NOTES TO FINANCIAL STATEMENTS

NOTE A - DESCRIPTION OF THE PLAN

The Plan is a non-contributory defined benefit pension plan established to provide benefits to eligible employees at retirement and is sponsored by Ahlstrom West Carrollton LLC. An eligible employee is an hourly employee of Ahlstrom West Carrollton LLC who has worked at least one year and has been credited with at least one thousand hours of service during that year and is represented by the PACE International Union, AFL-CIO Local Union No. 5-0781, but only to the extent that their eligibility to participate in the Plan has been agreed upon by the Employer and the Union. An eligible employee shall become a participant on the first day of the calendar month that coincides with or next follows the date on which eligibility requirements are met. At the later of age 62 or the date on which the participant completes five years of Plan participation, a participant is entitled to his accrued retirement benefit, as defined in the Plan. A participant whose employment continues after age 62 may elect to defer payment of benefits to the date of termination. A participant qualifies for early retirement when he has completed ten years of service and attains age 55. A participant becomes fully vested upon completion of five years of service. A participant may receive disability payments when he has completed fifteen years of service. A participant's beneficiary may be eligible to receive death benefits as defined in the Plan.

In 2007, the Plan was amended to change the eligibility requirements. No eligible employee whose employment begins on or after January 1, 2008, will be eligible to participate in the Plan. Also, a participant in the Plan who was employed prior to August 1, 2006, may elect to terminate his participation in the Plan and enroll in the 401(k) plan.

The Company's funding policy is to fund pension costs that, at a minimum, would satisfy the minimum requirements of the Employee Retirement Income Security Act of 1974 (ERISA) and would be deductible under Section 404 of the Internal Revenue Code. Contributions are intended to fund the Plan's normal cost on a current basis. The Plan has met ERISA's minimum funding requirements.

Upon termination, the Plan's assets would be allocated among the participants in the order prescribed by ERISA. Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation if the Plan terminates. The Plan is administrated by certain members of the Company's management approved by the Board of Directors of the Company.

A Summary Plan Description is available to provide greater detail to participants concerning Plan provisions.

The Plan Sponsor sold the Parchment and Converting Business that employed the Plan's Participants as of December 31, 2013; therefore, all participants were terminated as of December 31, 2013, as they no longer work for the Plan Sponsor. All benefits remain frozen.

NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2013 and 2012**

NOTE A - DESCRIPTION OF THE PLAN (Continued)

Amendments

Effective December 31, 2012, the Plan Sponsor and the Union agreed to continue participation in the Plan to participants and freeze the benefits to all participants in the Plan. Plan participants will not earn any future benefits. Any Plan participant who terminates employment during the Plan Year ending December 31, 2012, (voluntary or involuntary) and each Plan participant who is an employee of the Plan Sponsor at December 31, 2012, shall become 100% vested in the accrued benefit as of the earlier of employment termination date or December 31, 2012, regardless of years of service.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The Plan prepares its financial statements using the accrual basis of accounting.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note E for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Benefit payments to participants are recorded upon distributions.

Administrative Expenses

Administrative fees are paid by both the Plan and Plan Sponsor. Plan expenses paid by the Plan include fees for investment management and trust service fees. Audit, legal, and accountant expenses are paid by the Plan Sponsor.

NOTE C - ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments including lump sum distributions that are attributable under the Plan's provisions to the service participants have rendered. Accumulated plan benefits include benefits expected to be paid to (1) retired or terminated participants or their beneficiaries, (2) beneficiaries of participants who have died, and (3) active participants or their beneficiaries. Benefits under the Plan are calculated based on the number of years during which a participant completed one thousand hours of service with Ahlstrom West Carrollton LLC.

The actuarial present value of accumulated benefits is determined by an actuary from Milliman USA and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations as of January 1, 2014 and 2013, include (1) mortality of participants determined using the 2014 and 2013 Group Annuity Mortality Tables, and (2) discount rate of 7%.

The most recent actuarial valuation of the Plan was made as of January 1, 2014. The actuarial present value of accumulated plan benefits at January 1 is as follows:

	<u>2014</u>	<u>2013</u>
Actuarial present value of accumulated plan benefits vested:		
Participants currently receiving benefits	\$ 795,264	\$ 818,997

NET APPRECIATION (DEPRECIATION) IN FAIR VALUE

Net appreciation (depreciation) in the fair value of investments bought, sold, and held for the year ended December 31 is as follows:

	<u>2013</u>
Investments at Fair Value as Determined by	
Quoted Market Price:	
Equity Mutual Funds	\$ 287,201
Fixed Income Mutual Funds	<u>(216,029)</u>
Net Appreciation in Fair Value	<u>\$ 71,172</u>

NOTE E - FAIR VALUE MEASUREMENTS

FASB Accounting Standards Codification (ASC) 820-10, Fair Value Measurements, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820-10 are described below.

