Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2013 and 2012, and the changes in net assets available for benefits for the year ended December 31, 2013, in accordance with accounting principles generally accepted in the United States of America.

Independent Auditor's Report (Continued)

Emphasis of Matter

As discussed in Note 4, the financial statements include an investment whose carrying value has been estimated in the absence of a readily determinable fair value. The estimate is determined by an independent valuation specialist. This investment represents 98% and 96% of net assets available for benefits as of December 31, 2013 and 2012, respectively. Our opinion has not been modified with respect to this matter.

Other Matter - Report on Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedule of assets (held at end of year) as of December 31, 2013 is presented for the purpose of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from, and relates directly to, the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Employee Stock Ownership Plan**

Notes to Financial Statements

Note 1. Description of Plan

The following description of the Die-Matic Corporation Employee Stock Ownership Plan (the Plan) provides only general information. Participants should refer to the Plan agreement or Summary Plan Description for a more complete description of the Plan's provisions.

Die-Matic Corporation (the Company) established the Plan effective January 1, 1998. The Plan operates as an employee stock ownership plan (ESOP), and is designed to comply with Section 4975(e)(7) and the regulations thereunder of the Internal Revenue Code of 1986 (the Code), as amended, and is subject to the applicable provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended. The Plan was restated effective January 1, 2012. An Employee Benefits Administration Committee comprising of up to two persons appointed by the Company's Board of Directors administers the Plan as trustee.

In 1998, the Plan purchased Company common shares using the proceeds of a borrowing guaranteed by the Company, and held the stock in a trust established under the Plan. The borrowing was repaid over a period of ten years by fully tax deductible Company contributions to the trust fund. As the Plan made each payment of principal, an appropriate percentage of stock was allocated to eligible participants' accounts in accordance with applicable regulations under the Code. In 2007, the loan was paid in full and all shares have been fully allocated.

Eligibility: Employees of the Company are generally eligible to participate in the Plan after six months of service providing they worked at least 1,000 hours during such Plan year. Participants who do not have at least 1,000 hours of service during such Plan year, or are not employed on the last working day of a Plan year, are generally not eligible for an allocation of Company contributions for such year.

Vesting: Vesting in the Company contribution plus earnings is based on years of continuous service. A participant is 100 percent vested after six years of credited service, 20 percent per year after two years of credited service.

Participant accounts: A separate individual account is established for each participant. Each participant's account is credited as of the last day of each Plan year with an allocation of shares of the Company's common stock released from the unallocated account, if any, and forfeitures of terminated participants' non-vested accounts.

Employer contributions and Plan forfeitures are allocated to each participant's account based upon the relation of the participant's eligible compensation to total eligible compensation for the Plan year. At December 31, 2013 and 2012, there were no unallocated forfeitures. Plan earnings are allocated to each participant's account based on the ratio of the participant's beginning of the year account balance to all participants' beginning of the year account balances.

Employer contributions: The Company is obligated to make contributions in cash to the Plan that, when aggregated with the Plan's interest earnings, equals the amount necessary to enable the Plan to fund current year distributions.

Payment of benefits: Distributions will not be made until a participant retires, dies (in which, payment shall be made to his or her beneficiary or, if none, his or her legal representatives), or otherwise terminates employment with the Company. Distributions are made in cash or, if a participant elects, in the form of Company common stock plus cash for any fractional share.

Note 1. Description of Plan (Continued)

Voting rights: The shares of Company stock held in the Plan will be voted by the trustees as directed by the Employee Benefits Administration Committee. However, in the event of a stockholder vote with respect to a major corporate event such as a corporate merger or consolidation, recapitalization, liquidation, or sale of substantially all of the corporate assets, the participant is entitled to direct the trustee on how to vote the shares of Company stock allocated to their account. In such event, the trustee will vote any unallocated shares of the Company stock, as well as allocated shares of Company stock for which no directions are received, as directed by the Employee Benefits Administration Committee, provided, however, that the trustee may vote the shares as it determines is necessary to fulfill their fiduciary duties.

Put option: Under Federal income tax regulations, the Company stock that is held by the Plan and its participants and is not readily tradable on an established market, or is subject to trading limitations, includes a put option. The put option is a right to demand that the Company buy any shares of its stock distributed to participants for which there is no market. The put price is representative of the fair value of the stock. The Company can pay for the purchase with interest over a period of five years. The purpose of the put option is to ensure that the participant has the ability to ultimately obtain cash.

