We were engaged to audit the accompanying financial statements of MeadWestvaco Corporation Envelope Division Retirement Plan for Salaried and Non-Bargained Hourly Employees (the Plan), which comprise the statements of net assets available for benefits and statements of accumulated plan benefits as of December 31, 2013 and 2012, and the related statement of changes in net assets available for benefits for the year ended December 31, 2013, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audit in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the *Basis for Disclaimer of Opinion* paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by The Northern Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of December 31, 2013 and 2012, and for the year ended December 31, 2013, that the information provided to the plan administrator by the trustee is complete and accurate.

Disclaimer of Opinion

Because of the significance of the matter described in the *Basis for Disclaimer of Opinion* paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Report on Form and Content in Compliance With DOL Rules and Regulations

The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Schedule SB, Part V—Summary of Plan Provisions

Effective Date	December 1, 1955.

Provisions of Final Average Pay Formula

Eligibility for Participation	Envelope division salaried and non-bargained hourly employees.
Eligibility for Benefits	
Normal Retirement	Age 65.
Early Retirement	Age 55 and 5 years of service.
Disability Retirement	5 years of service and totally and permanently disabled for salaried locations.
Preretirement Death	Married participants with 5 years of service.
Vesting	5 years of service.
Amount of Benefits	
Normal Retirement	Salaried employees receive the larger of (a), (b), or (c): (a) 1.6% of final average salary for each year of benefit service not in excess of 40 minus 1.25% of primary social security amount for each year of benefit service not in excess of 40. (b) 1.0% of final average salary for each year of benefit service not in excess of 40. (c) 12/31/02 accrued benefit plus benefit calculated in (a) using future service only. Non-bargained hourly participants receive a monthly life annuity equal to the participant's total years of benefit service multiplied by $26.50.
Early Retirement	A benefit computed as for normal retirement, based on benefit service at date of early retirement and reduced 0.25% monthly between ages 62 and 65; reduced 0.50% monthly prior to age 62. For employees with at least 20 years of benefit service, benefit is unreduced at age 62 and over.

Amount of Benefits (continued)

Late Retirement	The normal retirement benefit based on pay and service at actual retirement.
Disability Retirement	The participant may elect to receive the accrued benefit to date without reduction for early commencement; or he may defer benefit payments until age 65 and continue accruing allowed service.
Preretirement Death	Upon the death of a vested active participant who has attained age 55 and 5 years of service, 75% of his accrued benefit payable immediately, reduced for early commencement, and a 75% contingent annuitant option. Upon the death of a vested participant who has not attained age 55 and 5 years of service, 50% of his accrued benefit payable at his earliest retirement age, reduced for early commencement, and a 50% contingent annuitant option.
Vested Deferred Retirement	A benefit computed in the same manner as a normal retirement benefit, assuming the employee would have continued to receive earnings for social security purposes at the same rate as in effect at the date of termination. The benefit will commence no earlier than the early retirement date and will be reduced 6% each year the commencement date falls before the participant's 65th birth date.
Normal Form of Benefits	Life annuity. Married participants will receive reduced benefits in a 50% contingent annuitant option unless otherwise elected.
Benefit Service	All participation service with the Company.

Salary	Compensation paid on a regular, fixed, periodic basis, overtime, cash bonuses for performance, sales commissions and cash awards under the Company's annual incentive compensation plan, exclusive of the following: (1) Long-term incentives. (2) Severance pay. (3) Hiring bonuses or retention bonuses. (4) Any other extra, contingent or supplemental compensation.
ERISA Maximum Benefit	Retirement benefit is capped at $205,000 payable as a life annuity reduced for early receipt. Salary is capped at the IRC Section 401(a)(17) limit for benefit determination. The IRC Section 401(a)(17) limit for 2013 is $255,000. The 2002 limit of $200,000 applies retroactively.
Final Average Salary	The average of the participant's 5 highest salaries during his final 10 years of service.
Primary Social Security Amount	The estimated social security benefit payable to the retiree at age 65 based upon the Social Security Act as in effect on the date of termination. Estimates of amounts payable at age 65 will assume zero earnings to age 65 for retirement ages 55 and over. Level future earnings to age 65 will be used for deferred vested benefits.

Provisions of Cash Balance Formula

Eligibility for Participation

- Future accruals for certain salaried and non-bargained hourly participants in the ERP.
  - All employees hired on or after January 1, 2007.
  - All employees under age 40 as of January 1, 2008.
  - Employees age 40 and older as of January 1, 2008 will have a one-time choice to continue earning benefits under the final pay or cash balance formula.

