MCCREARY, VESLEKA, BRAGG & ALLEN, LLC
401(K) PLAN & TRUST
NOTES TO FINANCIAL STATEMENTS
For the year ended December 31, 2013 and 2012

NOTE A-SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting: The financial statements of the McCreary, Veselka, Bragg & Allen, PC 401(k) Plan & Trust (the Plan) are prepared utilizing the accrual method of accounting.

Recognition of Income: The basis of the investments held by the Plan is adjusted annually to closing market value and unrealized gains and losses are recorded as part of the adjustment. Realized gains and losses on investments are computed using the adjusted based (beginning of year market value) on first in, first- out method. Purchases and sales of securities are recorded on a trade-date basis. Interest and dividend income are recorded on the cash received basis. Security transaction expenses are considered in computing realized gains and losses.

Participant Loans: Participant loans are valued at cost, which approximates fair value.

Benefit Payments: Benefits are recorded when paid.

Use of Estimates: The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires estimate assumptions that affect the reported amounts of net assets available for benefits and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of changes in assets available for benefits during the reporting period. Actual results could differ from those estimates.

Concentration of Credit Risks: Concentration of credit risk with respect to mutual funds managed by Lincoln Trust is reduced as a result of diversity of the underlying investments.

Subsequent Events: Subsequent events have been evaluated by management through the date of the independent accountant's report. Material subsequent events, if any, are disclosed in a separate footnote to these financial statements.

New Accounting Pronouncements: The Sponsor is not aware of any new accounting pronouncements that have been released, and are not effective, which will have a significant impact to its financial position or results of operations in future periods.

Participants may also contribute representing distributions from other qualified defined benefit or contribution plans. The Company contributed a 25% "match" for 2013 and 2012 of the amount that a participant contributed to the Plan. The Company matching contributions are a percentage of each Participant's elected deferrals up to the maximum amount determined by the Company. All employer contributions are deposited annually for the preceding calendar year matching contributions.

Vesting. Participants are immediately vested in their contributions plus actual earning thereon, and in the Company's matching and discretionary contribution portion of their accounts plus actual earnings thereon. NOTE E- TAX STATUS

The Internal Revenue Service has determined and informed the Company by a letter dated March 23, 1994 that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since receiving the latest determination letter. However, the Plan administrator and the Plan's tax counsel believe that the Plan remains in compliance and is currently being operated in compliance with the applicable requirements of the IRC.

NOTE F –FAIR MARKET VALUE MEASURMENTS

Generally accepted accounting principles (GAAP) has established a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability based on market data obtained from independent sources. Unobservable inputs are inputs that reflect assumptions of what market participants would use in pricing the asset or liability based on information available in the circumstances. The hierarchy is broken down into three levels based on the reliability of the inputs as follows:

Level 1:	Quoted prices are available in active markets for identical assets or liabilities;
Level 2:	Quoted prices in active markets for similar assets and liabilities that are observable for the asset or liability: or
Level 3:	Unobservable pricing inputs that are generally less observable from objective sources as discounted cash flow models or valuations.

The asset or liability's fair value measurement level within the fair value hierarchy is Based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs. The following is a description of the valuation methodologies used for investment assets measured at fair value.

Common Stocks, Preferred Stock, Corporate Bonds and U.S. Government Securities: Valued at the closing prices reported on the active market which the individual securities are traded.

Mutual Funds: Valued at the net asset value (NAV) of shares at year end.

Participant Loans: Valued at amortized costs, which approximates fair value.

The preceding methods described may produce a fair value calculation that may not be indicative of the net realizable value or reflective of future values. Furthermore the Plan believes its valuation methods or assumptions to determine the fair value of certain financial instruments could result in a different value measurement at the reporting date. The follow table sets forth, by level within the fair value hierarchy, the Plan's assets.

December 31,2013	Level 1	Level 2	Level 3	Total
