dividend income and net appreciation or depreciation in the fair value of investments, which includes gains or losses realized upon disposition of investments and net unrealized appreciation or depreciation of investments. The net investment gain or loss is allocated to the L-3 Participating Plans based upon the relationship of each plan's respective monthly balances in the investment pool to the total investments of the Master Trust, as determined on a monthly basis.

Benefit Payments

Benefit payments are recorded when paid.

Plan Expenses

The administrative expenses of the Plan are paid for by the Plan. Administrative expenses are allocated to the Plan at the direction of the Company based upon the Plan's respective portion of the expense. Investment management fees of the Master Trust are allocated to the L-3 Participating Plans based upon the relationship of each plan's respective monthly balances in the investment pool to the total investments of the Master Trust, as determined on a monthly basis.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make significant estimates and assumptions that affect the reported amounts of assets, liabilities, benefit obligations, and changes therein, disclosures of contingent assets, liabilities and benefit obligations, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results will differ from those estimates.

Risks and Uncertainties

Plan contributions and the actuarial present value of accumulated plan benefits are determined based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in the estimates and assumptions in the near term would be material to the financial statements.

The investments held in the Master Trust are exposed to various risks, such as interest rate, market and credit. Due to the level of risk associated with certain investments and the level of uncertainty related to changes in the value of investments, it is at least reasonably possible that

changes in risks in the near term would materially affect the investments and related allocation reported in the statements of net assets available for benefits and the statements of changes in net assets available for benefits.

Subsequent Events

The Plan continued to evaluate events after the Statement of Net Assets Available for Benefits date through September 14, 2012, the date the financial statements were available to be issued.

3. Contributions

Generally, the Company's funding policy is to contribute amounts in accordance with the Internal Revenue Code ("IRC") and the minimum funding requirements under ERISA. No contributions from the Company were required during the period ended December 31, 2011 and year ended January 31, 2011 to the Plan under the minimum funding requirements of ERISA. Contributions are calculated using the Projected Unit Credit Actuarial Cost Method. Under this method, the total actuarial liability for participants is the actuarial present value as of the valuation date of all benefits attributed by the pension benefit formula to employee service rendered prior to that date, which assumes the normal cost will increase each year for each employee as he or she approaches retirement age. The yield (interest, dividends and net realized and unrealized gains and losses) on investments of the Plan serves to adjust future contributions that will be required to provide for the defined level of benefits. The funding target is measured on an accrual-to-date basis using mandated mortality tables and interest rates with no salary projection past the end of the year.

4. Plan Benefits

The Plan provides a monthly benefit which is calculated by multiplying a participant's pension credits by the benefit rate in effect as of the date the employee leaves the bargaining unit, whether by transfer, termination, retirement or otherwise. Effective April 1, 2006, the monthly benefit rate per year increased from $12.25 to $13.25 per year of credited service, up to a maximum of 45 pension credits. Benefits vest 100% after 7 years and are payable at age 65.

The Plan permits early retirement for participants at age 60 with at least 7 years of service. The benefit may begin at the date of early retirement, with the benefit reduced by 0.6% for each month of age prior to reaching age 65.

The following presents the more significant assumptions underlying the actuarial computations as of December 31, 2011 and January 31, 2011.

Mortality basis	2011: RP2000 Combined Tables with static projection to 2018 and 2026, respectively. 2010: RP2000 Combined Table
Retirement	100% at age 65
Discount rate for the determination of the present value of accumulated plan benefits	December 31, 2011 and January 31, 2011 – 7.5%

The foregoing actuarial assumptions are based upon the assumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors may be used in determining the actuarial present value of accumulated plan benefits.

5. Master Trust Investments

The fair value of the assets and liabilities of the Master Trust at December 31, 2011 and January 31, 2011 is presented in the table below. The Plan's percentage interest in the Master Trust was approximately 0.4% at December 31, 2011 and January 31, 2011.