Eligibility for Benefits

Vesting: 3-year cliff vesting.

Pre-retirement Death: Immediately vested in account balance upon death.

Disability: The participant may elect to receive benefits as if he had terminated, or he may defer benefits until age 65 and continue accruing pay and interest credits based on his most recent rate of pay prior to disability.

Amount of Benefits

Annual Pay Credit: Applied on December 31 each year (or benefit commencement date, if earlier).

Points are calculated as age plus benefit service as of December 31 each year.

Points	Annual Credit as % of Pensionable Pay
Less than 40	4%
40–49.9	5%
50–59.9	6%
60–69.9	7%
70 or more	8%

Annual Interest Credit: Applied on December 31 each year (or benefit commencement date if earlier).

Annual interest crediting rate is the 30-year treasury rate in effect on November of the prior year.

Normal Form of Benefits	Life annuity equivalent of the account balance [using IRC section 417(e) basis]. Married participants receive an actuarially-reduced pension for life with 50% continuing to a surviving spouse upon death of the participant.
Optional Form of Benefits	Lump sum payment of account balance.
Benefit Service	All participation service with the Company.

Schedule SB, Part V—Statement of Actuarial Assumptions/Methods For Funding Requirements

Disability Rates	See Table E-1 for salaried participants. See Table E-2 for non-bargained hourly participants.
Surviving Spouse Benefit	It is assumed that 80% of males and 80% of females have an eligible spouse, and that males are 3 years older than their spouses.
Valuation Compensation	2012 pensionable earnings rolled forward 1 year with the salary increase assumption for non-bargained hourly participants. 2012 pensionable earnings (less actual bonus) rolled forward 1 year with the salary increase assumption plus the target bonus for salaried participants.
Benefit and Compensation Limits	Projected benefits and compensation are limited by the current IRC section 415 maximum benefit of $205,000 and the 401(a)(17) compensation limit of $255,000.
Valuation of Plan Assets	Average market value where the fair market value as of the December 31 immediately preceding the valuation date is averaged with the fair market value as of the preceding November 30 (adjusted for contributions, benefit payments, administrative expenses and assumed investment return between this date and the valuation date).
Expenses	Expected annual administrative and investment-related expenses (based on actual expenses paid out in the prior year) are explicitly added to the target normal cost.
Actuarial Method	Standard Unit Credit Cost Method.
Valuation Date	January 1, 2013.

Schedule SB, Part V—Summary of Plan Provisions

Effective Date	December 1, 1955.

Provisions of Final Average Pay Formula

Eligibility for Participation	Envelope division salaried and non-bargained hourly employees.
Eligibility for Benefits	
Normal Retirement	Age 65.
Early Retirement	Age 55 and 5 years of service.
Disability Retirement	5 years of service and totally and permanently disabled for salaried locations.
Preretirement Death	Married participants with 5 years of service.
Vesting	5 years of service.
Amount of Benefits	
Normal Retirement	Salaried employees receive the larger of (a), (b), or (c): (a) 1.6% of final average salary for each year of benefit service not in excess of 40 minus 1.25% of primary social security amount for each year of benefit service not in excess of 40. (b) 1.0% of final average salary for each year of benefit service not in excess of 40. (c) 12/31/02 accrued benefit plus benefit calculated in (a) using future service only. Non-bargained hourly participants receive a monthly life annuity equal to the participant's total years of benefit service multiplied by $26.50.
Early Retirement	A benefit computed as for normal retirement, based on benefit service at date of early retirement and reduced 0.25% monthly between ages 62 and 65; reduced 0.50% monthly prior to age 62. For employees with at least 20 years of benefit service, benefit is unreduced at age 62 and over.

Amount of Benefits (continued)

Late Retirement	The normal retirement benefit based on pay and service at actual retirement.
Disability Retirement	The participant may elect to receive the accrued benefit to date without reduction for early commencement; or he may defer benefit payments until age 65 and continue accruing allowed service.
Preretirement Death	Upon the death of a vested active participant who has attained age 55 and 5 years of service, 75% of his accrued benefit payable immediately, reduced for early commencement, and a 75% contingent annuitant option. Upon the death of a vested participant who has not attained age 55 and 5 years of service, 50% of his accrued benefit payable at his earliest retirement age, reduced for early commencement, and a 50% contingent annuitant option.
Vested Deferred Retirement	A benefit computed in the same manner as a normal retirement benefit, assuming the employee would have continued to receive earnings for social security purposes at the same rate as in effect at the date of termination. The benefit will commence no earlier than the early retirement date and will be reduced 6% each year the commencement date falls before the participant's 65th birth date.
Normal Form of Benefits	Life annuity. Married participants will receive reduced benefits in a 50% contingent annuitant option unless otherwise elected.
Benefit Service	All participation service with the Company.

