1. **Description of Plan**

The Westlake Wage Employees' Defined Benefit Plan (the "Plan") is a noncontributory defined benefit plan and is subject to the provisions of the Internal Revenue Code of 1986 (the "Code") and ERISA.

The Plan was established effective March 1, 1990. It covers all employees of Westlake Management Services, Inc. and Westlake Vinyls, Inc. ("the Companies") who are covered by a collective bargaining agreement providing for participation under the Plan. Prior years' service is recognized for purposes of accruing benefits under the Plan with respect to certain employees as defined in the Plan agreement. The Plan was amended and restated effective January 1, 2009, and has since been further amended to reflect the most recent statutory and regulatory changes applicable to plans maintained under Code Section 401(a). A favorable determination of the qualified status of the Plan was issued by the Internal Revenue Service on October 21, 2011.

Following is a brief description of the Plan's provisions. Participants should refer to the Plan document for more complete information.

Retirement Benefits

Effective January 1, 2005, participation under the Plan was frozen.

Effective as of March 1, 2010, participants were given an additional one-time irrevocable election to cease active participation in the Plan, and in lieu of such participation, became eligible to receive the Employer Annual Retirement Contribution provided under the Westlake Savings Plan.

Normal monthly retirement benefits are generally calculated under a formula based upon the participant's number of years of credited service multiplied by a retirement income factor as defined in the Plan as $45 for the years ended December 31, 2013 and 2012. The Plan is responsible for payment of this monthly benefit, less the fixed portion of benefits to be paid by a previous employer, where applicable, which is based on previous service with that employer. Benefits payable in the event of death, disability or early retirement are computed in a similar manner as defined in the Plan.

The disability retirement pension payable to a participant shall be a monthly amount determined in the same manner as a normal retirement pension under section 6.1 of the Plan Document, except the participation years of benefit service shall be determined as of the date that the participant first becomes entitled to the disability retirement pension payment.

Certain general and temporary limitations exist on the benefits described above and are more fully explained in the Plan document.

Payment of Retirement Benefits

Payment of benefits to which a participant is entitled and has elected to receive shall begin at:

a. Normal retirement - the participant attains age 65 and has completed 5 years of service;

b. Early retirement - the participant attains age 55 and has completed 10 years of service or has completed 30 years of participation; or

Continued

1. **Description of Plan, continued**

Payment of Retirement Benefits, continued

c. Late retirement - the participant terminates employment with the Companies after attaining normal retirement age.

Unless a participant elects in writing to receive an alternate form of payment, benefits are payable in the form of a qualified joint and survivor annuity for married participants and a 5-year certain and life annuity for unmarried participants.

Vesting Provisions

An employee becomes 100 percent vested after five years of vesting service.

Funding Policy

The Companies' funding policy is to contribute such amounts as are necessary, on an actuarial basis, to provide the Plan with assets sufficient to meet the benefits to be paid to participants and their beneficiaries. The contributions to the Plan are based on the limitations of maximum and minimum tax-deductible deposits certified by the actuary. Any gains resulting from forfeitures of non-vested benefits will be used to reduce future contributions that would otherwise be required to provide for the defined level of benefits under the Plan. The Companies recorded contributions to the Plan of $1,206,010 and $1,202,577 for the years ended December 31, 2013 and 2012, respectively. Such contributions for the plan year met the minimum funding requirements of the Code and ERISA.

Termination of the Plan

Although it has not expressed any intent to do so, the Companies have the right to discontinue contributions and to terminate the Plan at any time subject to the provisions of the Code and ERISA and the provisions of the Plan. In the event of Plan termination, the net assets of the Plan will be allocated in accordance with the Plan as provided by ERISA.

Should the Plan terminate at some future time, and should the Plan not be sufficiently funded to provide all accrued benefits, whether a particular participant's accumulated plan benefits will be paid would depend on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation ("the PBGC") at that time. In such a case, some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all. Should the Plan be sufficiently funded at the time of termination, PBGC coverage does not become an issue.

Administration

The Plan is administered by Westlake Chemical Corporation ("WCC"), parent of the Companies. Wells Fargo Bank Texas, N.A. serves as trustee of the Plan.

WCC provides certain administrative services without charge to the Plan. In accordance with the Plan document, administrative expenses incurred on behalf of the Plan that are not paid by the Companies are paid from Plan assets. During 2013 and 2012, the Companies paid administrative expenses of $500 and $5,138, respectively. All other administrative expenses were paid by the Plan.

2. **Summary of Significant Accounting Policies**

Basis of Accounting

The financial statements and supplemental schedules of the Plan have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Valuation of Investments

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Bank collective trust funds are valued based on information reported in the audited financial statements of the bank collective trusts at year-end.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on an accrual basis. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts of net assets available for benefits and changes therein and disclosure of contingent assets and liabilities at the date of the financial statements. Accordingly, actual results could differ from those estimates.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the services employees have rendered. Accumulated plan benefits include benefits expected to be paid to retired or terminated employees or their beneficiaries, beneficiaries of employees who have died and present employees or their beneficiaries. The accumulated plan benefits for active employees are based upon current benefit levels and actual service.

