Metaldyne Retirement Plan

Notes to Financial Statements December 31, 2013 and 2012

Note 1 - Plan Description

The following description of Metaldyne Retirement Plan (the "Plan") provides only general information. Participants should refer to the plan document for a more complete description of the Plan's provisions.

General - The Plan is a defined contribution plan covering eligible employees at various divisions and subsidiaries of Metaldyne, LLC (the "Company") upon completion of certain employment service requirements. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions - Participants may contribute up to 75 percent of their pretax annual compensation as defined by the Plan, subject to maximum tax-deferred limitations established by the Internal Revenue Code. Participants may also make contributions to the Plan in the form of a rollover of funds from another qualified plan.

The Plan provides for discretionary employer matching and/or profit-sharing contributions and are subject to certain limitations in accordance with plan provisions. These Company contributions, if applicable, can vary by division or subsidiary and are determined at the sole discretion of the Company. The matching contribution for 2013 was 50 percent of the first 6 percent of employee deferrals. There were no profit-sharing contributions in 2013.

Participant Accounts - Each participant's account is credited with the participant's contribution and allocations of the Company's contributions and plan earnings and charged with an allocation of administrative expenses. Allocations are based on participants' compensation or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account. Participants may direct the investments of their account balances into various investment options offered by the Plan.

Vesting - Participants are immediately 100 percent vested in employee deferrals, rollover contributions, and employer match and any income or loss thereon. Vesting in the Company's discretionary profit-sharing contribution portion of their accounts, plus actual earnings thereon, is based on years of service. Participants vest 20 percent each year and are fully vested after five years of service.

Benefit Payments - Distributions are payable upon retirement, death, disability, or termination of employment in the form of a lump-sum amount or installments over a period of no more than 10 years equal to the vested balance of a participant's account. In-service or hardship withdrawals, if applicable, are distributed in a single lump-sum payment.

Metaldyne Retirement Plan

Notes to Financial Statements December 31, 2013 and 2012

Note 1 - Plan Description (Continued)

Forfeitures - If a participant is not fully vested on his or her termination date, the nonvested amount of the account is forfeited. Forfeitures are used to reduce future Company contributions and reduce plan administrative expenses. At December 31, 2013 and 2012, forfeited account balances totaled \$2,194 and \$2,470, respectively.

Party-in-interest Transactions - Certain plan assets are in investment funds managed by Fidelity Management Trust Company (Fidelity) or its affiliates. Fidelity is the trustee of the Plan and, therefore, these transactions qualify as party-in-interest transactions as defined under ERISA guidelines.

Termination - While it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in the plan document and ERISA. Upon termination of the Plan, participants become 100 percent vested in their account balances.

Participant Notes Receivable - Participants may borrow from their accounts up to a maximum equal to the lesser of \$50,000 or 50 percent of their vested account balance, whichever is less. The notes receivable are secured by the balance in the participant's account and bear interest at rates that range from 4.25 percent to 10.50 percent, which are commensurate with local prevailing rates as determined periodically by the plan administrator. Principal and interest are paid ratably through monthly payroll deductions.

Note 2 - Summary of Significant Accounting Policies

Investment Valuation - The Plan's investments are stated at fair value except as noted below.

The fully benefit-responsive unallocated insurance contract is valued at contract value. Contract value represents investments at cost plus accrued interest income less amounts withdrawn to pay benefits (see Note 4). The fair value of the unallocated contract is based on contract value adjusted for certain contractual provisions.

Metaldyne Retirement Plan

Notes to Financial Statements December 31, 2013 and 2012

Note 2 - Summary of Significant Accounting Policies (Continued)

The common collective trust fund investment is valued at contract value. Contract value represents investments at cost plus accrued interest income less amounts withdrawn to pay benefits. The fair value of the common collective trust fund is based on the fair value of the underlying net assets at the measurement date by the issuer of the fund. The Plan's interest in the common collective trust fund is based on its proportionate ownership interest in the fair value of the common collective trust fund. The common collective trust fund primarily holds fixed-income securities and derivatives. The fair value of the fixed-income securities is valued using quoted market prices and/or other market data for the same or comparable instruments and transactions in establishing the prices, discounted cash flow models, and other pricing models. These models are primarily industry standard models that consider various assumptions, including time value and yield curve as well as other relevant economic measures. The fair value of a wrapper contract provided by the contract issuer is based on the replacement cost methodology which is the present value of the difference between the replacement wrapper fee and the contracted wrapper fee.

All other investments are valued based on quoted market prices. See Note 6 for additional information.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Benefit Payments - Benefits are recorded when paid.