	December 31, 2011	January 31, 2011

6. *Fair Value Measurements*

The Plan adopted the standards for fair value measurements. The provisions of the standards are applicable to all of the Plan's assets and liabilities that are measured and recorded at fair value. The standards establish a framework for measuring fair value and expand related disclosures. The standards define fair value as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants. It establishes a fair value hierarchy that gives the highest priority to observable inputs and the lowest priority to unobservable inputs. The three levels of the fair value hierarchy are described below.

Level 1: Quoted market prices available in active markets for identical assets or liabilities as of the reporting date. The Plan's Level 1 assets include equity securities, certain mutual funds and U.S. Treasury bonds, all of which fair value is derived from quoted market prices.

Level 2: Pricing inputs other than quoted prices in active markets included in Level 1, which are either directly or indirectly observable as of the reporting date. The fair value is determined using a valuation model based on observable market inputs. The Plan's Level 2 assets include commingled trust funds, certain mutual funds, corporate bonds, government securities and forward contracts.

Level 3: Pricing inputs that are generally unobservable inputs and not corroborated by market data. The Plan has no Level 3 assets.

The table below reports by level, within the fair value hierarchy, the assets held in the Master Trust at fair value as of December 31, 2011 and January 31, 2011, including a description of the valuation methodologies. As required by the standards, each asset is classified based on the lowest level of input that is significant to the fair value measurement.

	Fair Value Measured at December 31, 2011				Fair Value Measured at January 31, 2011			
Asset Category	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total

(1) Equity securities consist of investments in common stock of U.S. and foreign companies. The fair value of equity securities is based on quoted market prices available in active markets at the close of a trading day, primarily the New York Stock Exchange (NYSE), National Association of Securities Dealers Automated Quotations (NASDAQ), and various foreign exchanges. The Level 2 investment balance is derived from a pooled equity fund offered by a registered investment company, which fair value is based on net asset value (NAV). NAV is calculated by the fund manager based on the

fair value of the fund's holdings, primarily equity securities traded in active markets, determined as of the end of each month. Withdrawals are permitted monthly based on NAV.

(2) Approximately 50% in both 2011 and in 2010 of plan assets invested in fixed income — investment grade securities consist of a mutual fund offered by a registered investment company. The mutual fund invests in investment grade fixed income securities, mortgaged-backed securities, U.S. treasury and agency bonds and corporate bonds. This fund is classified by the Company as a Level 1 measurement within the fair value hierarchy as the mutual fund trades on an active market and daily, quoted prices are available.

(3) The remaining 50% in both 2011 and in 2010 of plan assets invested in fixed income — investment grade securities is derived from pooled bond funds offered by registered investment companies. As these funds do not trade in an active market, the fair value is based on NAVs calculated by fund managers based on yields currently available on comparable bonds of issuers with similar credit ratings, quoted prices of similar bonds in an active market, or cash flows based on observable inputs.

(4) Fixed income — high yield consists of investments in corporate high-yield bonds from various industries. The fair values of these investments are based on yields currently available on comparable bonds of issuers with similar credit ratings, quoted prices of similar bonds in an active market, or cash flows based on observable inputs.

(5) Real Estate Investment Trusts (REITs) consist of securities that trade on the major exchanges and invest directly in real estate, either through properties or mortgages.

(6) Other consists of short term investments maintained in a commingled trust or pooled fund, which primarily invests in short term, high quality money market securities such as government obligations, commercial paper, time deposits and certificates of deposit, which are classified as Level 2.

7. Accounting Standards Issued and Not Yet Implemented

In May 2011, the FASB issued a revised accounting standard for fair value measurement and disclosure. The revisions clarify how to measure fair value and require additional disclosures as follows: 1) transfers between Level 1 and Level 2 of the fair value hierarchy, 2) the valuation process used and the sensitivity of a fair value measurement categorized within Level 3 of the fair value hierarchy to changes in unobservable inputs, and 3) the categorization by level of the fair value hierarchy for items that are not measured at fair value in the Statement of Net Assets Available for Benefits, but for which the fair value of such items is required to be disclosed. The revised accounting standard is effective for the Company beginning after December 15, 2011, and is not expected to have an impact on the Plan's Net Assets Available for Benefits.