Benefits payable under all circumstances (retirement, death, disability and termination of employment) are included to the extent they are deemed attributable to employee services rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. The actuarial present value of accumulated plan benefits was calculated as of January 1, 2013 and January 1, 2012 and accordingly, the Plan presents the statements of accumulated plan benefits and the statements of changes in accumulated plan benefits using beginning of year actuarial data. Had the actuarial valuations been performed as of December 31, 2012 and December 31, 2011, there would be no material differences. The significant actuarial assumptions underlying the actuarial valuations for January 1, 2013 and 2012 are as follows:

Discount rate	7.0%

2. **Summary of Significant Accounting Policies, continued**

Risks and Uncertainties

The Plan has various investments in bank collective trust funds. Such investments are exposed to various risks, such as interest rate, market and credit risk. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is at least reasonably possible that changes in the values of investment securities in the near term could materially affect investment balances reported in the Statements of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

3. **Information Certified by Trustee (Unaudited)**

The Plan Administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the DOL Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, the Trustee has certified that the following data included in the accompanying financial statements and supplemental schedules is complete and accurate:

a. Information in the Statements of Net Assets Available for Benefits at December 31, 2013 and 2012:

	2013	2012

The Plan's independent accountants did not perform auditing procedures with respect to this information, except for comparing such information to the related information included in the financial statements and supplemental schedules.

4. Investments

Investments less than 5% of the Plan's net assets	87,083	159,621
Total investments	$ 19,370,322	$ 16,673,355

5. Fair Value Measurements

FASB Accounting Standards Codification Topic 820, *Fair Value Measurements and Disclosures* ("ASC 820"), establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

5. **Fair Value Measurements, continued**

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

In determining fair value, the Plan uses the income approach, which uses valuation techniques to convert future amounts such as cash flows or earning to a single present amount, with the measurement based on the value indicated by current market expectations about those future amounts.

Following is a description of the valuation methodologies used for assets measured at fair value.

Bank collective trust funds: Valued at the net asset value ("NAV") of units of a bank collective trust. The NAV, as provided by the Trustee, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2013 and 2012:

	Assets at Fair Value as of December 31, 2013			
	Level 1	Level 2	Level 3	Total

Total bank collective trust funds	$ -	$ 16,673,355	$ -	$16,673,355

6. Income Tax Status

The Internal Revenue Service has determined and informed the Plan Sponsor by a letter dated October 21, 2011, that the Plan is qualified and the trust established under the Plan is tax-exempt, under the appropriate sections of the Internal Revenue Code. The Plan has been amended since receiving the determination letter. However, the Plan Administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the IRC. Accordingly, no provision for federal income tax has been recorded.

7. Related Party Transaction

Westlake Chemical Corporation has a revolving credit facility with a syndicate of banks, of which an affiliate of Wells Fargo Bank is a participant. In addition, the Plan investments include funds managed by affiliates of Wells Fargo, the Plan trustee.

8. Subsequent Events

Plan management has evaluated subsequent events through July 14, 2014, which is the date the financial statements were issued, and has concluded that there are no significant events to be reported.

SCHEDULE SB, PART V - STATEMENT OF ACTUARIAL ASSUMPTIONS/METHODS

Maximum Benefit Limitations Under IRC Sec. 415	$205,000 effective for 2013
Changes in Assumptions	The mortality assumption, for all purposes, was changed to the IRS prescribed mortality table. There have been no other changes in funding valuation assumptions since the prior valuation except for adjustment to the PPA interest rates as required by IRS guidelines.

Methods

Asset Valuation Method	The actuarial value of assets on the valuation date is equal to a smoothed fair value of assets. The smoothed value is equal to the actual fair value of assets (including discounted receivable contributions) plus two-thirds of the investment gain or loss from the prior year plus one-third of the investment gain or loss from two years ago. The investment gains and losses are determined by comparing the actual fair value of assets to the expected fair value. Additionally, the resulting asset value is limited to be no less than 90% and no more than 110% of the fair market value of assets.
Unit Credit Actuarial Cost Method	The Unit Credit Actuarial Cost Method is used to determine Funding Target for ERISA funding purposes, and the Actuarial Present Value of Accumulated Plan Benefits for ASC 960 purposes. The Normal Cost for each employee is the present value of the benefit which accrues during that current year. The total Normal Cost is the sum of the Normal Costs for all active participants plus administrative expenses expected to be paid from the trust during the year.
Changes in Methods	There have been no changes in actuarial methods since the prior year.
