Note 1 – Description of Plan

The following description of the NSS Enterprises, Inc. UAW Local 12 Retirement Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

General

The Plan is a defined benefit plan established for the principal purpose of providing retirement, death, or disability benefits to employees of NSS Enterprises, Inc. (the Company and Plan Sponsor) who are represented by the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (UAW) and its Local 12 and who are members of the bargaining unit. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

On May 21, 2008 the UAW Local 12 ratified the labor agreement that was effective from August 1, 2008 through July 31, 2013. The labor agreement called for the freezing of the Plan as of January 1, 2009. Effective December 31, 2008, participants no longer accrue years of service, the benefit provision paid to qualifying retirees is frozen at $26.00 per year of credited service, and all participants became fully vested. The subsequent labor agreement did not change any Plan provisions.

Funding

Participants are not permitted to make contributions to the Plan. The Company contributes annually to meet the minimum funding requirements of ERISA and, at its discretion, may contribute more than the minimum funding requirement.

Benefits

Participants are entitled to benefits beginning at normal retirement age (the later of attaining age 65 or the completion of five years of creditable service as defined by the Plan). Retired employees eligible for the normal retirement benefits are entitled to a monthly benefit equal to multiplying a dollar amount, as specified by the date of retirement, by the years of credited service, both defined in the Plan document. Prior to January 1, 2009, accrued benefits were fully vested after completion of five years of credited service. Effective January 1, 2009, all participants became fully vested. Benefits are payable upon early, normal or late retirement.

Note 1 – Description of Plan (continued)

Benefits (continued)

Early retirement benefits, as defined by the Plan, are provided to employees who have attained age 60 and completed 10 years of credited service. Late retirement benefits are permitted, as defined by the Plan. Benefits are paid as a lump sum if less than $5,000 or monthly in the form of joint and survivor or single life annuity, subject to the limitations set forth in the Plan document.

If an active participant, prior to attaining age 65 and with a vested interest in the Plan, becomes totally and permanently disabled, a disability pension, calculated in a manner similar to a normal retirement pension based on credited service as of the disability date, is paid to the participant.

Supplemental benefits shall also be paid to certain participants, as further discussed in the Plan document.

Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Administrative Expenses

Plan administrative expenses, provided by parties-in-interest, are typically paid by the Plan Sponsor and not charged to the Plan although the Plan document does not prohibit the payment of expenses.

Note 2 – Significant Accounting Policies

Basis of Accounting

The accompanying financial statements of the Plan are prepared on the accrual basis of accounting in accordance with generally accepted accounting principles in the United States. Benefit payments to participants are recorded upon distribution.

Note 2 – Significant Accounting Policies (continued)

Investments Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. There have been no changes in the valuation methods used. The Plan's investments are held at Fifth Third Bank, the Plan's Trustee.

Mutual funds represent investments with various investment managers. The fair values of these investments are determined by reference to the fund's underlying assets, which are principally marketable equity and fixed income securities. Shares held in mutual funds are valued at the net asset value.

Exchange traded funds are valued at fair value based on closing prices on the last business day of each period presented.

Money market funds are valued using the amortized cost method as permitted by Rule 2a-7 under the Investment Company Act of 1940, which approximates their fair value.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement.

Purchases and sales of the investments within the Plan are reflected on a trade-date basis. Dividend income is recorded on the ex-dividend date. Interest income is recorded on the accrual basis. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Most significantly, estimates are used in determining the actuarial present value of accumulated plan benefits. Actual results could differ from those estimates.

Note 3 –Investments

All investment information disclosed in the accompanying financial statements and schedules, including investments held at October 31, 2013 and 2012, net appreciation (depreciation) in fair value of investments, interest and dividends for the years then ended, were obtained or derived from information supplied to the Plan Sponsor and certified as complete and accurate by the Trustee.

The fair value of individual investments that represent 5% or more of the fair value of the Plan's net assets available for benefits, are as follows:

	October 31, 2013	October 31, 2012
Pimco Total Return Fd Instl CL I #35	$ 642,982	$ 678,210

* Less than 5% of net assets available for benefits.

