Versa Technologies, Inc. Retirement Plan

Notes to Financial Statements

Note 1 Description of Plan

The following description of the Versa Technologies, Inc. Retirement Plan (the "Plan") provides only general information. Participants should refer to the Plan's summary plan description for a more complete description of the Plan's provisions. The Plan is a defined benefit pension plan sponsored by Versa Technologies, Inc. (the "Sponsor"). US Bank N.A. is the custodian of the Plan's assets. The custodian holds the Plan's investments and executes investment transactions. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"), as amended.

Effective August 15, 2013, the Plan sponsor approved an amendment to the Actuant Corporation Retirement Plan in which active participants from the Actuant Corporation Retirement Plan were spun-off into this Plan. As part of the spin-off, $2,742,176 of Actuant Corporation Retirement Plan's assets were transferred into the Plan in accordance with ERISA Section 4044.

Eligibility

The Plan has four major participant groups: Versa Technologies, Inc. ("Versa"), Acme Electric Corporation ("Acme"), Gits Manufacturing Co. LLC ("GITS"), and Sanlo Manufacturing Co. ("Sanlo"). No new employees are able to become participants in the Plan and no additional benefits can be earned.

Vesting

All Versa, Acme, and Sanlo participants are 100% vested. GITS participants vest 20% after three years of service and vest 20% each year thereafter. Certain GITS participants have unvested benefits.

Note 1 Description of Plan (Continued)

Retirement Benefits

The normal form of benefit payments is monthly life annuities but for certain participants other options are available. The normal retirement is generally at age 65, however the Plan provides for reduced early retirement benefits, generally, at age 55. The benefit formula for salary participants is based on average earnings, while the benefits for hourly employees are based on a dollar per month formula.

Depending upon a plan's funded status, the Pension Protection Act of 2006 may limit the amount of lump sum benefit payments.

Interest in Actuant Corporation Master Trust

All of the investment assets of the Plan are invested in the Actuant Corporation Master Trust ("Master Trust"), in which investments of the Sponsor's two retirement plans are commingled. The investment income (loss) and expenses of the Master Trust are allocated to each plan based on the relationship of the Plan's investment balances to the total Master Trust investment balances.

Note 2 Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States ("GAAP").

Use of Estimates in Preparation of Financial Statements

The preparation of the accompanying financial statements in conformity with GAAP requires management to make estimates and assumptions that directly affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results may differ from those estimates and are subject to change in the near term.

Note 2 Summary of Significant Accounting Policies (Continued)

Valuation of Investments and Income Recognition

The Plan's interest in the Master Trust is stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement dates. Purchases and sales of investments are recorded on a trade-date basis. Interest income is recognized when earned and dividend income is recorded on the ex-dividend date. Net appreciation (depreciation) in fair value of investments includes realized gains and losses and unrealized appreciation (depreciation) in investments.

Payment of Benefits

Benefits payments to participants are recorded upon distribution.

Administrative Costs of the Plan

Custodian and investment advisory fees, actuary costs, auditing costs and Pension Benefit Guaranty Corporation ("PBGC"), a U.S. Governmental Agency, premiums are paid by the Plan. Certain other administrative costs are paid by the Plan Sponsor and are excluded from these financial statements.

Subsequent Events

Subsequent events have been evaluated through May 12, 2014, which is the date the financial statements were available to be issued.

Note 3 Interest in Master Trust

The following table presents the net assets of the Master Trust as of December 31, 2013. At December 31, 2013, the Plan's interest in the net assets of the Master Trust was 6.9%.

Laudus Intl Makretmasters Fund Sel	$	2,701,595
Vanguard Total Stock Mkt Etf	$	16,879,138

For the year ended December 31, 2013 the Master Trust's investments appreciated (depreciated) as follows:

		2013
Net appreciation (depreciation) in fair value of investments:		
Corporate bonds	$	(266,796)
Domestic common stocks		5
Foreign bonds		(69,227)
Mutual funds		4,379,413
U.S. government securities		(3,780)
Net appreciation in fair value of investments	$	4,039,615

Note 4 Fair Value Measurements

A fair value hierarchy prioritizes the inputs to valuation techniques used in measuring fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value.

U.S. government securities, corporate bonds, foreign bonds and common stocks: Valued at the closing price reported in the active markets on which the individual investment is traded.

Mutual funds: Valued at quoted market prices which represent the net asset value ("NAV") of shares held by the Plan at year end. Money market funds are valued at amortized cost which approximates fair value.

Note 4 Fair Value Measurements (Continued)

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table set forth by level, within the fair value hierarchy, the Master Trust's assets at:

	Assets at Fair Value as of December 31, 2013
Level 1 Valuation:	
Corporate bonds	$ 6,793,303
Domestic common stocks	14
Equity mutual funds	28,909,413
Fixed income mutual funds	4,368,464
Foreign bonds	2,137,930
Money market mutual funds	2,035,453
Total assets at fair value	$ 44,244,577

Note 5 Funding Policy

The Plan is solely funded by contributions from the Sponsor. The Company's contributions for 2013 met or exceeded the minimum funding requirements of ERISA.

Due to the amendment effective on August 15, 2013 (see Note 1), the Sponsor was required to make, and made, contributions to the Plan or the Actuant Corporation Retirement Plan in the amount of $1,289,000 for the year ended December 31, 2013, which exceeded the required amount.

Note 6 Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those estimated future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances (retirement, death, disability and termination) are included to the extent they are deemed attributable to employee service rendered.

The actuarial present value of accumulated plan benefits is determined by the Plan's consulting actuary, Towers Watson, and is the amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. Due to the nature and uncertainty of these future assumptions, the resulting estimates are sensitive to changes in the near term and actual results could differ from those estimates.