Salary	Compensation paid on a regular, fixed, periodic basis, overtime, cash bonuses for performance, sales commissions and cash awards under the Company's annual incentive compensation plan, exclusive of the following: (1) Long-term incentives. (2) Severance pay. (3) Hiring bonuses or retention bonuses. (4) Any other extra, contingent or supplemental compensation.
ERISA Maximum Benefit	Retirement benefit is capped at $205,000 payable as a life annuity reduced for early receipt. Salary is capped at the IRC Section 401(a)(17) limit for benefit determination. The IRC Section 401(a)(17) limit for 2013 is $255,000. The 2002 limit of $200,000 applies retroactively.
Final Average Salary	The average of the participant's 5 highest salaries during his final 10 years of service.
Primary Social Security Amount	The estimated social security benefit payable to the retiree at age 65 based upon the Social Security Act as in effect on the date of termination. Estimates of amounts payable at age 65 will assume zero earnings to age 65 for retirement ages 55 and over. Level future earnings to age 65 will be used for deferred vested benefits.

Provisions of Cash Balance Formula

Eligibility for Participation

- Future accruals for certain salaried and non-bargained hourly participants in the ERP.
  - All employees hired on or after January 1, 2007.
  - All employees under age 40 as of January 1, 2008.
  - Employees age 40 and older as of January 1, 2008 will have a one-time choice to continue earning benefits under the final pay or cash balance formula.

Eligibility for Benefits

Vesting: 3-year cliff vesting.

Pre-retirement Death: Immediately vested in account balance upon death.

Disability: The participant may elect to receive benefits as if he had terminated, or he may defer benefits until age 65 and continue accruing pay and interest credits based on his most recent rate of pay prior to disability.

Amount of Benefits

Annual Pay Credit: Applied on December 31 each year (or benefit commencement date, if earlier).

Points are calculated as age plus benefit service as of December 31 each year.

Points	Annual Credit as % of Pensionable Pay
Less than 40	4%
40–49.9	5%
50–59.9	6%
60–69.9	7%
70 or more	8%

Annual Interest Credit: Applied on December 31 each year (or benefit commencement date if earlier).

Annual interest crediting rate is the 30-year treasury rate in effect on November of the prior year.

Normal Form of Benefits	Life annuity equivalent of the account balance [using IRC section 417(e) basis]. Married participants receive an actuarially-reduced pension for life with 50% continuing to a surviving spouse upon death of the participant.
Optional Form of Benefits	Lump sum payment of account balance.
Benefit Service	All participation service with the Company.

ENVELOPE DIVISION RETIREMENT PLAN

FOR SALARIED AND NON-BARGAINED HOURLY EMPLOYEES

STATEMENTS OF ACCUMULATED PLAN BENEFITS

	December 31, 2013	December 31, 2012
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Participants currently receiving payments	$58,507,000	$57,598,000
Other participants	12,283,000	32,089,000
Total actuarial present value of accumulated plan benefits	$70,790,000	$89,687,000

At December 31, 2012, the total actuarial present value of accumulated plan benefits was $89,687,000. During the year ended December 31, 2013, the total actuarial present value of accumulated plan benefits decreased $18,897,000 due to:

- benefit payments resulting in a decrease of $33,159,000, partially offset by
- plan benefit changes in age, service and interest resulting in a net increase of $14,262,000.

The company announced a program that allowed vested former employees who terminated service with the company on or before November 30, 2012 to receive their pension benefit in a single lump sum. The voluntary program was offered to about 20,000 former employees who had between February 15 and April 15, 2013 to make their election. The initiative reduced pension obligations by $23 million.

The accompanying notes are an integral part of these financial statements.

