INSTRUMENTARIUM CASH BALANCE PLAN

Notes to Financial Statements

December 31, 2013 and 2012

(1) Description of the Plan

The following brief description of the Instrumentarium Cash Balance Plan (the Plan) provides only general information. The complete terms of the Plan are provided in the Plan document. Information concerning the Plan, including benefits and vesting provisions, is also included in the Summary Plan Description (SPD) and other material distributed to participants.

(a) General

The Plan is a noncontributory frozen defined benefit pension plan covering certain employees who are not covered under a collective bargaining agreement with Datex-Ohmeda, Inc. (the Company). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

(b) Pension Benefits and Vesting

Plan members attaining the retirement age of 65 may receive benefits determined in accordance with plan provisions in effect at the date of retirement. Vested plan members terminating prior to their normal retirement date may commence their benefits whenever they so choose. Participants may elect to receive their pension benefits in the form of a lump-sum distribution, a joint and survivor annuity, or a life annuity. The Plan permits early retirement at ages 55–64 with 10 or more years of service. Each participant's cash balance is credited each quarter with a Pay Credit and an Interest Credit, as defined. With respect to employees who became participants before January 1, 2003, Pay Credits are calculated as 6% of a participant's earnings for participants with less than 10 years of service and 8% of a participant's earnings for participants with 10 or more years of service. With respect to employees who became participants after January 1, 2003, Pay Credits are calculated as 4% of a participant's earnings. A participant's Interest Credit is equal to 0.5% plus the one-year treasury constant maturities yield on December 1 of the preceding calendar year, as published by the Federal Reserve. Benefits under provisions of the Plan become fully vested at the time the participant completes seven years of service.

Effective November 28, 2004, the Plan was frozen such that no new participants may be added on or after that date and no further benefits will accrue to current participants with respect to service or earnings after that date (i.e., no further Pay Credits will accrue after that date, but Interest Credits will continue to accrue on existing cash balances). A participant who was in service on November 29, 2004 shall have a 100% vested percentage in his or her accrued benefits as of such date.

(c) Death and Disability Benefits

If an active employee dies prior to normal retirement, the participant's spouse or other designated beneficiary is entitled to a distribution of the amount credited to the participant's account at the date of death.

If a participant terminates because of a disability, the participant is considered 100% vested and is entitled to a distribution of his or her account.

INSTRUMENTARIUM CASH BALANCE PLAN

Notes to Financial Statements

December 31, 2013 and 2012

(d) Plan Amendment

An amendment to the Plan was adopted December 13, 2013, which updated the Plan document language to comply with Internal Revenue Code (IRC) section 411 regulations. This amendment is not expected to have a material impact on the net assets of the Plan based on the net assets as of December 31, 2013.

(2) Summary of Significant Accounting Policies

(a) Basis of Presentation

The accompanying financial statements have been prepared on the accrual basis of accounting.

(b) Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements and changes therein. Actual results could differ from those estimates.

(c) Investment Valuation and Income Recognition

Investment securities are recorded at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See note 3 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on the investment bought and sold as well as held during the year.

(d) Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable to services rendered by employees through the valuation date under the Plan's provisions. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated participants or their beneficiaries, (b) beneficiaries of participants who have died, and (c) present participants or their beneficiaries. Benefits payable under all circumstances — retirement, death, disability, and termination of employment — are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits, as determined by the Plan's actuary, is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements for such factors as death, withdrawal, or retirement) between the valuation dates and the expected dates of payments.

INSTRUMENTARIUM CASH BALANCE PLAN

Notes to Financial Statements

December 31, 2013 and 2012

The significant actuarial assumptions used in the valuations as of December 31, 2013 and 2012 include the following:

	2013	2012
Retirement age	Varying up to age 65	Varying up to age 65
Discount rate	5.00%	4.25%
Mortality	RP – 2000 Combined Health Table with Generational Projection by Scale AA	RP – 2000 Combined Health Table with Generational Projection by Scale AA

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. The computations of the actuarial present value of accumulated plan benefits were made as of January 1, 2014 and 2013. Had the valuations been performed as of December 31, there would have been no material differences.

(e) Administrative Expenses

All reasonable expenses of the Plan are paid by the Plan, unless paid by the Company at its sole discretion.

(f) Benefit Payments

Benefits paid to participants are recorded upon distribution.

(3) Fair Value Measurements

Accounting Standards Codification (ASC) 820, *Fair Value Measurement*, establishes a framework for measuring fair value, which provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are described below:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include the following:

- Quoted prices for similar assets or liabilities in active markets
- Quoted prices for identical or similar assets or liabilities in inactive markets
- Inputs other than quoted prices that are observable for the asset or liability
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means

INSTRUMENTARIUM CASH BALANCE PLAN

Notes to Financial Statements

December 31, 2013 and 2012

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2013 and 2012.

Common/collective trust fund – Valued at the net asset value (NAV) of the units of the collective trust. The NAV, as provided by the trustee, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. The fund invests in a money market fund, which is valued at amortized cost, which represents fair value. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV. Participant transactions (purchases and sales) may occur daily, and transactions are executed within one week of providing notice to the trustee. There are no unfunded commitments associated with the investment in the collective trust. Were the Plan to initiate a full redemption of the collective trust, the investment adviser would reserve the right to temporarily delay withdrawal from the trust in order to ensure that securities liquidations will be carried out in an orderly business manner.