During 2013 and 2012, the Plan's investments (including investments bought, sold, as well as held during the year) appreciated (depreciated) in fair value as follows:

	Years Ended October 31, 2013	2012
Mutual Funds	$ 438,449	$ 267,729
Exchange Traded Funds	9,696	5,867
	$ 448,145	$ 273,596

Note 4 - Fair Value Measurement

The various inputs that may be used to determine the value of the Plan's investments are summarized in three broad levels within the fair value hierarchy. The three levels are described below:

Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2: Quoted prices in markets that are not considered to be active or financial instruments for which all significant inputs are observable, either directly or indirectly;

Level 3: Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

A financial asset's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following table sets forth by level within the fair value hierarchy the Plan's investments at fair value, as of October 31, 2013 and 2012. Assets are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

Note 5 – Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump sum, that are attributable, under the Plan's provisions to services rendered by the participants to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries and (b) present employees or their beneficiaries. Benefits under the Plan are determined by considering the retirement date and the years of credited service. The accumulated plan benefit for active employees was determined using each employee's years of credited service and the benefit provision (based on a maximum of $26.00) at October 31, 2012 and 2011. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The Plan's actuary estimated the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of benefit payments (by means of decrements for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefit information as of October 31, 2012 (the latest available date) and 2011 are as follows:

	2012	2011
Actuarial Present Value of Accumulated Plan Benefits		
Vested benefits		
Participants currently receiving payments	$ 1,977,914	$ 1,883,090
Other participants	1,485,699	1,610,298
	3,463,613	3,493,388
Nonvested benefits	446,375	469,407
Total Actuarial Present Value of Accumulated Plan Benefits	$ 3,909,988	$ 3,962,795

Note 5 – Actuarial Present Value of Accumulated Plan Benefits (continued)

Changes in the actuarial present value of accumulated plan benefits are as follows:

	2012
Actuarial Present Value of Accumulated Plan Benefits as of Beginning of Year	$ 3,962,795
Increase (decrease) attributable to	
Decrease in discount period	288,048
Benefits paid	(225,509)
Additional benefits accumulated	(123,283)
Change in actuarial assumptions	7,937
Net decrease	(52,807)
Actuarial Present Value of Accumulated Plan Benefits as of End of Year	$ 3,909,988

Significant assumptions underlying the actuarial computations are:

Mortality Basis	RP-2000 static, non-generational Mortality Table (2012 and 2011)
Retirement	At Normal Retirement (65) (2012 and 2011)
Interest Rate	7.5% (2012 and 2011)

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Note 6 – Income Taxes

The Internal Revenue Service has determined and informed the Company by a letter dated December 30, 2011 that the Plan and related trust are designed in accordance with the applicable sections of the Internal Revenue Code (IRC). The Plan is required to operate in conformity with the IRC to maintain its qualification. The Plan Sponsor will take the necessary steps, if any, to bring the Plan's operations into compliance with the IRC.

Note 6 – Income Taxes (continued)

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the organization has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2010.

Note 7 – Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of the accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to the uncertainties inherent in the estimation and assumption processes, it is a least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Note 8 – Subsequent Events

Management has evaluated subsequent events through May 9, 2014, the date the financial statements were issued and determined that no events have occurred that require recognition or disclosure.

Rates of Turnover

Based on age and sex as follows:

Age	Males	Females
25	.099	.149
30	.069	.099
35	.049	.069
40	.028	.049

50	.004	.017
55	.000	.004

Assumptions Made In Valuing Spouse's Benefit

Eighty percent of the male and seventy percent of the female employees included in the valuation are assumed to be married. These percentages are used as the probabilities that survivor benefits will be payable due to preretirement deaths. The wife is assumed to be three years younger than the husband.

Optional Form Election

All employees are assumed to elect the life annuity benefit.

Standing Elections

The client has signed an election that provides for the automatic use of the Carryover and/or Prefunding Balance if necessary at the end of the plan year to meet the minimum funding requirement.

MAP-21 Elections

The MAP-21 segment rates have been used for minimum funding purposes as well as for the calculation of the AFTAP.

Provision for Expenses

The expected administrative (i.e. non-investment) expenses that will be paid from plan assets, which were assumed to equal actual expenses during the prior year, were included in the Target Normal Cost for minimum contribution purposes.

Asset Method

Funding: Market Value of Assets plus interest adjusted accrued but unpaid contributions as of the valuation date plus an adjustment to defer full recognition of investment losses and gains over a two-year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the interest rate above, but no greater than the third segment rate for the plan year, minus the end of the year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions). Note that due to the regulatory constraint on the interest rate, a characteristic of this asset valuation method is that, over time, it may be more likely to produce an actuarial value of assets that is less than the market value of assets.

Employees Valued

Only participants as of the valuation date were valued.