MEADWESTVACO CORPORATION

ENVELOPE DIVISION RETIREMENT PLAN

FOR SALARIED AND NON-BARGAINED HOURLY EMPLOYEES

NOTES TO FINANCIAL STATEMENTS

Note 1 - Description of the Plan

Organization and Administration

The following description of the MeadWestvaco Corporation Envelope Division Retirement Plan for Salaried and Non-Bargained Hourly Employees (the "Plan") provides only general information. Participants should refer to the Plan Document for a more complete description of the Plan's provisions. The Plan is a noncontributory defined benefit plan, which has been approved by the Board of Directors of MeadWestvaco Corporation (the "Company"). Plan assets are invested in the MeadWestvaco Corporation Master Trust (the "Master Trust"). The Northern Trust Company is the Plan's trustee (the "Trustee"). The Plan is administered by the Benefit Plans Administration Committee and the Benefit Plans Investment Policy Committee, both of which are appointed by the Chief Executive Officer of the Company. Administrative expenses, including benefit payment service charges and actuarial, trustee and audit fees, are paid by the Plan. Commissions and fees paid in connection with securities transactions and the Pension Benefit Guaranty Corporation (the "PBGC") premiums are also paid by the Plan. The Company pays for a blanket fidelity insurance policy which provides coverage for the Plan.

Eligibility and Vesting

Effective January 31, 2012, all MeadWestvaco Corporation salaried and non-bargained hourly employees who were employed by the MeadWestvaco Corporation Envelope Division, except for disabled participants, are no longer accruing service in the Plan pursuant to the sale of the Envelope Division. The Plan provides for lifetime retirement benefits beginning at age 65 with reduced benefits available upon earlier retirement. Plan participants with 20 years of credited service may retire with full benefits at age 62. At point of sale, participants became fully vested in their accrued benefits.

A cash balance formula within the Company's existing retirement plans for salaried and non-bargained hourly employees was adopted in 2006. This formula provides cash balance credits at the rate of 4% - 8% of eligible earnings, depending upon age and years of service points, with interest credited annually at the 30-year Treasury rate. Benefits under the cash balance formula vest after three years of credited service.

Note 1 - Continued

Plan Termination

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event of discontinuance of the Plan, all accrued benefits become vested and plan assets will be allocated to retirees and participants based on a predetermined order of precedence set forth in the Plan and by ERISA. First priority is payment of benefits derived from employee contributions, if any, and payment of benefits to participants who have been retired for three or more years. Second priority is payment of benefits to participants who would have been retired for three or more years had they elected early retirement. Third priority is payment of all remaining benefits which were vested prior to plan termination. The final priority is payment of all other benefits. Any balance remaining would be disbursed by the Trustee at the direction of the Board of Directors of the Company.

Insurance coverage by the PBGC guarantees each participant's vested benefits (exclusive of benefits which would become vested upon plan termination) up to $4,790 per month for plan terminations occurring during 2013. Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

Note 2 - Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

Use of Estimates and Assumptions

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of net assets available for benefits, liabilities, and changes therein and disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Note 2 - Continued

Risk and Uncertainties

The actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates, employee compensation and demographics. Investment securities held indirectly through the Plan's interest in the Master Trust are also exposed to various risks, such as interest rate, market and credit risks. Due to the changing nature of these assumptions, and the level of risk associated with certain investment securities, it is at least reasonably possible that changes in these assumptions and changes in the values of the investment securities will occur in the near term and, due to the uncertainties inherent in setting assumptions, the effect of such changes could materially affect the amounts reported in the financial statements.

Allocation of Units of the Master Trust

Each month, the value of each individual plan's investment in the Master Trust is determined by specific contributions to that plan, net of benefit payments, and a proportionate allocation of Master Trust earnings (losses). Master Trust earnings (losses) are comprised of interest and dividend income and the net appreciation (depreciation) in the fair value of investments, reduced by investment management fees. Net appreciation (depreciation) in the fair value of Master Trust investments consists of the realized gains (losses) and the unrealized appreciation (depreciation) on those investments.

The allocation percentage of these earnings (losses) is calculated on the monthly valuation date by dividing the Plan's current fund balance, net of funding activities directly attributable to the Plan, by the consolidated fund balance of all plans participating in the Master Trust. Following such determination, each plan is credited with a proportionate allocation of Master Trust net earnings (losses).

Security Transactions and Valuations

The Master Trust's investments are stated at fair value. The fair value of a financial instrument is the amount that would be received to sell an asset in an orderly transaction between market participants at the measurement date (the exit price). Security transactions of the Master Trust are accounted for on the trade date.

