INVESTMENT MANAGER'S REPORT For the year ended 31 December 2013

In 2013, Aurora Offshore Fund Ltd. (the "Fund") returned +9.42%, net of fees and expenses. The following provides a strategy overview for 2013.

The Long/Short Equities strategy delivered a return of +17.51% in 2013. While developed equity markets experienced robust gains during the year, emerging markets indices declined. Dispersion was also seen among and within sectors as company fundamentals became increasingly relevant to stock prices. Amid this favorable environment for stock selection, each of the Long/Short Equities specialties contributed positively. Our generalists produced the strongest gains, with profits emanating from positions in the technology, healthcare, and consumer sectors. The growing profitability of internet business models, both in the U.S. and Asia, benefited several managers with thematic long exposure to the industry. While short positions generally detracted from results due to the upward momentum in markets, managers limited these losses by focusing on companies most vulnerable to slowing growth in emerging markets. The technology and healthcare sectors also yielded profits for sector specialists. Equity holdings in pharmaceutical companies were especially profitable as several companies released constructive clinical data results on new drugs. A provider of video, data, and voice services that received multiple takeover offers during the year also contributed meaningful profits. Returns for geographic specialists came from a diversity of geographic regions. An Asian specialist generated gains from Asia as well as opportunistic investments in the U.S. and Europe. Positive contributors to the portfolio included a Chinese online media provider as well as U.S. and Asian online travel service providers. Other sources of profits for geographic specialists included a Swedish lock manufacturer and a British aerospace company.

The Long/Short Credit strategy posted a +24.05% return in 2013, generating profits in each quarter. Gains emanated from a variety of sources during the year as economic fundamentals improved in the U.S., supporting tighter credit spreads. Additionally, with concerns about the U.S. Federal Reserve potentially tapering its asset purchase plan, several managers reduced fixed income exposure and opportunistically increased long exposure to equity markets. Within the U.S., commercial and residential mortgage-backed securities performed well amid signs of a sustained housing market recovery, which also was helpful for equity and corporate credit holdings in real estate firms and homebuilders. Interest rate hedges added further to gains with the increase in long-term U.S. Treasury yields. Long positions in bank hybrid securities, sovereign debt, and Spanish covered bonds were some of the positive contributors coming from Europe during the year. Within equities, several managers' long positions in airline stocks contributed to their gains as investor expectations of rising profitability in the sector due to industry consolidation and cost rationalization lifted equity valuations to higher levels. An equity position in an Argentine energy company also fueled returns for a manager as investors were comforted by the country's more constructive stance towards private enterprises.

The Macro strategy produced a +2.78% return in 2013. Managers navigated a challenging environment centered on uncertainty around when the U.S. Federal Reserve would begin reducing its asset purchase program. Top contributors included a short position in the Japanese Yen and long positions in U.S., European, and Japanese equities. Markets in Japan reacted favorably to accommodative monetary policy measures by the Bank of Japan and the prospect of ongoing market reforms, while U.S. and European equity markets benefited from improving economic growth. Additional profits came from long exposure to U.S. and European credit securities. Trading in fixed income proved more challenging as uncertainty around the end of the U.S. Federal Reserve's asset purchase program led to increased volatility and several market reversals. Against this backdrop, managers lost money from long fixed income positions in the U.S. and Europe, while yield curve trading finished mixed with first and third quarter gains from U.S. and European yield curve steepeners offset by losses during the second quarter. Commodities also proved challenging as losses from energy trading offset gains from short holdings in precious metals. Finally, emerging markets experienced broad weakness due to rising interest rates in the U.S. and investor concerns about slowing economic growth. Losses stemmed from long exposure to fixed income securities in Latin America and emerging market equity holdings in Asia.

INVESTMENT MANAGER'S REPORT For the year ended 31 December 2013

The Event-Driven strategy returned +15.34% in 2013, with all managers generating a profit amid equity market tailwinds and a continued upward trend in corporate event activity. The activist component of the strategy was particularly profitable, led by strong performance from a North American activist that generated gains from a number of core positions. These included equity holdings in a pharmaceutical company that appreciated after the company completed an accretive deal acquisition of an eye-care product company early in the year. Additionally, the manager yielded gains after the market reacted favorably to news of its involvement in a bellwether technology company and, more specifically, the company's search for a new CEO. Meanwhile, a European-based manager generated meaningful returns from structured trade positions, most notably in one position related to a Spanish construction company. Conversely, the strategy's exposure to Canadian-listed energy and materials equities contributed modest losses, partially offsetting gains.