8. Tax Status

The Internal Revenue Service has determined and informed the Company by a letter dated February 10, 2012 that the Plan is designed in accordance with the applicable sections of the IRC. The Plan has not been amended since receiving the determination letter. The Plan administrator and the Plan's counsel believe that the Plan is designed and is currently being operated in compliance with the applicable regulations of the IRC; therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan administrator has analyzed the tax positions by the Plan, and has concluded that as of December 31, 2011, there are no uncertain tax positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is

no longer subject to income tax examinations for years prior to the year ended December 31, 2007.

9. Related-Party Transactions

Certain plan investments held in the Master Trust are units of a commingled trust fund managed by the Bank of New York Mellon, the Plan's trustee.

10. Termination Priorities

While the Company has not expressed any intention to do so, it is free to discontinue its contributions at any time and to terminate the Plan, subject to collective bargaining and the provisions set forth in ERISA.

In the event the Plan terminates, the net assets of the Plan will be allocated as specified by the Plan in accordance with ERISA, generally to provide the following benefits in the order indicated:

a. Benefits attributable to employee contributions, taking into account those paid out before termination.

b. Benefits attributable to participants who have retired at least three years before the termination date of the Plan or those participants who were eligible to retire and receive pension benefits at least three years before, but who did not elect to retire at that time.

c. Benefits commencing at retirement age to participants who are eligible to receive guaranteed benefits under ERISA.

d. All vested and non-vested benefits.

To the extent the Plan's net assets are not sufficient to fund the accumulated benefits upon Plan termination, ERISA provides that such benefits are payable by the Pension Benefit Guaranty Corporation, up to specified limits.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods
Revised Pension Plan for Hourly-Rated Employees of L-3 Communications Cincinnati Electronics Corporation
EIN 31-0826926 PN 030

Actuarial Assumptions and Methodologies (Funding)

Interest:	The interest rates used for the 2011 plan year are the October 2010 segment rates which are the 24-month average corporate bond yields ending in September 2010. These discount rates are 3.61% for payments in the first 5 years, 6.20% for payments in years 6 – 20, and 6.53% for payments thereafter, which translates to an effective interest rate of 6.04%. (Prior year 24-month average corporate bond rates were 4.92% for payments in the first 5 years, 6.71% for payments in years 6 – 20, and 6.80% for payments thereafter, which translates to an effective interest rate of 6.56%.) The yield curve used to determine the PBGC variable rate premium is 1.93% for payments in the first 5 years, 5.25% for payments in years 6 – 20, and 6.42% for payments thereafter. (Prior year yield curve was 2.31% for payments in the first 5 years, 5.64% for payments in years 6 – 20, and 6.47% for payments thereafter.)
Mortality rates:	RP2000 combined tables with static projection to 2018 and 2026, respectively. This assumption is one of the choices allowed by the regulations. (Prior year mortality table assumption was similar to this year, except with one less year of projection.)
Salary Increases:	N/A
Termination rates:	None
Disability rates:	None
Retirement rates:	100% at age 65
Percent married:	70% for male participants, 55% for female participants
Age difference:	For inactive participants for whom a spouse's date of birth was not provided, and for active participants, it was assumed that husbands were 3 year(s) older than their wives.
Administrative expenses:	$142,000
Asset method:	Assets are determined by averaging the market value as of the valuation date and the adjusted market values as of the preceding two years. The resulting value is limited to between 90% to 110% of market value of assets. WRERA provides that the averaging method is to be adjusted for expected earnings. The expected earnings are based on an assumed rate of return of 7.50%, not to exceed the applicable third segment rate of 6.69% in 2009 and 6.80% in 2010.
Funding method:	Funding method is unit credit actuarial cost method, as prescribed by law. The liability is measured on an accrual-to-date basis using mandated mortality tables and interest rates with no salary projection past the end of the year.