Note 2 - Continued

Investments in equity and fixed income securities listed on national securities exchanges are valued at fair value based on the sales price per the fund company, which is reported on composite listings on the valuation date. Equity and fixed income securities and other assets are valued at fair value based on the official closing price on the NASDAQ listing. If not NASDAQ traded, the securities are valued at broker price or, if no bid is available, the securities are valued at a quoted bid price obtained from a major market maker. Units held in the common collective trusts and 103-12 investment entities are valued at the unit value as reported by the investment managers, which is based on the quoted market value of underlying assets or market interest rates and quoted values for similar securities, as of December 31, 2013 and December 31, 2012. Investments in partnerships and joint ventures are valued at estimated fair value based upon a valuation of the underlying portfolio using guidelines or standard industry practices. Real estate investments are valued at estimated fair value based upon fund statements provided by the fund managers. For additional information on the Master Trust's derivative financial instruments, see Note 2 - Derivatives. Dividends are recorded on the ex-dividend date. Interest is recorded on the accrual basis.

Payment of Benefits

Benefit payments to participants are recorded when paid.

Funding Policy, Actuarial Methods and Assumptions

Contributions to the Plan, if any, are paid by the Company and equal or exceed ERISA minimum funding standards. The actuary's funding recommendations are based on the Projected Unit Credit Actuarial Cost method in conjunction with the actuarial assumptions. The Company does not anticipate any required funding payments in the foreseeable future due to the overfunded status of the Plan. The Company made no contribution for the year ended December 31, 2013 in accordance with the ERISA minimum funding requirements.

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable to the service employees have rendered under the Plan's provisions.

Note 2 - Continued

Accumulated plan benefits include benefits expected to be paid to retired or terminated employees or their beneficiaries, beneficiaries of employees who have died, and present employees or their beneficiaries.

The actuarial present value of accumulated plan benefits is determined by Aon Hewitt and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

For the year ended December 31, 2013 and 2012, the following actuarial assumptions were used:

- Mortality (active and retiree) - using the RP-2000CH Fully Generational Mortality Table
- Mortality (disabled) - using the RP-2000DR Disabled Mortality Table
- Average retirement age - 2013, 63; 2012, 61
- Asset valuation method - fair market value
- Interest rate - 2013, 7.90%; 2012, 7.60%

Derivatives

The Master Trust enters into contractual arrangements classified as derivatives in carrying out its investment strategy, principally to (1) hedge a portion of the Master Trust's portfolio to limit or minimize exposure to certain risks, (2) gain exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (3) increase investment returns by reducing the cost of structuring the portfolio or capturing value disparities between financial instruments. The Master Trust utilizes both exchange traded investment instruments, such as equity and interest rate futures, options on futures, and over-the-counter ("OTC") instruments, such as options and forward exchange contracts. When engaging in OTC and forward exchange contracts, there is exposure to credit loss in the event of nonperformance by the counterparties to these transactions. The Master Trust manages this for interest rate derivatives by requiring counterparties to post collateral with de minimis thresholds.

Note 2 - Continued

The Master Trust manages credit exposure for forward exchange contracts through credit approvals, limits, and monitoring procedures and, to the extent possible, by restricting the period over which unpaid balances are allowed to accumulate. Procedures are in place at the Trustee and at the investment managers to regularly monitor and report market risk. The investment managers monitor counterparty credit risks.

The Master Trust does not anticipate nonperformance by counterparties to these contracts, and no material loss would be expected from any such nonperformance.

The following is a summary of the significant accounting policies associated with the Master Trust's use of derivatives:

Forward Foreign Currency Exchange Contracts:
A forward foreign currency exchange contract ("forward currency contract") is a commitment to purchase or sell a foreign currency at a future settlement date and at a negotiated rate. Forward currency contracts are utilized to hedge a portion of the currency exposure that results from the Master Trust's holdings of equity and fixed income securities denominated in foreign currencies.

Forward currency contracts are marked-to-market at the prevailing forward exchange rate of the underlying currencies, and the difference between contract value and market value is recorded as unrealized appreciation (depreciation) in Master Trust interest of the Plan assets. When the forward exchange contract is closed, the Master Trust transfers the unrealized appreciation (depreciation) to a realized gain (loss) equal to the change in the value of the forward exchange contract when it was opened and the value at the time it was closed or offset. Sales and purchases of forward currency contracts having the same settlement date and broker, are offset and any gain (loss) is realized on the date of offset.

Note 2 - Continued

Future Contracts:

A future contract is a contractual agreement to make or take delivery of a standardized quantity of a specified grade or type of commodity or financial instrument at a specified future date, in accordance with terms specified by a regulated future exchange. The Master Trust uses equity index and fixed income future contracts to manage exposure to the market.