Diversification: Diversification is offered to participants close to retirement so that they may have the opportunity to move part of the value of their investment in Company stock into investments which are more diversified. Participants or former participants who have completed 10 years of service and attained age 55 may elect to diversify a portion of their account. Diversification is offered to each eligible participant over a six-year period, beginning with the year the requirements are met. In each of the first five years, a participant may diversify up to 25 percent of the number of post-1986 shares allocated to his or her account, less any shares previously diversified. In the sixth year, the percentage changes to 50 percent. Participants who elect to diversify receive a cash distribution.

Note 2. Summary of Significant Accounting Policies

Basis of accounting: The financial statements of the Plan are prepared using the accrual basis of accounting.

Use of estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, changes therein, and disclosures of contingent assets and liabilities. Actual results could differ from those estimates.

The financial statements include the Company's common stock valued at \$1,488,537 and \$1,006,740 at December 31, 2013 and 2012, respectively, whose value has been estimated by an independent valuation specialist in the absence of a readily determinable fair value. Because of the inherent subjectivity in any valuation, the estimated value may differ significantly from the value that would have been used had a ready market for the securities existed, and that difference could be material.

Investment valuation and income recognition: The common stock of the Company is valued at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is determined by an annual independent valuation. See Note 4 for discussion of fair value measurements. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Net appreciation includes the gains and losses on investments bought and sold, as well as held, during the year.

Note 2. Summary of Significant Accounting Policies (Continued)

Payment of benefits: Benefits are recorded when paid.

Subsequent events: The Plan's management has evaluated events for potential recognition and/or disclosure through October 2, 2014, the date the financial statements were available to be issued.

Note 3. Investments

The Plan's investments, at December 31, are presented in the following table:

	2013	2012
Die-Matic Corporation		
Common stock		
Number of shares	35,955	35,955
Cost	\$ 3,962,241	\$ 3,962,241
Fair value of common shares	\$ 1,488,537 *	\$ 1,006,740 *
Interest bearing cash	\$ 37,843	\$ 37,024

*Exceeds 5% of net assets at year end.

Note 4. Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under ASC 820 are described below.

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Note 4. Fair Value Measurements (Continued)

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2013 and 2012.

Die-Matic Corporation common stock: The fair value of the Company common stock held by the Plan is valued at fair value based upon an annual independent appraisal. In 2013 and 2012, the appraisal was based upon income valuation techniques. The appraiser took into account historical and projected cash flow and net income, return on assets, return on equity and estimated fair value of the Company's assets and liabilities. Due to the unobservable inputs, the Company common stock of \$1,488,537 and \$1,006,740 is considered a Level 3 asset within the fair value hierarchy as of December 31, 2013 and 2012, respectively.

Interest bearing cash: Valued at cost, which approximates fair value and considered a Level 1 asset within the fair value hierarchy as of December 31, 2013 and 2012.

The following table sets forth a summary of changes in the fair value of the Plan's Level 3 assets for the years ended December 31:

	Die-Matic Corporation Common Stock	
	2013	2012
Balance, beginning of year	\$ 1,006,740	\$ 805,392
Unrealized gains related to investments still held at the report date included in changes in net assets	481,797	201,348
Balance, end of year	\$ 1,488,537	\$ 1,006,740

For the years ended December 31, 2013 and 2012, there were no significant transfers in or out of Levels 1, 2, or 3 assets.

Note 5. Tax Status

The Internal Revenue Service has determined and informed the Company via the volume submitter, by a letter dated March 31, 2008, that the Plan is qualified and the trust established under the Plan is tax-exempt, under the applicable sections of the Code. The Plan was amended and restated effective January 1, 2012. Although the Plan has been amended since receiving the determination letter, the Plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would be sustained upon examination by the U.S. federal, state or local tax authorities. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2010.

Notes to Financial Statements

Note 6. Administration of Plan Assets

The Plan's assets, consisting principally of Die-Matic Corporation common stock, are held by the trustee of the Plan, as defined in the Plan document. Company contributions are held and managed by the trustee. The trustee invests cash received, interest, and makes distributions to participants.

Certain administrative functions are performed by officers or employees of the Company. No such officer or employee receives compensation from the Plan. Most Plan administrative expenses are paid directly by the Company.

Note 7. Plan Termination

The Company reserves the right to terminate the Plan at any time, subject to Plan provisions. Upon such termination of the Plan, the interest of each participant in the trust fund will be distributed to such participant or his or her beneficiary at the time prescribed by the Plan terms and the Code. Upon termination of the Plan, the Employee Benefits Administration Committee shall direct the trustee to pay all remaining liabilities and expenses of the trust fund and to sell shares of financed stock held in the loan suspense account, if any.