Mutual funds – Valued at daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the U.S. Securities and Exchange Commission. These funds are required to publish their daily NAV and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

INSTRUMENTARIUM CASH BALANCE PLAN

Notes to Financial Statements

December 31, 2013 and 2012

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2013:

		Investments at estimated fair value		
	Investments at fair value as determined by quoted prices in active markets (Level 1)	Valuation techniques based on observable market data (Level 2)	Valuation techniques incorporating information other than observable market data (Level 3)	Total
Common/collective trust fund:				
Cash equivalent	\$ —	100,004	—	100,004
Mutual funds:				
U.S. fixed income	69,933,912	—	—	69,933,912
Total investments	\$ 69,933,912	100,004	—	70,033,916

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2012:

		Investments at estimated fair value		
	Investments at fair value as determined by quoted prices in active markets (Level 1)	Valuation techniques based on observable market data (Level 2)	Valuation techniques incorporating information other than observable market data (Level 3)	Total
Common/collective trust fund:				
Cash equivalent	\$ —	100,003	—	100,003
Mutual funds:				
U.S. fixed income	77,688,738	—	—	77,688,738
Total investments	\$ 77,688,738	100,003	—	77,788,741

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. The significance of transfers between levels is based upon the nature of the financial instrument and size of the transfer relative to total

net assets available for benefits. For the years ended December 31, 2013 and 2012, there were no transfers into or out of Level 1, 2, or 3.

(4) Funding Policy

The Company's policy is to contribute to the Plan at least the minimum required contribution, per Internal Revenue Service (IRS) regulations, as determined by the Plan's actuary. Participants make no contributions to the Plan. During 2013 and 2012, the Company made no contributions and has met the minimum funding requirements of ERISA.

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth by ERISA.

(5) Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a participant's accumulated plan benefit will be paid depends on both the priority of those benefits and the level of the benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guaranty while other benefits may not be provided for at all.

(6) Investments

The trustee of the Plan, Wells Fargo Bank, N.A., has provided the plan administrator certifications as to the completeness and accuracy of investment information and data in accordance with 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. The data certified includes all investment information reflected in the statements of net assets available for benefits at December 31, 2013 and 2012, and investment income reflected in the statements of changes in net assets available for benefits for the years then ended, as well as the investment information included in note 3 and this note and the accompanying schedules to these financial statements.

The following table presents investments that represent 5% or more of the Plan's net assets available for benefits as of December 31, 2013 and 2012:

	<u>2013</u>	<u>2012</u>
Vanguard Long-Term Investment Grade Fund	\$ 24,495,282	77,688,738
Vanguard Interim-Term Investment Grade Fund	17,507,239	—
Vanguard Short-Term Investment Grade Fund	27,931,391	—

INSTRUMENTARIUM CASH BALANCE PLAN

Notes to Financial Statements

December 31, 2013 and 2012

During 2013 and 2012, the Plan's investments (including realized gains and losses on investments bought and sold, as well as unrealized gains and losses on investments held during the year) appreciated (depreciated) in value as follows:

	<u>2013</u>	<u>2012</u>
Collective trust funds	\$ —	6,098,707
Mutual funds	<u>(6,356,639)</u>	<u>3,041,116</u>
Total	<u>\$ (6,356,639)</u>	<u>9,139,823</u>

(7) Related-Party Transactions

Under the terms of a trust agreement, certain plan investments are managed by an entity related to Wells Fargo Bank, N.A., the trustee of the Plan. Therefore, these transactions are party-in-interest transactions. Fees incurred by the Plan for the party-in-interest investment management services amounted to \$10,000 and \$10,582 for the years ended December 31, 2013 and 2012, respectively.

(8) Tax Status

The IRS has determined and informed the plan administrator by a letter dated November 1, 2011 that the Plan and related trust are designed in accordance with applicable sections of the IRC. The Plan has been amended since receiving the determination letter. However, the plan administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC, and that the trust continues to be tax-exempt under IRC Section 501(a). Therefore, no provision for income taxes has been included in the Plan's financial statements.

Participants in the Plan are not subject to federal income taxes until they receive a distribution from the Plan.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that, as of December 31, 2013, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2010.

(9) Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

INSTRUMENTARIUM CASH BALANCE PLAN

Notes to Financial Statements

December 31, 2013 and 2012

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

(10) Subsequent Events

The Plan has evaluated subsequent events through September 5, 2014, the date the financial statements were issued, and no event has occurred through the evaluation date, which would impact the financial statements for the year ended December 31, 2013.

Schedule SB, line 24—Change in Actuarial Assumptions

A change in the rates of assumed retirement age for terminated vested participants with only Cash Balance benefits was made to better reflect anticipated plan experience. Because the changes to the non-prescribed assumptions did not decrease the funding shortfall by \$5 million, approval is not required.

Valuation of Plan Assets

Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value.

A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).

Schedule SB, line 24—Change in Actuarial Assumptions

A change in the rates of assumed retirement age for terminated vested participants with only Cash Balance benefits was made to better reflect anticipated plan experience. Because the changes to the non-prescribed assumptions did not decrease the funding shortfall by \$5 million, approval is not required.

Valuation of Plan Assets

Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value.

A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).