Buying futures tends to increase the Master Trust's exposure to the underlying instrument. Selling futures tends to decrease the Master Trust's exposure to the underlying instrument held or hedge the fair value of other fund investments. The Master Trust does not employ leverage in its use of futures; thus, cash balances are maintained at a level at least equal to the contract value of the futures.

Future contracts are valued at the last settlement price at the end of each day on the exchange which they are traded. Upon entering into a future contract, the Master Trust is required to deposit either in cash or securities an amount equal to a certain percentage of the nominal value of the contract ("initial margin"). Pursuant to the future contract, the Master Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the future contract. Such receipts or payments are known as variation margin, which are settled daily and are included in the realized gains (losses) on future contracts. The Master Trust will record a variation margin receivable or payable in the net assets for variation margins, which have not yet been paid at the end of the year.

Future contracts involve, to varying degrees, credit and market risks. The Master Trust enters into future contracts on exchanges where the exchange acts as the counterparty to the transaction. Thus, credit risk on such transactions is limited to the failure of the exchange. The daily settlement on the future contracts serves to greatly reduce credit risk. Losses in value may arise from changes in the value of the underlying instrument or if there is an illiquid secondary market for the contracts. In addition, there is the risk that there may not be an exact correlation between a future contract and the underlying index or security.

Note 2 - Continued

Options:

An option contract is a contract in which the writer of the option grants the buyer of the option the right to purchase from ("call option"), or sell to ("put option"), the writer a designated instrument at a specified price within a specified period of time. Certain options, including options on indices, will require cash settlement by the Master Trust if the option is exercised. The Master Trust may enter into put or call option contracts in order to hedge against potential adverse price movements in the value of the portfolio assets, as a temporary substitute for selling selected investments; to lock in the purchase price of a security or currency that it expects to purchase in the near future, as a temporary substitute for the purchase of selected investments; and to enhance potential gain. The Master Trust does not employ leverage in its use of option contracts.

When the Master Trust purchases or writes an option, an amount equal to the premium paid or received by the Master Trust is recorded as an asset or liability and is subsequently adjusted to the current market value of the option purchased or written. Options purchased or written are valued at the last sale price or, in the absence of a sale; the mean between the closing bid and asked prices or at the most recent asked price (bid for purchased options) if no bid and asked price are available. OTC purchased or written options are valued using dealer supplied quotations. Gain and loss is recognized when the option contract expires or is closed. Changes in the fair value of an option are recognized in earnings of the Master Trust.

If the Master Trust writes a covered call option, the Master Trust foregoes, in exchange for the premium, the opportunity to profit during the option period from an increase in the value of the underlying security above the exercise price. If the Master Trust writes a put option, it accepts the risk of a decline in the value of the underlying security below the exercise price. OTC options have a risk of the potential inability of counterparties to meet the terms of their contracts. The Master Trust's maximum exposure to purchased options is limited to the premium initially paid.

Note 2 - Continued

In addition, certain risks may arise upon entering into option contracts prior to the expiration date, and a change in value of the option contract may not correlate exactly with changes in the value of the securities or currencies hedged.

The Master Trust uses the following types of options: options on fixed income futures, options on equity indices, options on foreign currencies, options on equity securities, and options on bonds.

Swaps:

A swap is an agreement between two parties to exchange different financial returns on a notional investment amount. The major forms of swaps traded are interest rate swaps, credit default swaps, and total return swaps. The Master Trust uses swap and swaption (an option on a swap) contracts to adjust exposure to interest rates, fixed income securities exposure, credit exposure, and equity exposure, and to generate income based on the investment views of the portfolio managers regarding interest rates, indices and debt issues. Swaps are valued using a modeling technique which utilizes a market based discounted cash flow analysis.

Interest rate swaps involve exchanges of fixed rate and floating rate interest. Interest rate swaps are often used to alter exposure to interest rate fluctuations, by swapping fixed rate obligations for floating rate obligations, or vice versa. The counterparties to the swap agree to exchange interest payments on specific dates, according to a predetermined formula. The payment flows are usually netted against each other, with one party paying the difference to the other.

A credit default swap is a contract between a buyer and seller of protection against pre-defined credit events. The Master Trust may buy or sell credit default swap contracts to seek to increase the Master Trust's income or to mitigate the risk of default on Master Trust securities.