The Opportunistic strategy posted a +14.84% return in 2013, with profits stemming from a wide range of asset classes and sectors. Managers maintained relatively low net market exposures during the year, with much of the returns emanating from adept security selection. Equity holdings in the technology, media, financials, and homebuilders sectors were especially profitable for the strategy. In the U.S., the managers' portfolios included investments in media companies with premium content that performed well due to increased digitization and consolidation in the industry. In Europe, an internet advertising company traded higher after reporting strong earnings results and receiving broader coverage from sell-side research analysts. Several company-specific developments benefited event-driven investments as well. These included a real estate investment trust and a coffee and tea producer that each received takeover offers, as well as a solar company that announced the sale of a non-core business unit during the year. Credit investments, including bonds, claims, hybrid securities, and capital structure arbitrage trades, added further profits for the strategy. Finally, macro trades contributed positively with managers employing timely short positions in the Japanese Yen and positions that benefited from rising interest rates.

The Portfolio Hedge strategy ended 2013 with a -21.03% return. The strategy was presented with formidable headwinds as U.S. equity markets experienced their strongest year in over a decade, led by outperformance of smaller-capitalization stocks. Losses were incurred in all three sub-strategies, but were primarily attributable to the short selling sub-strategy, which ultimately suffered most from the outperformance of smaller-capitalization, less profitable companies. These companies tended to be among the most heavily shorted companies in the equity markets, which produced short squeezes that only further exacerbated losses. More specifically, short equity positions in the media, gaming, and healthcare industries were among the most significant detractors. Additionally, a continued easy-credit environment offered cash-strapped businesses a lifeline to stay afloat, presenting difficulty for a short credit specialist with significant exposure to corporate credit default swaps. The tail-risk sub-strategy was not immune to losses either, as continuously declining levels of volatility across a variety of asset classes proved costly. Finally, the strategy's index overlay incurred a loss, as this portion of the strategy was exposed to various short futures positions on the S&P 500 Index, which ended the year in positive territory.

Aurora Investment Management L.L.C.

Independent Auditor's Report

To the Board of Directors of Aurora Offshore Fund Ltd.

We have audited the accompanying financial statements of Aurora Offshore Fund Ltd. (the "Fund"), which comprise the statement of assets and liabilities, including the condensed schedule of investments, as of December 31, 2013, and the related statements of operations, of changes in net assets, and of cash flows for the year then ended.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Fund's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Aurora Offshore Fund Ltd. at December 31, 2013, and the results of its operations, changes in its net assets, and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

1. Description of Business

Aurora Offshore Fund Ltd. (the "Fund") was incorporated as an exempted company on 1 July 1998 under the laws of the Cayman Islands and commenced trading on 1 April 1999. The Fund maintains its registered office in the Cayman Islands and is registered under the Cayman Islands Mutual Funds Law.

The Fund is organized to invest and trade directly and indirectly in securities and other financial instruments through advisory accounts and investments in private investment funds. The Fund's investment objective is to generate consistent long-term capital appreciation with low volatility and little correlation with the equity and bond markets through a portfolio having a diversified risk profile. Certain classes of the Fund's shares have been listed on the Irish Stock Exchange since June 2001.

The Fund is operated by its Board of Directors. The Fund's Board of Directors consists of three directors: Mr. Scott Montpas, Mr. Ronan Daly and Mr. Clarendon Hugh (Hal) Masters. Mr. Scott Montpas is the General Counsel and Chief Compliance Officer of Aurora Investment Management L.L.C. (the "Investment Manager"), the investment manager of the Fund. Additional Directors may be appointed from time to time.

