Each participating employee elects to enter into a telephonic or electronic agreement with the Plan Sponsor, thereby contributing to his or her account a percentage of eligible compensation. Employee contributions are made before tax and after tax, if applicable. The participants designate a percentage between 1% and 25% of their annual eligible compensation as an elective contribution rate (subject to IRC limitations of \$17,500 and \$17,000 in 2013 and 2012, respectively). Certain highly compensated employees are limited to a maximum contribution of 13% of eligible compensation.

The Plan allows employees age 50 and older during the calendar year to elect to make up to an additional \$5,500 catch-up contribution during both 2013 and 2012. Catch-up contribution amounts are not eligible for Company matching contributions.

(d) Participant Account Balances

Participant contributions are credited to accounts established for each participant and, along with related investment gains and losses, are fully vested and nonforfeitable.

Contributions by the Company (if any) are credited to a participant's match account and, along with related investment gains and losses, become vested based upon a participant's years of service with the Company or upon reaching the normal retirement date, whichever is earlier. Except as otherwise provided in the relevant adoption agreement, the normal retirement date is the date upon which the participant reaches age 65. Participants vest in their match account as specified in their applicable adoption agreement.

Forfeitures represent the nonvested portion of Company matching contributions plus earnings thereon, which are not distributable to participants who terminate employment before they are 100% vested. Forfeitures are either applied to the payment of expenses incurred by the Plan Administrator in connection with administering the Plan or used to reduce future employer contributions. Forfeited nonvested amounts during 2013 and 2012 totaled \$67,785 and \$24,886, respectively.

(e) Funds

The Plan provides for the establishment of investment funds, which are administered within the Nestlé in the USA Savings Trust (Master Trust) (see note 5). The Master Trust was established by the Company for the pooled investment of assets. The Master Trust investments, investment returns, and plan expenses are allocated to participating plans, based on the underlying equity in each plan. The Company has the sole discretion to determine or change the number and nature of investment funds. On July 2, 2012, the Company implemented a new investment fund menu that streamlined the prior investment fund menu and replaced the risk-based Pre-set Portfolios with a series of Target Date Funds. The funds established under the Plan as of December 31, 2013, are as follows:

- The Conservative Income Fund, which is invested in bonds and real estate, with insurance contracts that “wrap” the bond and real estate investments (see note 3)
- The US Bond Fund, which is primarily invested in a balanced mix of government securities, mortgage-backed securities, and corporate bonds
- The Real Asset Fund, which is primarily invested in inflation-sensitive asset classes

Notes to Financial Statements

December 31, 2013 and 2012

- The US Stock Fund, which is primarily invested in stocks of companies contained in the S&P 500 index
- The International Stock Fund, which is primarily invested in stocks of non-U.S. companies
- The US Small Company Stock Fund, which is primarily invested in stocks of smaller U.S. companies
- Target Date Funds, a series of portfolios that consist of a custom mix of assets (equity, fixed income, commodity, real estate, and cash and cash alternatives) that gradually become more conservative over time
- The Mutual Fund Window, which is an investment offering of retail mutual funds

Participants specify the desired allocation of their contributions (including the related Company matching contributions, if any) to the Funds (excluding the Mutual Fund Window which requires a transfer from the Core Funds or Target Date Funds) noted above. The allocation percentages are limited to increments of 1% and may be changed daily. To the extent participants fail to direct the investment of amounts credited to their accounts, such amounts were invested in a Target Date Fund selected based on their date of birth on record in the Nestlé HR system and an assumed retirement age of 62.

(f) Distributions and Withdrawals

Distributions are due to a participant's retirement, death, total and permanent disability, or termination of employment, subject to conditions stated in the Plan. A terminated participant may elect to receive his or her distribution as a single lump-sum payment or as a partial distribution.

If a terminated participant's vested account balance is \$5,000 or less but greater than \$1,000 and he or she did not timely elect to receive his or her distribution in cash or directly roll over his or her distribution to an IRA or eligible retirement plan, the account balance will be transferred from the Plan to an ING Employer's Rollover IRA. If a participant's vested account balance is \$1,000 or less and he or she does not timely elect to roll over his or her distribution to an IRA or eligible retirement plan, he or she will automatically receive his or her total vested account balance as a single lump-sum payment.

The Plan also provides for nonhardship withdrawals, grandfathered withdrawals (if a participant was in a predecessor plan that contained the right to make certain nonhardship withdrawals under that plan), and hardship withdrawals, which are subject to conditions stated in the Plan.

(g) Loans

Loans of up to the lesser of 50% of a participant's vested account value or \$50,000 (less the highest outstanding loan balance in the past 12 months) may be obtained from the Plan. All loans are subject to the terms and conditions prescribed by the Plan Administrator in accordance with the agreements for each participating company. Principal and interest amounts repaid are invested based upon the participants' current investment elections. Loans to participants are recorded as an asset in the Loan Fund upon transfer from the appropriate investment funds. Interest rates on the loans vary between 4.25% and 10.50% with various maturity dates between 2014 and 2028. Participant loans are valued at amortized cost.

