DEFINED BENEFIT PENSION PLAN
for the Employees' of
VOCATIONAL GUIDANCE SERVICES
Notes to Financial Statements

(1) DESCRIPTION OF PLAN

The following brief description of the Defined Benefit Pension Plan of Vocational Guidance Services is provided for general information purposes only. Participants should refer to the Plan agreement for more complete information.

a.) General -

The Plan is a defined benefit pension plan covering substantially all salaried employees of Vocational Guidance Services (Agency). It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

b.) Pension Benefits -

Any employee who was a participant prior to July 1, 1997 shall continue to participate. Any eligible employee who was hired prior to July 1, 1997 who has both attained the age of 21 and completed two years of service participated starting on the date they satisfied such requirements. Each other employee participates on the date they have both obtained age 21 and completed one year of service. No new participants are permitted after March 19, 2010.

During 2010, the Plan was amended to reflect the following changes in coverage and benefits:

- a. Effective March 19, 2010, this Plan was frozen and no eligible employee shall become a participant after that date.
- b. With respect to highly compensated employees only, all benefit accruals ceased as of December 31, 2009.
- c. With respect to highly compensated employees only, no future periods of service will be earned for benefit accrual purposes after December 31, 2009.
- d. With respect to highly compensated employees only, average monthly compensation shall take into account monthly compensation earned through the earlier of the participant's termination of employment, or December 31, 2009.

The accrued benefit is equal to a monthly life annuity starting at age 65 equal to the greater of (1) the frozen accrued benefit and (2) 1.5% of the average monthly compensation times the participant's credited service at normal retirement plus 0.5% of the average monthly compensation in excess of the social security covered compensation multiplied by the participant's credited service (up to 25 years) at normal retirement with the resulting sum multiplied by a fraction whose numerator is the participant's credited service at termination and whose denominator is the participant's credited service at normal retirement. This amount was frozen for all Officers of the plan as of December 31, 2009 and for all other participant's as of December 31, 2010.

c.) Death and Disability Benefits -

The spouse of an active participant will receive a benefit equal to 66-2/3% of the vested accrued benefit reduced for early commencement and reduced to reflect payment as a Joint and 66-2/3% Survivor Annuity with 10 years certain.

(2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

a.) Basis of Accounting -

The accompanying financial statements are prepared on the accrual basis of accounting.

b.) Estimates -

The preparation of financial statements in conformity with generally accepted accounting principles requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

c.) Investment Valuation and Income Recognition -

Quoted market prices are used to value investments. Many factors are considered in arriving at that fair market value. In general, however, corporate bonds are valued based upon yields currently available on comparable securities of issuers with similar credit ratings. All investments are managed by PNC Bank which has determined all market values. Purchases and sales of securities are recorded on a trade-date basis. Interest and dividend income is recorded as paid. Market value reflects any earned but unpaid interest or dividends.

d.) Actuarial Present Value of Accumulated Plan Benefits -

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' compensation during the highest 3-year average of credited service. The accumulated plan benefits for active employees are based on their highest 3-year average of credited service as of the valuation date. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from Plan assets are excluded from accumulated plan benefits.

The actuarial present value of accumulated plan benefits is determined by an actuary from Findley Davies, Inc. and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations as of December 31, 2012 were (a) life expectancy of participants (the 1983 Group Annuity Mortality Table was used), (b) retirement age assumptions (the assumed average retirement age was 65), and (c) investment return (7.0%). The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Credited service is the continuous service while both a participant and a employee in a position covered by the plan. No Officer of the plan shall accrue additional credited service after January 1, 2010. This amount was frozen as of December 31, 2010 for all other participants.

e.) Payment of Benefits -

Benefit payments to participants are recorded upon distribution.

f.) Plan Administration -

Certain administrative functions are performed by Officers or employees of the Company. No such Officers or employees receive compensation from the Plan. Generally, administrative expenses, other than those paid to the actuary, investment advisor, and investment custodian, are paid directly by the Company.

g.) Date of Management Review -

Subsequent events were evaluated through June 18, 2014, which is the date the financial statements were available to be issued.