Administrative Expenses - Various administrative costs are paid by the Company.

Participant Notes Receivable - Participant notes receivable are recorded at their unpaid principal balances plus any accrued interest. Participant notes receivable are written off when deemed uncollectible.

Use of Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

Metaldyne Retirement Plan

Notes to Financial Statements December 31, 2013 and 2012

Note 2 - Summary of Significant Accounting Policies (Continued)

Risks and Uncertainties - The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.

Subsequent Events - The financial statements and related disclosures include evaluation of events up through and including August 8, 2014, which is the date the financial statements were available to be issued.

Note 3 - Unaudited Information

Fidelity holds the Plan's investments and participant notes receivable and executes all related transactions. The investment and participant notes receivable balances and related income and losses included in the accompanying financial statements and supplemental schedule of assets held at end of year are based solely on information provided by Fidelity.

Significant investments held as of end of year are as follows:

Metaldyne Retirement Plan

Notes to Financial Statements December 31, 2013 and 2012

Note 4 - Investment Contracts

During 2013, the Plan entered into a benefit-responsive investment contract with Massachusetts Mutual Life Insurance Company (MassMutual). MassMutual maintains the contributions in a general account. The account is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. The investment contract issuer is contractually obligated to repay the principal and a specified interest rate that is guaranteed to the Plan. There are no reserves against contract value for credit risk of the contract issuer or otherwise. The crediting interest rate is based on a formula agreed upon with the issuer, but may not be less than 0.00 percent. Such interest rates are reviewed on a quarterly basis for resetting.

Interest is credited on contract balances using a single "portfolio rate" approach. Under this methodology, a single interest rate is applied to all contributions made to the product regardless of the timing of those contributions. Interest crediting rates are reviewed on a semi-annual basis for resetting. When establishing interest credit rates for this product, MassMutual considers many factors, including current economic and market conditions, the general interest rate environment, and both the expected and actual experience of a reference portfolio within the issuer's general account. The minimum crediting rate under the contract is 1.50 percent.

Generally there are not any events that could limit the ability of the plan to transact at contract value paid within 90 days or, in rare circumstances, contract value paid over time. There are not any events that allow the issuer to terminate the contract and which require the plan sponsor to settle an amount different than contract value paid either within 90 days or over time.

As described in Note 2, because the unallocated insurance contract is fully benefit-responsive, contract value is the relevant measurement attribute for that portion of the net assets attributable to the unallocated insurance contract. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value.

	December 31, 2013
Average yields:	
Based on actual earnings	(0.69)%
Based on interest rate credited to participants	1.95 %

Metaldyne Retirement Plan

Notes to Financial Statements December 31, 2013 and 2012

Note 5 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination letter, management believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

In accordance with guidance on accounting for uncertainty in income taxes, management evaluated the Plan's tax position and does not believe the Plan has any uncertain tax positions that require disclosure or adjustment to the financial statements. The plan administrator believes the Plan is no longer subject to tax examinations for years prior to 2010.

Note 6 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

The following tables present information about the Plan's assets measured at fair value on a recurring basis at December 31, 2013 and 2012.

Level 1 - Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Level 2 - Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, and other inputs such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 - Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset.

In instances whereby inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

(a) This class represents investments in an actively managed common collective trust fund, the Fidelity Managed Income Portfolio Fund, which invests primarily in fixed-income securities and derivatives which may include corporate bonds, both U.S. and non-U.S. municipal securities, and wrapper contracts. The Fidelity Managed Income Portfolio Fund has certain limitations on withdrawals and exchanges as follows:

- Participant-directed - Withdrawals made in order to accommodate distributions to participants or transfers to noncompeting investments may be made on any business day. Transferred amounts must be held in a noncompeting investment option for 90 days before subsequent transfers to a competing fund can occur.

Notes to Financial Statements December 31, 2013 and 2012

Note 6 - Fair Value Measurements (Continued)

- Nonparticipant-directed - Withdrawals directed by a plan sponsor must be preceded by a 12-month written notice to Fidelity. Fidelity, however, may, in its discretion, complete any such plan-level withdrawal before the expiration of such 12-month period. On May 8, 2012, the Plan provided written notice to Fidelity that effective May 8, 2013, it would be withdrawing from the fund, and as planned, the amounts were withdrawn from the fund on this date.

There are no unfunded commitments or other redemption notice requirements related to this investment.

The Plan's policy is to recognize transfers between levels of the fair value hierarchy as of the actual date of the event of change in circumstances that caused the transfer. There were no significant transfers between levels of the fair value hierarchy during 2013 and 2012.