Note 6 Actuarial Present Value of Accumulated Plan Benefits (Continued)

The following is a summary of the actuarial present value of accumulated plan benefits as of December 31, 2013:

Vested benefits:		
Participants currently receiving payments	$	107,941
Other participants		2,749,494
Total vested benefits		2,857,435
Nonvested benefits		14,872
Total actuarial present value of accumulated plan benefits	$	2,872,307

The changes in the present value of accumulated plan benefits for the period from inception (August 15, 2013) through December 31, 2013:

Actuarial present value of accumulated plan benefits at inception	$	-
Increase (decrease) during the year attributable to:		
Spin-off from Actuant Corporation Retirement Plan		2,685,475
Actuarial gains		(57,964)
Benefits paid		(2,654)
Change in actuarial assumptions		39,427
Reduction in discount period		208,023
Net increase		2,872,307
Actuarial present value of accumulated plan benefits at December 31, 2013	$	2,872,307

Note 6 Actuarial Present Value of Accumulated Plan Benefits (Continued)

Significant actuarial assumptions utilized in determining the present value of accumulated plan benefits at December 31 are as follows:

	2013
Discount rate	7.65%
Mortality rates	RP-2000
Average retirement age	Age 62-65

The foregoing actuarial assumptions are based on the premise that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Note 7 Tax Status

The Plan has requested a determination letter and received confirmation that the Internal Revenue Service ("IRS") received their request on March 11, 2014. Plan management believes the Plan is currently designed and is being operated in compliance with the applicable requirements of the Internal Revenue Code.

The Plan Administrator analyzed the tax positions taken by the Plan and concluded there are no uncertain tax positions taken by the Plan. No provision for income taxes has been included in the Plan's financial statements. The Plan is subject to routine audits by taxing jurisdictions and there are currently no audits in progress.

Note 8 Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated as prescribed by ERISA and its related regulations.

Certain benefits under the Plan are insured by PBGC if the Plan terminates. Generally, PBGC guarantees most vested, normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan Sponsor and the level of benefits guaranteed by the PBGC.

Note 9 Information Certified by the Custodian

The Plan Sponsor has elected the method of annual reporting compliance by 29 CFR 2520.103-8 of the Department of Labor Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Accordingly, the Plan custodian has certified that the following data included in the accompanying financial statements is complete and accurate:

(a) Plan interest in the Master Trust as disclosed in the statements of net assets available for benefits.

(b) Plan interest in Master Trust net investment income as disclosed in the statements of changes in net assets available for benefits.

(c) Investment information disclosed in Note 3.

The Plan's independent auditors did not perform auditing procedures with respect to this information, except for comparing such information to the related information included in the financial statements.

Note 10 Risks and Uncertainties

The investments underlying the Master Trust are exposed to various risks, such as interest rate, market, and credit risks. Due to the level of risk associated with certain investments, it is at least reasonably possible that changes in the values of investments will occur in the near term and these changes could materially affect the amounts reported in the statements of net assets available for benefits and the statements of changes in net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Note 11 Subsequent Event

On March 30, 2014, the Sponsor ceased operation of its GITS facility in Iowa. The Sponsor believes that the reduction in force resulted in a PBGC reportable event. The Sponsor filed a PBGC form 10 on April 28, 2014. The Sponsor believes this is a Section 4062(e) event under ERISA as more than 20% of the employees affected are participants in the Plan. The Sponsor intends to file a notice with the PBGC in a timely manner.

Plan Name	Versa Technologies, Inc. Retirement Plan	**EIN:**	39-1143618

Actuarial value of assets for determining minimum required contributions	Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22) . The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2012 plan year.) The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets. As a result of the August 15, 2013 spin-off, pre-2013 historical smoothing bases were retained in the Actuant Corporation Retirement Plan.
Benefits not valued	All benefits described in the Plan Provisions section of this report were valued. Towers Watson has reviewed the plan provisions provided by Actuant Corporation and, based on that review, is not aware of any significant benefits required to be valued that were not.
Change in assumptions and methods since prior valuation of the combined plan (i.e., Actuant Plan and Versa Plan)	The segment interest rates used to calculate the funding target were updated from an applicable month of September 2011 to September 2012. The segment rates used to determine minimum funding requirements and benefit restrictions were revised by applying the corridors of MAP-21. The statutorily required mortality table used to calculate the funding target was updated to include one additional year of projected mortality improvements. The lump sum conversion interest rates were updated to align with the interest rates used to calculate the funding target. The lump sum conversion mortality table was updated from the 2012 IRS prescribed 417(e) mortality table to the 2013 IRS prescribed 417(e) mortality table. The assumed plan-related expenses added to the target normal cost were updated to reflect anticipated 2013 plan-related expenses. Actuant Corporation elected reasonable plan spin-off allocation methodologies that were reviewed by Actuant Corporation's ERISA counsel and were developed based on informal guidance received from the IRS as well as spin-off regulations in place prior to the passage of PPA.

If the participant elects and the spouse consent's, another actuarially equivalent optional form may be elected. Optional forms are a 100%, 75%, 66-2/3%, or 50% joint and survivor annuity, a 5 year certain and life annuity, or a 10 year certain and life annuity or a 15 year certain and life annuity. There is an automatic lump sum payment for amounts under $5,000 and an optional lump sum payment for amounts under $10,000.
Conversion basis	In calculating optional forms of benefits under the Plan for Gits participants, except for calculating lump sums benefits, an interest rate of 7.5% per year is used, and the mortality table is a unisex table, based on 1983 Group Annuity Tables. Lump sum benefits are calculated using the IRC 417(e) mandated interest rates and mortality table.
Maximum on benefits and pay	All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are assumed for determining pension cost but not for determining contributions.
