NATIONAL DISTRIBUTING COMPANY, INC. PENSION PLAN

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2013 AND 2012

1. PLAN DESCRIPTION:

The following description of the National Distributing Company, Inc. Pension Plan ("the Plan") provides only general information. Participants should refer to the Plan Agreement for a more complete description of the Plan's provisions.

General:

The Plan is a non-contributory defined benefit pension plan covering substantially all of the employees of National Distributing Company, Inc. (the Company or Plan Sponsor) at the time the Plan was frozen who had completed at least six months of employment. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

As of December 31, 2006, all benefits under the Plan were frozen. The normal retirement benefit as of December 31, 2006 remained fixed.

Pension Benefits:

The Plan's benefits are based on the sum of .65% of final average monthly earnings up to covered compensation, which varies based on age, and .55% of average monthly earnings in excess of covered compensation, multiplied by the years of service through December 31, 2006 (the date the Plan was frozen), limited to thirty years. Normal retirement age is 65. Participants are entitled to early retirement after attaining age 55 and completing ten years of service, at a reduced amount.

If the participant has 10 years of Vesting Service at exit, the benefit can be paid as early as age 55, with a benefit based on the frozen accrued normal retirement benefit.

In 2007, as a result of the Plan being frozen, all active participants became fully vested in their frozen accrued normal retirement benefit calculated as of December 31, 2006. If a participant had not attained the service requirement eligibility for early retirement, then they would not be vested in the full early retirement benefit until the early retirement eligibility service requirement is met. Accordingly, certain amounts of the accumulated benefit obligation would reflect these as non-vested.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

DECEMBER 31, 2013 AND 2012

1. PLAN DESCRIPTIONS (CONTINUED):

Death and Disability Benefits:

Death benefits are provided to participant's designated beneficiaries upon death of a participant in accordance with plan provisions which may vary depending upon if death is prior to participant's retirement or after termination of employment and before pension payments commence. Forms of death benefit payments and amounts may vary dependent upon plan provisions. Amounts of death benefits may vary according to certain conditions noted above but will be based on frozen accrued benefit calculated as of December 31, 2006.

Participants whose employment is terminated on account of Disability before death or retirement are eligible for a disability retirement pension. Payment of disability retirement pension shall commence as of the participants normal retirement date, subject to early retirement eligibility and reduced benefit. Accrued benefits for purposes of disability payment will be based on frozen accrued benefit calculated as of December 31, 2006

Funding Policy:

The Company's funding policy is to contribute at least the amount necessary to remain a qualified plan under the Internal Revenue Code. The Plan contributions are computed using the projected unit credit cost method and, as prescribed by the Internal Revenue Service, are designed to fund the Plan's normal costs currently and to fund the costs arising from qualifying service before the establishment of the Plan.

The Plan has complied with the minimum funding requirements of ERISA. Effective January 1, 1995, employee contributions were discontinued. Accumulated employee contributions as of December 31, 2013 and 2012 were approximately \$620,989 and \$653,673, respectively. Interest has been credited thereon at an interest rate of 1.04% in 2013 and 1.40% in 2012, compounded annually. The accumulated contributions, including cumulative interest credited thereon, approximated \$2,022,698 and \$2,106,878 at December 31, 2013 and 2012, respectively.

Plan Termination:

Although it has not expressed any intention to do so, the Company has the right under the Plan to terminate the Plan subject to the provisions set forth in ERISA. As a result of the Plan being frozen at December 31, 2006, all participants became fully vested.

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

DECEMBER 31, 2013 AND 2012

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Basis of Presentation:

The financial statements of the Plan are presented on the accrual basis of accounting.

Valuation of Investments:

Shares of registered investment companies (mutual funds) are valued at the net asset value (“NAV”) on the last day of business of the Plan year based on quoted market values.

Actuarial Present Value of Accumulated Plan Benefits:

Accumulated plan benefits, as discussed in Note 3, are those estimated future periodic payments including lump-sum distributions that are attributable under the Plan’s provisions to services rendered by the participants at the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated participants or their beneficiaries, (b) beneficiaries of participants who have died, and (c) present participants or their beneficiaries.

Benefits for retired or terminated employees or their beneficiaries are based on an average of the employees’ compensation during five of their last ten years of credited service. The accumulated plan benefits for active employees (as of December 31, 2006, the date the Plan was frozen) are based on their average compensation during the five years preceding December 31, 2006 (the date the Plan was frozen). Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

Benefits Paid:

Benefits are recognized as deductions during the period in which they are paid.

Administrative Expenses:

Administrative expenses are paid by the Plan as permitted by the Plan document provisions to the extent that they are not paid by the Plan Sponsor.