(h) Administrative Costs

All costs of administering the Plan are paid by the Company or the Plan, as determined by the Company, subject to limitations under ERISA. Expenses are allocated to the Plan based on its underlying interest in the Master Trust at the time the expense is incurred.

(i) Plan-to-Plan Transfers

Participant accounts may be transferred between plans within the Master Trust. The plan for which the participant's account will be transferred to or from is based on the participating company to which the participant is relocating.

(2) Summary of Significant Accounting Policies

(a) Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting in accordance with U.S. generally accepted accounting principles.

(b) Fully Benefit-Responsive Investment Contracts

Investment contracts held by a defined contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan. The statement of net assets available for benefits presents the fair value of the investment contracts as well as the adjustment of the fully benefit-responsive investment contracts from fair value to contract value. The statement of changes in net assets available for plan benefits is prepared on a contract value basis for the fully benefit-responsive investment contracts.

(c) Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and changes therein, and to disclose contingent assets and liabilities. Actual results could differ from these estimates.

(d) Payment of Benefits

Payments to participants are recorded upon distribution of assets from the Plan.

(e) Valuation of Investments

Plan assets are held in the Master Trust, which is maintained by the State Street Bank and Trust Company (SSB), as trustee. The Master Trust investments are stated at fair value. The Master Trust investments, investment returns, and plan expenses are allocated to participating plans based on the underlying equity of each plan in each investment fund administered through the Master Trust. All allocations are participant-directed.

Purchase and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) in fair value of investments represents both realized and unrealized gains and losses. Refer to note 8, *Fair Value Measurements*, for further information related to the valuation of Master Trust investments.

(f) Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for plan benefits.

(3) Guaranteed Investment Contracts (GICs)

The Master Trust holds fully benefit-responsive investment contracts, specifically synthetic investment contracts and separate account investment contracts (GICs), through the Conservative Income Fund with various third parties (i.e., insurance companies and banks). A synthetic GIC provides for a fixed return on principal over a specified period of time through wrapper contracts issued by a third party, which are backed by underlying assets owned by the Plan. A separate account GIC also provides for a fixed return but the GIC contract is backed by investments that are technically owned by the insurance company. However, these assets are held in a separate account allocated for the benefit of participants, they are not part of the insurance company's general account, and are expected to be insulated from claims should there be an insolvency. All investment contracts are reset quarterly. The benefit-responsive investment contracts purchased by the fund are designed to pay all participant-initiated transactions at contract value.

Contract value represents contributions made to the investment contracts, plus earnings (losses), less participant withdrawals and administrative expenses. Fair value of the GICs generally equals the quoted market price of the underlying assets on the last business day of the plan year. The fair value of the benefit-responsive investment contract for the GIC is determined using a discounted cash flow model, which considers recent rebids, as determined by recognized dealers, and the duration of the underlying portfolio.

The fair value of the benefit-responsive contracts and GICs, as well as the adjustment from fair value to contract value, was allocated to the Plan based upon the Plan's underlying share of the Conservative Income Fund as of December 31, 2013 and 2012.

There are no reserves against contract value for credit risk of the contract issuer or otherwise. The average crediting interest rates for the years ended December 31, 2013 and 2012, were 2.45% and 3.24%, respectively, with the range of interest rates varying from 1.38% to 3.64% in 2013 and 3.12% to 3.38% in 2012. The crediting interest rate is based on a formula agreed upon with the issuer, but may not be less than zero.

Notes to Financial Statements

December 31, 2013 and 2012

Certain events, such as layoffs or early retirement incentives, may limit the ability of participants to access their investments at contract value. The Company believes that the likelihood of such events is not probable. There are certain scenarios in which the contract issuers may terminate the GICs and settle at an amount different from the contract value. The Plan may experience losses if the issuer becomes insolvent and cannot pay their liabilities. If the Plan is unable to find a replacement contract, and the market value of the Plan's asset pool is below contract value, there could be losses. The Plan has multiple issuers in place in order to minimize the exposure to this risk. Also, the issuer can terminate the contract if the Master Trust fails to meet the terms of the contract.

(4) Plan Termination

Although it has not expressed any intent to do so, the Company has the right under the Plan to alter, suspend, or terminate the Plan subject to the provisions of ERISA. In the event of plan termination, all amounts credited to participants' accounts would become fully vested and nonforfeitable. In addition, a complete distribution of the Plan's assets would be made to participants after payment of administrative and termination expenses.

(5) Investment in Master Trust

The Plan's proportionate interest in the investments held by the trustee is approximately 5% at December 31, 2013 and 2012. The following is financial information with respect to the Master Trust (excluding participant loans) that has been certified by the trustee as complete and accurate (refer to note 6):

(7) Parties in Interest

During 2013 and 2012, Nestlé in the USA Savings Trust had parties in interest that included Plan Sponsor, trustee, record-keeper, and investment advisory, legal, and administrative service providers. The fees paid by the Plan to these parties in interest were \$362,594 during 2013.