A total return swap is a contract between a buyer and seller of exposures to certain asset classes such as equities. The Master Trust may buy or sell total return contracts to seek to increase or reduce the Master Trust's exposure to certain asset classes.

New Accounting Pronouncements

In January 2013, the plan adopted new accounting guidance regarding additional disclosures for financial instruments that are offset, including the gross amount of the asset and liability as well as the impact of any net amount presented in the plan financial statements. The impact of adoption did not have a material effect on the plan financial statements.

Note 3 - Federal Income Taxes

The Internal Revenue Service ("IRS") has determined and informed the Company by a letter dated June 25, 2010, that the Plan and related Master Trust are designed in accordance with applicable sections of the Internal Revenue Code ("IRC"). The Plan has been amended since receiving the determination letter, however, the Plan Administrator believes the Plan and Master Trust continue to be designed and operated in compliance with the requirements for income tax exemption under the IRC, and no income tax provision is required.

The Plan recognizes the tax benefits of certain tax positions only when the position is "more likely than not" to be sustained assuming examination by tax authorities. The tax benefit recognized is the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement. As of December 31, 2013, the Plan did not have any liabilities for any uncertain tax positions. The Plan's open tax years for the prior three years are subject to examination by the IRS.

Note 4 - Information Certified by the Trustee

The Plan Administrator has elected the method of annual reporting compliance permitted by 29CFR2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

Note 4 - Continued

The following information as of December 31, 2013 and 2012 and for the year ended December 31, 2013 was derived from data certified by the Trustee, The Northern Trust Company, as being complete and accurate:

Information contained in the Statements of Net Assets Available for Benefits:
Investment in MeadWestvaco Corporation Master Trust

Information contained in the Statement of Changes in Net Assets Available for Benefits:
Interest in Net Earnings of MeadWestvaco Corporation Master Trust

Investment information included in Notes 2, 5, 6 and 8

The Plan's auditor did not perform audit procedures with respect to this information, except for comparing such information to that which is included in the financial statements.

Note 5 - Investments

At December 31, 2013 and 2012, the investment in the Master Trust was $500,615,684 and $512,605,109, respectively, representing 5% or more of the Plan's net assets on those dates.

Note 6 - Interest in the Master Trust

At December 31, 2013 and 2012, the Plan's undivided interest in the net assets of the Master Trust was 34.4% and 34.0%, respectively. Net assets of the Master Trust at December 31, 2013 and 2012 were as follows:

Note 7 - Party-in-Interest Transactions

MeadWestvaco Corporation as Plan sponsor is a related party. The Short Term Investment Fund is managed by the Trustee of the Master Trust and, therefore, these transactions qualify as party-in-interest transactions.

Note 8 - Fair Value Measurement

ASC 820, *Fair Value Measurements and Disclosures*, provides a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value, as follows: Level 1, which refers to securities valued using unadjusted quoted prices from active markets for identical assets; Level 2, which refers to securities not traded on an active market but for which observable market inputs are readily available; and Level 3, which refers to securities valued based on significant unobservable inputs. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

Fair value calculations may not be indicative of net realizable value or reflective of future fair values. Furthermore, although Plan management believes the valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Management's assessment of the assets specific to the Master Trust (which holds the assets of the retirement plans) and are based on the lowest level of any input that is significant to the fair value measurement in its entirety, as of December 31, 2013 and 2012. The categorization of a value determined for a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Plans' perceived risk of that instrument. Plan management has used valuation techniques to maximize observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used to determine fair value of assets at year end. There have been no changes in the methodologies used at December 31, 2013 and 2012.

Equities: Valued at the closing price reported in the primary and secondary markets at year end. When quoted prices are not available, similar instruments adjusted for certain risks that may not be observable are used, such as liquidity risks.

Note 8 - Continued

Corporate bonds: Certain corporate bonds are valued at the closing price reported in the primary and secondary markets in which the bond is traded at year end. Other bonds are valued based on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available for identical or similar bonds, the bond is valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Government securities: Valued at the closing price reported in the primary and secondary markets in which the individual security is traded at year end. When quoted prices are not available for identical or similar securities, the security is valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Mutual funds and common collective trusts: Fair value represents the net asset value (NAV) of the fund shares, which is calculated based on the valuation of the funds' underlying investments at fair value at the end of the year. The investments are public investment vehicles, which are using the NAV provided by the administrator of the fund. The NAV is based on the value of the underlying assets owned by the fund, excluding transaction costs, minus its liabilities, and then divided by the number of shares outstanding. See the fair value tabular information for a further explanation of the NAV.