2. Significant Accounting Policies

The financial statements are expressed, and the accounting records are maintained, in U.S. Dollars ("US\$") and have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The preparation of these financial statements requires the Fund's management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

The Fund has an administration agreement with Citco Fund Services (Cayman Islands) Limited (the "Administrator"). The Administrator performs certain day-to-day administrative tasks on behalf of the Fund. These tasks include maintaining the Fund's books and records, processing investor transactions, and calculating fees and investors' share capital. In accordance with the Fund's Confidential Offering Memorandum ("Offering Memorandum"), the Administrator values the Fund's investments in private investment funds at fair value, which is generally an amount equal to the sum of the capital accounts or net asset value of the private investment funds determined from unaudited financial data supplied by the administrators of the underlying private investment funds. Observable prices for these investments are not quoted in an active market. Accordingly, the estimated fair values may differ significantly from the values that would have been used had a ready market existed for these investments. The Investment Manager has assessed the net asset value of each private investment fund in accordance with authoritative guidance on fair value measurements and disclosures under U.S. GAAP. See Note 4 for further discussion.

Investment transactions are accounted for on a trade date basis. The cost of investments is determined using the first in, first out method. All realized and unrealized gains and losses are included in the Statement of Operations.

Cash is held at JPMorgan Chase Bank, N.A.

Income and expenses are accounted for on an accrual basis.

2. Significant Accounting Policies (Continued)

Futures contracts are recorded on the trade date and are valued at the closing price on the last business day of the year. Upon entering into a futures contract, the Fund is required to deposit with the broker an amount of cash or liquid securities equal to a specified percentage of the contract amount. Subsequent payments are made or received by the Fund, depending on the fluctuation of the value of the contract and this balance is reflected as margin receivable or payable on the Statement of Assets and Liabilities. The difference between the original contract amount and the market value of the open futures position is reflected as unrealized appreciation/depreciation on derivative contracts on the Statement of Assets and Liabilities and as change in unrealized appreciation/depreciation on derivative contracts in the Statement of Operations. When the contract is closed or expired, a realized gain or loss is recognized equal to the difference between the value of the contract on the closing date and the original contract amount, and is included in net realized gain/(loss) on derivative contracts in the Statement of Operations.

Where the Fund issues shares in currencies other than US\$, the Fund endeavors to hedge the exchange rate exposure through the use of forward foreign currency contracts. Forward foreign currency contracts are valued at the forward rate and marked-to-market on the valuation date. The realized gain or loss is equal to the difference between the value of the contract at the onset and the value of the contract at settlement date. The unrealized gain or loss is equal to the difference between the value of the contract at the onset and the value of the contract at the Statement of Assets and Liabilities date. The realized and unrealized gain or loss is recorded in the Statement of Operations and allocated only to the related foreign capital share classes. There were no forward currency contracts outstanding at 31 December 2013.

Except for such allocations, the Fund does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in the market prices of securities. Such fluctuations are included in the net realized and unrealized gains/(losses) from investments and foreign currency transactions in the Statement of Operations.

Assets and liabilities denominated in non-US\$ currencies are translated at closing rates of exchange at 31 December 2013 with unrealized gains and losses and realized gains and losses reflected in the Statement of Operations. Transactions during the year were translated at the rate of exchange on the date of transaction.

Contributions paid in advance to private investment funds represent investments in private investment funds effective 1 January 2014. Contributions paid in advance to private investment funds do not participate in the earnings of the underlying private investment funds until such interests are issued.

Shareholders' subscriptions received in advance are comprised of cash received on or prior to 31 December 2013 for which shares in the Fund were issued on 1 January 2014. Shareholders' subscriptions received in advance do not participate in the earnings of the Fund until the related shares are issued. As of 1 January 2014, these amounts were reclassified to shareholders' net assets.

Shareholders' redemptions are recognized as liabilities when the amount requested in the redemption notice becomes fixed, which occurs on the last day of a fiscal period. As a result, redemptions paid after the end of the year which are based upon the fixed amounts as of 31 December 2013 are reflected as redemptions payable at 31 December 2013.

In December 2011, the Financial Accounting Standards Board ("FASB") issued an Accounting Standards Update ("ASU") No. 2011-11: Disclosures about Offsetting Assets and Liabilities ("netting") on the Statement of Assets and Liabilities, that are subject to master netting arrangements or similar agreements. ASU 2011-11, as amended by ASU No. 2013-01 clarifying which investments and transactions are subject to the netting disclosure. The scope of the disclosure requirements is limited to derivative instruments, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions. This information will enable users of the Fund's financial statements to evaluate the effect or potential effect of netting arrangements on the Fund's financial position. The ASU is effective for financial statements with fiscal years beginning on or after January 1, 2013 and interim periods within those fiscal years. The Fund adopted the disclosure requirement on netting for the current reporting period.