Use of Estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

3. ACCUMULATED PLAN BENEFITS:

An actuary estimated the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

Actuarial Present Value of Accumulated Plan Benefits at the beginning of the years is comprised of the following:

	January 1	
	2013	2012
Vested Benefits:		
Participants currently receiving payments	\$ 28,721,369	\$ 24,052,132
Other participants	48,235,819	36,074,602

Non-Vested Benefits	115,720	276,365
Present Value of Accumulated Plan Benefits	<u>\$ 77,072,908</u>	<u>\$ 60,403,099</u>

Changes in the Actuarial Present Value of Accumulated Plan Benefits at the beginning of the years are as follows:

	January 1	
	2013	2012
Present Value of Accumulated Plan Benefits for the prior year	<u>\$ 60,403,099</u>	<u>\$ 59,574,375</u>

Interest accumulated	4,712,621	4,649,210
Benefits paid	(3,049,332)	(2,975,751)
Benefits accrued and actuarial experience	(487,004)	(896,868)
Assumption changes	15,493,524	52,133
Total increases, net	<u>16,669,809</u>	<u>828,724</u>

3. ACCUMULATED PLAN BENEFITS (CONTINUED):

Significant underlying assumptions of the actuarial computations are as follows:

	As of January 1,	
	2013	2012
Mortality Basis	Static mortality table in accordance with IRS Regulation 1.430(h)(3)-1 for the valuation year.	Static mortality table in accordance with IRS Regulation 1.430(h)(3)-1 for the valuation year.
Assumed rate of return on investments	6.00%	8.00%
Retirement Age	Graduated table of ages between 55 and 65	Graduated table of ages between 55 and 65

The following actuarial method and assumption changes were reflected in this valuation:

- Interest rates used to calculate interest on employee contributions was 1.04% and 1.40% in the January 1, 2013 and 2012 computations, respectively. This change accounted for \$(16,598) of the assumption changes for 2013 noted in the Changes in the Actuarial Present Value of Accumulated Plan Benefits at the beginning of the year table above,
- As required by PPA, the mortality table was updated. This change accounted for \$113,847 of the assumption changes for 2013 noted in the Changes in the Actuarial Present Value of Accumulated Plan Benefits at the beginning of the year table above,
- Expected interest rates used to calculate investment return was 6.00% and 8.00% in the January 1, 2013 and 2012 computations, respectively. This change accounted for \$15,396,275 of the assumption changes for 2013 noted in the Changes in the Actuarial Present Value of Accumulated Plan Benefits at the beginning of the year table above.

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

5. FAIR VALUE MEASUREMENTS:

Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 820, *Fair Value Measurements*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodology used for assets measured at fair value on a recurring basis.

Registered investment companies, (mutual funds) – Valued at the net asset value (“NAV”) of shares held by the Plan at year end.

The preceding method described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes the valuation method is appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

6. INCOME TAX STATUS:

The Plan obtained its latest determination letter on July 30, 2002, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The Plan has been amended since receiving the determination letter. However, the Plan administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code. No provision for income taxes has been included in the Plan's financial statements. The Plan has open tax years 2010-2013.

7. RISKS AND UNCERTAINTIES:

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such change could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

8. SUBSEQUENT EVENTS:

The Plan has considered subsequent events through September 15, 2014, the date which the financial statements were available to be issued.

A ACTUARIAL COST METHOD

The actuarial cost method used to determine the target normal cost, target liability and required contribution amounts for the plan is the Traditional Unit Credit Actuarial Cost Method. Under this method, both the target normal cost and target liability are based on the annual accrual of benefits as accruals occur each year.

The target liability for each active plan participant is equal to the actuarial present value of the participant's accrued benefit as of the valuation date. The total target liability of the plan is equal to the sum of such liabilities as determined for each active participant plus the actuarial present value of benefits being paid, or due to be paid, to retirees, beneficiaries and former participants with deferred vested benefits.

The target normal cost for each active participant is equal to the actuarial present value of the benefit expected to be earned during the year starting on the valuation date. The total target normal cost of the plan is the sum of the target normal costs for each active plan participant.

All employees who are plan participants on a valuation date are included in the actuarial valuation.

B ASSET VALUATION METHOD

The actuarial value of assets is equal to the market value of assets on the valuation date reduced by the sum of:

1. 66.67% of gains and losses of the prior year;
2. 33.33% of gains and losses of the second prior year.

Investment gains and losses are determined by the excess or deficiency of the expected return (at the valuation interest rate) over the actual return on the market value (including employer contributions receivable for any given year).

The actuarial valuation of assets is further constrained to be not less than 90% or more than 110% of market value (including employer contributions receivable).