Derivatives: Valued at the closing price reported in the primary and secondary markets in which the individual security is traded at year end. Valued by third party vendors based on discounted cash flow models with market based interest rates as inputs. See Note 2 for a description of value for derivative instruments.

Partnerships and joint ventures: Valued quarterly on the basis of discounted cash flow analysis and comparable market inputs.

Note 8 - Continued

Real estate: Valued quarterly by the fund managers on the basis of a discounted cash flow approach, which includes the future rental receipts, expenses, and residual values as the highest and best use of the real estate from a market participant's view as rental property.

Other assets and liabilities: Valued at the closing price reported in the primary and secondary markets in which the individual security is traded at year end. When quoted prices are not available, the security is valued by third party vendors using observable inputs with market based interest rates, such as similar instruments.

Total Master Trust assets and liabilities at fair value classified within Level 3 were $275,386,053 and $279,902,135, as of December 31, 2013 and 2012, respectively. Such amounts were 7% of "Total investments" on the Master Trust's statement of net assets at fair value as of December 31, 2013 and 2012, respectively. The following information is presented for assets recorded in the Plan's statement of net assets available for benefits at December 31, 2013 and 2012, respectively.

Note 8 - Continued

(1) Quoted prices in active markets for identical assets.
(2) Quoted prices for similar assets and liabilities in active markets.
(3) Significant unobservable inputs.

(a) Derivative instruments consist of hedge contracts on foreign currencies and interest rate swaps. Foreign currency forward contracts and interest rate swaps are valued using models with market inputs such as prices of instruments of a similar nature.

(b) Equity investments, preferred stock, and other are valued using quoted market prices multiplied by the number of shares owned. Dealer quotes are used for less liquid markets. Valuation models with market inputs are used for securities that do not trade in transparent markets. The other pension (payables) receivables that are classified as Level 3 investments are valued using contract value which approximates fair value and include unobservable inputs such as illiquidity.

(c) Government securities include treasury and agency debt. The Level 2 investments are valued using a broker quote in an active market. The Level 3 investments include unobservable inputs that are valued using third-party pricing information without adjustments.

(d) The corporate debt investments category is primarily comprised of U.S. dollar denominated investment grade and non-investment grade securities. It also includes investments in non-U.S. dollar denominated corporate debt securities issued in both developed and emerging markets. Corporate debt investments are valued utilizing a market approach that includes various valuation techniques and sources such as value generation models, broker quotes in active and inactive markets, benchmark yields and securities, reported trades, issuer spreads, and/or other applicable reference data. The Level 3 investments include unobservable inputs that are valued using third-party pricing information without adjustments.

(e) The plan's derivative investments are forward contracts on foreign currencies, interest rate swaps, swaptions, and options on Treasury bonds. These investments are mainly traded in over-the-counter markets. The Level 2 investments are valued using models with market inputs such as dealer quoted interest rates and exchange rates. The Level 3 investments are valued based on the Black Option Pricing Model. The significant unobservable inputs include volatilities ranging from 27% - 47%.

(f) Common collective trusts, registered investment companies, and 103-12 investment entities are commingled funds for which there is no exchange quoted price. These commingled funds are valued at their net asset value per share multiplied by the number of shares held. The determination of net asset value for the commingled funds includes market pricing of the underlying assets as well as broker quotes and other valuation techniques. The funds invest mainly in liquid, transparent markets such as domestic and international equities, U.S. government bonds, and corporate bonds.

(g) Partnerships and joint ventures are commingled investments. The Master Retirement Trust owns interests in limited partnerships or funds rather than direct investments in the underlying asset classes such as real estate. Valuation is based on input from the general partner if no independent source is available. The valuation policies of the general partner are in compliance with accounting standards and the partnerships are audited by nationally recognized auditors. Various valuation techniques and inputs are considered in valuing private portfolio investments, including EBITDA multiples in other comparable third-party transactions ranging from 2.9% - 20%, Price to Earnings Ratios ranging from 4% - 13%, market conditions, liquidity, current operating results, and other pertinent information.

(h) Real estate investments are commingled investments. The fair values of the real estate partnerships are determined based on a combination of third party appraisals, discounted present value of estimated future cash flows, replacement cost, and comparable market prices. The significant unobservable inputs include discount rates ranging from 7% - 27.8% and capitalization rates ranging from 2% - 11%.