2. Significant Accounting Policies (Continued)

For financial reporting purposes, the Fund does not offset financial assets and financial liabilities that are subject to master netting arrangements or similar agreements on the Statement of Assets and Liabilities.

3. Investments in Private Investment Funds

At 31 December 2013, the majority of the Fund's assets were allocated to various private investment funds. The Investment Manager may reallocate assets among the Fund's investments at any time. The Fund receives annual audited financial statements from each of the private investment funds.

The private investment funds execute many investment strategies, including several types of arbitrage, event driven and directional strategies (e.g., long/short equities, relative value, long/short credit, volatility trading and capital structure arbitrage). At times, private investment funds focused on implementing a particular strategy may make an opportunistic trade representing a different trading approach. For example, in seeking to identify a relatively mispriced pair of assets, a private investment fund may conclude that an asset is sufficiently over or underpriced to merit taking an outright directional position. Each investment strategy involves specific risks which are summarized in the Offering Memorandum.

Private investment funds are continually developing new, and adapting and refining existing, strategies. There is no material limitation on the strategies that the private investment funds may apply and no assurance as to which types of strategies may be applied at any one time. In addition, there is no limitation on the investment instruments in which a private investment fund may invest. New investment instruments are continually developing and investment in such instruments may involve material and as yet unanticipated risks.

The private investment funds may use leverage by purchasing instruments with the use of borrowed funds, by trading derivatives or through other means. To the extent the private investment funds choose to utilize leverage, they increase the opportunity for a higher return on investment and they increase the risk of loss.

The Fund has the ability to liquidate its investments periodically, ranging from monthly to every three years, depending on the provisions of the respective private investment fund's governing agreement. Contribution requirements may also vary based on each private investment fund's governing agreement. Investment advisers of the private investment funds generally receive fees for their services. These fees include management fees based upon the value of the Fund's investment, as well as performance fees or allocations based upon new net trading profits earned by the Fund. These fees are deducted directly from the Fund's investment balance in accordance with the terms of each respective private investment fund's governing agreement.

The management fees charged by the private investment funds range from 0.75% to 2% annually of net assets, and performance fees or allocations charged by private investment funds range from 0% to 30% of new net trading profits, as defined in each private investment fund's governing agreement. Certain private investment funds may have expense reimbursement arrangements rather than or in addition to management fees, which are deducted directly from the Fund's investment balance.

The following table summarizes the Fund's investments in private investment funds that represent 5% or more of its shareholders' net assets at 31 December 2013:

		Unrealized					
	% of Net Assets	Fair Value US\$	Gain US\$	Liquidity			
	TIBBEES	Ουψ	СБФ	Elquidity			
Palomino Fund Ltd.	6.91%	176,829,104	145,954,064	Annual			
Redwood Offshore Fund Ltd.	5.68%	145,438,601	99,206,570	Biennial, Annual			

4. Fair Value Measurements

In accordance with the authoritative guidance on fair value measurements and disclosures under U.S. GAAP, the Fund discloses the fair value of its investments in a hierarchy that prioritizes the inputs to valuation techniques used to measure the fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under fair value measurements are as follows:

- Level 1 Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access at the measurement date;
- Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active; and
- Level 3 Inputs that are unobservable.

Inputs broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk.

The Fund's Board of Directors is responsible for the valuation process and has delegated responsibility for the Fund's valuation to the Administrator. The Investment Manager performs oversight of the monthly valuation process through a Fair Valuation Committee ("Valuation Committee). The Valuation Committee, pursuant to the valuation policies adopted by the Investment Manager, is responsible for making fair value recommendations, if deemed necessary, and are reported to the Board of Directors for approval.

The Fund generally invests in private investment funds whose reported net asset value ("NAV") generally serves as the basis for the investor's periodic subscription and redemption activity pursuant to the terms of the private investment fund's governing documents. The reported NAV serves as both the entry price (for subscriptions) and, depending on the facts and circumstances, the exit price (for redemptions). Depending on the redemption options available, it may be possible that the reported NAV represents fair value based on observable data such as ongoing redemption or subscription activity. The Investment Manager generally uses the reported NAV of the private investment fund reported by the administrator of the underlying private investment fund as the primary input to its valuation.