(3) FUNDING POLICY:

The Agency's funding policy is to make annual contributions to the Plan in amounts deemed necessary so that all employee's benefits will be fully provided for by the time they retire.

Although it has not expressed any intention to do so, the Agency has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

(4) FAIR VALUE MEASUREMENTS:

The Plan has adopted the provisions of ASC 820, *Fair Value Measurements and Disclosure*, which defines fair values as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date and establishes a framework for measuring fair values. The pronouncement establishes a three-level hierarchy for fair value measurements based on the transparency of inputs to the valuation of an asset or liability as of the measurement date. It also expands disclosures about instruments measured at fair value which includes the disclosure of the three levels of inputs that may be used to measure fair value. These include:

- Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the plan has the ability to access.
- Level 2 Inputs to the valuation methodology include:
 - Quoted prices for similar assets or liabilities in active markets;
 - Quoted prices for identical or similar assets or liabilities in inactive markets;
 - Inputs other than quoted prices that are observable for the asset or liability;
 - Inputs that are derived principally from or corroborated by observable market data by correlation or other means.If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.
- Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value.

Mutual Funds

Valued at the net asset value of the shares held in the plan at year end.

U.S. Government securities, Corporate bonds and debentures, Money market funds

Valued at the closing price reported on the active market on which the individual securities are traded

(6) PLAN TERMINATION:

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- a. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
- b. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations (discussed below).
- c. All other vested benefits (that is, vested benefits not insured by the PBGC).
- d. All non-vested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that PBGC guarantees. For Plan terminations occurring during 2014, that ceiling is \$4,943.18 per month at age 65. The ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than single-life life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations, and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by PBGC.

(7) TAX STATUS:

The Internal Revenue Service has determined and informed the Agency by a letter dated December 30, 1988, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has most recently been amended January 1, 2010 subsequent to receiving the original determination letter. However, the Plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require the plan administrator to evaluate tax positions taken by the Plan and recognize a tax liability for any uncertain position that more likely than not be sustained upon examination by the IRS. The Plan is subject to routine audits by tax authorities; however, there is currently no audits for any tax periods in progress. The Plan administrator believes the Plan is no longer subject to income tax examinations for years prior to 2009.

(8) RISKS AND UNCERTAINTIES:

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

APPENDIX B (Continued)

<i>Assumptions Made In Valuing Spouse's Benefit</i>	Eighty percent of the employees included in the valuation are assumed to be married. These percentages are used as the probabilities that survivor benefits will be payable due to preretirement deaths. The wife is assumed to be three years younger than the husband.
<i>Optional Form Election</i>	90% of employees are assumed to elect a lump sum distribution and 10% of employees are assumed to elect the life annuity benefit.
<i>Annual Increases to Maximum Benefits and Plan Compensation Limits</i>	N/A
<i>Annual Increases to Social Security</i>	N/A
<i>Provision for Expenses</i>	The expected administrative (i.e. non-investment) expenses that will be paid from plan assets, which were assumed to equal actual expenses during the prior year, were included in the Target Normal Cost for minimum contribution purposes.
<i>Standing Elections</i>	The sponsor has not signed an election that provides for the automatic use of the Carryover and/or Prefunding Balance if necessary at the end of the plan year to meet the minimum funding requirement.
<i>HATFA Elections</i>	The HATFA segment rates have been used for minimum funding purposes but not for the calculation of the AFTAP.
<i>Asset Method</i>	Funding: Market Value of Assets plus interest adjusted accrued but unpaid contributions as of the valuation date plus an adjustment to defer full recognition of investment losses and gains over a two-year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the interest rate above, but no greater than the third segment rate for the plan year, minus the end of the year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions). Note that due to the regulatory constraint on the interest rate, a characteristic of this asset valuation method is that, over time, it may be more likely to produce an actuarial value of assets that is less than the market value of assets.