(8) Fair Value Measurements

The Plan has adopted the guidance in Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures*, which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The fair value framework requires the categorization of assets and liabilities into three levels based upon the assumptions (inputs) used to price the assets or liabilities. Level 1 provides the most reliable measure of fair value, whereas Level 3 generally requires significant judgment. The three levels are defined as follows:

- Level 1 – Assets or liabilities that are valued based on quoted prices in active markets that are accessible at measurement date
- Level 2 – Assets and liabilities that are valued based upon inputs, other than those included in level 1; based on quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in inactive markets, or financial instruments for which all significant inputs are observable, either directly or indirectly
- Level 3 – Assets or liabilities that are based on unobservable inputs, including the reporting entity's own analysis of the underlying economic data that market participants would factor into the pricing of the asset or liability

The valuation methodologies utilized by the Master Trust for the above investments as of December 31, 2013 and 2012, are as follows:

- (a) Investments in fully benefit-responsive investment contracts are presented at fair value, and are adjusted to contract value in accordance with the ASC 962 (note 2(b)). The insurance contracts are backed primarily by fixed income investments that are valued on a market basis. Certain fixed income pricing is on a bid evaluation basis. Institutional bid evaluations are estimated prices. Pricing vendors use models, which are generally proprietary, to arrive at the estimated prices. These prices represent the price a dealer would pay for a security. Model inputs vary depending on the type of security, but typically include trade data, institutional bids, comparable trades, dealer quotes, and news media. Market data is provided by multiple independent sources, including primary and secondary dealers, portfolio managers, and research analysts.

- (b) Investment in real estate funds are based on the net asset values (NAVs) reported to the Company and trustee on a periodic basis by the general partners of the fund. These NAVs are based on fair value of the underlying portfolio investments held by the real estate fund. These fair values are valued at appraised values plus undistributed rental and interest income. Management has used the NAV as a practical expedient to estimate fair value of the real estate fund. All real estate investments are currently in liquidation status. There are no gates or lock-ups that would substantially impact the liquidity of the Conservative Income Fund. Redemptions occur at fair value, which is based on the most recent NAV prior to the redemption. The Company currently has no intention of selling any of these investments at an amount other than the NAV. The Company has no minimum capital commitments as of December 31, 2013.
- (c) Registered investment companies (i.e., mutual funds) are exchange traded and valued at quoted market prices. Other investments comprised cash operating accounts.
- (d) These common/collective trusts and cash equivalents are valued based on the NAV of the fund as determined by the investment manager based on quoted and/or industry market prices. The NAV is the market value of all of the securities owned by a fund, minus its total liabilities divided by the number of shares issued. These funds held in the trust can be redeemed on a daily basis with no redemption restrictions.
- (e) Fixed income is valued based on investment manager or industry pricing services. Certain fixed income pricing is on a bid-evaluation basis. Institutional bid evaluations are estimated prices. Pricing vendors use models, which are generally proprietary, to arrive at the estimated prices. These prices represent the price a dealer would pay for a security. Model inputs vary depending on the type of security, but typically include trade data, institutional bids, comparable trades, dealer quotes, and news media. Market data is provided by multiple independent sources, including primary and secondary dealers, portfolio managers and research analysts.
- (f) This common/collective trust is valued based on the NAV of the fund as determined by the investment manager. The valuation is based on the NAVs of its underlying funds, which comprise direct real estate investments and exchange traded REITs. The NAV is the market value of all the investments owned by the fund minus its total liabilities divided by the number of shares issued. This fund is valued daily, and can be redeemed on a monthly basis with no redemption restrictions.

A summary of changes in the fair value of Level 3 assets for the years ended December 31, 2013 and 2012, are as follows:

	<u>Level 3 assets</u> <u>Real estate</u> <u>only</u>
Nestlé in the USA Savings Trust Assets:	
Insurance contracts:	
Fair value of investments at December 31, 2011	\$ 6,040,968

Sales	<u>(2,364,000)</u>
Fair value of investments at December 31, 2013	<u>\$ 2,737,098</u>

Starting in 2011 and continuing in 2013, the Plan has either sold or is in the process of liquidating all real estate investments within the Conservative Income Fund, as well as adopted more conservative fixed income investment guidelines. The significance of transfers between levels was evaluated based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. For the years ended December 31, 2013 and 2012, there were no transfers between Levels 1, 2, or 3.

(9) Tax Status

The Internal Revenue Service (IRS) has determined and informed the Company by a letter dated July 11, 2003, and updated on November 15, 2012, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter; however, the Plan Administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC and Economic Growth and Tax Relief Reconciliation Act (EGTRRA).

U.S. generally accepted accounting principles require the Plan Administrator to evaluate tax positions taken by the Plan. The financial statement effects are recognized when the Plan has taken an uncertain position that more likely than not would be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2013, there are no uncertain tax positions taken or expected to be taken. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan Administrator believes the Plan is no longer subject to income tax examinations for years prior to 2010.

In May 2014, the Plan concluded the Department of Labor audit satisfactorily.