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The Investment Manager's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and the Investment Manager considers factors specific to the financial instrument.

All of the Fund's private investment funds have been classified within Level 2 or Level 3, and the Fund does not hold any private investment funds that could be classified as Level 1, as observable prices for investments in those funds are typically not quoted prices in an active market.

The ability to redeem the Fund's investment, determined by investment lot, within one year of the Statement of Assets and Liabilities date is considered indicative of a Level 2 observable input and classified as Level 2 within the fair value hierarchy. Investment lot liquidity terms that permit redemption within 12 months for a redemption fee of 5% or less are included as Level 2.

In the aggregate, the Investment Manager has determined that the Fund may realize approximately (a) 91.58% of its net asset value within 12 months and (b) 7.00% of its net asset value from the underlying private investment funds beyond 12 months according to the private investment funds' contractual redemption terms. Approximately 1.42% of its net asset value is comprised of designated investments with no fixed redemption terms.

4. Fair Value Measurements (Continued)

Liquidity of individual private investment funds vary based on various factors and may include gates or side pockets imposed by the private investment fund. In the case of the imposition of a gate or existence of a side pocket, the Investment Manager's ability to validate or verify the NAV through redemptions is impaired and the interest is generally classified as Level 3. The Fund has held side pockets for several years and expects to continue to hold side pockets as per the terms of the private investment funds' offering memorandums.

All of the private investment funds representing Level 3 investments were valued at the unaudited NAV determined by the administrators of the underlying investments.

There were no unfunded commitments to private investment funds as of 31 December 2013.

The following table presents the investments in private investments funds and unrealized appreciation/(depreciation) on derivative contracts carried on the Statement of Assets and Liabilities by level within the valuation hierarchy as of 31 December 2013.

	Fair Value as at 31 December 2013					
	Level 1 US\$	Level 2 US\$	Level 3 US\$	Total US\$		
Investments in private investment funds		2,174,764,506	215,626,983	2,390,391,489		
Derivative Contracts - Liabilities S&P 500 Index futures contracts	(459,885)			(459,885)		
Total Derivative Contracts - Liabilities	(459,885)	_	_	(459,885)		
Total	(459,885)	2,174,764,510	215,626,979	2,389,931,604		
	(0.02) %	91.00 %	9.02 %	100.00 %		

See Condensed Schedule of Investments for further disclosure of strategy and domicile information.

The following table lists investments by major category.

Major Category	Fair Value US\$	Redemption Frequency*	Redemption Notice*
Event Driven	251,822,908	Quarterly to Annual	60-95 days
Long/Short Credit	642,522,758	Quarterly to Triennial	30-90 days
Long/Short Equities	736,973,399	Monthly to Biennial	30-180 days
Macro	403,824,574	Monthly to Semi Annual	5-95 days
Opportunistic	200,090,129	Monthly to Annual	30-90 days
Portfolio Hedge	155,157,721	Monthly to Annual	15-60 days
Total	2,390,391,489		

^{*}Redemption frequency and redemption notice periods exclude designated investments which have no fixed redemption terms.

4. Fair Value Measurements (Continued)

Event-Driven strategies generally include investments in securities of firms involved in identifiable corporate actions, such as mergers, acquisitions, restructuring, spin-offs, shareholder activism, or other special situations which alter a company's financial structure or operating strategy. Long/Short Credit strategies generally take both long and short positions in credit related instruments, such as corporate bonds, bank loans, trade claims, emerging market debt and credit derivatives. Long/Short Equities strategies generally involve taking both long and short positions in equity securities that are deemed to be under or overvalued. Macro strategies generally involve discretionary or systematic, directional or relative value trading in currencies, commodities, fixed income investments and equities. Opportunistic strategies generally involve portfolio managers exercising discretion in allocating capital among several types of arbitrage, event driven and directional strategies. Portfolio Hedge strategies generally seek to profit from declining security prices through short positions in the equity or debt (or similar functioning derivatives) of companies with unfavorable prospects. The major categories are described further in the Offering Memorandum.

The following table presents changes in investments in private investment funds classified within Level 3 for the year ended 31 December 2013.