Level 1

Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2

Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2013 and 2012**

NOTE E - FAIR VALUE MEASUREMENTS (Continued)

Level 3

Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level with the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2013.

Common stocks, corporate bonds, and U.S. government securities: Valued at the closing price reported on the active market on which the individual securities are traded.

Mutual funds: Valued at the net asset value (NAV) of shares held by the Plan at year-end.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of:

	<u>Assets at Fair Value as of December 31, 2013</u>			
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>

NOTE F - PARTY-IN-INTEREST TRANSACTIONS

Certain Plan investments are shares of mutual funds managed by SEI Private Trust Company. SEI Private Trust Company is the Trustee as defined by the Plan; therefore, these transactions qualify as party-in-interest.

NOTE G - INCOME TAX STATUS

The Plan obtained a favorable tax determination letter on July 14, 2011, in which the Internal Revenue Service stated that the Plan was in compliance with the applicable requirements of the Internal Revenue Code. The Plan Sponsor believes that the Plan was qualified and the related trust was tax-exempt as of the financial statement date; therefore, no income taxes have been provided for in the financial statements.

Subsequent amendments have been made to the Plan, and these changes have not been submitted for a determination letter.

Accounting principles generally accepted in the United States of America require the Plan Administrator to evaluate tax positions taken by the Plan and recognize a tax liability for any uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan is subject to routine audits by tax authorities; however, there are currently no audits for any tax periods in progress. The Plan Administrator believes the Plan is no longer subject to income tax examinations for years prior to 2010.

NOTE H - RISKS AND UNCERTAINTIES

Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee compensation, and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements.

NOTE I - PLAN TERMINATION

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. The Plan's financial statements have been prepared based on the Plan continuing as a frozen plan. At December 31, 2012, the Plan was amended to continue participation in the Plan and freeze the benefits of all participants in the Plan. Due to the number of involuntary terminations in 2012, a partial plan termination occurred and participants as of December 31, 2012, immediately became 100% vested in their respective accrued benefit.

NOTE J - SUBSEQUENT EVENT

Subsequent events were evaluated through July 24, 2014, the date which the financial statements were available to be issued.

Description of the Actuarial Cost Method

A. Actuarial Cost Method

The true cost of a pension plan will ultimately be determined by the excess of benefits actually paid and the expenses incurred in its administration over investment income earned on monies set aside for its funding. Thus, the ultimate cost of a plan cannot be known until the last payment has been made to its last participant. The actuarial cost method is the technique adopted by the actuary for establishing the amount and incidence of annual actuarial costs. The actuarial cost method determines the portion of the ultimate cost of a pension plan which should be allocated to each plan year (known as the normal cost). The cost method is thus a budgeting tool which helps to ensure that the pension plan will be adequately and systematically funded.

The annual costs for a pension plan can be determined using any one of several actuarial cost methods. The methods differ in how much of the ultimate cost of the plan is assigned to each prior year, the current year and to each future year. Although the ultimate cost for a pension plan will be determined not by the cost method, but by the benefits and expenses which become payable and the earnings which are obtained on the investments of the plan, the pattern of annual contributions from year to year and the rate of funding for the benefits will vary with the choice of actuarial cost method. In addition, the choice of actuarial assumptions for a given actuarial cost method will affect the current level of contributions and pattern of future contributions.

The actuarial cost method used in the valuation of this plan is known as the projected unit credit cost method. Under this cost method a projected retirement benefit at assumed retirement age is computed for each participant. The normal cost for each participant is computed as the present value of the pro-rata portion of the participant's projected benefit which is accrued or earned during the plan year being valued. The normal cost for the plan is the total of the individually computed normal costs for all participants including the costs for any death or disability benefits under the plan.

The funding cost of the Plan is derived by making certain specific assumptions as to rates of interest, mortality, turnover, etc. which are assumed to hold for many years into the future. Since actual experience may differ somewhat from the assumptions, the costs determined by the valuation must be regarded as estimates of the true costs of the Plan.

B. Asset Valuation Method

For purposes of applying the actuarial cost method, plan assets are valued at market value. Employer contributions made after the valuation date are discounted back to the valuation date using the prior year's Effective Interest Rate and included in the assets.