	Investments in private investment funds US\$
Balance at 1 January 2013	364,065,962
Net transfers into Level 3	(89,773,379)
Subscriptions	10,155,170
Redemptions	(108,823,359)
Gain/(loss)	
Realized	13,743,142
Unrealized	26,259,447
Balance at 31 December 2013	215,626,983

All net realized and unrealized gain/(loss) in the table above are reflected in the accompanying Statement of Operations. The change in net unrealized appreciation included in the Statement of Operations attributed to Level 3 investments held in private investment funds as of 31 December 2013 was US\$4,497,335.

For the year ended 31 December 2013, the net transfers out of or into Level 3 represent transfers between Level 2 and Level 3. US\$123,261,936 of private investment funds was transferred from Level 3 into Level 2, and US\$33,488,557 of private investment funds was transferred from Level 2 into Level 3. These transfers occurred as a result of the Fund's ongoing assessment of the liquidity terms of the Fund's private investment funds by lot and of the net transfers into designated investments by the Fund's private investment funds. All transfers are recorded at beginning of year fair values.

5. Derivative Contracts

In the normal course of business, the Fund invests in derivative contracts. The derivative contracts that the Fund trades are forward and futures contracts. These instruments are subject to various risks similar to non-derivative instruments, including market, liquidity, counterparty and off-balance sheet risks. The Fund manages these risks for its derivative contracts and non-derivative investments on an aggregate basis.

5. Derivative Contracts (Continued)

Market risk represents the risk of adverse movements in markets for the derivatives or the underlying asset or index to which the derivative relates. The Fund purchases derivatives to hedge exposure to underlying assets, rather than to speculate on market movements. An adverse movement in the market prices of the derivatives will be offset, in part or in whole, by the opposite movement in the underlying asset or index if the hedges perform on a correlated basis as intended. Thus, the Fund is typically neutral with respect to market risk as it relates to derivatives, however there is a risk that the expected correlation differs to actual and the Fund could lose money.

Forward foreign currency contracts are contracts or agreements for delayed delivery of specific currencies in which the seller agrees to make delivery at a specified future date. The Fund enters into forward foreign currency contracts to hedge the foreign currency exchange rate risk of its non-U.S. Dollar denominated investments or Share Classes. To minimize market risk, the Fund limits the contract value of the forward foreign currency contracts to the estimated non-U.S. Dollar currency obligations of the Fund. The Fund does not speculate by trading forward foreign currency contracts for currencies other than those offered to shareholders.

A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. The Fund may use equity index futures contracts to seek to reduce the Fund's exposure to general stock market movements. The Fund purchases S&P 500 equity index futures contracts to supplement the Fund's allocations to underlying funds that engage in the Portfolio Hedge strategy and to attempt to hedge against overall equity market risk. The Fund purchases and sells futures contracts on an exchange and has the ability to liquidate the contracts quickly under normal market conditions, which allows it to mitigate market risk.

Liquidity risk represents the possibility that the Fund may not be able to rapidly adjust the size of a position in times of high volatility and financial stress at a reasonable price. The Fund restricts its exposure to liquidity risk by trading only in major foreign currencies or futures markets that the Investment Manager considers readily realizable.

Counterparty risk is the risk that a counterparty will fail to perform the contractual obligations under the contract. Counterparty risk is minimized as the Fund's counterparties are the exchanges where such futures are traded.

Off-balance sheet risk refers to situations where the maximum potential loss on a particular investment is greater than the value of the asset or liability reflected on the Statement of Assets and Liabilities. Notional amounts are the underlying reference amounts which the fair value of the derivatives traded by the Fund are based. While notional amounts do not represent the current fair value and are not necessarily indicative of the future cash flows of the Fund's derivatives, the underlying price changes in relation to the variables specified by the notional amounts affect the fair value of these derivative financial instruments.

For the year ended 31 December 2013, the average number of futures contracts outstanding was 307 lots per month.

Impact of Derivatives on the Statement of Assets and Liabilities

The following table identifies the fair value and notional amounts of derivative instruments included in the Statement of Assets and Liabilities within unrealized appreciation/(depreciation) on derivative contracts at 31 December 2013. Balances are presented on a gross basis prior to the application of the impact of counterparty and collateral netting.

	Notional Amount Assets	Notional Amount Liabilities	Derivative Assets	Derivative Liabilities
S&P 500 Index futures contracts	\$ _	\$ (12,703,590)	\$ _	\$ (459,885)
Total	\$ _	\$ (12,703,590)	\$ _	\$ (459,885)

5. Derivative Contracts (Continued)

Impact of Derivatives on the Statement of Operations

The following table identifies the net gain/(loss) amounts included in the Statement of Operations within realized and unrealized gain/(loss) on derivative contracts for the year ended 31 December 2013:

	Amount of Net Realized Gain/(Loss)			Amount of Net Change in Unrealized Gain/(Loss)		
S&P 500 Index futures contracts	\$	(6,141,924)		(484,878)		
Total loss	\$	(6,141,924)	\$	(484,878)		

As of 31 December 2013, derivative assets and liabilities did not have the ability to offset.

6. Share Capital

The Fund has an authorized share capital of US\$50,000 consisting of 5,000,000 shares, (the "Shares"), par value US\$0.01 each, which may be issued as Class A, AA, D, DD, GG, L, U, UU, V, VV, Z, and Z1 Shares (denominated in U.S. Dollars), Class B, BB, E, and EE Shares (denominated in Euro), Class C, CC, F, FF, II, and JJ Shares (denominated in Yen), Class G, H, HH, and KK Shares (denominated in Sterling), or such other Classes as the Board of Directors so determines. Class D, DD, E, EE, F, FF, H, HH, JJ, V, VV, and Z Shares may be issued to "restricted" investors in connection with the Fund's new issue investments. The primary difference amongst the Classes (other than those issued to "restricted" investors in connection with the new issue investments or those issued to the Investment Manager's principals, employees and affiliates) is the currencies in which the Shares of such Class are issued, valued and redeemed and the fees charged to such Classes.

Each Class of Shares may be divided into separate series. Each separate series of Shares will be identified by its date of issue. Quarterly each separate series is collapsed into the master series of the applicable Share Class (or another series that has realized performance fees if the master series has not) upon realization of performance fees. The Shares are entitled to receive any dividends that are declared by the Board of Directors; however, the Fund does not anticipate declaring or paying any dividends. Subject to the foregoing, each of the Shares in each class will participate ratably with all other outstanding Shares in the Fund's assets and earnings and is entitled to one vote at any meeting of shareholders.

On 31 December 2013, 790.91 Shares have been issued to employees and affiliated entities and are classified as Class Z and Class Z1 Shares. These Shares rank pari-passu in all respects with other Classes of Shares except that no performance or management fees are paid on such Shares.

7. Taxation

Under current laws of the Cayman Islands, there are no income, estate, corporation, capital gains or other Cayman Islands taxes payable by the Fund. As a result, no provision for taxes has been made in the financial statements.

The Fund follows the authoritative guidance on accounting for and disclosure of uncertainty in tax positions, which requires the Investment Manager to determine whether a tax position of the Fund is more likely than not to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. The Investment Manager has evaluated tax positions for the years 2010-2013 and has determined that there was no effect on the financial statements.

8. Fees

Generally, the Investment Manager earns a monthly management fee equal to one-twelfth of 1% (1% per annum) of the month-end net asset value, after reduction for all other fees and expenses for the month (other than the current month's management and performance fees or ongoing selling commissions, if any). Management fees payable at year end were US\$2,583,383.

For contributions made on or before 1 November 2006, 12.5% of any new net profits, as defined in the Offering Memorandum, in excess of a 1.5% quarterly rate of return is paid to the Investment Manager. For contributions made as of 1 November 2006 and thereafter, 10% of any new net profits, as defined in the Offering Memorandum, is paid to the Investment Manager. Performance fees are accrued monthly for each series of Shares and paid on a quarterly basis. Performance fees payable at year end were US\$4,425,571.

Per the Offering Memorandum, management fees and performance fees may be waived, reduced, or rebated with respect to certain shareholders at the discretion of the Investment Manager and certain classes of shares may pay management and performance fees that are higher or lower than those specified above.

The Administrator performs certain day-to-day administrative tasks on behalf of the Fund. These tasks include maintaining the Fund's books and records, processing shareholder transactions, and calculating fees and net asset values. The Administrator receives a monthly administration fee at an annual rate of 0.07% for net assets under administration less than US\$500 million, 0.06% for net assets under administration between US\$500 million and US\$2 billion and 0.05% for net assets under administration in excess of US\$2 billion, subject to a minimum fee of US\$48,000 per annum. For purposes of calculating the Administrator's fees, the Fund's net assets under administration are combined with the net assets of other accounts managed by the Investment Manager that also use the Administrator. Administration fees payable at year end were US\$227,453.

Directors' fees are allocated evenly to the two independent Directors. Mr. Scott Montpas, being an officer of the Investment Manager, is not paid a fee. Directors fees payable at the year end were US\$12,500.

9. Allocation of Income and Loss

In general, profits and losses, before management fees and performance fees and results from foreign exchange hedging, as applicable, are allocated among all shareholders in proportion to their respective share holding values at the beginning of each month, adjusted for any capital subscriptions or redemptions. Subscriptions and redemptions are governed by the Offering Memorandum. Subscriptions are generally accepted on a monthly basis. The Fund's ability to satisfy redemption requests is largely contingent upon its ability to redeem assets from private investment funds. Redemptions could generally be made as of the end of any calendar quarter upon 95 days' prior written notice to the Administrator.

Net gains and losses arising from the Fund's investments in private investment funds that are classified as "new issues" under regulations of the Financial Industry Regulatory Authority Inc. are allocated only to eligible shareholders, as defined in the Offering Memorandum.

10. Related Parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions. There were no transactions with related parties other than those in the normal course of business. The Investment Manager and the Board of Directors are deemed to be related to the Fund. Fees incurred with related parties during the year are disclosed in the Statement of Operations. Amounts payable to related parties at 31 December 2013 are disclosed in Note 8.

Certain shareholders in the Fund are employees of the Investment Manager or funds managed by the Investment Manager. Such affiliated interests are classified as Class Z and Class Z1 shareholders and represent 0.08% of total net assets of the Fund at 31 December 2013.

11. Contingencies

In the normal course of business, the Fund enters into contracts that contain a variety of representations and warranties and which provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown, as any such exposure would result from future claims that may be, but have not yet been, made against the Fund based on events which have not yet occurred. However, based on experience, the Fund believes the risk of loss from these arrangements to be remote.

12. Custody of Assets

The Fund has a custodial agreement with J.P. Morgan Trust Company (Cayman) Limited (the "Custodian"). Services rendered by the Custodian principally include receipt, disbursement and safekeeping of all money and receipt of all property held for the Fund's accounts.

13. Line of Credit Arrangements

The Fund maintains a committed, secured line of credit with JPMorgan Chase Bank, N.A. ("JPM"). The facility has the following terms: (a) interest rate of three-month LIBOR plus 1.75%, (b) commitment fee of 0.70% per annum, and (c) a committed amount of US\$310,000,000. The Custodian holds cash and the investments in private investment funds of the Fund under a general lien as collateral for the line of credit. As of 31 December 2013, the Fund had a line outstanding of US\$169,100,000, and three-month LIBOR plus 1.75% was equal to 2.00%.

There is no guarantee that the Fund's borrowing or other arrangements for obtaining leverage will continue to be available or available on terms and conditions acceptable to the Fund. Unfavorable economic conditions could also increase funding costs, limit access to the capital markets or result in a decision by lenders not to extend credit to the Fund.

14. Financial Highlights

Per unit realized and unrealized gain and net investment income/(loss) has been determined on the basis of the weighted average number of units outstanding during the period. The total return in the following table is calculated for a shareholder who was invested in the Fund for the entire year. The ratios to average net assets are calculated for all shareholders as a group for the same period. The ratios were not annualized for the share classes with periods of less than one year. The ratios do not reflect the Fund's proportionate share of income and expenses of the underlying private investment funds. The actual results for individual shareholders may vary from these returns based on participation in new issues, timing of capital transactions, expenses and share class specific income/expenses relating to foreign currency shareholders.

⁽¹⁾ Class L was issued on 1 February 2013.

15. Subsequent Events

Subsequent events have been evaluated for events that occurred after the balance sheet date through 26 March 2014, the date the financial statements are available for issuance.

Effective 1 January 2014 and through 26 March 2014, the Fund recorded capital subscriptions of US\$30,956,000 from shareholders of which US\$12,956,000 was received prior to 31 December, 2013. The Fund anticipates redemptions of approximately US\$70,906,330 as of 31 March 2014.

Please see the attached Accountant's Opinion for the Schedule of Assets Held.
